- (29) The lessee shall not interfere with the timber on any of the land leased which is within a State forest, timber reserve or flora reserve unless authorisation has been obtained under the provisions of the Forestry Act 1916 and shall not prevent any person or persons duly authorised in that behalf from taking timber on the land leased. PESTICIDES REGULATION 2009

Sydney Catchment Authority

PESTICIDE USE NOTIFICATION PLAN

January 2012

1. INTRODUCTION

This pesticide use notification plan has been prepared in accordance with the requirements of the Pesticides Regulation 2009 (the Regulation). The plan sets out how Sydney Catchment Authority (SCA) will notify members of the community of pesticide applications it makes or allows to be made to public places that it owns or controls.

The aim of this plan is to meet the community's general right to know about pesticide applications made to outdoor public places. The plan allows members of the community to take action to avoid contact with pesticides, if they wish.

The SCA ensures that pesticides are applied to public places in a safe, responsible manner, minimising harm to the community and the environment.

The plan sets out how the SCA will notify members of the community of pesticide applications made by the SCA to public places.

The plan describes:

- What public places are covered by the plan
- Who regularly uses these public places and an estimate of the level of use
- How and when SCA will provide the community with information (notification arrangements) about its pesticide applications in public places
- How the community can access this plan and get more information about SCA notification arrangements
- How future reviews will be conducted
- Contact details for anyone wishing to discuss this plan with the SCA.

SCA uses pesticides in public places when necessary to eliminate weeds, insects / invertebrate and vertebrate pests, to protect public property from pest damage and to protect the users of public places from nuisance or danger.

SCA pesticide use consists of applying herbicides for weed control, insecticides for insect control and the use of baits to manage vertebrate pests. The applications of herbicide and baiting for vertebrate pests aims to be consistent with contemporary standards, cost effective and have minimal impact on the environment.

SCA also uses pesticides on lands that are not public places and therefore no public access is permitted, such as schedule 1 Special Areas, Controlled lands, SCA owned or leased lands. On these lands the SCA does not propose to provide notification of pesticides use.

Further information on SCA pesticide use can be obtained by contacting the SCA on 1300 722 468 or by visiting the website www.sca.nsw.gov.au.

2. PUBLIC PLACES COVERED BY THIS PLAN

The SCA proposes to use or allow the use of pesticides in outdoor public places that it owns or controls within the SCA area of operation.

The estimate of the level of community use, regular user groups, types of pesticide use and level of notification in each category of public places is summarised in the following table.

| <i>Public place category</i> | <i>Regular user groups</i> | <i>Level of use of public place</i> | <i>Type of pesticide use</i> | <i>Type of Notification</i> |

3. NOTIFICATION ARRANGEMENTS

This section of the plan describes how and when the SCA will provide notice for pesticide use, arrangements for emergency pesticide applications, arrangements governing pesticide use by contractors and pesticide uses for which notice will not be given.

These notification requirements are based on the SCA consideration of the following:

- Level of usage of public places where pesticides are to be used.
- Extent to which activities generally undertaken in these areas could lead to some direct contact with pesticides.
- Type of pesticide to be used.

Notice of pesticide use will be provided in one or more of the following methods:

- Signs displayed at entrances to a public place
- Information on the SCA website (which will describe programs, reactive and emergency pesticide use in public areas)
- Advertisements in a state and local newspapers
- Letterbox drops to residents
- Door knocking
- Individual notification to anyone who has requested such notice
- Other means if required by pesticides labels, Pesticide Control Orders and/or off label permits.

(a) Outdoor recreational facilities

The notification arrangements described below will apply to the following public place categories owned or controlled by the SCA within its area of operation:

- Picnic areas
- Playgrounds

- Landscaped areas
- Carparks
- Laneways and pathways
- Camping areas
- Water body, lake surface or foreshores

In addition to the general notification arrangements as stated above information on the forward programme for pesticide use will be posted on the SCA website every 4 months if future scheduled works are planned for public areas. Signs will be provided notifying the general community near the main entrance to the facilities during the application of pesticides (or longer where required by a pesticide control order, pesticide label or permit) for the following pesticide uses:

- Broad scale selective herbicides (high volume spraying)
- Broad scale non selective herbicides (high volume spraying)
- Spot spraying of herbicides (knap sack sprayers)

Herbicides will be used during periods of low occupancy and will not be programmed for use on weekends or public holidays (unless in an emergency).

For the control of vertebrate pests using 1080 baits the conditions of any relevant product label, permit or pesticide control order will be followed i.e. distance restrictions, public notification and warning signage will be implemented as per legislated requirements. Information on the notification requirements for the use of 1080 baits can be found on the DECC website at: www.environment.nsw.gov.au/pesticides/pco.htm.

For parties who register interest with SCA, prior notice by mail or letterbox drop will be provided at least 5 working days beforehand.

(b) Schedule 2 lands (including water body / lake surface)

The SCA owns schedule 2 land that is open for public uses such as camping, bushwalking, picnicking, canoeing and fishing. Notification arrangements will be consistent with those detailed previously.

Notification for Schedule 2 lands managed by other agencies will be detailed in that agencies pesticides notification plan.

(c) Special measures for sensitive places

Clause 11J (1) of the Pesticides Regulation defines a sensitive place to be any:

- school or pre-school
- kindergarten
- childcare centre
- hospital
- community health centre
- nursing home
- place declared to be a sensitive place by the Environment Protection Authority (now a part of the Department of Environment and Climate Change).

There are no sensitive places in the SCA Special Areas or Controlled lands. For sensitive places adjacent to SCA lands the SCA will provide notification by mail and/or letterbox drop 5 working days prior to pesticide use, and will undertake works in times of low risk.

(d) Notification of emergency pesticide applications

In cases where emergency pesticide applications in public places are required to deal with biting or dangerous pests such as wasps, bees, venomous spiders, fleas, bird mites or rodents (that pose an immediate health hazard) and for noxious aquatic weed control, the SCA will, where possible, provide notice by posting signs nearby at the time of the application and provide a bulletin on its website.

In cases where the SCA is required to undertake emergency 1080 baiting, the conditions as stipulated in the approved Pesticide Control Order for feral pig, wild dog or fox will be followed. The SCA where possible will provide notification via signs in the immediate area and a bulletin on the website.

(e) Pesticide contractors

Where the SCA uses contractors to apply pesticides on its behalf, the SCA will ensure that notification is made in accordance with the notification requirements of this plan.

(f) Public places and pesticide uses where no notice will be provided

The SCA uses small quantities of some pesticides that are widely available in retail outlets and ordinarily used for domestic purposes. The SCA does not propose to provide notice for such pesticide applications other than by way of this plan. This will apply to spot weed control using less than 20 litres of ready mixed glyphosate applied by hand held applicator; minor control of indoor and outdoor insect pests using baits or aerosol spray cans.

The SCA will not provide notice of herbicide use on access roads to dams, pathways and verges leading to designated picnic grounds where they are not open for public access.

4. WHAT INFORMATION WILL BE PROVIDED

In accordance with clause 11L (2) (g) of the Pesticides Regulation, notice of pesticides uses will include the following information:

- the full product name of the pesticide to be used, and
- the purpose of the use, clearly setting out what pest or pests are being treated, and
- the proposed date/s or date range of the pesticide use, and
- the places where the pesticide is to be used, and
- contact telephone number of the SCA officer who can be contacted to discuss the notice, and
- any warnings regarding re-entry to or use of the place, if specified on the pesticide product label or the APVMA permit.

Signs will be of a standardised design that will be easily recognised by the public and workers.

The SCA website will have a dedicated area where the pesticide notifications will be posted. The SCA website address will be publicised in SCA advertisements associated with notification arrangements.

5. HOW THE COMMUNITY WILL BE INFORMED OF THIS PLAN

The SCA will advise the community of this plan and its contents by:

- making a copy of the plan available for viewing, free of charge, at its head office at Level 4, 2–6 Station Street, Penrith
- placing a copy of the plan on the SCA website
- placing a notice in the *Sydney Morning Herald*
- placing a notice in selected local newspapers
- placing a notice in the *NSW Government Gazette*

SEWERAGE SERVICE CHARGES

Residential Sewerage Charges

Single Residential Properties Including Residential Strata Properties and Company Title Dwellings

It is proposed to continue the current charging structure based on a service charge for each residential property. The proposed charge is \$463.44 for each single residential property/lot/dwelling. There is no usage charge for this category.

Metered Non-Residential Charges

Non-Residential customers are those that do not meet the classification as a single residential customer. These include non strata titled residential units and Retirement Villages. Council has adopted a pay for use charging policy for Non-Residential customers based upon a service charge and a usage charge.

Non-residential properties connected to the sewerage system will be levied a sewerage service charge based on meter size and a sewerage usage charge. Where the sum of these charges is less than the non-residential minimum sewerage charge, the non-residential minimum will be charged instead.

A discharge factor is applied to the charge based on the volume of water discharged into Council's sewerage system.

| <i>Meter Size (mm)</i> | <i>Meter Charge (\$)</i> |
|-------------------------------|---|
| 20 | \$166.96 x discharge factor |
| 25 | \$260.87 x discharge factor |

| Non-specified Pipe/Meter Size | $(\text{Meter Size})^2 \times \$166.96 / 400 \times \text{discharge factor.}$ |

Pricing for sewerage supply service and usage charges for each non-residential property type is as follows:

| <i>Property Type</i> | <i>Sewerage Service Charges</i> | <i>Sewerage Usage Charges</i> |
|---|--|---|
| Non-Residential Properties | | The usage charge is to be based on the estimated volume of metered water usage discharged into the Council's sewerage system. Metered water usage is to be multiplied by a discharge factor, based on the type of premises to estimate the volume of water discharged. The price for sewerage usage charges is proposed to be 83.00 cents per kilolitre. |
| Non-Residential Properties – Minimum Charge | The proposed minimum amount payable for a non-residential customer is \$463.44. | |
| Non-Residential Properties – Community Development Lots | The sewerage service charge for a community development lot is calculated by: the non-residential sewerage usage charge commensurate with meter size apportioned to the various lots in the community development lot in accordance with the schedule of unit entitlement. | The price for sewerage usage charges is proposed to be 83.00 cents per kilolitre. |

Liquid Trade Waste Charges

Liquid trade waste means all liquid waste other than sewage of domestic nature. A summary of the trade waste policy outlining the property classifications and charges is as follows:

- Classification A Low risk liquid trade waste. Is of low volume and/or strength and has standard non-complex pre-treatment requirements.
- Classification B Medium risk liquid trade waste (<20kL per day) with prescribed pre treatment requirements.
- Classification C High risk and large liquid trade waste dischargers which are not nominated as a Classification A or B discharger and/or involve a discharge volume of over 20 kl/day
- Classification S Acceptance of septic tank waste, pan waste and ship-to shore pump-outs into Council's sewerage system. Private pumping stations are included in Category S.

Pricing for Liquid Trade Waste discharges from the above classifications (excluding Classification S) is calculated based on the following three categories.

| <i>Liquid Trade Waste Discharge Category</i> | <i>Liquid Trade Waste Application Fee</i> | <i>Annual Trade Waste Fee</i> | <i>Re-inspection Fee</i> | <i>Liquid Trade Waste Usage Charge/kl</i> | <i>Excess Mass Charges/kg</i> | <i>Non-compliance Excess Mass Charges</i> |

The volume discharge to sewer is deemed to be low. Also included are Classification A or B activities with prescribed pre-treatment but low impact on the sewerage system. | Yes | Yes | Yes | No | No | No |
| <i>Category 2</i> Liquid Trade Waste Dischargers are those conducting an activity deemed by Council as requiring a prescribed type of liquid trade waste pre-treatment equipment and whose effluent is well characterised. | <i>Category 3</i> Liquid Trade Waste Dischargers are those conducting an activity which is of an industrial nature and/or which results in the discharge of large volumes (generally over 20kL/day) of liquid trade waste to the sewerage system. Any Category 1 or 2 discharger whose volume exceeds 20 kl/day becomes a Category 3 discharger. | Yes | Yes | Yes | No | Yes | Yes |
| <i>Category S</i> Liquid Trade Waste Discharges are those conducting an activity of transporting and/or discharging septic tank waste, pan waste and ship to shore pump-outs into the sewerage system. | Yes | Yes | Yes | No | No | No |
