Subject: RMS Registries at Ingleburn and Campbelltown

Dear Ms Deitz,

Thank you for your correspondence of 22nd June 2015 in which you have requested my support for Council's campaign to retain the RMS Registry Offices at Campbelltown and Ingleburn.

Further to receiving your correspondence, I have written to The Hon Duncan Gay MLC, Minister for Road, Maritime and Freight in support of your request to keep the RMS Registry Offices open.

Please be assured that as soon as I receive advice from the Minister, I will contact you again.

Yours Sincerely, Jai Rowell MP

Member for Wollondilly

Mr Jai Rowell MP Member for Wollondilly P O Box 1005 TAHMOOR NSW 2573

Dear Mr Rowell

RMS Registries at Ingleburn and Campbelltown

Council at its meeting of 9 June 2015 resolved to write to you requesting your support for Council's campaign to retain the RMS Registry Offices at Campbelltown and Ingleburn within the Campbelltown LGA, particularly as Campbelltown was recently declared a Regional City Centre.

Council is committed to working cooperatively with the NSW Government in promoting Campbelltown as a Regional City and along with the local community would greatly appreciate your support to retain these important State Government services within the Campbelltown LGA.

If you require any further information please contact the Director City Works, Wayne Rylands, on 4645 4636.

Yours sincerely

Deitz

Ms Lindy Deitz A/General Manager Campbelltown City Council PO Box 57 CAMPBELLTOWN NSW 2560

JUL30'15 08:05:05 RCVD

Dear Ms Deitz

Thank you for your correspondence to the Minister for Finance, Services & Property (and similarly to the Minister for Road and Freight of 22 June 2015) about the Ingleburn and Campbelltown motor registries. As this matter falls within Service NSW, the Minister has asked me to respond directly to you.

Service NSW is setting a new era in customer service delivery in NSW. Since July 2013 until July 2015, Service NSW has served more than 18 million customers across three channels – digital, phone and a network of one stop shops. Customers can access more than 800 transactions at Service NSW with at least 30 per cent of all transactions now being done via the digital channel – a number set to increase over the next decade.

In responding to the growing customer appetite for online services, Service NSW is working with key agencies such as Roads and Maritime Services' to improve the digital experience and make it easier for customers to transact online. When customers do have to see us face to face, we are designing a physical network of strategically placed one stop shops and other points of presence to enable customers to access, not just motor registry transactions, but a host of other government services all under the one roof.

As you would be aware, Service NSW has located a site in the Macarthur region in the growing area of Gregory Hills subject to council approval. The centre will be open for extended trading hours, have access to a wide range of transactions and will act as a major driver testing hub for the region. In fact it will be the largest heavy vehicle testing facility in the Sydney region. The Macarthur Service Centre is expected to attract more than 1,200 customers a day. We are confident the proposed service centre will be a major success with customers just as the centres in Liverpool, Wetherill Park, Blacktown and many more have been.

Service NSW is also exploring other points of presence that may be required in the Macarthur region. We will continue to keep staff, customers and the wider community, including the council, informed of our plans.

If you would like further information, you are welcome to contact Ms Shoshana Wall, Director Corporate Relations at Service NSW on (02) 8059 2211.

Yours sincerely,

Glenn King Chief Executive Officer 24.07.15

22June 2015

The Hon Dominic Perrottet MP Minister for Finance, Services and Property GPO Box 5341 SYDNEY NSW 2001

Dear Mr Perrottet

RMS Registries at Ingleburn and Campbelltown

Council at its meeting of 9 June 2015 resolved to write to you requesting that the NSW Government retain the RMS Registries currently located at Ingleburn and Campbelltown.

Council makes this request due to the NSW Government's recent declaration of Campbelltown/Macarthur as a Regional City Centre and the need to ensure that all regional level facilities remain in the City of Campbelltown, especially at locations where they can be easily accessed by public transport.

Council is committed to working cooperatively with the NSW Government in promoting Campbelltown as a Regional City and along with the local community would greatly appreciate your consideration to retain these important State Government services within the Campbelltown LGA.

If you require any further information please contact the Director City Works, Wayne Rylands, on 4645 4636.

Yours sincerely

PDeitz

Nil

Purpose

To provide Council with an update on the results of the 2015 Household Chemical CleanOut event.

History

Council, in partnership with the NSW Environment Protection Authority (EPA), hosts an annual Household Chemical CleanOut event. This event provides residents with the opportunity to drop off hazardous household items for safe disposal and recycling free of charge.

Report

The Household Chemical CleanOut event was held on 11 and 12 July 2015 at Council's Waste Depot at Junction Road, Leumeah. As in previous years, the collection and recycling of the chemicals dropped off by residents during the event was facilitated by ToxFree Solutions Limited, a contractor appointed by the EPA.

Council supported the event in several ways, the first of which was to coordinate the promotion of the event throughout the Campbelltown Local Government Area. This promotion included advertising in local newspapers, inclusion on Council's website, insertion of a flyer in Council's rates mail-out, inclusion in the winter edition of Compass and eNewsletters, radio advertising and advertisements on bus shelters.

Council was also responsible for coordinating the Traffic Management Plan required for the changed traffic conditions in place along Junction Road for the duration of the event. In this regard, two qualified traffic marshals were provided by Council to ensure compliance with the Traffic Management Plan during the event, and to monitor traffic flow into and out of the site. A Council Ranger was also provided to liaise with members of the public and ToxFree staff, and to resolve potential conflicts.

The 2015 event saw 1514 residents utilise the service (905 on Saturday and 609 on Sunday). A 34% increase from last year, this represents a record participation rate in the event's history in Campbelltown.

The outstanding attendance rate at this year's event can be attributed to Council's extensive advertising campaign. A survey conducted with participants indicated that the most popular means by which they became aware of the event were:

- Rates mail-out: 39.9% of participants
- Newspaper: 31.1% of participants
- Internet: 12.7% of participants.

Residents dropped of a total of 64,151 kilograms, an average of just over 42 kilograms per drop-off.

The most commonly dropped off products (by weight) included:

- Water-based paints (29.5%)
- Oil-based paints (17.4%)
- Oils (15.9%)
- Lead-acid batteries (12.4%)
- Gas cylinders (10.3%).

While the event was run in a most efficient manner, the unprecedented take-up rate by residents resulted in participants at times experiencing delays of up to 20 minutes, with traffic at times queuing up to the roundabout at Peter Meadows Road. With the Community Recycling Centre's (CRC) anticipated opening in the first quarter of 2016, it is hoped that such queuing will not occur again in the future, as residents will be able to drop their items off at the CRC all-year round, rather than at a one-off annual event.

Officer's Recommendation

That the information be noted.

Committee's Recommendation: (Kolkman/Lound)

That the Officer's Recommendation be adopted.

Draft Australian White Ibis Management Plan for Lake Mandurama, Ambarvale (contained within this report)

Purpose

To advise Council of the outcome of the public exhibition of the draft Australian White Ibis (AWI) Management Plan for Lake Mandurama, Ambarvale and to seek Council's adoption of the AWI Management Plan.

History

At its meeting held on 21 April 2015, Council considered a report on a draft AWI Management Plan for Lake Mandurama, Ambarvale and resolved:

- 1. That Council support the public exhibition of the draft Management Plan for Australian White Ibis at Lake Mandurama, Ambarvale.
- 2. That Council support the application for a Section 121 Occupier's Licence to Harm Fauna in New South Wales under the *National Parks and Wildlife Act 1974*.
- 3. That Council receive a further report on the exhibition of the draft Management Plan which also addresses funding options.

Report

Public Exhibition

The draft AWI Management Plan (the draft Plan) for Lake Mandurama, Ambarvale was placed on public exhibition for one month (from Tuesday 5 May 2015 until Friday 5 June 2015) at the following locations:

- Council's Civic Centre
- All Council libraries
- Council's website.

The exhibition of the Plan was advertised in the public notices section of the Campbelltown Advertiser and the Macarthur Chronicle. Details of the public exhibition were also mailed out to 121 residents who border Lake Mandurama directly and interested residents who enquired about the issue during the preparation of the plan.

Submissions Received

During the public exhibition period Council received three submissions from the community, each of the submissions commented on the increase in number of pest birds and decline of native bird species in the area and welcomed Council responding to the issue. The table below presents an overview of the issues raised in the submissions and how the plan addresses these concerns.

Issue Raised	Management Response as per Plan
AWI are observed removing rubbish from bins in the area making public spaces untidy	All bins within the reserve will be replaced with closed lid bins and the condition of the area will continue to be monitored
Concern about the removal of Willow (Salix spp) from Lake Mandurama Reserve	Some of the Willow may be removed from the area to discourage AWI from nesting at the site. The removal of Willow will be offset through revegetation with native canopy species less suited to roosting. The nesting habits of the AWI will continue to be monitored.
Reducing availability of nesting material from surrounding properties	Education will be undertaken with the surrounding residents, park users and community at large through the installation of signage, production of brochures and updating of Council's website

Licencing

Following the commencement of the public exhibition of the plan during June 2015, Council officers submitted an application to the NSW National Parks and Wildlife Service (NPWS) for an occupier's licence to harm fauna in NSW under Section 121 of the NSW National Parks and Wildlife Act 1974. The draft Plan was submitted as an attachment to the application (for consideration by NSW NPWS), providing details of how population management, community education and monitoring activities will be undertaken for consideration by NSW NPWS.

Council has since been advised that its application for a Section 121 Licence to harm fauna under the auspice of the draft AWI Management Plan Lake Mandurama, Ambarvale was successful.

Implementation

The draft Plan proposes management objectives and a range of actions for active management of the AWI population at Lake Mandurama Reserve, Ambarvale. Management actions proposed under the plan include:

- egg oiling during the breeding season and nest burning outside the breeding season to assist in managing the population humanly
- removing dead carcasses and undertaking nest burning to minimising fouls odours generated by AWI
- reduce AWI feeding opportunities by replacing all rubbish bins at the reserve with closed lid bins

- 2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama
- community education through the installation of signage, production of brochures and updating of Council's website
- environmental improvement through removal of exotic vegetation
- monitoring AWI impact, population size and the effectiveness of management actions.

It is envisaged that subject to Council's endorsement, implementation of the actions of the draft Plan will commence promptly to ensure appropriate issues are addressed prior to the AWI breeding season. Council will engage the services of a contractor to undertake on ground activities such as egg oiling and collection and disposal of carcasses under a separate licence held by the contractor.

AWI Management Plan Budget

In order to achieve the activities outlined within the draft Plan, Council will need to allocate sufficient funds towards its implementation. A large number of the actions listed within the draft Plan are already funded through Council's existing operational budget, such as the replacement of the bins at the reserve.

However, some actions will require additional funds, in this regard the amount of \$6,000 has been allocated for feral animal management in the 2015/16 budget. Funding requirements for the implementation of the plan will continue to be reviewed as the plan is delivered.

Conclusion

The draft AWI Management Plan Lake Mandurama, Ambarvale was placed on public exhibition for a period of one month. Three submissions from the community were received during the exhibition period. Council officers are of the view that the draft Plan, in its current form, adequately addresses the issues raised in the submissions and as such no changes to the publicly exhibited management plan are considered necessary.

The draft AWI Management Plan has been developed in consultation with various government agencies and organisations to determine the most effective actions to sufficiently manage the AWI population at the site. The prompt implementation of actions within the draft Plan, will ensure the impact of AWI on the community is reduced, whilst providing best value outcomes for Council and the environment.

The draft AWI Management Plan for Lake Mandurama Reserve, Ambarvale will be reviewed annually upon submission of the NPWS licence application to ensure that it remains relevant and appropriate in regards to best management practices, knowledge and understanding of the species.

Officer's Recommendation

That Council adopt the draft Australian White Ibis Management Plan for Lake Mandurama as attached to this report.

Committee's Recommendation: (Thompson/Lound)

That the Officer's Recommendation be adopted.

CARRIED

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

1. Executive Summary

The Australian White Ibis (AWI) is a common native avian species, it is therefore protected in New South Wales (NSW) under the NSW *National Parks and Wildlife Act 1974*. The eastern seaboard of Australia is considered an important refuge for AWI populations displaced from traditional inland breeding sites through years of drought and ecologically damaging water management practices.

During 2014 the AWI population at Lake Mandurama Reserve, Ambarvale significantly increased affecting the local environment, public amenity and prompting management action response from Council.

Council has developed this Management Plan for AWI at Lake Mandurama Reserve, Ambarvale to ensure that it is meeting legislative requirements for managing a native species in an urban area and to assist in managing:

- · AWI in the area in a strategic and sustainable way
- · conflict between AWI and the local community
- · impacts of AWI on the local environment.

This plan identifies the site management objectives and makes recommendations for active management of the AWI population at Lake Mandurama Reserve, Ambarvale. Management actions proposed under this plan include population reduction through egg oiling and nest burning, community education, environmental improvement through removal of exotic vegetation and monitoring to understand the AWI population, their impacts and the effectiveness of management actions.

This management plan is proposed to be implemented over the next three years at the conclusion of this time its need and appropriateness will be determined. In the interim it will be reviewed on an annual basis and/or when significant changes in legislation or management direction warrant a review.

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

2.Introduction

The AWI is distinguishable by its almost entirely white body plumage and black head and neck. The head is featherless with a long black down-curved bill around 16 centimetres in length. Adult birds have a tuft of cream plumes on the base of the neck. During the breeding season the skin on the under-surface of the wing changes from dull pink to dark scarlet. Young birds are similar to adults with slightly smaller, shorter bills.

In flight, flocks of AWI form distinctive V-shaped flight patterns. Breeding season usually occurs from June to February, with between one and three clutches per season. AWI nest in large colonies, often with the Straw-necked Ibis. Eggs incubate for 23 days on average.

The AWI can be observed in all but the driest habitats. Traditional breeding locations for this species were inland wetlands such as the Macquarie Marshes, however modifications to the hydrology of these wetlands over the last two decades have resulted in dramatic reductions in populations in these areas and populations have increased in the Eastern seaboard. Natural preferred habitats include swamps, lagoons, floodplains and grasslands, but it has also become a successful inhabitant of urban parks and gardens.

The AWI traditionally diet on both terrestrial and aquatic invertebrates, however they are increasingly feeding on human food waste. Many AWI populations have learnt to exploit human food waste in urban environments. As a result AWI are becoming more common in urban areas and less common in their natural habitat.

Figure 1. Adult AWI and juvenile in nest

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

3.AWI Management

Since 2004 AWI have expanded their roosting and nesting sites in the Sydney Region. The large number of AWI in urban areas has affected public amenity, aircraft safety, water quality and biodiversity, creating conflict with local communities and prompting the need for management of AWI in the Sydney Region.

During 2009/10 relevant government organisations including local Councils, NSW NPWS and the Centennial Parklands Trust formed an AWI Regional Task Force with the aim of developing a Sydney Regional Ibis Management Plan. This document is now in the form of a working draft plan awaiting adoption by the NSW Government.

The working draft Sydney Regional Ibis Management Plan categorises colonies of AWI into three different types based on their population size with corresponding different management strategies and licensing requirements applicable for each colony category (see Table 1).

As AWI are a native species a licence is required under the *National Parks and Wildlife Act* 1974 before any intervention can be undertaken. Where local government authorities, private organisations or landholders determine the need to manage breeding AWI colonies, a Section 121 Occupier's Licence to Harm Fauna in NSW must be obtained from NSW National Parks & Wildlife Service (NPWS). In addition a Section 120, General Licence must be obtained for anyone carrying out works resulting in harm.

For colonies of greater than 50 birds the landowner must also prepare a detailed site management plan.

Colony Category Population s		ze Management/licensing requirement		
Small colony	<50 individuals	 A Section 120 General Licence under the National Parks and Wildlife Act 1974 for persons harming protected fauna (for contractors undertaking works) A Section 121 Occupier's Licence under the National Parks and Wildlife Act 1974 for landholders, authorising works to be undertaken on specific lands 		
Medium-large colony	>50 individuals	A Section 120 General Licence under the		

Table 1. Licence requirements for AWI management

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

		 National Parks and Wildlife Act 1974 for persons harming protected fauna (for contractors undertaking works) A Section 121 Occupier's Licence under the National Parks and Wildlife Act 1974 for landholders, authorising works to be undertaken on specific lands Development of a Site Management Plan for the species
Refuge colony	Specific colonies determined by the NSW Government eg Lake Annan, Lake Gillawarna	 A Section 120 General Licence under the National Parks and Wildlife Act 1974 for persons harming protected fauna (for contractors undertaking works) A Section 121 Occupier's Licence under the National Parks and Wildlife Act 1974 for landholders, authorising works to be undertaken on specific lands Development of a Site Management Plan for the species, specifying that at least 50% of active nests will be left undisturbed during control activities.

The working draft Sydney Regional Ibis Management Plan recommends that a Sydney Region population of at least 6,500 AWI individuals be maintained. If the population falls below this number the management strategies for colonies will be reviewed.

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

4.AWI Distribution

4.1 AWI in South-Western Sydney

Within the South Western Sydney Region large AWI colonies are present at:

- Spring Farm ARRT Facility
- Lake Annan in Mt Annan, Camden.
- Lake Gillawarna, Georges Hall
- Eastern Creek ARRT facility, Eastern Creek.

As waste processing facilities close down or modify their practices the AWI move looking for sources of food and suitable habitat in different areas, thus establishing new colonies which commonly result in community and environmental conflicts.

4.2 AWI in Campbelltown

Within Campbelltown emerging colonies of AWI have been observed at Lake Mandurama Reserve, Ambarvale and Eagle Farm Reserve, Eagle Vale.

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

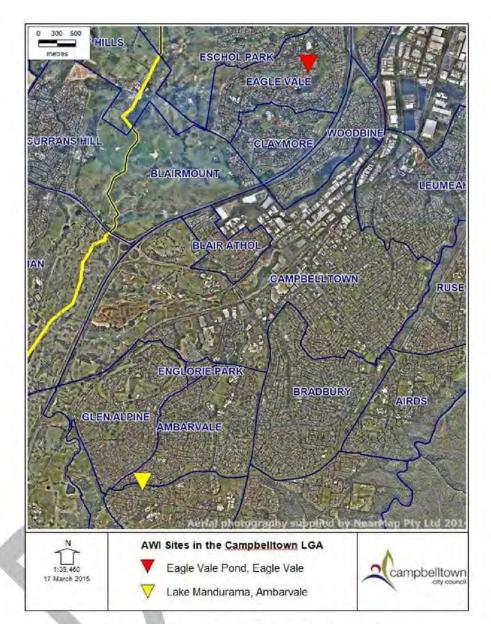

Figure 2. AWI sites in the Campbelltown LGA

AWI have been known to roost within Lake Mandurama Reserve, Ambarvale in small numbers alongside a range of other bird species over the past few years. Until 2014 there have been no recorded effects on the environment, surrounding residents and park users.

However during 2014 population numbers were observed to significantly increase, prompting concern from local residents and park users regarding the damage to vegetation in the area, the loud noises emanating from the nesting birds and the odours generated from concentrated fouling in nesting areas.

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

5.Site Description

This Management Plan applies to the area of Lake Mandurama and the surrounding reserve (Lot 1552 DP 709072). A map identifying the area covered by the Plan is provided in Figure 3 below. The area covered by the Plan encompasses 35,900m² and is herein referred to as Lake Mandurama Reserve.

Lake Mandurama Reserve is located in the suburb of Ambarvale approximately five kilometres from the Campbelltown CBD. The lake was constructed in or around the 1950s as a farm dam. In the early 1990s it was converted into water quality control pond, in-line with Spring Creek, to capture run-off from construction in the surrounding suburb. The lake is 1.5 hectares in size and contains a refuge island which is around 1000m² in area.

The lake is adjacent to a passive recreational space which is part of the reserve, which includes a small playground and park area. The site is in close proximity to residences and is bordered by, Cleopatra Drive, Crisparkle Drive, Haredale St, Darnay Place and Jasper Place.

Figure 3. Management area covered under this plan

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

6.Site Significance

6.1 Historical

The waterbody now known as Lake Mandurama was constructed in or around the 1950's to serve as a farm dam for Bishop's Farm (see Figure 4), which encompassed the area.

The suburb itself was named after the old Ambarvale farm which despite popular belief, actually stood on the other side of Appin Road where the suburb of St Helens Park is now. Still, as Ambarvale was one of the oldest property names to be used south of Campbelltown, the Council decided to apply to use the name and the Geographical Names Board approved it in 1976. It was March 1972, that the state government had first approved the farm land for urban development and, by the end of 1975, the first homes were under construction.

Figure 4. Lake Mandurama as a farm dam as pictured in aerial photography from 1956

In the early 1970's a series of three dams was established on the site and surrounds, in line with what is now called Spring Creek. Council's photography from 1972 shows three dam walls with the largest occurring adjacent to what is now known as Crisparkle Drive (see Figure 5).

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan - Lake Mandurama

Figure 5. The series of three dams in the area as pictured in aerial photography from 1972

In the early 1990's the lake was utilised to ameliorate impacts from construction of the surrounding suburb, to trap sediment and assist in protecting water quality of the creek and downstream river. The refuge island was installed at this time to provide a refuge for fauna and to add additional lake edge for macrophyte plants to assist in preventing erosion and to aid water purification.

6.2 Environmental

Lake Mandurama Reserve is home to a significant variety of plants and animals. Plant species found within the area include: She-Oak (*Casuarina Glauca*), Spiny Headed Mat Rush (*Lomandra longifolia*), Honey Myrtle (*Melalueca decora*), Sydney Green Wattle (*Acacia parramattensis*), Water Gum (*Tristaniopsis laurina*), various Eucalyptus spp as well as exotic species such as *Willow Spp* and African olive. Within the lake there are naturally occurring pockets of reeds (*Juncus, Baumea*) which provide ideal roosting habitat for birds. Additionally in 2013 Council constructed floating reed beds within the lake to assist in water filtration, species planted include: *Baumea articulate*, *Phragmites australis*, *Schoenoplectus validus*, *Eleocharis sphacelata*, *Cyperus exaltus* and *Carex appressa*.

In regard to fauna, the area is predominately populated by bird species, including: Black Swans (*Cygnus atratus*), Purple Swamp Hens (*Porphyrio porphyrio melanotus*), Masked Lapwing Plovers (*Vanellus miles*), Domestic Goose (*Anser anser domesticus* or *Anser cygnoides*), Australian Wood Duck (*Chenonetta jubata*) and Little Black Cormorants (*Phalacrocorax sulcirostris*).

The small refuge island within the lake is vegetated with a range of trees and shrubs and offers protection from predators to a range of birds particularly during breeding season for roosting. The

island was strategically placed at the inflow of the dam in a central location to disperse the flow of water and reduce short circuiting of the water movement around the lake.

The lake forms part of the highly modified headwaters of Spring Creek, it now serves as a stormwater quality improvement device for the surrounding catchment (60 hectares). Overflow water from the lake immediately proceeds downstream through two water quality improvement devices (one currently under construction), to a modified channel and ultimately to Spring Creek and the Georges River. Water quality monitoring is undertaken routinely within the lake and the results indicate that water quality within the lake is variable but is generally indicative of a small waterbody in an urban catchment.

6.3 Landscape

The site is surrounded by residential housing, suburban roads and a series of detention basins downstream. The natural soil at the site has been highly disturbed, particularly at the time the lake was constructed. Plantings on the refuge island are representative of the Ecological Community of River Flat Eucalyptus Forest, however noxious and exotic weed species have become established on the island also. The surrounding landscape of the site is open parkland with the dominant tree species of the areas bordering the lake being *Eucalyptus Spp* and *Casurina Glauca*. A small remnant of Cumberland Plain Woodland ecological community has been mapped approximately 180 metres upstream of the lake.

6.4 Aboriginal significance

Council is still awaiting confirmation of the aboriginal cultural and heritage significance of the site from the Tharrawal Aboriginal Land Council. As outlined previously, this area has been heavily developed for residential purposes and associated landscaping. However, it is not intended as part of this plan to disturb the soil. If in the future soil disturbance is required consultation and guidance will be sort from the NSW government.

A search of the OEH Aboriginal Heritage Information Management System was undertaken on Tuesday 10 March 2015, it was noted that no aboriginal sites or places were recorded or declared in or near Lake Mandurama Reserve, Ambarvale (Lot 1552 DP 709072).

6.5 Community and Recreation

Recreational use of the reserve is limited to the boardwalk and the perimeter of the lake for passive activities including walking, sitting, and bird watching. There is children's playground equipment within the reserve and a concrete path around the southern and eastern perimeter of the lake. Due to the relative inaccessibility of the refuge island from the mainland there is no recreation activity on the island. The area is predominately used by local residents within walking distance. Aspect depictions of the lake and reserve are provided in Figures 6 and 7.

Planning and Environment Committee Meeting 11 August 2015 Pag 2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

Figure 6 Lake Mandurama as pictured from Cleopatra Drive from wooden boardwalk

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan - Lake Mandurama

7. Site Issues

As stated previously, until 2013 AWI inhabited Lake Mandurama Reserve in small numbers (<10). Since 2013 this number has steadily increased, with counts of around 75 birds recorded on some occasions (see section 8 - Colony Composition).

A significant number of nests have been observed in the trees on the refuge island, particularly in *Willow spp*. AWI have also been observed on the mainland around the perimeter of the lake and in particular foraging through the bins at the reserve and on the floating reedbed, which has been decimated over the last 12 months.

AWI appear to be attracted to the area as it provides safe roosting opportunities, on the refuge island and the floating reed bed as well as ample food sources.

Since AWI numbers have increased at the site recreational activities have been detrimentally impacted by the damage caused to the general appeal of the reserve including aesthetics of vegetation and grassed areas within the reserve and foul smells associated with defecation and breeding. Whilst water quality results do not presently indicate any recent adversarial impacts from the AWI it is anticipated that over time nutrient levels will increase. Community feedback about the AWI has been negative, Council has received a significant number of complaints from park users and local residents either not wanting to use the reserve or concerned about the direct and indirect impact to their properties.

The following table outlines issues that have been identified as associated with AWI and their current applicability to Lake Mandurama Reserve.

Potential issues with AWI	Relevant to site?	Comments		
Smell	~	Offensive odours have been experienced at the site, assumed to be associated with bird defecation and decaying organic matter from rotting carcasses/eggs.		
Noise	~	Noise levels have increased at the site. Calls from the birds are observed primarily around sunrise and sunset.		
Water quality	×	Water quality monitoring is undertaken on a monthly basis. To date no impacts attributed to the bird population have been observed.		
Fauna displacement	x	Avifauna such as Cattle Egret, Little Black Cormorant, Black Swans and Purple Swamp Hens and Masked Lapwing Plovers still co-exist and breed on the island and in the reed pockets within the lake.		

Planning and Environment Committee Meeting 11 August 2015Page2.1Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

		Previous numbers are unknown.
Vegetation destruction	~	Vegetation on the island is being intensively used by AWI to make nests. Many of the larger trees have been stripped bare of foliage. Some residents have reported that AWI have collected large quantities of twigs from their gardens to aid nest building.
Public nuisance	1	AWI have been observed foraging in local bins. Their presence has been a deterrent to the public using recreational facilities based on perceived aggressiveness and threatening size, particularly towards young children.
Public health	1	Faecal matter and decaying organic matter poses a risk to public health, in particular children. Increase in nutrients within the lake may result in blue-green algae blooms.
Public image	1	The presence of AWI (and associated problems) is contributing to a declining image of Lake Mandurama and its public amenity.
Ecological sensitivity	√	The site is located approximately two kilometres upstream of the natural waters of Spring Creek. At this location the creek is bordered by Shale Sandstone Transition Forest (a critically endangered ecological community). A remnant patch of Cumberland Plain Woodland is also mapped approximately 150 metres upstream. It is possible that water quality impacts from the colony could negatively impact on these ecological assets however given the distance and opportunities for water quality treatment it is unlikely.

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

8. Colony composition

AWI colony counts are designed to determine the number of AWI colonising at a given site. Council commenced colony counts in September 2014 at Lake Mandurama Reserve. All counts were undertaken from the perimeter of the lake due to WHS restrictions and available equipment. The results of colony counts undertaken to date are provided in Table 3.

Date	Time started	Time finished	Total chicks on-site (a)	Total adults on- site (b)	# AWI flying in (c)	# AWI flying out (d)	Total adults (b+c-d=e)	Colony population (a+e)
8/9/14	nr	nr		62				62
9/9/14	nr	nr		55				55
18/9/14	4.30pm	6.00 pm	12	42	nr	nr	42	54
3/10/14	1.30pm	2.30pm	11	47				58
15/10/14	3.30pm	4.30pm	11	51				62
4/11/14	6.00pm	7.30 pm	9	39	19	4	54	63

Table 3. Results of AWI colony counts undertaken at Lake Mandurama Reserve

nr = not recorded / not observable

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

9.Site Management & Actions

Council recognises that the AWI colony at Lake Mandurama Reserve is not a geographically isolated issue but part of a South-Western Sydney region-wide AWI population. The working draft Sydney Regional Ibis Management Plan did not acknowledge the Lake Mandurama colony, however based on the colony categorisation under the plan, the colony would be considered a medium colony (greater than 50 individuals).

Due to the environmental damage, public health and nuisance issues arising from the AWI colony at Lake Mandurama, the 'do nothing' approach is not considered adequate. Moreover, as indicated above, the population dramatically increased in one season, it is uncertain if this trend will continue, particularly as a result of changes and reductions in other food resources. If an increase in population does continue it would most likely result in even more significant environmental and social impacts.

9.1 Past Management Actions

In response to resident's feedback Council has undertaken regular colony population counts of the AWI population at Lake Mandurama. Council has also consulted with other affected Council's such as Bankstown, Camden and Fairfield to assist in determining the most effective management actions.

Council's outdoor staff undertake regular maintenance activities of the reserve and grassed areas surrounding Lake Mandurama which also includes the collection of any dead birds, however the data regarding numbers of carcasses removed is unavailable. Once collected the dead birds are taken to a Council facility for collection and disposal by a specialised contractor.

9.2 Site Management Objectives

This site specific management plan aims to enable Council to effectively mitigate site specific negative impacts associated with AWI by providing comprehensive and clear guidelines for onsite management. Objectives of this plan are:

- 1. Manage the AWI colony within Lake Mandurama Reserve, in order to achieve/ restore a sustainable balance between the environment, recreational users, and local residents.
- 2. Increase community understanding of AWI.
- 3. Address environmental impacts to Lake Mandurama Reserve from AWI.
- 4. Manage public health impacts of the AWI colony at Lake Mandurama Reserve.

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

5. Monitor the AWI colony at Lake Mandurama Reserve to ensure appropriate and effective management practices are employed for the colony.

9.3 Site Management Action Plan

With the above objectives in mind a series of management strategies and corresponding actions have been developed to assist in achieving these objectives. These actions will be delivered over the three year life of the management plan and their effectiveness will be monitored and reviewed on an ongoing basis.

These strategies and actions are specified in the action plan in Table 4 below. Further details about each of the actions are provided in Section 10.

Planning and Environment Committee Meeting 11 August 2015Page2.1Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

Objective #	Management Strategy	Management Action	Timeframe	Responsibility	Comment
	Reduce	Undertake egg oiling program during breeding season	Fortnightly during breeding season (July – February)	Council to engage contractor	Section 120 and 121 licences to be obtained. Ensure chicks are not present or adjacent to nests.
1	breeding success	Undertake nest burning outside breeding season	April – June each year	Council to coordinate RFS and SES to undertake pile burns on the island.	Application to be made to EPA for an ecological burn. Ensure animals are not present in nests
2	Reduce exotic vegetation	Undertake bush regeneration and weed treatment, particularly on refuge island	April – Dec 2015	Council to engage contractor	To be removed during non-breeding season
3	Reduce odours	Remove decaying egg/ carcasses routinely	Fortnightly inspections and removal during breeding season (July – February)	Council to engage contractor	

Table 4. AWI Action Plan for Lake Mandurama Reserve	Table 4. AWI	Action Plan for	Lake Mandurama	Reserve
---	--------------	-----------------	----------------	---------

		Undertake nest burning outside breeding season	March – June each year	Council to coordinate RFS and SES to undertake pile burns on the island.	Application to be made to EPA for an ecological burn. Ensure animals are not present in nests
4	Maintain site and surrounds	Manage litter and food waste within the area through inspections, rubbish removal, bin clearing and grass mowing	Bins are emptied on a daily basis and park maintenance (mowing) undertaken on a monthly basis.	Council	
5	Control AWI feeding opportunities	Replace bins within Lake Mandurama Reserve with steel caged, covered waste bins	April – Dec 2015	Council	
		Encourage residents not to over-fill household bins	Ongoing	Council	Through comprehensive education campaign
6	Revegetation of native species	Removal of exotic vegetation.	April - Dec 2015	Council or Council Contractor	
		Planting of native species	Spring and Autumn as needed annually	Council or Council Contractor	Using species representative of River Flat Eucalypt Forest

		Protection of vegetation on floating reed bed	June – August 2015	Council	Explore deterrence options such as bird spikes, cages
7	Undertake community education campaign	Design and install signage around the perimeter of lake discouraging litter and feeding of birds	June – Dec 2015	Council	
		Design and distribute brochures for community on AWI, their impacts and appropriate behavioural practices	June – Dec 2015	Council	
		Update Council's website to include information about AWI, their impacts and appropriate behavioural practices	June 2015	Council	
8	Monitor AWI population	Undertake population counts of AWI colony at Lake Mandurama Reserve	Population counts undertaken fortnightly during breeding season (June – February) and monthly during the rest of the year	Council Council contractor	

		Participate in statewide surveys to assist in national management of species	October/ November annually	Council	Survey of Lake Mandurama Reserve colony undertaken annually in conjunction with statewide survey
9	Support research opportunities	Investigate research opportunities to achieve a better understanding of AWI.	Ongoing	Council	Participate in proposed University of Wollongong "Waterbird parasites and pathogens: disease threats in urban wetlands project" if project proceeds

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

10. Description of Management Actions

A detailed description of each of the management actions is provided below. These should only be performed by adequately trained personnel wearing the necessary personal protective equipment (PPE) and in accordance with protocol and procedures to be developed under an operational plan.

If at any time, an AWI (of any age) is harmed while performing any of these management actions, they must be immediately taken to a wildlife carer or a registered veterinary.

10.1 Reduce breeding success

Egg oiling - involves the coating of unhatched eggs with household cooking oil. The oil blocks air exchange through the pores of the egg preventing it from hatching. Egg-oiling is viewed as an environmentally safe and socially preferable to culling adult birds. Studies have shown that egg-oiling is 98-100% effective at preventing eggs hatching. Oiling can be conducted at any time during the 23 day incubation period and in 30% of cases parent AWI continued to brood the eggs for up to 54 days longer than the normal incubation period. This time spent brooding on unviable eggs reduces the opportunity for further egg laying.¹

Egg-oiling is considered to be a humane method of euthanasia and has been deemed an acceptable method by ecological authorities both nationally and internationally. Locally, egg oiling has been previously undertaken by both Bankstown, Camden and Fairfield Councils and they found it to be an effective management strategy. Thus far each council has engaged the services of a qualified contractor to undertake the oiling exercise.

Nest Burning - burning of AWI nests aims to reduce the availability of nesting habitat by destroying unused nests outside of the breeding season with all material piled in strategic locations on the island for pile burning in accordance with the RFS Guidelines for Pile Burning. Nest burning also reduces the amount of odour that is generated from the area, which will provide long term benefit to local residents. The nests that are heavily contaminated with faecal material and abandoned will be targeted as a priority.

Due to the disturbance and loss of nesting materials (once an ecological burn has been implemented), the AWI are likely to disperse and look for food and nesting materials in nearby locations.

To assist residents in this regard, an education campaign will be implemented simultaneously to provide residents with simple ideas how they can discourage AWI from visiting their properties, cleaning up vegetation debris from their front yards and making them less attractive to the AWI. This is described in more detail within Section 10.7 – Community Education.

10.3 Reduce Exotic Vegetation

Regular inspections and surveys at Lake Mandurama have identified AWI to be predominately nesting within exotic vegetation such as *Willow Spp*. Removal of exotic vegetation including *Willow Spp*, African Olive and African Boxthorn from the refuge island will assist in promoting native biodiversity and reducing favourable nesting habitat.

Vegetation removal and weed treatment will be undertaken in a mosaic pattern to ensure that habitat remains for the AWI and other avifauna and to promote the resilience of the remaining native vegetation. Any exotic tree species supporting active AWI nests will be left in situ to ensure that they have the best chance of survival. All exotic species larger than 100mm in diameter that are not in risk of falling into the water will be drilled and injected with Glyphosate herbicide to ensure that they can still provide habitat for fauna species in the short term whilst native species are encourage to fill the void. All weed species less than 100m diameter will be cut and painted using Glyphosate herbicide and left on island as habitat piles or placed in open locations for pile burning whilst nest burning is undertaken.

10.4 Reduce Odours

AWI nests are associated with foul odours as they are heavily contaminated with decaying organic material (eg eggs) and faecal matter. In addition when AWI breeding colonies reach high densities, on-site mortality of individuals of any age is inevitable. The resulting carcass decomposition adds to the odour associated with AWI breeding colonies.

Nest burning will assist in removing organic material and faecal matter thereby reducing odours. Prompt removal of decaying carcasses will help to reduce these odours and can be performed while on-site for other activities such as breeding restriction.

Inspection for carcasses and subsequent removal will be undertaken on a fortnightly basis, whilst other management activities are conducted.

10.5 Maintain Site and Surrounds

Council will endeavour to manage litter and waste at Lake Mandurama Reserve and surroundings to ensure that the availability of unnatural food sources for AWI is kept to a minimum. This includes ongoing regular mowing of grassed areas and regularly emptying bins to prevent overflow.

Planning and Environment Committee Meeting 11 August 2015

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

10.6 Control AWI Feeding Opportunities

One of the main sources of food and attraction to the site for AWI is human food waste. Currently the bins provided for the public at Lake Mandurama Reserve are not enclosed allowing birds (especially AWI) to forage for food in the bins. The current general waste bins at the reserve will be replaced with steel caged, covered waste bins to reduce access to the bins from animals other than humans.

10.7 Community education

Community education is an integral part of successful AWI management as many common practices such as feeding wildlife and incorrect disposal of rubbish greatly contribute to increased feeding opportunities. The community education campaign developed under the management plan will address community understanding of the species, human relationship and behavioural change. Education around conservation of native species is also important as many members of the general community may not be aware that AWI are a native species and may not understand why they have taken refuge in urban areas similar to Lake Mandurama Reserve within the Sydney Basin.

A public education campaign will be developed to address issues including:

- Biology of the species
- Impacts of the species
- Council's management actions
- Overfilling of household bins
- Bird feeding and rubbish dumping
- Management of vegetation on private property, to reduce foraging for nesting material.

Actions implemented through the education campaign will include:

- Development and distribution of education material such as brochures, stickers for bins, schools packages and media articles
- Installation of signage around the reserve area
- Update of Council's website with recommended behavioural practices for the public to discourage the presence and breeding of AWI
- Issue of a media release an annual basis prior to the breeding season to encourage residents to report AWI breeding sites and to increase awareness of the issues associated with urban AWI populations.

Creating community awareness of public feeding and general AWI issues can also be integral in communicating important and useful information about foraging, roosting and breeding sites within the area. It will also aid in community acceptance of this Management Plan.

10.8 Monitoring of AWI population

Monitoring of the Lake Mandurama Reserve AWI colony and reporting to the NPWS is required under the conditions of the Section 121 Occupier's Licence under the *National Parks and Wildlife Act 1974.* In addition it is appropriate to evaluate and assess the effectiveness of management actions prescribed within this management plan.

As indicated in the action table Council will engage a contractor to undertake egg oiling and decaying egg and carcass removal on a fortnightly basis during breeding season. The contractor will also collect and record data relating to their activities including roost counts, egg counts, the number of eggs oiled, number of carcasses removed and general population counts. This will be supplemented by monthly population counts by Council staff throughout the year.

An annual census of the colony is to be undertaken in conjunction with the OEH annual community survey of the AWI population across Australia to be held October/November each calendar year. This helps to accurately calculate the population within the Sydney Basin and guide statewide management direction which may impact on licence conditions.

10.9 Support Research Opportunities

Council will endeavour to support research opportunities through local schools, TAFE and universities as they arise. This will greatly assist in better understanding the species whilst also helping to guide appropriate management actions into the future.

11. Review of AWI Management Plan

This AWI Management Plan for Lake Mandurama Reserve, Ambarvale will be reviewed annually to ensure that it remains relevant as management techniques, knowledge and ability advance in management of the species. This will also include a review of the efficiency and effectiveness of the management actions specified within Section 9 of this plan.

Significant legislative or policy changes affecting the management of native species and/or changes in recommended practices for the management of native species will also trigger a review of this plan.

2.1 Outcome Of The Public Exhibition Of The Australian White Ibis Management Plan -Lake Mandurama

12. Glossary

Definition	
Australian White Ibis	
The moving of individuals away from each other or away from a particular site.	
The process of searching for and obtaining food or materials for nests.	
The process of birds congregating overnight at a specific place for rest and protection from predators.	
NSW National Parks and Wildlife Service	
Office of Environment and Heritage

2.2 Planning Proposal - Amundsen St Leumeah

Reporting Officer

Manager Environmental Planning

Attachments

- 1. Location Plan (contained within this report)
- 2. Landscape Concept Plan and draft indicative allotment layout (contained within this report)
- 3. Draft Planning proposal (contained within this report)

History

The land contained within the planning proposal is located at the southern end of the area generally known as 'The East Edge Scenic Protection Lands' which is an area located adjacent to the eastern boundary of the Campbelltown Urban Area, and is separated from an extensive regional open space network (that runs along the Georges River) by a reservation for the Georges River Parkway.

There have been numerous representations to Council in the past about the possibility of rezoning the East Edge Scenic Protection Lands to allow for further subdivision.

On 10 May 2004, Council notified the (then) Department of Planning (DoP), of its intention to prepare a Local Environmental Plan (LEP) to rezone the East Edge Scenic Protection Lands, and sought the DoP's requirements in relation to the Local Environmental Strategy (LES).

In a letter dated February 2006, the DoP advised that:

"the Department would not support a Local Environmental Plan based on a Local Environmental Study that was limited to investigating only one option – that of reducing the subdivision standard to one hectare, unless this was found to be the only one that satisfactorily addressed all issues."

Council subsequently advised the affected land owners of the DoP's response. The land owners raised concerns about the cost of a full LES, which would be significantly higher than that of an LES to only investigate the one hectare option.

On 26 October 2006, senior representatives from Council and the DoP met with the Minister for Planning to discuss the possibility of limiting the scope of the LES to investigate the one hectare only option. The Minister confirmed the Department's position, that any LES for the land would need to consider a range of options (including urban). Council was also invited to work collaboratively with the DoP to refine the scope of the LES but on the basis of a range of options being considered.

At its meeting on 21 November 2006, Council considered a report on the matter and resolved:

- "1. That Council refund the landowners (who made contributions towards the preparation of the Natural Conservation Assessment Study of the Edge Scenic Protection Lands) to the amount of the remaining funds held by Council.
- 2. That Council not proceed with the Draft LEP amendment seeking the proposed rezoning of the Edge Scenic Protection Lands.
- 3. That Council investigate the alignment of the urban zoned boundary as it affects the western edge of the Edge Scenic Protection Lands, as part of the Comprehensive LEP, noting that the extent of any potential options for zoning alterations will be minor.
- 4. That the development of the Campbelltown Comprehensive LEP include consideration of urbanising suitable portions of the Edge Scenic Protection Areas for ecologically sustainable developments west of the western edge of Bensley Road forming the boundary between potentially urbanised land and the environmental protection zone.
- 5. That Council inform interested parties of the decision."

Following the meeting, a Rescission Motion was lodged. At the following Council meeting on 12 December 2006, the Rescission Motion was carried and a further amendment was moved via a Notice of Motion:

"That a decision in this matter be deferred and that in accordance with the usual practice for the LEP this matter be the subject of a workshop by Councillors where all land uses in the Campbelltown area be considered and report back to Council."

On 30 January 2007, a presentation was made to Councillors about the Preliminary Findings of the Draft Campbelltown Local Planning Strategy. The Edge Scenic Protection Lands were discussed as part of this presentation.

On the 18 October 2011, Council considered a report on the "Draft Visual and Landscape Analysis of the Scenic Hills and the East Edge Scenic Protection Lands" which indicated:

"In some places in the East Edge Scenic Protection Lands, a further increase in the density of development may also be possible providing that the detailed subdivision design and subsequent siting of buildings will not compromise the bushland qualities of the landscape, especially when other issues such as bushfire protection for any dwellings is addressed." On the 10 April 2012, Council considered a report titled "Supplementary Report on Future Planning Directions for the East Edge Scenic Protection Lands" which specifically discussed the subject site. In this regard the report stated:

"Landscape Unit E-LU5 contains some land (particularly in the north western part of the landscape unit) that is of low conservation value, as the land is largely cleared. A landowner in this area who has land fronting Amundsen Street, Leumeah, and a property developer with an interest in that land, have made regular enquiries about the possible future rezoning of the land for residential use over at least the last five years. This land is mostly clear of vegetation as the land was previously used for farming. The assumption could be made that the land is therefore suitable for urban development, however, this land is located on the ridgeline and it therefore visually prominent. Most parts of the land also drain towards the Georges River. These are some of the reasons why residential zoning, urban development or subdivision to 4000m², is not appropriate in other parts of the Edge Lands.

However, it could be argued that the part of the land with direct frontage to Amundsen Street (namely part of Lot 1 DP 795498 and part of Lot 2 DP 126471) could be potentially be suitable for some increase in development density. The existing lots are respectively 1.84 hectares and 2.4 hectares in size.

This site is generally cleared and a significant portion drains away from the Georges River (directly). Land on the opposite side of Amundsen Street is developed for urban housing.

It is considered from initial investigation that some additional new lots may potentially be able to be created on that part of the land which drains away from the Georges River towards Amundsen Street and where no significant vegetation exists.

Any such development proposal for that part of the land would need to be more fully investigated and achieve a master planned outcome including:

- drainage of stormwater from development to Amundsen Street and away from the Georges River
- connection to mains sewer
- no new dwellings or outbuildings to be located on that part of the land, east of the ridgeline that traverses the site
- that part of the site between the ridgeline and Hansens Road to be revegetated with appropriate endemic species reflective of existing endangered ecological communities in the locality, in accordance with a vegetation rehabilitation/management plan, taking appropriate account of the management of bushfire risk
- a limit on the height of any future development to one storey only
- the design, siting and finish (materials and colours) of buildings and structures undertaken in such ways to minimise the visual prominence of development.

As Lots 1 and 2 were previously used for farming, an appropriate site contamination assessment would need to be carried out to establish whether or not any parts of the land need to be remediated. Such assessment would need to be carried out as part of the more detailed site investigation.

If Council were to support the investigation of additional limited development on the existing cleared land fronting Amundsen Street, in the terms described above, it would need to be made clear that such development is not a precedent for its consideration of other proposals for further encroachment into other parts of the Edgelands, for further subdivision and urban development.

Any such detailed investigation would need to be at no expense to Council and be submitted for formal consideration as soon as possible to enable coordination with Council's consideration of the preparation of the Comprehensive LEP."

Council subsequently resolved:

"That Council advise the owners of Lot 1 DP 795498 and Lot 2 DP 126471, Amundsen Street Leumeah, that it is prepared to consider the submission of a detailed investigation into the possible future development (for residential purposes) of part of the land, but only in accordance with the terms set out in the above report, and that such submission shall be received by Council by no later than 30 June 2012."

Since that time Council staff have been working with the land owner and their consultants to identify the suitability and capability of the land for further residential development. While a preliminary submission was received within the specified timeframe, it was considered prudent to consider additional key constrains on the land being the heritage significance of the old farmhouse and the impact on the visual landscape, prior to preparing a more detailed planning proposal.

Detailed technical reports on these matters were completed in November 2013 and November 2014 respectively and form part of the submitted preliminary planning proposal recently lodged to rezone Lot 1, DP 795498, Lot 2, DP 126471, No 82 - 102 Amundsen Street Leumeah and Lot 1, DP 709918, No. 86 Amundsen Street Leumeah, to permit the development of the site for residential purposes. A location map of the proposed site is provided in Attachment 1.

As investigations into the suitability and capability of this land were progressing independently of the CLEP 2014, it was decided that the most effective way to progress this matter was by way of a separate planning proposal. Subsequently this site was listed as a 'Deferred Matter' in the draft CLEP 2014. Consequently Council received a preliminary planning proposal on behalf of the land owners in December 2014 and staff have since worked with the applicant to progress the planning proposal to this stage.

Councillors received a briefing on the proposed rezoning at Council's briefing night on 28 July 2015.

Report

Property Description:	Lot 1, DP 795498, Lot 2, DP 126471, No 82 - 102 Amundsen Street Leumeah
Owner:	Mrs Jessie Maude Newham and Mrs Edith Marie Clarke
Property Description:	Lot 1, DP 709918, No. 86 Amundsen Street Leumeah
Owner:	Mr William Leslie Toole and Mrs Alexandra Toole
Applicant:	Michael Brown Planning Strategies

Council has received a preliminary planning proposal, on behalf of the two property owners, to rezone land at Amundsen Street Leumeah, to permit the development of the site for residential purposes.

The Site

The subject site includes Lot 1, DP 795498, and Lot 2, DP 126471, No 82 - 102 Amundsen Street Leumeah, owned by Mrs J. Newham and Mrs E. Clarke, and Lot 1, DP 709918, No. 86 Amundsen Street Leumeah, owned by Mr W. Toole and Mrs A. Toole. The site is bounded by Leumeah Rd to the south, Hansens Rd to the east, Amundsen Street to the west and residential development within the suburb of Leumeah to the north as shown in Attachment 1.

The land uses that abut the site include Biehler Reserve on the southern side of Leumeah Road; three large residential lots (ranging in size from 10,400m² to 20,000m²) on the eastern side of Hansens Road; 13 rear facing standard residential lots set back approximately 15 metres from Amundsen Street to the west (these premises front Wyangala Crescent) and the Leumeah Baptist Church to the north. The total area of the subject site is 4.36 hectares.

Historically the site has been predominantly used for agricultural and grazing purposes and more recently for horse agistment. The site contains three main dwelling houses, one of which was the original farmhouse and has been the subject of a heritage assessment.

The site is currently vegetated with open grassland with some scattered trees located along the eastern boundary. The terrain is undulating and is dominated by a ridgeline along the western side of the site and a 2m-3.5m deep cutting abutting the Leumeah Road boundary.

Zoning

The current zoning of the subject site is 7(d4) - Environmental Protection, 2ha minimum under the provisions of Campbelltown (Urban Area) LEP 2002. The draft CLEP 2014 lists the site as a 'Deferred Matter'. The preliminary planning proposal aims to rezone the subject land to a residential zone and provide for subdivision into approximately 36 residential allotments (zoned R2 – Low Density Residential) with a range of allotment sizes from 500m² to 720m² and two allotments (zoned R5 – Large lot Residential) of 9778m² and 9435m². The proposal only seeks to amend the zoning of No.86 Amundsen Street with no plans being made for subdivision of this 1574m² lot at this stage. The proposal would result in a net increase of 35 lots with an estimated population of approximately 123 people.

Key Planning Issues

Visual

The site was identified in the draft report entitled "Visual Analysis of Campbelltown's Scenic Hills and East Edge Scenic Protection Lands" prepared in 2011 for Council by Paul Davies Pty Ltd in association with Geoffrey Britton (the Visual Study). The site is part of Unit 5 (E-LU5) in the Visual Study.

As mentioned above Council considered a report on the Visual Study at its meeting on 10 April 2012 and indicated that any such development proposal for that part of the subject land would need to be more fully investigated and achieve a master planned outcome including:

- drainage of stormwater from development to Amundsen Street and away from the Georges River
- connection to mains sewer
- no new dwellings or outbuildings to be located on that part of the land, east of the ridgeline that traverses the site
- that part of the site between the ridgeline and Hansens Road to be revegetated with appropriate endemic species reflective of existing endangered ecological communities in the locality, in accordance with a vegetation rehabilitation/management plan, taking appropriate account of the management of bushfire risk
- a limit on the height of any future development to one storey only
- the design, siting and finish (materials and colours) of buildings and structures undertaken in such ways to minimise the visual prominence of development.

With the above criteria in mind the applicant commissioned a detailed visual and landscape assessment of the land by HLS Pty Ltd (Landscape Architects) to conduct a site specific analysis of the site. The assessment recommends that the inclusion of the following design recommendations in the development will ensure that any visual effects will be minimised.

- Ensure Hansens Road is retained as a "Rural Road Construction standard" on the western verge, to maintain trees and reduce adverse visual impacts
- Ensure driveway locations and crossovers to the bushland interface lots are located to minimise vegetation removal.(It should be noted that only one access from Hansens Road is proposed)
- Installation of a rural style (post and rail or similar) fence, max 1200mm high, from the Hansens Road Roundabout splay, along the length of the Hansens Road frontage
- Preparation of a landscape plan for each future rural residential dwelling providing for a bushland setting and planting at the frontage of each dwelling
- Planting of the 8m wide dense native vegetation strip with canopy trees across the site for visual amenity value, plus a 7m wide cleared zone against rear fences. Plant at a density of 1/3m² as per section "7.1 Suggested Plant List"
- Retention of a 30m wide vegetation zone along the Hansens Road frontage of the "bushland interface" lots
- Planting of a 15m wide canopy zone with trees at 1/3m², on the roundabout splay to maintain views through trees to larger lot housing beyond, typical of the "bushland interface" within the unit

- Trees to be protected as per AS 4970-2009 Protection of Trees on Development Sites.
- Engage an Arborist to investigate health and determine Tree Protection Zones of two remaining large Eucalypts near the building envelope in larger lots to assist in locating buildings outside TPZs of large healthy trees
- In larger lots, site future dwellings within the nominated building zone, amongst the isolated scattered trees to enable the retention of all trees
- Buildings in larger lots are to be single storey, built in recessive colours to integrate with the bushland, with no high contrast colours or materials
- Planting of a 3m wide native screen planting strip at the top of the earth bank cutting along Leumeah Road to create a permanent screen in this location to replace short-lived wattles. Fence the developed side of the strip with 1800mm high lapped and capped timber fence for safety reasons
- Increase the planting in the 15m wide verge on the western side of Amundsen Street, within an 8m zone, 7m from rear fences, to fill gaps in the scattered tree planting and to create a softer ridgeline. This will also provide some screening between new residential lots and the rear of existing lots on Wyangala Crescent
- Where possible, minimise vegetation clearing for visual reasons. Plant at a density of 1/25m² (at 5m intervals) as per section 7.1
- Locate services outside of the existing vegetated western verge of Hansens Road
- Minimise clearing for overhead electricity and telecommunication lines where lines cross the verge
- A maximum built height of 8.5m is recommended for those dwellings on the ridgeline, to ensure their visual impacts are minimised with screening by the proposed 15m high canopy trees.

These recommendations were used to produce a Landscape Concept Plan which resulted in the development of a draft indicative allotment plan (both in attachment 2), which will be refined and potentially modified based on the results of the required additional studies should the preliminary planning proposal progress.

Considering Council's criteria and the recommendations of the site specific visual and landscape analysis the following assessment can be made:

Stormwater Drainage – whist this is discussed in further detail below, it is consider that the proposal can achieve Council's criteria and would be subject to further detailed analysis should the preliminary planning proposal progress.

Connection to mains sewer - whist this is discussed in further detail below, it is consider that the proposal can achieve Council's criteria and would be subject to further detailed analysis should the preliminary planning proposal progress.

No structures east of the ridgeline – whilst it is proposed that approximately half of the standard residential allotments and two large lot residential allotments will be located beyond the ridge line the visual and landscape analysis recommends significant vegetative screening and building height controls to address any impacts. A building height of 8.5m is proposed, however this will not limit the height of a residential building to one storey as required by Council and a more appropriate building height would be 6.5m. These matters can be further refined should the preliminary planning proposal progress.

Revegetation of the site east of the ridgeline – The visual and landscape study recommends revegetation with appropriate endemic species reflective of existing endangered ecological communities in the locality. The location of vegetation on site will need to be further addressed as part of the management of bushfire risk which is recommended to be a required additional report should the preliminary planning proposal progress.

Building height of one storey – as discussed above a building height of 6.5m rather than the proposed 8.5m would be required to achieve this criteria and this will be refined should the preliminary planning proposal progress.

Building design, siting and finish – the visual and landscape assessment requires a landscape plan for each large residential allotment, a building height of one storey with recessive and no high contrasting building colours to be used. These controls along with a number of other building standards recommended by the visual and landscape assessment will (should the preliminary planning proposal progress) be incorporated into a site specific Development Control Plan for the site.

Therefore it is considered that given the above the issues of visual and landscape impacts can be addressed by way of additional controls which will be formalised and incorporated in future LEP and DCP amendments should the preliminary planning proposal progress.

Flora and Fauna

The site has been used for agricultural purposes for many years, and particularly for horse agistment and cattle grazing, which has resulted in only scattered canopy trees associated with Shale Sandstone Transition Forest on the eastern side of the ridge. It is proposed to retain (and supplement) as much existing significant vegetation as possible via the creation of the proposed large lots. While there have been no sighting of threatened species at the site there is the potential for Koalas and the Cumberland Plain Land Snail to exist on site.

At this stage, no assessment of potential threatened species has been undertaken; however, it is recommended that the Gateway Determination require a flora and fauna study to be completed.

Transport and Access

The draft indicative allotment layout proposes access to the majority of lots within the site via Amundsen Street which is a local road. The section of Amundsen Street which abuts the subject site currently contains a bitumen road without formalised kerb and gutter. The upgrade of this section of Amundsen Street will take place as part of any future subdivision applications of the land should the planning proposal progress.

Heritage - Non Indigenous

The subject lands are not listed as containing a heritage item, however, the farmhouse on Lot 2 DP 126471 No 102 Amundsen Street has some historical connections with the development of the area. In this regard John Oultram (Council Heritage and Design Consultant) undertook an assessment of the dwelling. The following summarises that assessment:

- The property is not representative of the early development of the area being built in 1928
- The property is representative of the type of Inter War smallholding found in many areas of outer Sydney that were purchased by local workers for hobby farms
- The house is of very limited significance
- The property would not meet the threshold for listing as a heritage item in the LEP
- The house and property have no features of note that would require retention.

The report recommends that, if the cottage is to be demolished:

- 1. It be the subject of archival photographic recording in accordance with the Heritage Branch guidelines for digital capture.
- 2. An oral history be taken from the current occupier of the property detailing its later history, development and use.
- 3. These records (and a copy of this report) be lodged with a suitable archive (e.g. the Local History Library).

Given the above it is considered subject to the above recommendations being implemented by the applicant that non-indigenous heritage is not a constraint to the future rezoning of the land.

Heritage - Indigenous

At this stage detailed investigation into indigenous heritage have not been undertaken however further investigation and consultation with Aboriginal stakeholders would be required as part of the preparation of documentation to support the proposed rezoning of the site, should Council decide to support the proposal. A search of the Office of the Environment and Heritage Aboriginal Heritage Information Management System has shown that there are no records of Aboriginal sites or places in or near the site.

Servicing

Initial investigations have indicated that the adjacent residential areas are serviced with water, sewer, stormwater drainage and electricity. However, further confirmation would be required prior to the rezoning of the subject land. With the exception of the two large residential lots, which are suitably sized to accommodate stormwater disposal on site, all of the remaining lots fall way from the Georges River.

Community Infrastructure

Given the minimal impact in population resulting from the proposed rezoning it is considered that the additional demand on services could be accommodated within the existing community services/facilities in adjoining suburbs (e.g. schools and playing fields).

Land Contamination

At this stage detailed investigation into land contamination have not been undertaken however further investigation would be required to confirm that there is no contamination on the site and confirm its suitability for residential development, should Council decide to support the proposal.

Conclusion

The rezoning of the subject site presents an opportunity for the delivery of additional residential land within the Campbelltown LGA.

The planning proposal process under which this rezoning is being considered, is designed to ensure that preliminary information provided in support of the planning proposal (rezoning), is provided to a level that enables the Council to make a decision on whether or not the proposal has sufficient merit for progression through to the Department of Planning and Environment's Gateway Panel.

The Gateway Panel's purpose is to make a decision (determination) on whether or not the draft planning proposal lodged by the Council has sufficient merit to move to stage 2 of the process, being the detailed assessment and exhibition stage. As this planning proposal is in the first stage of the planning proposal assessment process, Council needs to be initially satisfied that the proposal has sufficient merit, before such a proposal is forwarded to the Gateway for its determination.

In this regard, based on the information provided by the applicant to date, Council officers have deemed it appropriate to prepare a draft planning proposal for Council's consideration and subject to the endorsement of the Council, its lodgement with the Department of Planning and Environment for determination by the Gateway Panel (see draft planning proposal at Attachment 3).

On receipt of a draft planning proposal, the Gateway Panel will consider the draft proposal and will determine whether or not the draft proposal should proceed to full assessment and exhibition, and if so, under what circumstances. If the draft planning proposal is supported by the Gateway Panel and it determines that the proposal can proceed to the next stage, then the Gateway determination will advise what further studies are required, which State or Commonwealth Public Authorities will need to be consulted, and the times within which the various stages of the procedure for the making of the proposed rezoning plan (LEP) are to be completed, including the sequencing of the public exhibition. These studies will need to address in detail, the key planning issues discussed in this report, e.g. flora and fauna, bushfire risk, indigenous heritage, contamination and any additional matters required by the Gateway Panel. Where the draft planning proposal is supported by both the Council and the Gateway Panel, subject to the applicant satisfying the conditions of any Gateway approval, a further report will be prepared for Council's consideration prior to the public exhibition of any planning documentation for this proposed rezoning.

Officer's Recommendation

- 1. That Council forward the draft planning proposal for the rezoning of Lot 1, DP 795498, Lot 2, DP 126471 and Lot 1, DP 709918, Amundsen Street, Leumeah, to the Department of Planning and Environment for a Gateway Determination.
- 2. That Council advise the applicant of Council's decision.

Committee's Recommendation: (Oates/Lound)

That the Officer's Recommendation be adopted.

CARRIED

Voting for the Committee's Recommendation were Councillors: Kolkman, Lound, Matheson, Oates, Rowell and Thompson.

Voting against the Committee's Recommendation: Nil.

Council Meeting 18 August 2015 (Hawker/Thompson)

That the Officer's Recommendation be adopted.

Council Resolution Minute Number 152

That the Officer's Recommendation be adopted.

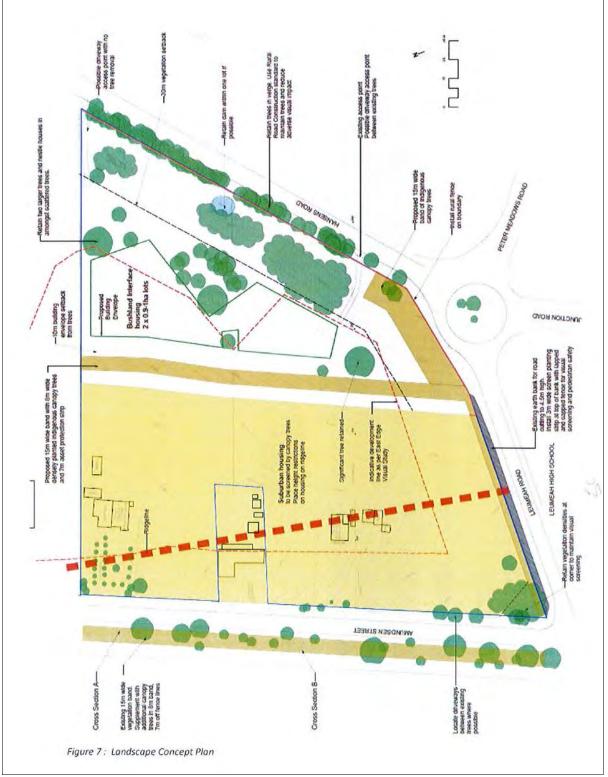

Voting for the Council Resolution were Councillors: Borg, Brticevic, Chanthivong, Dobson, Glynn, Hawker, Kolkman, Lake, Lound, Matheson, Mead, Oates, Rowell and Thompson.

Voting against the Council Resolution: Nil.

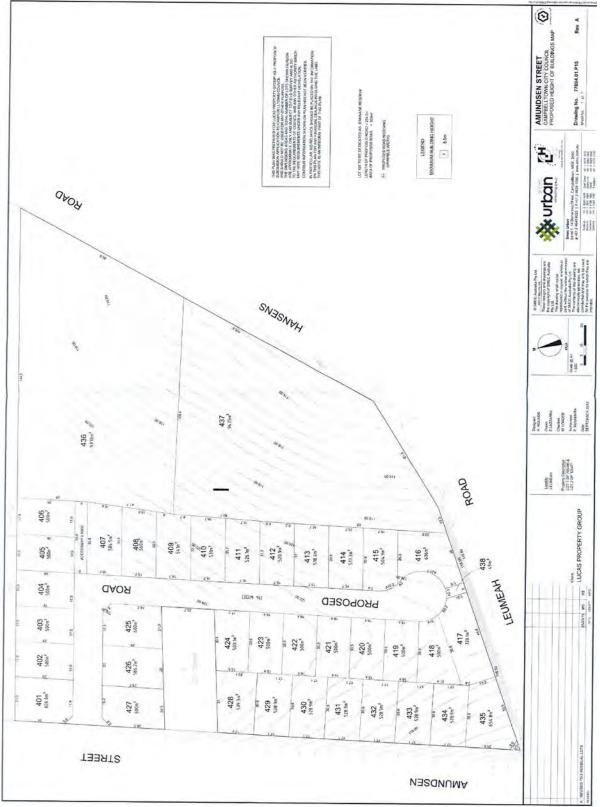

Location Plan Proposed Rezoning of Land - Amundsen Street LEUMEAH

Planning Proposal

2. Draft Campbelltown Local Environmental Plan 2014 - Amendment No. 1

Part 1 – Objectives or Intended Outcomes

The objective of this planning proposal is to enable 43,624m² of environmental protection land at Leumeah to be developed for approximately 35 residential allotments.

Part 2 – Explanation of the Provisions

The planning proposal applies to land at Leumeah known as Lot 1, DP 795498, Lot 2, DP 126471 and Lot 1, DP 709918, Amundsen Street, Leumeah. A location map is shown at attachment 1.

The subject site is currently zoned Environmental Protection under the provisions of Environmental Planning Instrument (EPI) *Campbelltown (Urban Area) Local Environmental Plan 2002* (CLEP 2002) with a minimum residential subdivision standard of 2 hectares. A copy of the existing zoning map is shown at attachment 2.

The main EPI for the Campbelltown Local Government Area is *Campbelltown (Urban Area)* Local Environmental Plan 2002 (CLEP 2002) which is currently being incorporated into the draft Campbelltown Local Environmental Plan 2014 (CLEP 2014). The subject site is currently listed as a 'Deferred Matter' under the draft CLEP 2014.

Depending on the timing of the completion of the draft CLEP 2014 this planning proposal may become an amendment to CLEP 2014.

A number of detailed technical studies would be required to be prepared to inform a final planning proposal. These would include the following matters:

- Flora and fauna
- Transport and access
- Indigenous heritage
- Bushfire risk
- Contamination
- Geotechnical conditions
- Infrastructure, Stormwater and Sewer Services

The outcome of these studies would be used to define the zone boundaries and applicable planning controls within the subject site, and the final planning proposal would include the proposed amendments to CLEP 2002 or draft CLEP 2014 that would be required to accommodate these changes.

Subject: 1. Draft Campbelltown (Urban Area) Local Environmental Plan 2002 – Amendment No 29 – Leumeah or

Part 3 – Justification

Section A – Need for the planning proposal

1. Is the planning proposal a result of any strategic study or report?

While the planning proposal is not a result of any strategic study or report, it will however deliver on a number of outcomes consistent with both state and local government planning documents including:

- Conservation and enhancement of the natural landscape
- Utilization and embellishment of existing physical and human infrastructure
- Contributing housing stock to help meet housing targets provided in the Sydney Metropolitan Strategy
- Promoting housing choice and diversity thereby responding to the needs of Campbelltown's community.

As noted in Part 2 further technical studies will be prepared to ensure that the subject site is capable of being developed for residential purposes.

2. Is the planning proposal the best means of achieving the objectives or intended outcomes, or is there a better way?

Council is towards the end of the process of preparing a comprehensive local environmental plan (CLEP 2014) under the provisions of the Standard Instrument – Principal Local Environmental Plan, to cover the entire Campbelltown Local Government Area. As sufficient information to justify the change in zoning of the land was not available at the time of advertising the CLEP 2014 it was considered that the best means of achieving the rezoning of the land was via an independent planning proposal. Depending on timing of the progress of CLEP the proposal is to either amend *Campbelltown (Urban Area) Local Environmental Plan 2002* or CLEP 2014.

3. Will the net community benefit outweigh the cost of implementing and administering the planning proposal?

The planning proposal would result in a modest increase in the supply of new housing located on the eastern boundary of the Campbelltown urban area, and within close proximity to the major regional city centre of Campbelltown/Macarthur. This is compatible with the State Government's desire for the release of additional residential land on the fringes of existing urban areas.

There will be no need for new infrastructure to service the proposed additional 35 residential allotments beyond that provided by the developer. This development will therefore be at no cost to Government at any level.

It is anticipated that the net community benefit of the planning proposal in providing much needed housing for the population growth of Sydney would outweigh any implementation and administration costs involved.

Section B – Relationship to strategic planning framework

4. Is the planning proposal consistent with the objectives and actions contained within the applicable regional or sub-regional strategy (including the Sydney Metropolitan Strategy and exhibited draft strategies).

Metropolitan Plan for Sydney 2036

The Metropolitan Plan for Sydney 2036 (MPS) recognises that there will be a need for 770,000 additional homes by 2036.

Draft South West Subregional Strategy

The draft South West Subregional Strategy (SWSS) aims to provide 24,653 additional dwellings by 2031, with 4,700 of these dwellings proposed to be developed in greenfield sites within the Campbelltown LGA.

A Plan for Growing Sydney (New Metro Plan)

This Plan was announced on 14 December 2014 and contains a number of key actions, goals and directions to drive Sydney's growth to 2031.

Of relevance to this planning proposal is Goal 2: A city of housing choice, with homes that meet our needs and lifestyles. Under Goal 2 there are four Directions as follows:

Direction 2.1: Accelerate housing supply across Sydney Direction 2.2: Accelerate urban renewal across Sydney – providing homes closer to jobs

Direction 2.3: Improve housing choice to suit different needs and lifestyles Direction 2.4: Deliver timely and well planned greenfield precincts and housing

As this planning proposal aims to provide 35 residential allotments on the eastern boundary of the Campbelltown urban area, it is considered that it is consistent with the aims of the MPS, draft SWSS and the New Metro Plan.

5. Is the planning proposal consistent with the local council's Community Strategic Plan, or other local strategic plan?

The planning proposal is not inconsistent with the *Campbelltown 2025 Looking Forward* long term town planning strategy, nor with the draft *Local Planning Strategy,* as the planning proposal seeks a rezoning outcome that is consistent with the surrounding land uses. The planning proposal is also not inconsistent with Campbelltown's draft *Community Strategic Plan 2012 - 2022*, which contains an objective of a strong local economy.

Council's Residential Strategy accompanies a suite of planning documents to support draft CLEP 2014. The Strategy has the following recommendations:

"The Residential Strategy Review and this emergent Strategy indicate that future dwelling targets for 2031 can be achieved with current zonings, their minor rationalisation and the release of identified greenfields and incremental phasing of new centres and transit focused infill growth nodes.

Additionally, the need for diverse housing forms, adaptable housing and more affordable housing should be acknowledged."

It is considered that the proposed development of the land is consistent with the above recommendations as this Planning Proposal seeks to rezone for a range of residential purposes via a minor rationalisation of existing zones using a master planning approach.

6. Is the planning proposal consistent with applicable state environmental planning policies?

It is considered that the planning proposal is consistent with all applicable state environmental planning policies (SEPPs) being:

SEPP No 55 – Remediation of Land

SEPP No 60 - Exempt and Complying Development

SEPP Affordable Rental Housing 2009

SEPP, Building Sustainability Index - BASIX 2004

SEPP Exempt and Complying Development Codes 2008

SEPP Housing for Seniors or People with a Disability 2004

Deemed SEPP No 2 (SREP 2) - Georges River Catchment

However, please note that the technical studies required to be prepared to inform the final planning proposal for public exhibition purposes, would address the issue of consistency with all relevant SEPPs.

7. Is the planning proposal consistent with applicable Ministerial Directions (s117 directions)?

It is considered that the planning proposal is either consistent or justifiably inconsistent with all applicable s117 directions being:

1.5 Rural Lands

2.1 Environment Protection Zones

- 2.3 Heritage Conservation
- 3.1 Residential Zones
- 3.3 Home Occupations
- 3.4 Integrating Land Use and Transport
- 4.4 Planning for Bushfire Protection

6.1 Approval and Referral Requirements

6.3 Site Specific Provisions

7.1 Implementation of the Metropolitan Plan for Sydney 2036).

Please also note that the technical studies required to be prepared to inform the final planning proposal for public exhibition purposes would address the issue of consistency with all relevant s117 directions.

Section C – Environmental, social and economic impact.

8. Is there any likelihood that critical habitat or threatened species, populations or ecological communities, or their habitats, will be adversely affected as a result of the proposal?

The ecological values of the subject site are highly degraded due to extensive clearing, and continuing agricultural activities. However, the site does exhibit some canopy trees consistent with Shale Sandstone vegetation, which is proposed to be retained and supplemented with additional plantings. Whilst there have been no sightings of threatened species on site there is the potential for Koalas and the Cumberland Plain Land Snail to exist on site. These issues would be addressed in the relevant technical studies required for the final planning proposal.

9. Are there any other likely environmental effects as a result of the planning proposal and how are they proposed to be managed?

Other likely environmental effects such as bushfire hazard would be addressed within the relevant technical studies required for the final planning proposal.

10. How has the planning proposal adequately addressed any social and economic effects?

The planning proposal aims to provide additional housing within easy access of the regional city centre of Campbelltown/Macarthur. It also aims to provide additional housing adjacent to existing residential areas within easy access to public transport services / routes, and community facilities and amenities. With the limited number of additional lots created it is considered that the additional demand on services could be accommodated within the existing community services/facilities in adjoining suburbs (e.g. schools and playing fields).

Section D - State and Commonwealth interests.

11. Is there adequate public infrastructure for the planning proposal?

Initial investigations have noted that the adjoining residential areas adjoining this site can be serviced with water, sewer, stormwater drainage, electricity and telecommunication facilities. However, the relevant technical studies required for the final planning proposal would address availability of adequate public infrastructure to service the proposed future development of this site.

12. What are the views of State and Commonwealth public authorities consulted in accordance with the gateway determination?

This issue should be addressed when Council receives the gateway determination as part of the community consultation phase of the planning proposal.

Part 4 – Community Consultation

It is considered that a public exhibition period of a minimum of 28 days should be undertaken, however ultimately this will be a matter for the Gateway Determination.

Purpose

To assist Council in its determination of the subject Development Application in accordance with the provisions of the *Environmental Planning and Assessment Act 1979 (EP&A Act)*.

This development application is required to be reported to Council due to the number of objections received in response to the public exhibition and notification of the application.

Property Description	Lot 36 DP 13118 No. 17 Lyndia Street, Ingleburn		
Application No	2775/2014/DA-MAH

Owner	Mr Ramy Maher Youssef and Mrs Nevine Magdy Youssef		
Provisions	Campbelltown 2025 - Looking Forward		
	State Environmental Planning Policy (Affordable Rental Housing) 2009		
	Seniors Living Policy: Urban Design Guidelines for Infill Development		
	Campbelltown (Urban Area) Local Environmental Plan 2002		
	Draft Campbelltown Local Environmental Plan 2014		
	Campbelltown (Sustainable City) Development Control Plan 2014		
Date Received	19 November 2014		

History

An inspection was undertaken of the subject site on Tuesday 28 July 2015 by Councillors and Council officers which both the applicant and objectors were invited to attend. The inspection was attended by representatives of the applicant as well as those objecting to the application. A number of issues were raised at the inspection. All of the issues raised form part of the assessment of this proposal.

The application is now presented to Council for its consideration.

Report

This application has been made pursuant to the provisions of State Environmental Planning Policy (Affordable Rental Housing) 2009. It proposes the construction of nine two-storey dwellings, with two dwellings (units 4 and 6, making up 21.6% of the proposed gross floor area) to be used for the purpose of affordable housing and be managed by a registered community housing provider for 10 years. The application proposes a common driveway from Lyndia Street that accesses the nine proposed dwellings. Eight of the proposed dwellings have three bedrooms and one has four bedrooms. All of the proposed dwellings would have their own courtyards, and a communal open space area would be provided towards the rear of the site. Landscaping is proposed to be provided within the front setback of the development, within the rear courtyards of the dwellings, along the common driveway, and adjacent to the front entries of dwellings.

The subject site is located on the north-western side of Lyndia Street, and is rectangular in shape. The site has an area of 1821m², with a frontage of 20.115 metres. It is adjoined to the north, west and south by single dwellings in Lyndia and Desmond Streets. Further to the north-east of the site (within Michael Place) is a multi-dwelling development containing 15 dwellings.

1. Vision

'Campbelltown 2025 Looking Forward' is a statement of broad town planning intent for the longer term future of the City of Campbelltown that:

- Responds to what Council understands people want the City of Campbelltown to look, feel and function like
- Recognises likely future government policies and social and economic trends
- Sets down the foundations for a new town plan that will help achieve that future.

The document establishes a set of strategic directions to guide decision making and development outcomes. These directions are broad in nature and form a prelude to a new statutory town plan for the City.

The strategic directions relevant to this application are:

- Growing the regional City
- Creating education, employment and entrepreneurial opportunities.

The application is consistent with the above strategic directions as the proposal would provide a housing product that would enable the City to grow by providing affordable housing opportunities as well as providing employment opportunities within the construction industry.

Some of the relevant desired outcomes of the strategic directions included in Campbelltown 2025 include:

- Urban environments that are safe, healthy, exhibit a high standard of design, and are environmentally sustainable
- Development and land use that matches environmental capacity and capability.

The development is consistent with desired outcomes within Campbelltown 2025 specifically in relation to providing a development that is functional and of a high quality design, and one that matches the environmental capacity and capability of the site.

2. Planning Provisions and Assessment

The development has been assessed in accordance with the heads of consideration under Section 79C of the Environmental Planning and Assessment Act, 1979, and having regard to those matters, the following issues have been identified for further consideration.

2.1 State Environmental Planning Policy (Affordable Rental Housing) 2009

This application proposes an 'infill' affordable housing development under the provisions of the Affordable Housing SEPP. The aims of the SEPP are as follows:

Aims of Policy

- (a) to provide a consistent planning regime for the provision of affordable rental housing
- (b) to facilitate the effective delivery of new affordable rental housing by providing incentives by way of expanded zoning permissibility, floor space ratio bonuses and non-discretionary development standards
- (c) to facilitate the retention and mitigate the loss of existing affordable rental housing
- (d) to employ a balanced approach between obligations for retaining and mitigating the loss of existing affordable rental housing, and incentives for the development of new affordable rental housing
- (e) to facilitate an expanded role for not-for-profit-providers of affordable rental housing
- (f) to support local business centres by providing affordable rental housing for workers close to places of work
- (g) to facilitate the development of housing for the homeless and other disadvantaged people who may require support services, including group homes and supportive accommodation.

The application is consistent with objectives (b), (d), (e) and (f), as it would facilitate the delivery of new affordable rental housing to be managed by a registered community housing provider, in a location that is highly accessible to nearby local business centres.

Affordable housing means housing for very low income households, low income households or moderate income households, being such households as are prescribed by the regulations or as are provided for in an environmental planning instrument. Under the Affordable Housing SEPP, a household is taken to be a very low income household, low income household or moderate income household if the household:

- (a) has a gross income that is less than 120 per cent of the median household income for the time being for the Sydney Statistical Division (according to the Australian Bureau of Statistics) and pays no more than 30 per cent of that gross income in rent, or
- (b) is eligible to occupy rental accommodation under the National Rental Affordability Scheme and pays no more rent than that which would be charged if the household were to occupy rental accommodation under that scheme.

Control	Required	Proposed	Compliance
Control Development to which Division applies	RequiredThis Division applies to development for the purposes of dual occupancies, multi dwelling housing or residential flat buildings if the development concerned is permitted with consent under another environmental planning instrument, and the development is on land that 	Proposed Multi-dwelling housing is permissible with consent under the CLEP The site does not contain any heritage items	Yes Yes
	 accessible area means land that is within either: 800m walking distance of 		
	a public entrance to a railway station or a wharf from which a Sydney Ferries ferry service operates		
			Yes

Development Standards for In-fill Affordable Housing

Control	Required	Proposed	Compliance
	400m walking distance of a bus stop used by a regular bus service (within the meaning of the <i>Passenger Transport Act</i> <i>1990</i>) that has at least one bus per hour servicing the bus stop between 6.00am and 9.00pm each day from Monday to Friday (both days inclusive) and between 8.00am and 6.00pm on each Saturday and Sunday.	The site is within 300m of a bus stop on the 873 (Ingleburn to Minto) route on Chester Road. This route operates within the times specified. The site is therefore within an accessible area.	
Floor Space Ratios	This clause applies to development to which this Division applies if the percentage of the gross floor area of the development that is to be used for the purposes of affordable housing is at least 20%.	The application indicates that 21.6% of the gross floor area is to be used for the purposes of affordable housing.	Yes
	The maximum floor space ratio for the development to which this clause applies is the existing maximum floor space ratio for any form of residential accommodation permitted on the land on which the development is to occur, plus a bonus over that of:	The existing maximum floor space ratio that applies to the site is 0.55:1 (dwelling house)	
	(If the existing maximum floor space ratio is 2.5:1 or less)	The existing maximum floor space ratio = 0.55:1	
	0.5:1 if the percentage of the gross floor area of the development that is used for affordable housing is 50% or higher	Doesn't apply as the gross floor area = 21.6%	
	OR		
	where the gross floor area to be used for affordable housing is less than 50%, the maximum floor space ratio that applies to the land = the maximum floor space ratio that applies to the land (0.55:1 or 55%) + the gross floor area of the proposed affordable housing (0.216:1 or 21.6%)	As the gross floor area of the development that will be used for affordable housing is 21.6%, and the maximum applicable floor space ration for the site is 55%, then a maximum allowable floor space ratio of 76.6% or 0.766:1 (0.55:1 + 0.216:1) applies to the development.	

Control	Required	Proposed	Compliance
		The proposed development has a floor space ratio of 0.52:1.	Yes
Standards that cannot be used to refuse consent	A consent authority must not refuse consent to development to which this Division applies on any of the following grounds:		
	Site area If the site area on which it is proposed to carry out the development is at least $450m^2$.	The subject site has an area of 1821m ² .	Yes
	Landscaped area If at least 30% of the site area is to be landscaped.	30.3% is proposed to be landscaped	Yes
	Deep soil zones If, in relation to that part of the site area (being the site, not only of that particular development, but also of any other associated development to which this Policy applies) that is not built on, paved or otherwise sealed:		
	 there is soil of a sufficient depth to support the growth of trees and shrubs on an area of not less than 15% of the site area (the deep soil zone), and 	The area available for deep soil planting is greater than 15% of the site area.	Yes
	 each area forming part of the deep soil zone has a minimum dimension of 3m, and 	Areas forming part of the deep soil zone are at least 3m wide.	Yes
	 if practicable, at least two- thirds of the deep soil zone is located at the rear of the site area. 	The deep soil zones are spread throughout the site within the dwellings' courtyards.	Satisfactory
	Solar access If living rooms and private open spaces for a minimum of 70% of the dwellings of the development receive a minimum of three hours direct sunlight between 9.00am and 3.00pm in mid-winter.	All of the proposed dwellings receive the minimum solar access required.	Yes
	Parking If at least 0.5 parking spaces	14 parking spaces are required based on the	Yes

Control	Required	Proposed	Compliance
	are provided for each dwelling containing one bedroom, at least one parking space is provided for each dwelling containing two bedrooms and at least 1.5 parking spaces are provided for each dwelling containing three or more bedrooms	number of bedrooms within the proposed dwellings. 14 parking spaces have been provided.	
	Dwelling size If each dwelling has a gross floor area of at least: 95m ² in the case of a dwelling having three or more bedrooms	All proposed three bedroom dwellings are greater than 95m ²	Yes
Design Requirements	A consent authority must not consent to development to which this Division applies unless it has taken into consideration the provisions of the Seniors Living Policy: Urban Design Guidelines for Infill Development	Assessment of the proposal against the provisions of the Seniors Living Policy: Urban Design Guidelines for Infill Development is outlined later in this report. The proposal is consistent with the provisions of these standards	Yes
Subdivision	Land on which development has been carried out under this Division may be subdivided with the consent of the consent authority	Strata subdivision of the multi-dwelling development is proposed.	Yes

Character of Local Area

Under the provisions of the Affordable Rental Housing SEPP, a consent authority must not consent to a development for the purpose of in-fill affordable housing unless it has taken into consideration whether the design of the development is compatible with the character of the local area. Accordingly, an assessment of the proposal in terms of various aspects of its built form is outlined below:

Building height – All of the proposed dwellings would be two-storeys in height, which is consistent with the height of several existing dwellings and multi-dwelling developments within the surrounding locality as well as the maximum storey limit permitted under the Campbelltown (Sustainable City) Development Control Plan 2014 for multi-dwelling developments. In addition, the maximum building height above natural ground level would be 7.4 metres, which is less than the maximum building height permitted (9.5 metres) under the Campbelltown (Sustainable City) Development Control Plan 2014 for dwellings and multi-dwelling developments. The height of the proposed development is not inconsistent with that of surrounding dwellings and the height of future dwellings anticipated by the applicable DCP height controls, and is considered to be satisfactory.

- Building bulk and scale/site coverage The scale of the overall development as measured by its floor space ratio is compliant with the provisions of the Affordable Housing SEPP, which allows the proposed infill affordable housing development to achieve the maximum floor space ratio applicable to residential development permissible on the land, plus a maximum bonus of up to 0.5:1. In this case, the floor space ratio applicable to the proposed development is 0.766:1 (see table above). The proposed development has a floor space ratio of 0.52:1, which is far less than that allowed. The proposed development would be comprised of two separate buildings, with three breaks in the first floor component of the development, which would ensure that the visual bulk of the development is minimised. Under the Campbelltown (Sustainable City) Development Control Plan 2014, there is no site coverage ratio for a multi-dwelling development, however were a multi-dwelling development proposed on the site that was not proposed under the Affordable Housing SEPP, no development standard would prevent such a development from having a site coverage ratio as per that of the proposed development. The proposed site coverage ratio is similar to that of existing multi-dwelling developments within the vicinity of the site. In this regard, the bulk, scale and site coverage of the proposed development is considered to be compatible with the existing and future character of the local area.
- Setbacks The front, side and rear setbacks of the proposed development are entirely consistent with those specified by the Campbelltown (Sustainable City) Development Control Plan 2014 for multi-dwelling developments, and entirely consistent with (or greater than) those of surrounding multi-dwelling developments. In this regard, the proposed development has a front setback of 5.5 metres, side setbacks of at least 1.5 metres, a ground floor rear setback of 5 metres, and a first floor rear setback of 10.05 metres. Accordingly, the setbacks of the proposed development are consistent with the character of the local area.
- The proposed setbacks allow for adequate spatial relief between the proposed dwellings and adjoining dwellings, noting that some of the dwellings adjoining the subject site have lesser rear setbacks (to the subject site) than what is currently required than the SCDCP. The proposed setbacks also allow for adequate spatial relief between the proposed dwellings and the street, as well as adequate solar access to the proposed and adjoining open space areas and adequate landscaping within the setback and private open space areas. In this regard, the setbacks of the proposed development are considered to be compatible with the existing and future character of the local area.
- Architectural style/materials The proposed dwellings would be constructed predominantly of brick and rendered brick, which would be visually compatible with the surrounding residential development, which contains a wide range of architectural styles and several examples of brick and rendered bricks dwellings. The proposed dwellings would have pitched roofs, which is compatible with those of surrounding dwellings. An architectural outcome similar to that proposed under this application would not be unexpected were a multi-dwelling development to be constructed on the site without the use of the Affordable Housing SEPP provisions. In this regard, the architectural style of the proposed development is considered to be compatible with the existing and future character of the local area.

 Landscaping/Fencing – The proposed landscaping treatment is satisfactory and adequately softens the visual impact of the development. Landscaping is proposed to be provided within the front, side and rear setback areas of the development, as well as a strip of landscaping spanning the full length of the site along the proposed common driveway. This is considered to be consistent with or greater than the landscaping provided by other developments in the vicinity of the site, and appropriate for the site in question.

Affordable Housing – 10 Year Restriction

Under the provisions of the Affordable Rental Housing SEPP, a consent authority must not consent to a development for the purpose of in-fill affordable housing unless conditions are imposed by the consent authority to the effect that:

- For 10 years from the date of the issue of the occupation certificate:
 - The dwellings proposed to be used for the purposes of affordable housing will be used for the purposes of affordable housing, and
 - all accommodation that is used for affordable housing will be managed by a registered community housing provider.
- A restriction will be registered, before the date of the issue of the occupation certificate, against the title of the property on which development is to be carried out, in accordance with section 88E of the *Conveyancing Act 1919*, that will ensure that the above requirements are met.

Accordingly, a condition will be imposed on the development consent requiring 21.6% of the gross floor area to be used for the purposes of affordable housing, and managed by a registered community housing provider, for a period of 10 years from the date of the issue of the occupation certificate. A condition of consent will also require the registration of a restriction on the title of the land that will ensure that these requirements are met.

2.2 Seniors Living Policy: Urban Design Guidelines for Infill Development

An assessment of the proposal against these guidelines (as required by the provisions of the Affordable Housing SEPP) is presented below:

Design Principle and Better Practices Required	Proposed	
Responding to Context		
Street Layout and Hierarchy What is the pattern and hierarchy of streets in the local area? Are there opportunities for introducing new streets or lanes? How does the built form vary between different types of streets? What are the patterns of planting in the streets and gardens? What are the typical front setbacks and building heights? Where are there anomalies to any of these patterns and why?	The site is large in the context of surrounding allotments, and there are other large allotments that could have a similar form of development constructed on them.	

	Provenue	
Design Principle and Better Practices Required	Proposed	
Block and Lots What are the predominant block and lot patterns? How have these changed over time (for example by subdivision and amalgamation)? What are the typical lot sizes, shape and orientation? Which lots are better for intensification and which are not? Is amalgamation necessary to support future development? Are there any corner sites, sites with two street frontages, or sites that are relatively wide or shallow and are therefore more suitable for intensification?	The subject site is large in comparison to surrounding sites, however there are other large sites in the surrounding area that have not been subdivided. In the surrounding area there are large sites that have had medium density developments constructed on them.	
Built Environment Look for buildings that have a good relationship to the street or characteristics that contribute positively to neighbourhood character. Do buildings have a consistent scale and massing? Is there a regular rhythm of spaces between them? What are the atypical buildings? Should particular streetscapes and building types by further development or discouraged?	A two-storey development is in keeping with the character of the surrounding developments. The proposed front setback is 5.5 metres, which is similar to that of adjacent properties. The middle units (2-7) have been provided with gaps in the two-storey component to reduce massing.	
Trees Where are the significant trees and landscapes in the neighbourhood? Are there street trees, and is so what species and spacing? What are the patterns of planting in the front and rear gardens? Could new development protect and enhance existing vegetation?	A flora and fauna assessment has determined that the existing trees on the site are not significant enough to warrant being retained. The proposed landscaping would enhance the development and consists of locally endemic species.	
Policy Environment What are the key characteristics of an area as identified by the Council? How might these be accommodated in the design of new development for the area? Are there any special character areas, view corridors, vistas, landscaped areas, or heritage buildings or precincts that should be considered?	The proposed development is consistent with the applicable DCP setback and height controls, and similar in character to recently constructed surrounding multi-dwelling development.	
Site Planning and Design		
 Objectives: To minimise the impact of new development on neighbourhood character To retain existing natural features of the site that contribute to neighbourhood character To provide high levels of amenity for new dwellings To maximise deep soil and open space for mature tree planting, water percolation and residential amenity To minimise the physical and visual dominance 	The proposed development would be consistent with the existing neighbourhood character, which contains multi-dwelling developments. Retaining existing vegetation would not be practical or necessary. Proposed dwellings would have high level of amenity - north facing private yards with ample solar access and landscaping. Ample amount of open space and deep soil zones would be provided. Most car parking would be screened by	
 To minimise the physical and visual dominance of car parking, garaging and vehicular circulation 	Most car parking would be screened by landscaping and buildings.	

De	Design Principle and Better Practices Required Proposed		
•	To provide housing choice through a range of dwelling sizes.	A range of dwelling sizes is proposed	
Ge	eneral		
•	Site design should be driven by the need to optimise internal amenity and minimise impacts on neighbours. These requirements should dictate the maximum development yield	Private and common open space is sufficient. Setbacks to neighbouring properties are satisfactory.	
•	Cater for the broad range of needs from potential residents by providing a mix of dwelling sizes and dwellings both with and without assigned car parking. This can also provide variety in massing and scale of built form within the development.	Mix of dwelling sizes provided. All proposed dwellings have car parking.	
Bu	lilt Form		
•	Locate the bulk of development towards the front of the site to maximise the number of dwellings with frontage to a street Parts of the development towards the rear of the site should be more modest in scale to limit the impacts on adjoining properties	Two dwellings face the street, which is the maximum number of dwellings that could be located at the front of the site. Rear portion of development is two storeys – consistent with height limit.	
•	Design and orient dwellings to respond to		
	 environment conditions: Orient dwellings on the site to maximise solar access to living areas and private open space 	Solar access to dwellings is compliant with ARH SEPP.	
	 Locate dwellings to buffer quiet areas within the development from noise. 	The development would not be adversely affected by noise.	
Tr	ees, Landscaping and Deep Soil Zones		
•	Maintain existing patterns and character of		
	 gardens and trees: Retain trees and planting on the street and in front setbacks to minimise the impact of new development on the streetscape Retain trees and planting at the rear of the lot to minimise the impact of new development on neighbours and maintain 	There are no existing trees that are located in what would be the front setback or rear setbacks of the development. It is not practical to retain existing trees on the subject site. The trees are not significant enough to warrant them being retained.	
	 the pattern of mid-block deep soil planting Retain large or otherwise significant trees on the other parts of the site through sensitive 	Existing trees are inconveniently located and not significant, and cannot be retained.	
	 site planning Where it is not possible or desirable to retain existing trees, replace with new mature or semi-mature trees. 	Several new mature and semi-mature trees to be provided.	
•	 Improve amenity by increasing the proportion of the site that is landscaped area by: Increasing the width of the landscaped areas between the driveways and boundary fences, and between driveways and new 	Adequate landscaping is to be provided between driveways and fences and between driveways and dwellings.	
	 dwellings Providing pedestrian paths Reducing the width of driveways Providing additional private open space above the minimum requirements Providing communal open space Increasing front, rear and/or side setbacks Providing small landscaped areas between 	Pedestrian access along driveway is adequate. Driveway widths are not excessive. Private open space for some units is above the minimum requirements. Communal open space is to be provided. Front setbacks compliant with DCP. Adequate landscaping provided between	

Des	sign Principle and Better Practices Required	Proposed
ä	 garages, dwelling entries, pedestrian paths, driveways, etc. Provide deep soil zones for absorption of run-off and to sustain vegetation, including large trees: It is preferable that at least 10% of the site area is provided as a single area at the rear 	garages, dwelling entries, pedestrian paths, driveways, etc. Adequate deep soil zones provided. 5% of the site area would be provided as a single area at the rear of the site.
	of the site, where there is opportunity to provide a mid-block corridor of trees within a neighbourhood - Where the pattern of neighbourhood	Deep soil zones are provided within the front
	development has deep soil planting at the front of the site, it may be desirable to replicate this pattern. Minimise the impact of higher site cover on	setback, and within rear courtyards.
	 stormwater runoff by: Using semi-pervious materials for driveways, paths and other paved areas 	Adequate amount of pervious area on the site to limit stormwater runoff.
	- Using on-site detention to retain stormwater.	On-site detention not required.
• (1 (king, garaging and vehicular circulation Consider centralised parking in car courts to reduce the amount of space occupied by driveways, garages and approached to garages	10 car parking spaces to be provided in garages and four uncovered, including two visitor spaces.
	Where possible maintain existing crossing and driveway locations on the street.	Better solar access outcome from new driveway location and building locations.
Imp	acts on Streetscape	
• -	ectives: To minimise impacts on the existing streetscape and enhance its desirable characteristics To ensure that new development, including the built form, front and side setbacks, trees, blanting and front fences, is designed and scale	Streetscape presentation satisfactory – integrates with existing development. Setbacks and landscaping would be consistent with DCP and sympathetic to adjoining development.
6	appropriately in relation to the existing streetscape	
ł	To minimise dominance of driveways and car bark entries in the streetscape	Landscaping would screen driveways and parking areas. Driveway contains bend to avoid gun barrel effect.
	To provide a high level of activation and passive surveillance to the street.	Proposed front dwelling faces street and adequately activates street frontage.
	neral	
	Respond to the desired streetscape character by:	
	 Locating and designing new development to 	Proposed development would be sympathetic to
	by sympathetic to existing streetscape	existing streetscape patterns (building siting,
	patterns (building siting, height, separation, driveway locations, pedestrian entries, etc.)	height, separation, driveway locations, pedestrian entries etc).
	 Providing a front setback that relates to 	Front setback would be equal to or greater than
P	adjoining development. It Form	those of adjoining developments.
	Reduce the visual bulk of a development by:	
-	 Breaking up the building massing and articulating building facades 	Massing is broken up by providing gaps in two storey component and having two separate buildings.
-	 Allowing breaks in rows of attached dwellings 	Breaks proposed in two storey component of front building, and break provided between front and back buildings.

Design Principle and Better Practices Required	Proposed
 Using variation in materials, colours and openings (doors, windows and balconies) to order building facades with scale and proportions that respond to the desired contextual character 	Variety of colours and materials is proposed, and openings provide sufficient fenestration.
 Setting back upper levels behind the front building façade 	This is not required by the DCP.
 Where it is common practice in the streetscape, locating second storeys within the roof space and using dormer windows to match the appearance of existing dwelling houses 	Second storeys within roof space and dormer windows are not prevalent within the existing streetscape.
 Reducing the apparent bulk and visual impact of a building by breaking down the roof into smaller roof elements 	The roof form has sufficient articulation.
 Using a roof pitch sympathetic to that of existing buildings in the street Avoiding uninterrupted building facades including large areas of painted render. 	The roof pitch of the dwellings would be consistent with buildings in the street. Building form would be broken up – two separate buildings are proposed, and gaps in the two-storey component.
 Trees, Landscaping and Deep Soil Zones Retain existing trees and planting in front and rear setbacks and the road reserve. Where this is not possible or not desirable use new planting in front setback and road reserve, and plant in front of front fences to reduce their impact and improve the quality of the public domain. 	There are no existing trees that are located in what would be the front setback or rear setbacks of the development. New planting is proposed to take place within the front setback of the development and within the courtyards of the dwellings.
 Residential Amenity Clearly design open space in front setbacks as either private or communal open space Define the threshold between public and private space, for example by level change, change in materials, fencing, paving and/or signage Design dwellings at the front of the site to address the street 	Open space within front setback would belong to front dwelling. Change between private and public space defined by fence. The front dwelling faces Lyndia Street.
 Provide a high quality transition between the public and private domains by: Designing pedestrian entries where possible to be directly off the street 	Entries to individual dwellings from street not practical due to site shape. Unit 1 would have its own entry.
 For rear residents, providing a pedestrian entry that is separate from vehicular entries Designing front fences to provide privacy where necessary, but also to allow for surveillance of the street orienting mailboxes obliquely to the street to reduce visual clutter 	This would not be practical. Front fence would allow for privacy but also for surveillance and good aesthetic outcomes
 and the perception of multiple dwellings Locating and treating garbage storage areas with switchboards so that their visual impact on the public domain is minimised. 	Waste storage areas would be screened by landscaping.
Parking, garaging and vehicular circulation	
 Avoid unrelieved, long, straight driveways that are visually dominated by: Varying the alignment of driveways to avoid 	Bend in driveway eliminates gun barrel effect.
a 'gun barrel' effect Setting back garages behind the 	Garages would not be visible from the street.

Design Principle and Better Practices Required	Proposed
predominant building line to reduce their visibility from the street - Considering alternative site designs that	The full length of the driveway would not be
avoid driveways running the length of the siteMinimise the impact of driveways on	visible from the street.
 streetscape by: Terminating vistas with trees, vegetation, open space or a dwelling, not garages or parking Using planting to soften driveway edges 	Landscaping within the front setback would obscure view of the full driveway length. Proposed planting softens driveway edges. Not necessary.
 Varying the driveway surface material to break it up into a series of smaller spaces (for example delineate individual dwellings) Limiting driveway widths on narrow sites to single carriage width with passing points Providing gates at the head of driveways to 	The driveway width is appropriate as its full length is obscured by landscaping. Gates at head of driveway not necessary, however front fencing is proposed.
 minimise visual pull of the driveway Where basement car parking is proposed, minimise the impact of the entry by: Reducing the width where possible to single vehicle width rather than double 	No basement car parking is proposed.
 Locating it to one side of the site, not at the centre where it is visually prominent Recessing it from the main building façade Where a development has a secondary street frontage, providing vehicular access from the secondary street 	
 Providing security doors to avoid the appearance of a 'black hole' in the streetscape Returning façade material into the visible area of the car park entry. Locate or screen all parking to minimise visibility from the street. 	No car parking would be visible from the street.
Impacts on neighbours	
 Objectives: To minimise impacts on the privacy and amenity of existing neighbouring dwellings To minimise overshadowing of existing dwellings and private open space To retain neighbours' views and outlook to existing mature planting and tree canopy To reduce apparent bulk of development and its impact on neighbouring properties To provide adequate building separation. 	Privacy/amenity satisfactory – setbacks are sufficient. Overshadowing of adjoining dwellings would be minimal. Existing trees would not be retained as they are not significant enough. Bulk would be broken up by having two distinct buildings and gaps in the two storey component of the front building. Adequate building separation proposed.
Built Form	
 Design the relationship between buildings and open space to be consistent with the existing patterns in the block: 	Surrounding multi-dwelling developments have similar building/open space relationships.
 Where possible maintain the existing orientation of dwelling 'fronts' and 'backs' Where the dwelling must be orientated at 90 degrees to the existing pattern of 	Not possible as the site is a different size and alignment to all adjoining properties.  visual impacts Position driveways so as to be a buffer between new and existing adjacent dwellings. 	The driveway would form a buffer between new and existing adjacent dwellings.		
Internal Site Amenity			
Objectives:			
 To provide quality useable private and communal open spaces for all residents To provide dwellings that have distinct identity and safe entries 	Communal open space is useable, private and contains facilities. All dwellings would have safe entries.		
 To provide safe and distinct pedestrian routes to all dwellings and communal facilities 	Pedestrians would access the dwellings via the driveway.		
 To ensure adequate solar access to living areas and private open space To reduce the dominance of parking, garaging and vehicular circulation space on the internal character of new development. 	Each dwelling would have adequate solar access to living areas and private open space. Car parking spaces would not be visible from the street. A bend has been proposed in the driveway to eliminate gun barrel effect.		
Built form			
Design dwellings to maximise solar access to	Each dwelling would have adequate solar		
 living areas and private open spaces In villa or townhouse style developments, provide dwellings with a sense of individual identity through building articulation, roof form and other architectural elements, and through the use of planting and building separation 	access to living areas and private open space. Variety of colours and materials are proposed to be used. Variation to building form between dwellings is proposed.		
 Provide buffer spaces and/or barriers between the dwellings and driveways, or between dwellings and communal areas 	Buffer planting to be provided between the dwellings and the driveway.		
 Use trees, vegetation, fencing, or screening devices to establish curtilages for individual dwellings 	Vegetation and fencing establishes curtilages of dwellings.		
 Design dwelling entries so that they are clear and identifiable from the street or driveway Provide a buffer between public/communal 	Dwelling entries are clear and identifiable from the driveway. Landscaping and fencing provided as buffer.		
space and private dwellings			
Provide a sense of address for each dwelling	Sense of address provided for each dwelling by using different styles.		
Dwellings are orientated to not look directly into other dwellings.	Fences would prevent overlooking between dwellings.		
 Parking, Garaging and Vehicular Circulation Locate habitable rooms, particularly bedrooms, away from driveways, parking areas and pedestrian paths: Where this is not possible use physical separation, planting, screening devices or lowyros to achieve adequate privacy. 	Some bedrooms are located adjacent to the driveway, however there would be a landscape buffer between the bedrooms and driveway.		
 louvres to achieve adequate privacy. Avoid large uninterrupted areas of hard surface (driveways, garages, walls). Small areas of planting can break these up and soften their 'hard edge' appearance 	Sufficient planting would be provided to break up hard edges.		
 Screen parking views and outlooks from dwellings Reduce the dominance of areas for vehicular circulation and parking by considering: 	Views of parking spaces from dwellings would be screened by landscaping.		
 Single rather than double width areas with passing bays 	Double aisle required due to number of dwellings proposed. Communal parking provided in addition to		

Design Principle and Better Practices Required	Proposed
 Communal car courts rather than individual garages Single rather than double garages Tandem parking or a single garage car port in tandem The provision of some dwellings without any car parking for residents without cars. 	single garages. No double garages. All single garages – no double garages. Tandem parking provided for units. All dwellings have car parking.
Residential Amenity	
 Provide distinct and separate pedestrian and vehicular circulation on the site: Where this is not possible shared driveway/pedestrian paths should be wide enough to allow a vehicle and a wheelchair to pass safely 	A vehicle and a wheelchair would be able to pass along the main driveway section.
 Provide pedestrian routes to all public and semi-public areas including lobbies, dwelling entries, communal facilities and visitor parking spaces. 	Sufficient pedestrian access is available to all dwellings and communal open space.
 Ensure that adequate consideration is given to safety and security by: Avoiding ambiguous spaces in building and dwelling entries that are not obviously 	Satisfactory – no ambiguous spaces proposed.
 designated as public or private Minimising opportunities for concealment by avoiding blind or dark spaces between buildings, near lifts and foyers and at the entrance to or within indoor car parks 	No concealment opportunities proposed. Distinction between public and private spaces is
 Clearly identifying thresholds between public and private spaces (for example by level change, change in materials, fencing, planting and/or signage). Provide private open space that: 	obvious.

 dwellings Uses screening for privacy but also allows casual surveillance when located adjacent to public or communal areas (including streets 	Private open space areas would be screened by fences.
 and driveways) Provides both paved and planted areas when located at ground level 	Paved and planted areas would be provided.
 Retains existing vegetation where practical Uses pervious pavers where private open space is predominantly hard surfaced, to allow for water percolation and reduced runoff. 	Not practical to retain existing vegetation. Private open space is predominantly grass.
 Provide communal open space that: Is clearly and easily accessible to all residents and easy to maintain Incorporates existing mature trees and vegetation to provide additional amenity for 	Easily accessible to all residents and easy to maintain. Landscaping provided in communal open space area

Design Principle and Better Practices Required	Proposed
 all residents Includes shared facilities such as seating areas and barbeques to permit resident interaction. Site and/or treat common service facilities such as garbage collection areas and switchboard to reduce their visual prominence to the street or to any communal open space. 	Play equipment to be provided. Waste storage areas have satisfactory appearance from communal areas, and would be screened by landscaping.

The table above demonstrates that the proposal is consistent with the Seniors Living Policy: Urban Design Guidelines for Infill Development.

2.3 Campbelltown (Urban Area) Local Environmental Plan 2002

The subject site is zoned 2(b) - Residential B Zone under the provisions of Campbelltown (Urban Area) Local Environmental Plan 2002. The proposed development is defined as multi-dwelling housing and is permissible with Council's development consent within the zone.

The proposal is consistent with several zone objectives, particularly:

- (a) To make general provision for land to be used for housing and associated purposes
- (b) To permit the development of a range of housing types
- (c) To encourage a variety of forms of housing that are higher in density than traditional dwelling houses, including accommodation for older people and people with disabilities, in locations which are accessible to public transport, employment, retail, commercial and service facilities
- (d) To allow development which:
 - (i) Is compatible with residential use
 - (ii) Is capable of visual integration with the surrounding buildings
 - (iii) Serves the needs of the surrounding population without conflicting with the residential intent of the zone
 - (iv) Does not place demands on services beyond the level reasonably required for residential use.

Except as otherwise provided by this plan, consent must not be granted for development on land within this zone unless the consent authority is of the opinion that carrying out the proposed development would be consistent with one or more of the objectives of this zone.

A further objective of this zone is to encourage a high quality standard of development which is aesthetically pleasing, functional and relates sympathetically to nearby and adjoining development.

2.4 Draft Campbelltown Local Environmental Plan 2014

The application was lodged after the commencement of the exhibition of the Draft Campbelltown Local Environmental Plan 2014 on 12 June 2014. Accordingly, under Section 79C(1)(a)(ii), the provisions of the draft Plan must be taken into consideration in the assessment of the application. An assessment of the application against the relevant provisions of the Plan is presented below:

Zoning

The draft zoning of the subject property under the Draft CLEP 2014 is R2 – Low Density Residential. Multi-dwelling housing is permissible within the R2 zone.

The objectives of the R2 zone are as follows:

- To provide for the housing needs of the community within a low density residential environment
- To enable other land uses that provide facilities or services to meet the day to day needs of residents
- To enable development for purposes other than residential only if that development is compatible with the character of the living area and is of a domestic scale
- To minimise overshadowing and ensure a desired level of solar access to all properties
- To facilitate diverse and sustainable means of access and movement.

Height of Buildings

Under the draft CLEP 2014, the maximum building height applying to the subject site is 8.5 metres. The proposed development would comply with this draft standard.

Minimum lot size for residential development and certain other development

Under the draft CLEP 2014, multi-dwelling housing in the R2 zone would require a minimum lot size of 1,000m². The subject site would comply with this standard as it has a site area of 1,821m².

Floor space ratio

The proposed floor space ratio under the draft CLEP for multi-dwelling housing in the R2 zone is 0.45:1. However, the floor space ratio for in-fill developments under the Affordable Housing SEPP would prevail over the draft CLEP's floor space ratio standards.

The above assessment shows that the proposed development is consistent with the draft standards of the draft CLEP 2014.

2.5 Campbelltown (Sustainable City) Development Control Plan 2014

Part 2 - Requirements Applying to All Types of Development

The general provisions of Part 2 of the Plan apply to all types of development. Compliance with the relevant provisions of Part 2 of the Plan is discussed as follows:

Views and Vistas – The proposed development would not affect any of Campbelltown's important views and vistas.

Sustainable building design – A BASIX certificate has been submitted in respect of the proposed development, and rainwater tanks are included as part of the proposal. BASIX commitments have been shown on the plans. The relevant energy, water and thermal comfort targets would be met by the proposed development.

7 Lyndia Street, Ingleburn

Landscaping – The landscape plan submitted makes provision for an adequate amount of landscaping within the front setback of the development, within the courtyards of the dwellings and along the common driveway. The proposed landscaping incorporates a mixture of plants and trees. The majority of the species to be used have been selected from the Campbelltown Native Gardening Guide.

Cut, fill and floor levels – The amount of cut and fill would not exceed 1.0 metre above or below natural ground level, consistent with the requirements of the SCDCP. The proposed development would be constructed at or near natural ground level throughout the site.

Waste Management – The application was referred to Council's Waste and Recycling Services section for assessment of the waste management and disposal aspects of the proposed development. Council's Waste Officer advised that the site has insufficient street frontage for kerbside presentation of both general waste bins and recycling/organics bins for the number of dwellings proposed. Accordingly, Council's garbage truck will need to access the complex to collect general waste, which would be stored in two 1,100 litre waste bins. Residents would present their own recycling and organics bins to the street on alternate weeks for collection. A bin storage facility is proposed to be located towards the front of the site, which would be screened by landscaping. The applicant will be required to demonstrate that the driveway would be of sufficient thickness to accommodate a Council garbage truck without damaging the concrete, and provide public indemnity insurance to Council, indemnifying Council in respect of any damage to the concrete attributable to Council's garbage trucks. Recommended conditions of consent addressing these matters have been included in Attachment 1.

Stormwater – The proposed dwellings would drain to the kerb in Michael Place via an easement that passes through Nos. 7 and 9 Michael Place. The application was referred to Council's Flooding Engineers and Development Engineers, and was found to be satisfactory subject to the imposition of certain conditions of consent, which have been included within the recommended conditions in attachment 1.

Part 3 - Dwelling Houses, Narrow Lot Dwellings, Multi Dwellings and Residential Subdivision

Part 3 - Dwelling Houses, Narrow Lot Dwellings, Multi Dwellings and Residential Subdivision of the SCDCP sets out development standards for certain residential development within the City of Campbelltown. An assessment of the proposed development against the relevant development standards is detailed below:

Control	Required	Proposed	Compliance
Streetscape design requirements	Building design to complement character of streetscape.	Building design complements character of streetscape (including other two storey dwellings).	Yes
	Built form relates to natural landform / setting.	Built form relates to natural landform / setting.	Yes
	On-site parking to reduce visual prominence.	Garages not considered to be visually prominent.	Yes

Control	Required	Proposed	Compliance
	Garage doors to be no wider than 50% of the width of the building.	Garage doors not visible from street.	Yes
Architectural requirements for multi dwellings	A distinctive architectural outcome that unifies the range of building elements and diversity within the development and which also harmonises with surrounding development.	The front dwelling facing Lyndia Street has a high quality design with a range of building elements, which would harmonise with surrounding development.	Yes
	Incorporation of variations in roof heights and wall planes to avoid long unbroken ridge lines.	Variations in roof heights and distinct breaks in the first floor component break up ridge lines.	Yes
	Incorporation of façade shifts and articulation, varied materials and colours in order to avoid duplication of the same building elements.	Each dwelling has architectural differences when viewed from the common driveway.	Yes
	Provision of windows and active spaces in the building ends, to provide additional security and visual interest.	The proposed dwellings have a sufficient amount of windows to create visual interest and passive surveillance.	Yes
Building Height	Must not exceed two storeys.	Proposed development is two storeys.	Yes
	Height shall not exceed 7.2m at the upper most ceiling measured from existing ground level.	Maximum height to upper most ceiling from ground level would be 5.6m.	Yes
	Height shall not exceed 9.5m at the upper most roof height measured from existing ground level.	Maximum height to upper most roof height from ground level is 6.8m.	Yes
Car Parking and Access	Minimum of one undercover garage space per dwelling.	All dwellings have an undercover garage space.	Yes
	One visitor space for every two units (six required for 11 dwellings).	Two designated visitor car parking provided.	No, however the proposal complies with the car parking provisions of the Affordable Rental

Control	Required	Proposed	Compliance
			•
	Parking space dimensions of 2.5m by 5.5m, with end spaces having a width of 2.7m.	All spaces are 2.5m wide. End spaces have width of 2.7m.	Housing SEPP Yes
	Garage space – minimum dimensions of 3m X 6m.	All dwellings have 3m X 6m garages.	Yes
	Driveway grades to comply with AS2890.1.	Capable of complying.	Yes
	Minimum driveway width at street kerb for access to three or more dwellings – 5m.	5m (to be widened to 5.5m for two-way access).	Yes
	Multi dwellings shall not incorporate vehicular access that utilises any gate structure /mechanism other than access to basement car parking.	No gates proposed.	Yes
	Driveways longer than 30m in length as viewed from the street shall be avoided.	The driveway contains a bend so as not to appear longer than 30m when viewed from the street.	Yes
Visual privacy	 Windows of habitable room/balcony shall not directly face adjoining balcony/window/open space within 6m. Any window of a habitable room located on an upper level shall: be offset by 2m to limit views between balconies and windows; or have a sill height of 1.7m above the floor level; or be splayed to avoid direct views between windows; or have fixed translucent glazing in any part of the window within 1.7m of the floor level 	All first floor north- facing bedrooms would be fitted with external louvered privacy screens, that are only able to be angled upwards or horizontally (not downwards) to prevent overlooking of adjoining properties. The proposed balconies of dwellings 1 and 9 face towards the street and do not directly overlook adjoining properties.	Yes

Control	Dominod	Dranaad	Compliance
Control	Required	Proposed	Compliance
Solar access	Living areas to have northern orientation.	Living areas have northern orientation	Yes
	20m ² of private open space to receive three hours of solar access on 21 June between 9.00am and 3.00pm.	Open space of all dwellings to receive compliant solar access.	Yes
	Development shall have regard to the solar access of adjoining properties.	All adjoining dwellings would continue to receive ample solar access to their living areas and open space areas.	Yes
Floor Space Ratio	0.45:1	0.52:1	No, however the proposal complies with the maximum floor space ratio of 0.776:1 applicable under the Affordable Rental Housing SEPP
Bedroom to floor space ratio	0.4:1	All dwellings <0.4:1	Yes
Landscaping	No more than 30% of the area forward of the building alignment shall be hardstand area.	27% hardstand	Yes
	Minimum 20% of site area available for deep soil planting.	Greater than 20% of the site area would be available for deep soil planting.	Yes
Allotment size/location	Min. 700m²	1821m ²	Yes
	Not within 50m of cul- de-sac head	Not within 50m of cul- de-sac head	Yes
Allotment width	Min. of 22.5m at 5.5m back from front boundary.	20.115m	No
	Min. 10m at street kerb between extended side boundaries.	Greater than 10m	Yes
Density	Two dwellings for the first 700m ² and one dwelling per 300m ² thereafter (minimum of 3,400m ² required for 11 dwellings).	1821m²	No, however the proposal complies with the minimum site area and maximum floor space ratio applicable under the Affordable Rental Housing SEPP
Setback from Primary	5.5m	5.77m	Yes
Street Boundary Garage Setback	6m	6m	Yes
Side setbacks	0.9m ground floor 1.5m first floor	1.5m 1.5m	Yes Yes

Control	Required	Proposed	Compliance
Rear setback	5m ground floor 10m first floor	Minimum of 5m Minimum of 10m	Yes Yes
Private Open Space	Located behind primary building setback.	Provided behind prescribed building alignment.	Yes
	Minimum area of 60m² per unit.	All dwellings except one have less than 60m ² of open space.	No
	Minimum width of 3m.	Min. width > 3m for each unit.	Yes
	Minimum levelled area of 5m x 5m.	Minimum area of 5m x 5m not provided for most dwellings.	No
	Direct access from living room.	All dwellings have direct access from living rooms.	Yes
	Any communal open space or recreation facility shall be designed and constructed to:		
	 Ensure safe access by the occupants 	Safe access provided	Yes
	ii. Prevent access by members of the	Not visible from the street – far from street	Yes
	public iii. Provide for the safety and wellbeing of children.	Play equipment provided. Natural surveillance possible.	Yes
Waste Storage	Development incorporating more than six dwellings shall make provision for an appropriately sized communal waste facility that is centrally located and provides convenient access for occupants and collection contractors.	Communal waste facilities are proposed for general waste, and the dwellings would store their own recycling and organic waste bins. The communal waste bins will be collected onsite.	Yes
	Bin storage areas must be:		
	Behind primary building alignment	Behind primary building alignment	Yes
	No more than 25m from the street	Less than 25m from street	Yes
	Covered, contain a	Condition of consent	Yes

Control	Required	Proposed	Compliance
	hose connection and impervious floor connected to sewer	for communal waste facility to be covered and contain a hose and sewer connection.	
	 More than 3m from opening in dwelling or property boundaries 	More than 3m from proposed dwellings, however located adjacent to property boundary.	No, however bin storage room location selected to satisfy Council's waste collection requirements
	Designed to complement the development	Condition of consent to use same bricks as the dwellings	Yes
	Sufficient to accommodate a 140L bin and two 240L bins.	Sufficient space to accommodate three bins per dwelling is provided.	Yes
Subdivision of multi dwelling housing	Must be strata title.	Strata subdivision of the proposed dwellings is proposed.	Yes

Private Open Space

The SCDCP states that each dwelling in a multi-dwelling development shall have a minimum area of $60m^2$, and shall include a minimum area of 5.0 metres x 5.0 metres. The subject proposal fails to comply with these standards. In this regard, only one of the nine proposed dwellings would have a private open space area that is greater than $60m^2$, and only two of the nine proposed dwellings would have an area of 5.0 metres x 5.0 metres within their private open space areas.

The Affordable Rental Housing SEPP contains no development standard in respect of the minimum size or width of private open space for multi-dwelling developments. However, the Urban Design Guidelines for Infill Development, which the SEPP requires that Council consider, refer to the private open space requirements of the Housing for Seniors of People with a Disability SEPP (a minimum of 15m² per dwelling with a minimum area of 3.0 metres x 3.0 metres). In this regard, compliance with the lesser standards of the Urban Design Guidelines for Infill Development would appear to be consistent with the objectives of the Affordable Housing SEPP, as less private open space would be likely to make a dwelling more affordable. As the proposed development complies with the private open space standards referred to by the Urban Design Guidelines for Infill Development, Council should not insist on the proposed development achieving compliance with the private open space standards of the SCDCP, and it is considered in this instance that the proposed variation should be accepted.

Allotment Width

The SCDCP states that a multi-dwelling development containing three or more dwellings shall only be permitted on a site that has a width at the front building line of 22.5 metres. The subject site has a width of 20.115 metres, and therefore fails to comply with the subject development standard. It should be noted that the Affordable Rental Housing SEPP has no site width standard for in-fill multi-dwelling housing.

Council's site width standard aims to ensure that a multi-dwelling development has sufficient space for a common driveway, a row of dwellings, and the private open space areas to be sited in a linear configuration that is perpendicular to the street. The site width control is particularly important, given that Council's private open space standard for multi-dwellings requires each dwelling to have an area of 5.0 metres x 5.0 metres. However in the present case, where affordable housing is proposed under the Affordable Rental Housing SEPP, the Urban Design Guidelines for Infill Development refer to the private open space requirements of the Housing for Seniors of People with a Disability SEPP (minimum of 15m² with a minimum area of 3.0 metres x 3.0 metres). As the required width of private open space is less than that stipulated under Council's DCP, the site width becomes less critical. The application demonstrates that the site is capable of accommodating a common driveway, a row of dwellings, and private open space for each dwelling that complies with the relevant numerical standards, in a configuration that allows for ample solar access, landscaping and adequate vehicular manoeuvring. Therefore, it is considered not unreasonable to vary the allotment width requirement in this instance.

Part 11 – Vegetation and Wildlife Management

The proposed development involves the removal of 13 trees from the site. An arborist report submitted with the application identifies 18 trees as part of the assessment that could be impacted by the proposal (13 on the subject site, two within the Lyndia Street road reserve, and three located in the adjoining residential properties). The report contains recommendations for minimising impacts on the trees to be retained.

In accordance with Part 11 of the SCDCP 2014, the removal of, or impact on, native flora or fauna requires that a Flora and Fauna Assessment be prepared by an appropriately qualified person in accordance with the Office of Environment and Heritage's Threatened Species Survey and Assessments Guidelines and Field Survey Methods and submitted to Council for assessment. A Flora and Fauna Assessment was prepared by the applicant's environmental consultant and submitted to Council for review.

The flora assessment determined the site consisted of two vegetation communities, Landscape Gardens, and Cumberland Plain Woodland (CPW) Canopy Only.

The CPW (Canopy Only) vegetation community occurs mostly in the north-western portion of the subject site. CPW is listed as a Critically Endangered Ecological Community (CEEC) under the *Threatened Species Conservation Act* (TSC 1995) and also under the *Environment Protection and Biodiversity Conservation Act* (EPBC 1999). This vegetation community consists of a total of eight trees that are representative of CPW. Shrub and ground layers indicative of CPW have been cleared and are not present at the site. The habitat assessment determined that the subject site does not provide suitable or likely habitat for any threatened flora species. The flora assessment concludes that the loss of the eight trees representative of CPW at the subject site would not be considered to cause a significant impact upon the CEEC, and that a species impact statement is not required for the proposal.

The fauna assessment was undertaken based on desktop analysis, threatened species records and habitat attributes observed during the flora assessment. Particular attention was given to search for potential threatened fauna species habitat, including Cumberland Plain Land Snail habitat, presence of hollow bearing trees, and any other likely important habitat in the immediate surrounds.

The fauna assessment found the following potential habitat present on site:

- One hollow bearing tree present with one small hollow with an opening of approximately 5cm observed in a broken branch
- Nectar producing tree species, principally Ironbarks, Redgums and Grey Box.
- Six E. tereticornis koala feed species. (It was noted that these were not accessible to Koala due to urban development and fencing)

Threatened fauna species considered to have potential suitable habitat present within the site included Grey-headed Flying-fox (potential), Little Lorikeet (low), Swift Parrot (low), and the Eastern Bentwing-bat (unlikely).

The fauna assessment determined that there was no likely breeding or otherwise important habitat present for the above considered threatened fauna species, and concluded that there would be no likely significant impact on any threatened fauna species with potential to occur on site.

The Flora and Fauna Assessment recommends that any landscaping on site should include species native to the CPW CEEC and include ground covers to limit erosion and to encourage local fauna use. It also recommends that the removal of the single hollow bearing tree be undertaken under the guidance of a fauna ecologist or experienced wildlife carer so that any fauna, if present, may be effectively recovered and relocated. The recommendations of the flora and fauna assessment report have been incorporated into the recommended conditions of consent in Attachment 1.

The Flora and Fauna Assessment was reviewed by Council's Environmental Planning section and was found to be satisfactory.

3. Public Participation

The application was notified to nearby and adjoining residents for two separate 14 day periods (one for the original proposal and one for the amended plans). Council received written individual submissions from the occupants of 58 properties. Council also received a petition against the proposal with 102 signatures from the residents of 60 properties, many of whom also wrote an individual submission. The submissions and petition raised the following issues:

Issue - The proposed development has insufficient car parking. Each proposed dwelling could have two or more cars. Residents of the development will have to park on the street, and this would cause traffic congestion and safety problems.

Comment - The Affordable Housing SEPP specifies that Council cannot refuse a development application on the basis of car parking if at least 1.5 parking spaces are provided for each dwelling containing three or more bedrooms. Based on the nine dwellings proposed, each with three or four bedrooms, 14 car parking spaces are required, and 14 car parking spaces are proposed to be provided. Council therefore cannot insist on additional on-site car parking being provided.

Issue - The proposed development would cause an increase in traffic, which would affect the safety of children walking to school. Children will no longer be able to play in the street.

Comment - The increase in traffic volumes from the proposed development would not be so great as to affect safety, and would still be within the levels expected for a local road. An equivalent increase in traffic volumes within the vicinity of the site could occur as a result of several smaller permissible developments. The likely increase in traffic movements expected as a result of the development is not a sufficient reason for refusal.

Issue - The proposed driveway is dangerous as it has only a single lane for entering and exiting the development.

Comment - A recommended condition of consent would require the front portion of the driveway to be widened to 5.5 metres, in order to allow two-way vehicular access into and out of the site.

Issue - Construction of the development would create safety issues for children walking past the site to school.

Comment - The developer would be required to secure the site with fencing in accordance with the relevant legislation.

Issue - The frontage of the site is too narrow and there is insufficient space for the waste bins to be presented for kerbside collection.

Comment - The application was referred to Council's Waste and Recycling Services section for assessment of the waste management and disposal aspects of the proposed development. Council's Waste Officer advised that the site has insufficient street frontage for kerbside presentation of both general waste bins and recycling/organics bins for the number of dwellings proposed. Accordingly, Council's garbage truck will need to access the complex to collect general waste, which would be stored in two 1,100 litre waste bins. Residents would present their own recycling and organics bins to the street for collection. A bin storage facility is proposed to be located towards the front of the site, which would be screened by landscaping. There is sufficient width at the kerb for the presentation of nine bins, which is the maximum number of bins that would be required to be presented at the kerb at any one time.

Issue - The proposed children's playground (common open space area) within the development is too small. The children may therefore play in the street, which increases the chance of a car accident.

Comment - There is no minimum size applicable for a common open space area. The size of the proposed common open space area is sufficient to allow play equipment to be installed.

Issue - There is environmentally sensitive vegetation on the site, which provides habitat for wildlife. The removal of the vegetation would remove the habitat and harm the wildlife.

Comment - The flora assessment submitted with the application determined that the site contains Cumberland Plain Woodland (CPW) Canopy Only. The CPW (Canopy Only) vegetation community occurs mostly in the north-western portion of the subject site. CPW is listed as a Critically Endangered Ecological Community (CEEC) under the *Threatened Species Conservation Act* (TSC 1995) and also under the *Environment Protection and Biodiversity Conservation Act* (EPBC 1999). This vegetation community consists of a total of eight trees that are representative of CPW. Shrub and ground layers indicative of CPW have been cleared and are not present at the site. The habitat assessment determined that the subject site does not provide suitable or likely habitat for any threatened flora species. The flora assessment concludes that the loss of the eight trees representative of CPW at the subject site would not be considered to cause a significant impact upon the CEEC, and that a species impact statement is not required for the proposal.

The fauna assessment found the following potential habitat present on site:

- One hollow bearing tree present with one small hollow with an opening of approximately 5cm observed in a broken branch
- Nectar producing tree species, principally Ironbarks, Redgums and Grey Box
- Six E. tereticornis koala feed species. (It was noted that these were not accessible to Koala due to urban development and fencing).

Threatened fauna species considered to have potential suitable habitat present within the site included Grey-headed Flying-fox (potential), Little Lorikeet (low), Swift Parrot (low), and the Eastern Bentwing-bat (unlikely). The fauna assessment determined that there was no likely breeding or otherwise important habitat present for the above considered threatened fauna species, and concluded that there would be no likely significant impact on any threatened fauna species with potential to occur on site.

The Flora and Fauna Assessment recommends that any landscaping on site should include species native to the CPW CEEC and include ground covers to limit erosion and to encourage local fauna use. It also recommends that the removal of the single hollow bearing tree be undertaken under the guidance of a fauna ecologist or experienced wildlife carer so that any fauna, if present, may be effectively recovered and relocated. The recommendations of the flora and fauna assessment report have been incorporated into the recommended conditions of consent in Attachment 1.

Issue - The development would cause privacy problems. The windows of the development would look into the yards of dwellings, and there are no privacy screens proposed. The number of first floor windows should be reduced. The proposed privacy louvres would be insufficient.

Comment - The south-facing first floor windows of the development would be far enough away from the adjoining properties so as to mitigate overlooking concerns over the properties to the south of the site. The first floor north-facing bedrooms would all be fitted with external louvred privacy screens, that are only able to be angled upwards or horizontally (not downwards) to prevent overlooking of adjoining properties.

Issue - The proposed development would increase the noise levels to neighbouring properties, because of the density of the development.

Comment - There is no evidence to suggest that the density of the proposed development would increase the noise levels within the vicinity of the site to levels that would affect the amenity of surrounding residents.

Issue - The density of the proposed development is out of character with the area. The other multi-dwelling complexes in the area are all single storey and do not have such a high density. There are not many other two storey dwellings in the street.

Comment - There are at least five two-storey dwellings within the vicinity of the site, and two-storey multi-dwelling complexes can be found in Jaclyn street, Chester Road, and backing onto Drumalbyn Street. The density of the development (number of dwellings) is a function of the development's compliance with the relevant development standards contained within the Affordable Rental Housing SEPP.

Issue - The proposed development may lead to vandalism of existing properties and crime in the area. Additional security would need to be provided to existing homes.

Comment - There is no evidence to suggest that the proposed development would lead to vandalism of existing properties and crime in the area.

Issue - The proposed development would cause depreciation in the value of surrounding properties.

Comment - There is no evidence to suggest that the proposed development would cause depreciation in the value of surrounding properties.

Issue - The development would create a fire hazard as the fire brigade would not be able to access the property in the event of a fire.

Comment - The maximum width of a NSW fire truck is 2.5 metres, and it requires a minimum carriageway width of 4.0 metres for general appliance access. Both Lyndia Street and the proposed common driveway would be able to accommodate a fire truck for general appliance access. The truck requires a minimum width of 6.0 metres in order to extend its stabilisers for aerial appliance access. The proposed development would contain several areas that are greater than 6 metres wide and could therefore accommodate a fire truck for aerial appliance access.

Issue - People may use the proposed common driveway to look over back fences into the pools of other properties. Higher fencing is required.

Comment - It is unlikely that people would trespass into the common driveway for the purpose of looking into neighbouring properties, and it is beyond the scope of the assessment of this application to deal with such matters.

Issue - The setback of the development to adjoining properties is insufficient.

Comment - The side setbacks of the proposed development are entirely consistent with those specified by the Campbelltown (Sustainable City) Development Control Plan 2014 for multi-dwelling developments, and entirely consistent with (or greater than) those of surrounding multi-dwelling developments. In this regard, the proposed development has side setbacks of at least 1.5 metres to the northern property boundary, and the majority of the proposed development would have a side setback greater than 1.5 metres. The proposed setbacks allow for adequate spatial relief between the proposed dwellings and adjoining dwellings, noting that some of the dwellings adjoining the subject site have lesser rear setbacks (to the subject site) than what is currently required than the SCDCP.

Issue - Time restrictions for the common open space area are requested, as well as not having items that would allow children to climb over the boundary fence.

Comment - Council does not impose conditions with such specificity concerning the manner in which communal open space may be used. In the event that concerns relating to noise pollution and trespassing arise, they would need to be addressed by the Police.

Issue - Placing large numbers of disadvantaged people in one place would decrease social cohesion.

Comment - It should be noted that only two of the proposed dwellings would be used for the purpose of affordable housing for a period of 10 years, to be managed by a registered community housing provider (not Housing NSW). All of the other dwellings would be privately owned. It should also be noted that people who reside in affordable housing are not necessarily socioeconomically disadvantaged, with affordable housing generally targeted at key workers/families such as emergency services, teachers and Council workers.

Issue - Overcrowding within the proposed development would negatively affect the amenity of children living within the complex.

Comment - Children living within the proposed dwellings would all have access to a private courtyard as well as a communal open space area.

4. Conclusion

The proposed development has been assessed against the provisions of Section 79C of the Environmental Planning and Assessment Act, 1979. The proposal has been found to satisfy the relevant State Environmental Planning Policies and the relevant provisions of Campbelltown (Urban Area) Local Environmental Plan 2002. The proposal is generally compliant with the relevant provisions of Campbelltown (Sustainable City) Development Control Plan 2014, and where non-compliances are present, these are considered to be justified. It is considered that the overall social and economic impacts of the proposed development would be positive, and that potential impacts on the natural and built environments have and will be mitigated through design measures. The application was publicly exhibited and notified on two occasions to a significant number of surrounding residents. Written submissions from 58 households were submitted as well as a petition with signatures from 60 households, raising a number of issues. It is considered that all of the matters raised in the submissions have been addressed through design measures and operational conditions of consent. The site's location, zoning and configuration make it suitable for the proposed development, and the proposal is considered to be in the broad interests of the general public. Accordingly, this report recommends the approval of the application.

Officer's Recommendation

That development application 2775/2014/DA-MAH for the construction of nine two-storey dwellings at No. 17 Lyndia Street Ingleburn be approved, subject to the conditions detailed in Attachment 1 of this report.

Committee Note: Mr Hitchcock, Mr Shirley, Mr Pearce, Mr Ogdon, Mr Carruthers and Mr Willis addressed the Committee in opposition to the development.

Mr Zappia and Mr Youssef addressed the Committee in favour of the development.

Committee's Recommendation: (Oates/Lound)

That development application 2775/2014/DA-MAH for the construction of nine two-storey dwellings at No. 17 Lyndia Street Ingleburn be refused for the following reasons:

- i. It is an inappropriate development that seriously impinges on the amenity and quality of life of the existing neighbouring residents and is out of character in this street
- ii. Insufficient parking allocation for residents and visitors which will impact on the surrounding streets on a daily basis possibly creating safety issues
- iii. Inadequate provision for waste storage and collection
- iv. Does not meet community expectations and standards in terms of bulk, scale and height, visual and environmental amenity
- v. Only 1/5 of this development will be for affordable housing.

CARRIED

Voting for the Committee's Recommendation were Councillors: Lound, Matheson, Oates, Rowell and Thompson.

Voting against the Committee's Recommendation was Councillor: Kolkman.

Council Meeting 18 August 2015 (Oates/Glynn)

That development application 2775/2014/DA-MAH for the construction of nine two-storey dwellings at No. 17 Lyndia Street Ingleburn be refused as the development proposal:

- i. is an over development of the site that will result in a significant adverse impact on the amenity and quality of life of the existing neighbouring residents
- ii. fails to provide sufficient on site visitor parking which will result in an adverse impact on the amenity and safety of the local street network
- iii. fails to provide adequate facilities for the storage and collection of waste bins
- iv. is inconsistent with community expectations and standards in terms of bulk and scale, visual and environmental amenity
- v. is not considered to be an affordable housing development as it offers only two of the nine proposed dwellings for affordable housing
- vi. is not sited on an allotment of sufficient width to adequately support such a development
- vii. is inconsistent with the desired character of the area
- viii. is not in the public interest.

Council Resolution Minute Number 153

That the above Council Resolution be adopted.

Voting for the Council Resolution were Councillors: Borg, Brticevic, Chanthivong, Dobson, Glynn, Hawker, Lake, Lound, Matheson, Oates, Rowell and Thompson.

Voting against the Council Resolution were Councillors: Kolkman and Mead.

ATTACHMENT 1

Recommended Conditions of Consent

GENERAL CONDITIONS

The following conditions have been applied to ensure that the use of the land and/or building is carried out in such a manner that is consistent with the aims and objectives of the planning instrument affecting the land.

For the purpose of these conditions, the term 'applicant' means any person who has the authority to act on or benefit of the development consent.

1. Approved Development

The development shall be carried out in accordance with the approved plans listed below, and all associated documentation supporting this consent, except as modified in red by Council and / or any conditions within.

Drawing/Document No.	Prepared By	Date
1339-DA-01 to DA-03 inclusive (all Issue C)	Planspec Building Design	April 2015
1339-DA-07 Issue B	Planspec Building Design	April 2015
1339-DA-09 Issue A	Planspec Building Design	August 2015
1407/SW1.1-B and 1407/SW1.2-B	AJC Design	April 2015
3938 Sheet 1 of 1	Monaco Designs PL	May 2015
Colour and Materials Schedule	Planspec Building Design	April 2015
Arboricultural Impact Assessment	Urban Forestry Australia	January 2015
Flora and Fauna Assessment	Travers Bushfire and	April 2015
	Ecology	

2. Flora and Fauna

The applicant must ensure that all recommendations made by Urban Forestry Australia in the Flora and Fauna Assessment report dated April 2015 are implemented in the design and construction stages of the project, including but not limited to avoiding any level changes in areas in close proximity to potentially sensitive offsite trees (Tree 13 and Tree 14), and that landscaping and other works are done in accordance with the arboricultural recommendations made in the report (installation of appropriate protective devices such as fencing and mulching).

3. Affordable Housing

For 10 years from the date of the issue of the occupation certificate:

- Dwellings 4 and 6 (comprising 21.6% of the gross floor area of the development) shall be used for the purposes of affordable housing
- All accommodation that is used for affordable housing shall be managed by a registered community housing provider

• The operator of the site shall provide Council with an annual Tenancy Audit Report at the end of each financial year. The Tenancy Audit Report shall review the Affordable Rental Housing tenants to ensure that the occupancy of dwellings 4 and 6 satisfy the State (Affordable Rental Housing) 2009 requirements criteria.

4. Building Code of Australia

All building work must be carried out in accordance with the provisions of the Building Code of Australia. In this clause, a reference to the Building Code of Australia is a reference to that Code as in force on the date the application for the relevant construction certificate is made.

5. Contract of Insurance (residential building work)

In the case of residential building work for which the *Home Building Act 1989* requires there to be a contract of insurance in force in accordance with Part 6 of that Act, that such a contract of insurance is in force before any building work authorised to be carried out by the consent commences.

This clause does not apply:

- a. To the extent to which an exemption is in force under Clause 187 or 188 of the Environmental Planning and Assessment Regulation 2000, subject to the terms of any condition or requirement referred to in Clause 187(6) or 188(4) of that regulation, or
- b. To the erection of a temporary building.

6. Notification of *Home Building Act* 1989 Requirements

Residential building work within the meaning of the *Home Building Act 1989* must not be carried out unless the principal certifying authority for the development to which the work relates (not being Council) has given Council written notice of the following information:

- a. In the case of work for which a principal contractor is required to be appointed:
 - i. The name and licence number of the principal contractor, and
 - ii. The name of the insurer by which the work is insured under Part 6 of that Act.
- b. In the case of work to be done by an owner-builder:
 - i. The name of the owner-builder, and
 - ii. If the owner-builder is required to hold an owner-builder permit under that Act, the number of the owner-builder permit.

If arrangements for doing the residential building work are changed while the work is in progress so that the information notified becomes out of date, further work must not be carried out unless the principal certifying authority for the development to which the work relates (not being Council) has given Council written notification of the updated information.

7. Landscaping

The provision and maintenance of landscaping shall be in accordance with the approved landscape plan containing Council's approved development stamp including the engagement of a suitably qualified landscape consultant/ contractor for landscaping works. The landscape design shall incorporate a significant portion of native, low water demand plants consistent with BASIX requirements.

- a. All landscaped areas on site should, where possible, include species native to the Cumberland Plain Woodland Critically Endangered Ecological Community, including ground covers to limit erosion and to encourage local fauna use.
- b. All plants shall be vigorous and well established, free from disease and pests, of good form, consistent with species or variety, hardened off, not soft or forced, with large healthy root systems with no evidence of root curl, restriction or damage.
- c. All trees are to be staked and tied with a minimum of three hardwood stakes. Ties are to be hessian and fixed firmly to the stakes, one tie at half the height of the main stem, others as necessary to stabilise the plant.
- d. Root deflection barriers having a minimum depth of 600mm are to be installed adjacent to all footpaths and driveways.
- e. Minimum 75mm depth of organic mulch shall be placed within an area 500mm radius from the base of trees. Mulch shall be free from deleterious and extraneous matter, including soil, weeds, rocks, twigs and the like and shall be placed so that it is not in contact with the stem of the plant.

8. Removal of Hollow-Bearing Tree

The removal of the single hollow-bearing tree (Tree No.0 on the tree plan) must be undertaken under the guidance of a fauna ecologist or experienced wildlife carer such that any fauna, if present, may be effectively recovered and relocated.

9. External Finishes

The external finishes shall be in accordance with the approved plans and the schedule of finishes submitted with this application. Any proposed alterations to these finishes are considered to be a modification to the development consent and require separate approval by Council.

10. Privacy Screens

The first floor window privacy screens identified on the approved plans shall be designed so that views out of the windows are only horizontal or upward. The depth of the louvres shall be such that downward views out of the windows are not possible. The louvres shall be moveable and shall only be able to be moved to a horizontal or upward-facing position.

11. Garbage Room

The garbage storage room identified on the approved plans shall comply with the following requirements:

- a. The room shall be fully enclosed including a roof and shall be provided with a concrete floor, with concrete or cement rendered walls coved to the floor.
- b. The floor shall be graded to an approved sewer connection incorporating a sump and galvanised grate cover or basket.
- c. A hose cock shall be provided within the room.
- d. Garbage rooms shall be vented to the external air by natural or artificial means.
- e. The finishes/materials of the garbage storage room shall be the same as those used for the construction of the dwellings.

12. Fencing

A 1.8 metre high fence shall be erected on the site's side and rear boundaries behind the front building alignment and between each required courtyard at the sole cost of the developer. 'Colorbond' style metal fences that face a public space are not permitted.

13. Switchboards/Utilities

Switchboards, garbage storage areas and storage for other utilities shall not be attached to the front elevations of the building or side elevations that can be seen from a public place.

14. Driveway

The gradients of driveways and manoeuvring areas shall be designed in accordance with Australian Standard AS 2890.1 and AS 2890.2 (as amended).

Driveways shall be constructed using decorative paving materials such as pattern stencilled concrete, coloured stamped concrete or paving bricks. The finishes of the paving surfaces are to be non-slip and plain concrete is not acceptable.

All driveways in excess of 20 metres in length shall be separated from the landscaped areas by the construction of a minimum 150mm high kerb, dwarf wall or barrier fencing.

15. Lighting

Illumination of the site is to be arranged to provide an appropriate level of lighting and in accordance with the requirements of Australian Standard 4282 (as amended) so as not to impact upon the amenity of the occupants of adjoining and nearby residential premises or traffic.

16. Engineering Design Works

The design of all engineering works shall be carried out in accordance with the requirements set out in the Campbelltown (Sustainable City) DCP 2009 - Volumes 1 and 2.

17. Rubbish/Recycling Bin Storage

The rubbish, recycling and green waste bins shall not be stored within vehicle parking, vehicle manoeuvring areas, driveway or landscaped areas.

The bin(s) shall only be stored in accordance with the approved plans.

18. Shoring and Adequacy of Adjoining Property

If the development referred to in this development consent involves an excavation that extends below the level of the base of the footings of a building on adjoining land, the person having the benefit of the development consent must at the person's own expense:

- a. Protect and support the adjoining premises from possible damage from the excavation, and
- b. Where necessary, underpin the adjoining premises to prevent any such damage.

This condition does not apply if the person having the benefit of the development consent owns the adjoining land or the owner of the adjoining land has given consent in writing to that condition not applying.

19. Rain Water Tank(s)

Rain water tank/s shall be installed on site for the collection and storage of stormwater for irrigation and reuse purposes (e.g. the flushing of toilets), in accordance with the approved plans.

20. Construction Certificate

Prior to the commencement of any works that require a construction certificate:

- a. The applicant shall obtain a construction certificate for the particular works
- b. The applicant shall appoint a principal certifying authority
- c. The private certifying authority shall notify Council of their appointment no less than two days prior to the commencement of any works.

21. Garbage Bin Collection

The two 1100 litre garbage bins are to be collected onsite and shall not be transported to the street, roadway or footpath for collection.

22. Evidence of Public Indemnity Insurance

Each year the body corporate must furnish Council with a copy of its reviewed public indemnity insurance policy, valid for the next 12 months, to satisfy Council that in the event of a claim arising, a suitable public indemnity insurance policy is in place to respond to the claim.

23. Vehicular Access

Vehicles accessing the site shall comply with the following requirements:

a. All vehicular entries and exits shall be made in a forward direction.

A traffic sign shall be placed adjacent to the driveway at the entrance to the property, advising drivers of the above information. Should the sign be damaged or removed, it shall be replaced within 48 hours.

24. Car Parking Spaces

14 car parking spaces, two of which are to be marked as visitor spaces, shall be designed, sealed and line marked, in accordance with Australian Standards 2890 (as amended).

25. Storage of Recycling and green Waste Bins

Dwellings 1, 7 and 8 shall store their recycling and green waste bins on their respective premises when not awaiting collection and not within the communal garbage room.

PRIOR TO THE ISSUE OF A CONSTRUCTION CERTIFICATE

The following conditions of consent must be complied with prior to the issue of a construction certificate by either Campbelltown City Council or an accredited certifier. All necessary information to comply with the following conditions of consent must be submitted with the application for a construction certificate.

26. Utility Servicing Provisions

Prior to Council or an accredited certifier issuing a construction certificate, the applicant shall obtain a letter from both the relevant electricity authority and the relevant telecommunications authority stating that satisfactory arrangements have been made to service the proposed development.

Note: The applicant should also contact the relevant water servicing authority to determine whether the development will affect the authorities water or sewer infrastructure.

27. Sydney Water Stamped Plans

Prior to Council or an accredited certifier issuing a construction certificate, the approved plans must be submitted to a Sydney Water Quick Check agent to determine whether the development will affect any Sydney Water wastewater and water mains, stormwater drains and/or easements, and if any requirements need to be met. Plans will be appropriately stamped.

Please refer to the web site www.sydneywater.com.au for:

- Quick Check agents details see Building and Developing then Quick Check and
- Guidelines for Building Over/Adjacent to Sydney Water Assets see Building and Developing then Building and Renovating.

or telephone 13 20 92.

28. Design of Common Driveway

The applicant shall engage a suitably qualified structural engineer to design the proposed driveway. The structural engineer shall certify that the driveway has been designed taking into account the use of the driveway by a 24 tonne waste collection vehicle. The structural details of the driveway shall be shown on the engineering drawings and submitted to Council for approval prior to Council or an accredited certifier issuing a Construction Certificate.

29. Waste Management Plan

Prior to Council or an accredited certifier issuing a construction certificate, the relevant provisions of Council's Waste Management Plan is to be completed to the satisfaction of Council.

30. Geotechnical Report

Prior to Council or an accredited certifier issuing a construction certificate, a geotechnical report prepared by a NATA registered lab shall be submitted which indicates that the land will not be subject to subsidence, slip, slope failure or erosion where excavation and/or filling exceeds 900mm in depth or identified as filled land.

31. Soil and Water Management Plan

Prior to Council or an accredited certifier issuing a construction certificate, a detailed soil and water management plan shall be submitted for approval.

32. Stormwater Management Plan

Prior to Council or an accredited certifier issuing a construction certificate, a plan indicating all engineering details and calculations relevant to site regrading and the collection and disposal of stormwater from the site, building/s and adjacent catchment, shall be submitted for approval. Floor levels of all buildings shall be a minimum of 150mm above the adjacent finished site levels and stormwater shall be conveyed from the site to the stormwater system in the existing drainage easement at the rear northern corner of the subject property. All proposals shall comply with the Campbelltown (Sustainable City) DCP - Volumes 1 and 3.

33. Existing Drainage

Prior to Council or an accredited certifier issuing a construction certificate, the applicant shall submit design details and related calculations for the analysis of the existing drainage system in the drainage easement at the northern corner of the subject property where it is proposed to discharge stormwater, to determine whether the existing system has sufficient capacity to adequately convey the increased flows. In case the capacity of the existing drainage system is not adequate to accommodate the additional stormwater flows, the applicant shall reconstruct the existing drainage system in accordance with the approved design plans. All proposals shall comply with the Campbelltown (Sustainable City) DCP - Volumes 1 and 3.

Written approval from Council shall be required for any proposed work on public land. Inspection of such works shall be undertaken by Council at the applicant's expense and a compliance certificate, approving the works, shall be obtained from Council prior to the principal certifying authority issuing an occupation certificate.

34. Dilapidation Report

Prior to Council or an accredited certifier issuing a construction certificate, the applicant shall submit a dilapidation report for all buildings on lands that adjoin the subject works.

35. Work on Public Land

Prior to Council or an accredited certifier issuing a construction certificate, the applicant shall obtain written approval from Council for any proposed work on public land. Inspection of this work shall be undertaken by Council at the applicants expense and a compliance certificate, approving the works, shall be obtained from Council prior to the principal certifying authority issuing an occupation certificate.

36. Section 94A Developer Contribution - Community Facilities and Services

Prior to Council or an accredited certifier issuing a Construction Certificate, the applicant shall provide a receipt for the payment to Council of a community facilities and services contribution in accordance with the provisions of the Campbelltown City Council Section 94A Development Contributions Plan.

For the purposes of calculating the required S94A contribution, where the value of the total development cost exceeds \$100,000, the applicant is required to include with the application for the respective certificate, a report setting out a cost estimate of the proposed development in accordance with the following:

 where the value of the proposed development is greater than \$100,000 but less than \$500,000, provide a Cost Summary Report by a person who, in the opinion of the Council, is suitably qualified to provide a Cost Summary Report (Cost Summary Report Template 1). All Cost Summaries will be subject to indexation on a quarterly basis relative to the Consumer Price Index - All Groups (Sydney) where the contribution amount will be based on the indexed value of the development applicable at the time of payment; or • where the value of the proposed development is \$500,000 or more, provide a detailed development cost report completed by a quantity surveyor who is a registered member of the Australian Institute of Quantity Surveyors (Quantity Surveyors Estimate Report Template 2). Payment of contribution fees will not be accepted unless the amount being paid is based on a Quantity Surveyors Estimate Report (QS Report) that has been issued within 90 days of the date of payment. Where the QS Report is older than 90 days, the applicant shall provide an updated QS Report that has been indexed in accordance with clause 25J(4) of the Environmental Planning and Assessment Regulation 2000 to ensure quarterly variations in the Consumer Price Index All Group Index Number for Sydney have been incorporated in the updated QS Report.

Copies of the Cost Summary Report - Template 1 and the Quantity Surveyors Estimate Report - Template 2 are located under "Developer Contributions" on Council's web site (www.campbelltown.nsw.gov.au) or can be collected from Council's Planning and Environment Division during normal business hours.

On calculation of the applicable contributions, all amounts payable will be confirmed by Council in writing.

Payment of Section 94A Developer Contributions will only be accepted by way of Cash, Credit Card or Bank Cheque issued by an Australian bank. Payment by any other means will not be accepted unless otherwise approved in writing by Council.

Note: This condition is only applicable where the total development value exceeds \$100,000.

37. Telecommunications Infrastructure

- a. If the development is likely to disturb or impact upon telecommunications infrastructure, written confirmation from the service provider that they have agreed to proposed works must be submitted to the Principal Certifying Authority prior to the issue of a Construction Certificate or any works commencing, whichever occurs first; and
- b. The arrangements and costs associated with any adjustment to telecommunications infrastructure shall be borne in full by the applicant/developer.

PRIOR TO THE COMMENCEMENT OF ANY WORKS

The following conditions of consent have been imposed to ensure that the administration and amenities relating to the proposed development comply with all relevant requirements. These conditions are to be complied with prior to the commencement of any works on site.

38. Erosion and Sediment Control

Prior to the commencement of any works on the land, adequate/approved erosion and sediment control measures shall be fully installed/implemented.

39. Erection of Construction Sign

Prior to the commencement of any works on the land, a sign/s must be erected in a prominent position on the site:

- a. Showing the name of the principal contractor (if any) for any building work and a telephone number on which that person may be contacted outside working hours
- b. Stating that unauthorised entry to the work site is prohibited
- c. Pollution warning sign promoting the protection of waterways (issued by Council with the development consent)
- d. Stating the approved construction hours in which all works can occur
- e. Showing the name, address and telephone number of the principal certifying authority for the work.

Any such sign/s is to be maintained while the building work, subdivision work or demolition work is being carried out, but must be removed when the work has been completed.

40. Toilet on Construction Site

Prior to the commencement of any works on the land, toilet facilities are to be provided, at or in the vicinity of the work site on which work involved in the erection or demolition of a building is being carried out, at the rate of one toilet for every 20 persons or part thereof. Each toilet provided must be a standard flushing toilet and be connected to:

- a. A public sewer, or
- b. If connection to a public sewer is not practicable, to an accredited sewage management facility approved by Council, or
- c. If connection to a public sewer or an accredited sewage management facility is not practicable, to some other management facility approved by Council.

41. Trade Waste

Prior to the commencement of any works on the land, a trade waste facility shall be provided on-site to store all waste pending disposal. The facility shall be screened, regularly cleaned and accessible to collection vehicles.

42. Vehicular Access during Construction

Prior to the commencement of any works on the land, a single vehicle/plant access to the site shall be provided, to minimise ground disturbance and prevent the transportation of soil onto any public road system. Single sized aggregate, 40mm or larger placed 150mm deep, extending from the kerb and gutter to the property boundary, shall be provided as a minimum requirement.

43. Public Property

Prior to the commencement of any works on site, the applicant shall advise Council of any damage to property which is controlled by Council which adjoins the site, including kerbs, gutters, footpaths, and the like. Failure to identify existing damage may result in all damage detected after completion of the development being repaired at the applicant's expense.

44. Footpath and Vehicular Crossing Levels

Prior to the commencement of any work, footpath and vehicular crossing levels are to be obtained from Council by lodging an application on the prescribed form.

45. Demolition of Existing Dwelling

Prior to the commencement of any other works, the existing dwelling and all other improvements on the land shall be demolished in accordance with the conditions of this consent.

46. Demolition Works

Demolition works shall be carried out in accordance with the following:

- a. Prior to the commencement of any works on the land, a detailed demolition work plan designed in accordance with Clause 1.7.3 of Australian Standard AS 2601-2001 – The Demolition of Structures, prepared by a suitably qualified person with suitable expertise or experience, shall be submitted to and approved by Council and shall include the identification of any hazardous materials, method of demolition, precautions to be employed to minimise any dust nuisance and the disposal methods for hazardous materials.
- b. Prior to commencement of any works on the land, the demolition Contractor(s) licence details must be provided to Council.
- c. The handling or removal of any asbestos product from the building/site must be carried out by a NSW Work Cover licensed contractor irrespective of the size or nature of the works. Under no circumstances shall any asbestos on site be handled or removed by a non-licensed person. The licensed contractor shall carry out all works in accordance with NSW Work Cover requirements.
- d. An appropriate fence preventing public access to the site shall be erected for the duration of demolition works
- e. Immediately prior to the commencement of the demolition or handling of any building or structure that contains asbestos, the applicant shall request that the principal certifying authority attend the site to ensure that all appropriate safety measures are in place. The applicant shall also notify the occupants of the adjoining premises and Workcover NSW prior to the commencement of any works.

47. Fencing

An appropriate fence preventing public access to the site shall be erected for the duration of construction works.

48. Geotechnical Reference

Prior to the commencement of any works, a certificate prepared by the designing structural engineer certifying that the design is in accordance with the geotechnical investigation of the site shall be submitted to the PCA. The designing structural engineer shall also nominate a site classification in accordance with AS2870 – Residential Slabs and Footings.

49. Structural Engineer Details

Prior to the commencement of any works, the submission to the principal certifying authority of all details prepared by a practicing structural engineer.

DEVELOPMENT REQUIREMENTS DURING CONSTRUCTION

The following conditions of consent have been imposed to ensure that the administration and amenities relating to the proposed development comply with all relevant requirements. These conditions are to be complied with during the construction of the development on site.

50. Construction Work Hours

All work on site shall only occur between the following hours:

Monday to Friday	7.00am to 6.00pm
Saturday	8.00am to 1.00pm
Sunday and public holidays	No Work.

51. Erosion and Sediment Control

Erosion and sediment control measures shall be provided and maintained throughout the construction period, in accordance with the requirements of the manual – Soils and Construction (2004) (Bluebook), the approved plans, Council specifications and to the satisfaction of the principal certifying authority. The erosion and sedimentation control devices shall remain in place until the site has been stabilised and revegetated.

Note: On the spot penalties up to \$1,500 will be issued for any non-compliance with this requirement without any further notification or warning.

52. Work Zones

All loading, unloading and other activities undertaken during construction shall be accommodated on the development site.

Where it is not practical to load, unload or undertake specific activities on the site during construction, the provision of a 'Work Zone' external to the site may be approved by Council following an application being submitted to Council's Traffic Unit outlining the proposal for the work zone. The application is required to be made prior to the commencement of any works and is to include a suitable 'Traffic / Pedestrian Management and Control Plan' for the area of the work zone that will be affected. All costs of approved traffic / pedestrian control measures, including relevant fees, shall be borne by the applicant.

53. Excavation and Backfilling

All excavations and backfilling associated with the approved works must be executed safely and in accordance with appropriate professional standards. All excavations must be properly guarded and protected to prevent them from being dangerous to life or property.

If an excavation associated with the approved works extends below the level of the base of the footings of a building on an adjoining allotment of land, the person causing the excavation to be made:

- a. Must preserve and protect the building from damage; and
- b. If necessary, must underpin and support the building in an approved manner, and
- c. Must, at least seven days before excavating below the level of the base of the footings of a building on an adjoining allotment of land, give notice of intention to do so to the owner of the adjoining allotment of land and furnish particulars of the excavation to the owner of the building being erected or demolished.

The owner of the adjoining allotment of land is not liable for any part of the cost of work carried out, whether carried out on the allotment of land being excavated or on the adjoining allotment of land.

54. Dust Nuisance

Measures shall be implemented to minimise wind erosion and dust nuisance in accordance with the requirements of the manual – 'Soils and Construction (2004) (Bluebook). Construction areas shall be treated/ regularly watered to the satisfaction of the principal certifying authority.

55. Certification of Location of Building during Construction

Prior to the positioning of wall panels/ bricks or block work, the applicant shall submit to the principal certifying authority a qualified practicing surveyor's certificate showing the boundaries of the allotment, distances of walls and footings from the boundaries, and the dimensions of the building.

56. Certification of Levels of Building during Construction

Prior to the placement of any concrete of the basement/ground floor slab, the applicant shall submit to the principal certifying authority a qualified practicing surveyor's certificate showing that the formwork levels are in accordance with the approved plan.

57. Certification of Location of Building upon Completion

Upon completion of the building, the applicant shall submit to the principal certifying authority a qualified practicing surveyors certificate showing the boundaries of the allotment, distances of walls and footings from boundaries.

58. Public Safety

Any works undertaken in a public place are to be maintained in a safe condition at all times in accordance with AS 1742.3. Council may at any time and without prior notification make safe any such works Council considers to be unsafe, and recover all reasonable costs incurred from the applicant.

59. Compliance with Council Specification

All design and construction work, shall be in accordance with:

- a. Council's specification for Construction of Subdivisional Road and Drainage Works (as amended)
- b. Campbelltown (Sustainable City) DCP 2009 Volumes 1 and 2
- c. 'Soils and Construction (2004) (Bluebook)
- d. Relevant Australian standards and State Government publications.

60. Footpath

The footpath adjoining the subject land shall be regraded, topsoiled and turfed in accordance with levels to be obtained from Council. The footpath formation may need to be extended beyond the site boundaries, to provide an acceptable transition to existing footpath levels.

61. Associated Works

The applicant shall undertake any works external to the development, that are made necessary by the development, including additional road and drainage works or any civil works directed by Council, to make a smooth junction with existing work.

62. Industrial / Commercial Driveway and Layback Crossing

The applicant shall provide a reinforced concrete driveway and layback crossing/s to Council's Industrial/Commercial Vehicle Crossing Specification and Campbelltown (Sustainable City) DCP 2009 - Volumes 1 and 2.

A separate application for this work, which will be subject to a crossing inspection fee, fixing of levels and inspections by Council, must be lodged with Council. Conduits must be provided to service authority requirements.

63. Redundant Laybacks

All redundant layback/s shall be reinstated to conventional kerb and gutter to Council's Specification for Construction of Subdivisional Road and Drainage Works (as amended) and with the design requirements of the Campbelltown (Sustainable City) DCP 2009 - Volumes 1 and 2.

64. Completion of Construction Works

Unless otherwise specified in this consent, all construction works associated with the approved development shall be completed within 12 months of the date of the notice of the intention to commence construction works under Section 81A of the Act.

In the event that construction works are not continually ongoing, the applicant shall appropriately screen the construction site from public view with architectural devices and landscaping to Council's written satisfaction.

PRIOR TO THE ISSUE OF AN OCCUPATION CERTIFICATE

The following conditions of consent must be complied with prior to the issue of an occupation certificate by either Campbelltown City Council or an accredited principal certifying authority. All necessary information to comply with the following conditions of consent must be submitted with the application for an occupation certificate.

Note: Under this subheading, for the purpose of issuing an occupation certificate, any reference to "occupation certificate" shall also be taken to mean "interim occupation certificate".

65. Public Indemnity Insurance – Waste Collection

The applicant shall indemnify Council and its contractors and agents against any claims, proceedings, actions or demands arising from or in relation to any damage howsoever caused to the road surface, paving or drainage within the Development by the operation by Council or its contractors or agents in the collection of domestic waste except to the extent that such damage results from any misconduct or negligent act or omission of Council or its contractors or agents.

Prior to the issue of an occupation certificate, the applicant shall provide Council with a copy of its public liability insurance policy valid for 12 months to satisfy Council that in the event that such a claim arises, a public liability insurance policy is in place to respond to any claim arising. Each year the body corporate must furnish Council with a copy of its renewed public liability insurance policy valid for the next 12 months to satisfy Council that in the event that such a claim arises, a public valid for the next 12 months to satisfy Council that in the event that such a claim arises, a public liability insurance policy valid for the next 12 months to satisfy Council that in the event that such a claim arises, a public liability insurance policy is in place to respond to any claim arising.

66. Section 73 Certificate

Prior to the principal certifying authority issuing an occupation certificate, a Section 73 Compliance Certificate under the *Sydney Water Act 1994* must be obtained from Sydney Water Corporation. Early application for the certificate is suggested as this can also impact on other services and building, driveway or landscape design.

Application must be made through an authorised Water Servicing Coordinator.

For help either visit www.sydneywater.com.au > Building and developing > Developing your Land > Water Servicing Coordinator or telephone 13 20 92.

The Section 73 Certificate must be submitted to the Principal Certifying Authority prior to the issue of an occupation certificate.

67. Completion of External Works Onsite

Prior to the principal certifying authority issuing an occupation certificate, all external works, repairs and renovations detailed in the schedule of treatment/finishes, landscaping, driveways, fencing and retaining walls to be completed to the satisfaction of the principal certifying authority.

68. Subdivision Certificate

Prior to the principal certifying authority issuing a subdivision certificate, a final occupation certificate is required to be issued for all buildings on the land.

69. Final Inspection – Works as Executed Plans

Prior to the principal certifying authority issuing any occupation certificate, the applicant shall submit to Council two complete sets of fully marked up and certified work as executed plans for drainage works in accordance with Council's Specification for Construction of Subdivisional Road and Drainage Works (as amended) and with the design requirements detailed in the Campbelltown (Sustainable City) DCP Volume3 (as amended).

70. Restoration of Public Roads

Prior to the principal certifying authority issuing any occupation certificate, the restoration of public road and associated works required as a result of the development shall be carried out by Council and all costs shall be paid by the applicant.

71. Public Utilities

Prior to the principal certifying authority issuing an occupation certificate, any adjustments to public utilities, required as a result of the development, shall be completed to the satisfaction of the relevant authority and at the applicant's expense.

72. Service Authorities

Prior to the principal certifying authority issuing a subdivision certificate, two copies of all servicing plans shall be forwarded to Council in accordance with the following:

Written advice from Sydney Water, Integral Energy and where applicable the relevant gas company, shall be submitted, stating that satisfactory arrangements have been made for the installation of either service conduits or street mains in road crossings, prior to the construction of the road pavement. All construction work shall conform to the relevant authorities specification/s.

The final seal shall be deferred pending installation of all services. In this regard the applicant shall provide a temporary seal and lodge with Council as security, the amount to be determined by Council, to cover the cost of trench restoration by Council and the placement of the final asphaltic concrete seal.

73. BASIX

Prior to the principal certifying authority issuing an occupation certificate, completion of all requirements listed in the relevant BASIX certificate for the subject development shall be completed/installed.

74. Council Fees and Charges

Prior to the principal certifying authority issuing an occupation certificate, the applicant shall obtain written confirmation from Council that all applicable Council fees and charges associated with the development have been paid in full. Written confirmation will be provided to the applicant following Council's final inspection and satisfactory clearance of the public area adjacent the site.

75. Structural Engineering Certificate

Prior to the principal certifying authority issuing an occupation certificate, the submission of a certificate from a practising structural engineer certifying that the building has been erected in compliance with the approved structural drawings and relevant SAA Codes and is structurally adequate.

76. House Numbers

Prior to the principal certifying authority issuing a subdivision certificate, house numbers shall be stencilled onto the kerb at appropriate locations with black letters / numbers, 75mm high on a white background using an approved pavement marking grade paint.

For all new additional lots created, please contact Council's Land Information Unit on 4645 4465 to ensure the correct house number is stencilled.

77. Restriction on the Use of Land

a. Prior to the principal certifying authority issuing a subdivision certificate, the applicant shall create appropriate restrictions on the use of land under Section 88B of the *Conveyancing Act*, for:

i. Restriction as to user - burdening the Body Corporate with the responsibility to maintain the proposed on-site detention system.

The applicant shall liaise with Council regarding the required wording. Any lots subsequently identified during the subdivision process as requiring restrictions shall also be suitably burdened. Design plans and work as executed plans shall show affected lots marked with Council approved symbols. The authority empowered to release, vary or modify these restrictions on the use of land shall be the Council of the City of Campbelltown. The cost and expense of any such release, variation or modification shall be borne by the person or corporation requesting the same in all respects.

- b. Prior to the principal certifying authority issuing an Occupation Certificate, the applicant shall create a restriction as to user, registered against the title of the property of land under Section 88E of the *Conveyancing Act 1919*:
 - i. for 10 years from the date of the issue of the Occupation Certificate, dwellings 4 and 6 are to be used for the purpose of affordable housing and be managed by a registered community housing provider.

The applicant shall liaise with Council regarding the required wording. The authority empowered to release, vary or modify these restrictions on the use of land shall be the Council of the City of Campbelltown. The cost and expense of any such release, variation or modification shall be borne by the person or corporation requesting the same in all respects.

ADVISORY NOTES

The following information is provided for your assistance to ensure compliance with the *Environmental Planning and Assessment Act 1979*, Environmental Planning and Assessment Regulation 2000, other relevant Council Policy/s and other relevant requirements. This information does not form part of the conditions of development consent pursuant to Section 80A of the Act.

Advice 1. Environmental Planning and Assessment Act 1979 Requirements

The Environmental Planning and Assessment Act 1979 requires you to:

- a. Obtain a construction certificate prior to the commencement of any works. Enquiries regarding the issue of a construction certificate can be made to Council's Customer Service Centre on 4645 4000.
- b. Nominate a principal certifying authority and notify Council of that appointment prior to the commencement of any works.
- c. Give Council at least two days' notice prior to the commencement of any works.
- d. Have mandatory inspections of nominated stages of the construction inspected.
- e. Obtain an occupation certificate before occupying any building or commencing the use of the land.

Advice 2. Smoke Alarms

From 1 May 2006 all NSW residents must have at least one working smoke alarm installed on each level of their home. This includes owner occupier, rental properties, relocatable homes and any other residential building where people sleep.

The installation of smoke alarms is required to be carried out in accordance with AS 3786. The licensed electrical contractor is required to submit to the Principal Certifying Authority a certificate certifying compliance with AS 3000 and AS 3786.

Advice 3. Retaining Walls

A separate development application shall be submitted and approved for any retaining walls that exceed 0.9 metres in height.

Advice 4. Filling on Site

Council's records in respect of this lot indicate that varying depths of filling covers the natural ground surface.

Advice 5. Buried Waste

Should buried materials/wastes or the like be uncovered during the excavation of footings or trenches on site works, Council is to be contacted immediately for advice on the treatment/removal methods required to be implemented.

Advice 6. Covenants

The land upon which the subject building is to be constructed may be affected by restrictive covenants. Council issues this approval without enquiry as to whether any restrictive covenant affecting the land would be breached by the construction of the building, the subject of this permit. Persons to whom this permit is issued must rely on their own enquiries as to whether or not the building breaches any such covenant.

Advice 7. Inspection within Public Areas

All works within public areas are required to be inspected at all stages of construction and approved by Council prior to the principal certifying authority releasing the Occupation Certificate.

Advice 8. Strata Linen Plan and Copies

Should Council be nominated as the principal certifying authority for the strata subdivision, an original linen plan (and if required an original 88B Instrument) together with four copies of each shall be submitted to Council prior to the release of the subdivision certificate.

Advice 9. Linen Plan Checking Fee

Where Council is the principal certifying authority a linen plan checking fee is payable on submission of the linen plan of subdivision to Council. The exact amount will be calculated at the rate applicable at the time of release of the linen plans.

Advice 10. Salinity

Please note that Campbelltown is an area of known salinity potential. As such any salinity issues should be addressed as part of the construction certificate application. Further information regarding salinity management is available within Campbelltown (Sustainable City) DCP 2009 - Volumes 1 and 2.

Advice 11. Asbestos Warning

Should asbestos or asbestos products be encountered during construction or demolition works you are advised to seek advice and information prior to disturbing the material. It is recommended that a contractor holding an asbestos-handling permit (issued by Work Cover NSW), be engaged to manage the proper disposal and handling of the material. Further information regarding the safe handling and removal of asbestos can be found at:

www.environment.nsw.gov.au www.nsw.gov.au/fibro www.adfa.org.au www.workcover.nsw.gov.au

Alternatively, call Work Cover Asbestos and Demolition Team on 8260 5885.

Advice 12. Rain Water Tank

It is recommended that water collected within any rainwater tank as part of the development be limited to non-potable uses. NSW Health recommends that the use of rainwater tanks for drinking purposes not occur where a reticulated potable water supply is available.

Advice 13. Dial before you Dig

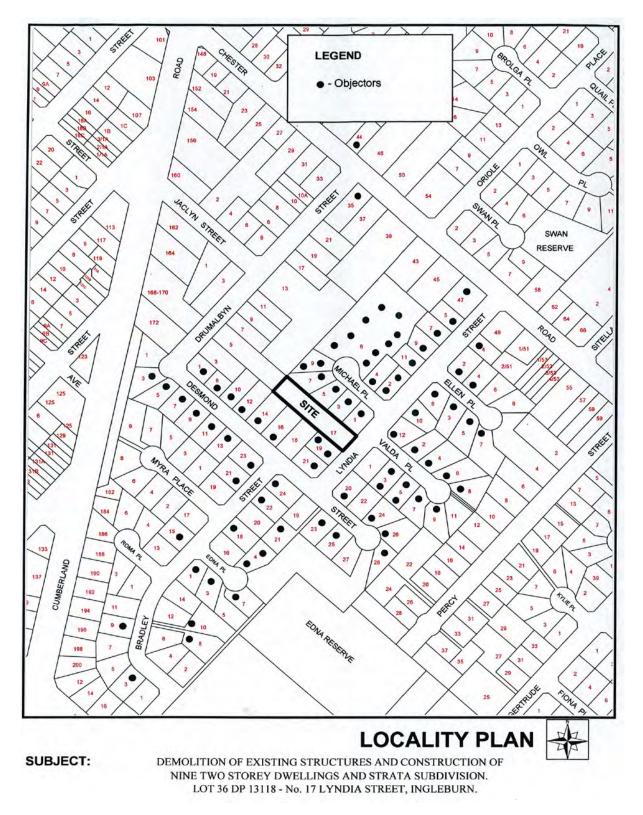

Underground assets may exist in the area that is subject to your application. In the interests of health and safety and in order to protect damage to third party assets please contact Dial before you dig at www.1100.com.au or telephone on 1100 before excavating or erecting structures (This is the law in NSW). If alterations are required to the configuration, size, form or design of the development upon contacting the Dial before you dig service, an amendment to the development consent (or a new development application) may be necessary. Individuals owe asset owners a duty of care that must be observed when working in the vicinity of plant or assets. It is the individual's responsibility to anticipate and request the nominal location of plant or assets on the relevant property via contacting the Dial before you dig service in advance of any construction or planning activities.

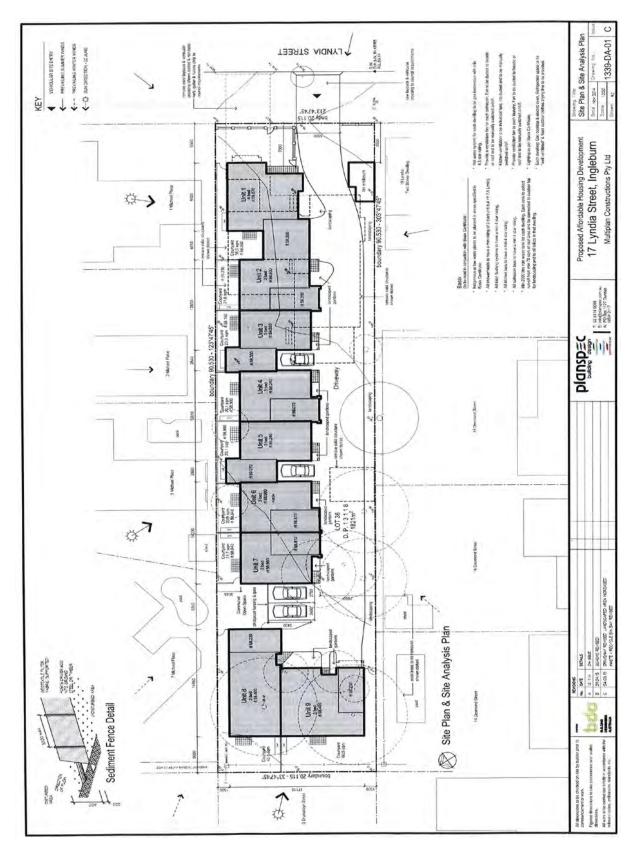

Advice 14. Telecommunications Act 1997 (Commonwealth)

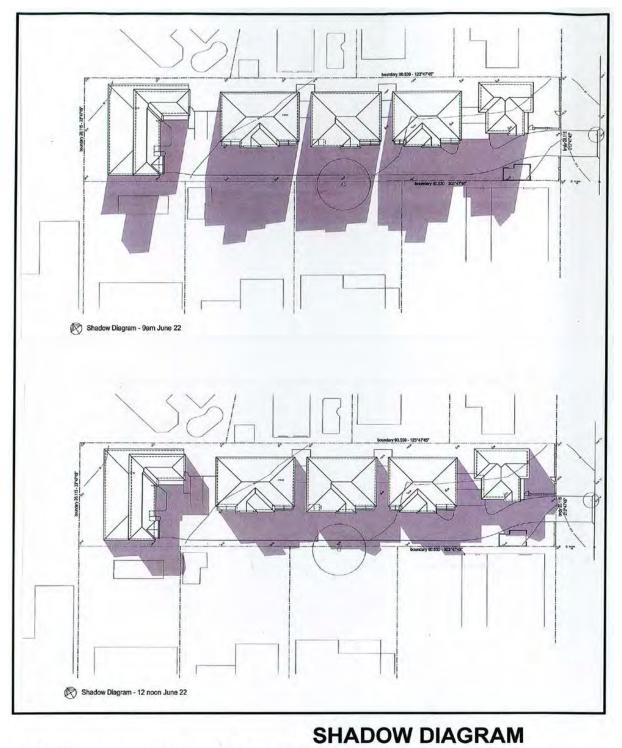

Telstra (and its authorised contractors) are the only companies that are permitted to conduct works on Telstra's network and assets. Any persons interfering with a facility or installation owned by Telstra is committing an offence under the *Criminal Code Act 1995* (Cth) and is liable for prosecution.

Furthermore, damage to Telstra's infrastructure may result in interruption to the provision of essential services and significant costs. If you are aware of any works or proposed works which may affect or impact on Telstra's assets in any way, you are required to contact: Telstra's Network Integrity Team on phone number 1800 810 443.

Planning and Environment Division Monthly Legal Matters Status and Costs Summary (contained within this report)

Purpose

To update Council on the current status of the Planning and Environment Division's legal matters.

Report

This report contains a summary of the current status of the Division's legal matters for the 2015-2016 period as they relate to:

- The Land and Environment Court
- The District Court
- The Local Court
- Matters referred to Council's solicitor for advice.

A summary of year-to-date costs and the total number of matters is also included.

Note: The year to date cost totals itemised in sections one to seven inclusive of the report do not necessarily correlate with the costs to date total of individual matters listed in each section, as the costs to date total of individual matters shown refer to total costs from commencement of the matter, which may have commenced before 1 July.

Officer's Recommendation

That the information be noted.

Committee's Recommendation: (Thompson/Kolkman)

That the Officer's Recommendation be adopted.

CARRIED

Council Meeting 18 August 2015 (Rowell/Kolkman)

That the Officer's Recommendation be adopted.

Council Resolution Minute Number 151

That the Officer's Recommendation be adopted.

4.2 North Area Alcohol Free Zones

Reporting Officer

Manager Compliance Services

Attachments

Maps of Alcohol Free Zones for Claymore (as amended), Glenfield, Ingleburn, Macquarie Fields, Minto, Minto (Zone 2) (as amended), Raby and St Andrews (contained within this report)

Purpose

To obtain Council's approval to re-establish and amend eight Alcohol Free Zones that are located within the north area of the Campbelltown City LGA and that are due to expire on 24 December 2015, including a proposed extension of the Claymore and Minto (2) zones.

History

The Local Government Act 1993 (the Act) provides Council with the ability to establish an Alcohol Free Zone (AFZ) to promote the safe use of roads, footpaths and public car parks (including privately owned shopping centre car parks) without interference from anti-social behaviour caused by people consuming alcohol in public/semi-public areas. The object of an AFZ is to enable early intervention by the enforcement authority (i.e. NSW Police) to prevent incidents involving serious crime resulting from the consumption of alcohol in public/semi-public places.

Any person living or working within the Local Government Area (LGA), the local police or a local community group can make an application for an AFZ. Once established, an AFZ prohibits the drinking of alcohol within the specified zone. A proposal to establish an AFZ must, in all cases, be supported by evidence that the consumption of alcohol has compromised the public's use of those footpaths, roads or car parks. The maximum duration of an AFZ is four years although it may be re-established upon following the same procedure that was used to establish the zone.

Report

The management and operation of an AFZ is a collaborative approach between Council and Police Local Area Commands. Council's role is to administer the establishment and sign posting of the zones, whilst the Police have responsibility for enforcement.

The procedure that Council must follow prior to resolving to declare an AFZ, is outlined in the *The Local Government Act 1993* and is summarised as follows:

- 1. Publish a notice in one or more local newspapers advising of Council's intention to establish the alcohol free zone and inviting public submissions. The minimum period for lodging representations is 14 days after publication of the notice.
- 2. Consider any submissions received, and where it is decided to declare the zone, advise:
 - The Anti Discrimination Board
 - The Officer in charge of the Police Station nearest to the zone
 - The liquor licensees and secretaries of registered clubs whose premises adjoin or are adjacent to the proposed zone
 - Any known group that might be affected by the creation of the AFZ
 - Council must give each of the abovementioned notified organisations or persons at least 30 days to make written submissions.
- 3. Consider any submissions received and where it is decided to proceed with the declaration, notify that decision (whether as originally proposed or as amended), in a local newspaper at least seven days in advance of the proposed date of commencement.
- 4. Signpost the area in accordance with the Act.

Re-establishment of existing Alcohol Free Zones

The following zones that are subject of this report are proposed to be re-established. The specific streets covered by the zones are shown in Attachment 1 to this report and are listed below:

Claymore:

Dobell Road (between Gould Road and western boundary of Claymore Public School) Gidley Crescent (between Dobell Road and southern boundary of Davis Park) Gould Road (between Boyd Street and Dobell Road)

Glenfield:

Belmont Road (between Railway Parade and Hosking Crescent) Hosking Crescent Magee Lane Railway Parade (between Chesham Parade and Belmont Road) Trafalgar Street (between Railway Parade and Baldwin Avenue) Waterloo Place

Ingleburn:

Boots Lane Cambridge Street Carlisle Street (between Cambridge Street and Suffolk Street) Cumberland Road (between Cambridge Street and Suffolk Street) Ingleburn Road (between Macquarie Rd and Suffolk Street) Macquarie Road (between Ingleburn Road and Oxford Road) Nardoo Street (between Oxford Road and Suffolk Street) Norfolk Street Oxford Road (between Ingleburn Road and Lionel Street) Palmer Street (between Norfolk Street and Suffolk Street) Salford Street Suffolk Street

Macquarie Fields:

Berrigan Crescent Brooks Road (between Victoria Road and Parliament Road) Clematis Place Eucalyptus Drive (between Hibiscus Crescent and Rosewood Drive and between Rosewood Drive and Maple Place) Harold Street (between Parliament Road and Victoria Road) Maple Place Mulga Place Risdoni Way Rosewood Drive (between Harold Street and Eucalyptus Drive) Rubida Way Saligna Way Victoria Road (between Brooks Road and Mary Street)

Minto:

Burrows Lane Erica Lane Kent Street (between Stafford Street and Redfern Road) Minto Road (between Stafford Street and Redfern Road) Pembroke Road (between Stafford Street and Redfern Road) Redfern Road Ruth Place Stafford Street Surrey Street (between Stafford Street and Redfern Road) Susan Place Unnamed Iane 6.1w (between Erica Lane and Surrey Street) Unnamed Iane 6.1w (between Ruth Place and Redfern Road) Somerset (from Wiltshire Street north 200m)

Minto (Zone 2):

Ben Lomond Road (from Pembroke Road to Selwyn Avenue) Selwyn Avenue Perisher Circuit Snowy Avenue Longhurst Road (from Selwyn Avenue to Ben Lomond Road) Curruthers Street Trickett Street Gawler Avenue Glass House Street (from Trickett Street to Ellery Street) Gardiner Street Patching Close Smart Close Tate Place Edward Edgar Street Blane Street Norman Dunlop Crescent Jenner Street Lind Street **Minto (Zone 2) Continued:**

St Andrews:

Ballantrae Drive (between Arisaig Place and St Andrews Road) Stranraer Drive (between Ballantrae Drive and Aberfeldy Crescent) Cupar Place Deveron Place

Requests to vary existing Alcohol Free Zones

An email was received from a member of a local community group requesting that the Claymore Alcohol Free Zone be extended to include the following locations:

- Claymore Community Centre and Gumnut building (Gould and Dobell Roads, Claymore, between Fullwood Place and Abrahams Way)
- Mission Australia (Lot 507 Dobell Road, behind Claymore Shopping Centre)

The email states that the abovementioned buildings are targeted areas for vandalism as they are not in sight from the main roads, and that staff at the Claymore Community Centre are cleaning up broken bottles on a weekly basis.

As noted earlier in the report, the Local Government Act provides Council with the capacity to establish AFZ's for the safe use of roads, footpaths and public car parks. In addition, where public housing open space is adjacent to a public place which is to be declared an Alcohol Free Zone, the public space may be included in the AFZ by the Council, providing Council obtains the consent of the NSW Land and Housing Corporation and the NSW Police.

In view of the above request it is proposed the current zone be amended to extend the zone along Dobell Road to the intersection of Fullwood Place, Claymore (as shown in the AFZ map at attachment 1). In addition, it is considered the request to extend the zone marginally along Gould Road from the intersection of Boyd Street to Abrahams Way and along Boyd Street to Leigh Crescent will be of limited effect and that as a preferred alternative, consideration be given to including the adjoining public housing open space in lieu (as shown in the AFZ map at attachment 1). NSW Police and NSW Land and Housing have both indicated their support for the proposed alternative extension of the existing Claymore AFZ.

Further, an Alcohol Free Zone application was received from a person working in the Macquarie Fields area, requesting that an AFZ be created to include Saywell Road (adjoining the property at 46 Saywell Road and in the vicinity of Atchison and Parliament Roads).

The Alcohol Free Zone application states that there is an issue with staff from the office at 50 Saywell Road being harassed by a local person who is loitering and drinking alcohol near the BWS retail liquor outlet which is at the rear of the office where the toilets are located.

This application refers to an isolated situation and as the Police have general powers to deal with matters of harassment and move persons on if causing public nuisance, Council may wish to consider whether the establishment of an AFZ to create a new zone in Macquarie Fields, in such circumstances, is warranted.

It is intended to seek further comment from NSW Police Macquarie Fields LAC as to the merits of this application or otherwise, and details of the response is intended to be provided at or prior to the Planning and Environment Committee Meeting of 11 August, 2015.

In addition, a general business item was raised in the City Works Committee Meeting of 12 May 2015, suggesting that consideration be given to making Redfern Park Minto an Alcohol Free Zone in light of anti-social behaviour and vandalism in the vicinity. The Crime Coordinator of the NSW Police Macquarie Fields Local Area Command has since reviewed reports held by Police regarding incidents in the vicinity of Redfern Park and confirmed their support of extending the zone to include Redfern Park. Accordingly, it is recommended that the Minto (Zone 2) AFZ be extended to include Redfern Park, Minto.

Conclusion

The abovementioned zones are due to expire on 24 December 2015 and accordingly, in the interest of continuing to promote the safe use of the roads, footpaths and car parks within the zones and reduce the potential for alcohol related incidents, it is proposed these zones be re-established and extended as proposed in the body of the report and as shown on the attached plans (Attachment 1).

Further, it is recommended that Council proceed to publicly notify its intention to re-establish the AFZ's that are the subject of this report, including the proposed extension of the Claymore zone, and the Minto (Zone 2) AFZ as outlined above in the body of the report.

The creation of a new zone in Macquarie Fields to include Saywell Road (adjoining the property at 46 Saywell Road and in the vicinity of Parliament and Atchison Roads) is not recommended as it relates to an isolated situation and the police have sufficient powers to move on a person that is causing public nuisance.

Officer's Recommendation

- 1. That a notice be placed in a local paper inviting submissions from any person or group, in response to Council's intention to re-establish and amend Alcohol Free Zones over the streets, car parks, public housing open areas and footpaths detailed in Attachment 1 to this report for the proposed Alcohol Free Zones of:
 - (a) Claymore (as amended)
 - (b) Glenfield
 - (c) Ingleburn
 - (d) Macquarie Fields
 - (e) Minto
 - (f) Minto Zone 2 (as amended)
 - (g) Raby
 - (h) St Andrews.
- 2. That all submissions received during the exhibition period be reported to Council.
- 3. That the creation of a new zone in Macquarie Fields to include Saywell Road (adjoining the property at number 46) and in the vicinity of Atchison and Parliament Roads not be recommended as it relates to an isolated situation which is able to be regulated separately by the NSW Police; and the applicant be informed of the reasons for this accordingly.
- 4. That should no submissions be received during the exhibition period, advice be given and comment be sought on Council's intention to re-establish and or amend Alcohol Free Zones over the areas specified in Recommendation 1 above to:
 - (a) The Anti Discrimination Board
 - (b) The Officer in charge of the Police Station nearest to the zone
 - (c) The liquor licensees and secretaries of registered clubs whose premises border on or adjoin or are adjacent to the proposed zone
 - (d) Any known group or organisation that might be affected by the creation of the Alcohol Free Zone.
- 5. That a further report be provided to Council on the re-establishment and amendment of the Alcohol Free Zones specified in Recommendation 1 at the completion of the period for comment by the organisations/groups listed in Recommendation 4.

Committee's Recommendation: (Oates/Thompson)

That the Officer's Recommendation be adopted.

Attachments

- 1. Minutes of the Local Traffic Committee Meeting of 16 July 2015 (contained within this report)
- 2. Minutes of the Campbelltown Traffic Committee Meeting of 16 July 2015 (contained within this report)

Purpose

To seek Council's endorsement of the recommendations arising from the Local Traffic Committee and Campbelltown Traffic Committee Meeting held on 16 July 2015.

Report

RECOMMENDATIONS OF THE LOCAL TRAFFIC COMMITTEE ON 16 JULY 2015

Reports Listed for Consideration

LTC 15/19 Longhurst Road, Minto - Installation of Traffic Calming Devices

That Council design and install traffic calming devices in Longhurst Road between Guernsey Avenue and Ben Lomond Road, Minto.

LTC 15/20 Airds Bradbury Urban Renewal: Signs and line marking Stage 2

- 1. That Council approve the signs and line marking for roads covered by Airds Bradbury Urban Renewal Stage 2.
- 2. That Council not approve the treatment at the intersection of Wheatley and Riverside Drive.

Late Items

NOTE: This next item was dealt with at the Council Meeting on 21 July 2015.

LTC 15/21 Kellerman Drive, St Helens Park - Service Station Development

- 1. That the Committee discuss the proposal for the right turn bay in Kellerman Drive, St Helens Park to access the proposed service station on the corner with Appin Road traffic signals.
- 2. That if there is any further development on the site the developer would be required to provide traffic studies to support the right turn lane for the increased development.

Note: Council at its meeting on 21 July 2015 made the following amendment:

- 1. That the recommendations of the Local Traffic Committee and Campbelltown Traffic Committee as detailed in the Minutes of the meeting held on 11 June 2015 be adopted with the exception of LTC item 15/14.
- 2. That in relation to item 15/14, Council concur with the Traffic Committee recommendation from its meeting held 16 July 2015 with respect to:
 - a) the proposal for the right turn lane in Kellerman Drive, St Helens Park to access the proposed service station on the corner with Appin Road traffic signals.
 - b) if there is any further development on this site the developer would be required to provide traffic studies to support the right turn lane for the increased development.

RECOMMENDATIONS OF THE CAMPBELLTOWN TRAFFIC COMMITTEE ON 16 JULY 2015

Reports Listed for Consideration

CTC 15/16 School Zone Flashing Lights

That the information be noted.

General Business

CTC 15/17 Traffic Lights - Corner of Broughton Street and Moore Oxley Bypass

That the Roads and Maritime Services representative investigate the concerns raised regarding right turn movements with traffic heading east-west along Broughton Street and report back to the Traffic Committee.

Officer's Recommendation

That the recommendations of the Local Traffic Committee and Campbelltown Traffic Committee as detailed in the Minutes of the meeting held on 16 July 2015 be adopted.

Committee's Recommendation: (Hawker/Borg)

That the Officer's Recommendation be adopted.

CARRIED

Council Meeting 18 August 2015 (Dobson/Hawker)

That the Officer's Recommendation be adopted.

Electorate:	Macquarie Fields
Author Location:	Traffic and Road Design Unit

Attachments

- 1. Design plan for traffic calming devices (Option 1)
- 2. Feedback of Community Consultation

Background (16/7/2015)

On 12 March 2015, a report was presented to the Local Traffic Committee with two options for resolving ongoing safety concerns due to speeding vehicles on Longhurst Road, Minto (between Guernsey Avenue and Ben Lomond Road). It was recommended by the Committee that consultation be undertaken with the affected residents for Option 1 and the outcome be presented back to the Committee for a final decision.

Consultation letters were mailed out to the affected residents in May 2015. Council has not received any concerns regarding this proposal with 3 residents giving positive support to the proposal (refer attachment 2).

It is recommended that the traffic calming devices be designed and installed as per the proposal.

Council Officers will review the performance of these devices should concerns arise.

Officer's Recommendation

That Council design and install traffic calming devices in Longhurst Road between Guernsey Avenue and Ben Lomond Road, Minto

Discussion (16/7/2015)

The Committee discussed the matter and supported the recommendation as presented.

Recommendation of Local Traffic Committee

That Council design and install traffic calming devices in Longhurst Road between Guernsey Avenue and Ben Lomond Road, Minto

Airds Bradbury Urban Renewal: Signs and line marking Stage 2			
LTC 14/26 CTC 14/14			
Campbelltown			
Traffic and Road Design Unit			

Attachments

- 1. Locality Site Plan showing location Stage 2 Airds Bradbury
- 2. Extract proposed bus route Airds Bradbury Urban Renewal AECOM Study
- 3-6 Linemarking and Signage Plans Stage 2

Background (16/7/2015)

Council has received signs and line marking plans for Stage 2 of Airds Bradbury development, which are presented to the Committee for its endorsement.

The Airds Bradbury Urban Renewal development area contains approximately half of existing roads and the rest as new roads. Stage 2 is similar in principle, with the extensions of existing Nandewar Place and Heathfield Place into Avenues.

Stage 2 of the development extends from Stage 1B serviced by a 11.6m collector road from the new roundabout, currently being constructed on Georges River Road. This new Road No. 1 (Wheatley Drive), follows a route through these stages and joins the existing Riverside Drive under stop sign control. Although this revised proposal differs from the Master Plan it provides a more direct route for buses along Riverside Drive.

Council Officers have reviewed the submitted plans and noted the key features as follows;

- 1. Stop sign controls are proposed for 6 T-intersections (refer Attachments 3,4 and 5).
- 2. The T-intersecton of Nandewar Avenue and Jensen Way is not controlled by signs (refer attachment 3).
- 3. The angle bend in Road No 82 (Jacka Street) is provided with no stopping restriction and yellow edge lines (refer attachment 4, diagram 3).
- 4. No stopping signs are provided at road narrowing points.

In regards to the treatments at the intersections of Riverside Drive and Wheatley Drive, Council Officers are requesting further clarifications on the;

a. Continuity of the existing on road cycleway through the intersection and

b. the location of the bus stop/shelter in Riverside Drive, which appears to be in conflict with movements of right turn rigid vehicles out of Wheatley Drive.

It is recommended that in reference to points 1 to 4 noted above the signs and line markings for Airds Bradbury Urban Renewal Stage 2 be approved.

It is further recommended that the treatment at the intersection of Wheatley Drive and Riverside Drive not be supported because of the on road cycleway and the location of the bus stop/shelter.

Officer's Recommendation

- 1. That Council approve the signs and line markings for roads covered by Airds Bradbury Urban Renewal Stage 2.
- 2. That Council not approve the treatment at the intersection of Wheatley and Riverside Drive.

Discussion (16/7/2015)

Following discussion on a number of key issues identified in the report it was agreed that the treatment at the intersection of Wheatley and Riverside Drive be further investigated and reported back to the Committee.

Recommendation of Local Traffic Committee

- 1. That Council approve the signs and line markings for roads covered by Airds Bradbury Urban Renewal Stage 2.
- 2. That Council not approve the treatment at the intersection of Wheatley and Riverside Drive.

- 3. RMS Traffic Signal Plan Site 3813 Issue C
- 4. Truck Turning Path Plan Left turn into Kellerman Drive
- 5. Right turn bay Civil Works Plan

Background (16/7/2015)

The Local Traffic Committee at its meeting of 11 June 2015 considered a proposal for the treatment of a right turn bay in Kellerman Drive, St Helens Park to access a proposed service station and convenience store on the corner of Appin Road and Kellerman Drive.

In presenting the sign and line marking details to the Committee, discussions led to issues raised by the Roads and Maritime Services on the feasibility of the right turning bay. It was recommended that the matter be deferred pending further information from the Roads and Maritime Services.

With the details as previously presented, it is recommended that the matter be brought back to the Committee for further discussion.

Background (11/6/2015)

Transportation and traffic planning consultants on behalf of the developer for the proposed service station and convenience store, Lot 5210 (DP 1193880), on the corner of Appin Road and Kellerman Drive has forwarded a set of plans that includes a plan for signs and line markings associated with access alterations to the site off Kellerman Drive, St Helens Park.

The proposed development includes the construction of a service station and convenience store building, internal access driveway, landscaped gardens, parking spaces, ingress and egress works. The site is on the south east corner of the intersection and is bounded by Appin Road and Kellerman Drive with central medians on each leg. The median in Kellerman Drive is associated with its sag point and there is limited sight distance for vehicles turning in and off this section of the road.

The developer has proposed two driveways off Appin Road which will cater only for southbound traffic. No changes will be made to the median on Appin Road. Alterations to the

median in Kellerman Drive was approved by Council for access purposes with a condition that the right turn bay must comply with Austroads and relevant design guide lines.

The driveway access on Kellerman Drive is proposed on the furthest eastern border of the property allowing for a protected right turn bay catering for 4 to 5 cars. Due to the location of the driveway and internal access road, Council had conditioned the development so that articulated and heavy rigid vehicles servicing the site shall not enter from Kellerman Drive at any time.

The consultant has proposed the following in relation to the access in and out of Kellerman Drive;

1. The existing median in Kellerman Drive between Appin Road and the driveway access will be replaced by a 0.9m wide and median including a 'bull nose' entry for a length of 12m (approximately) into Kellerman Drive. The width of the westbound carriageway will be reduced from 5.5m to 5.1m so as to provide a 3.3m wide eastbound through lane and a 3m right turn lane (as per the attachment 2).

The 'bull nose' island treatment will be partially mountable (50mm high) to allow for safe turning movement of vehicles including buses especially from Appin Road left into Kellerman Drive.

- 2. 'No Stopping' restriction on both sides of Kellerman Drive.
- 4. Trucks prohibited signs (R6-10-2) at the entry of Kellerman Drive.
- 5. 'No Right Turn' (R2-6 R) and No Left Turn (R2-6 L) with supplementary 'Vehicles Under 6m Excepted' signs for east bound and west bound traffic at the access entrance off Kellerman Drive.
- 6. 'No U Turn' signs at the median opening for eastbound traffic (compliance to the conditions of consent).
- 7. E4 median edge line on the southern side of the median, east of the driveway. This delineation is required to line the edge of westbound traffic with the edge of the new revised median on the west side of the driveway. The new median will be offset by 0.4m.
- 8. 'Keep Clear' delineation at the driveway for westbound traffic.

It is recommended to the Committee that the signs and line marking plan Drawing No. 4034-CC-03 for the median alterations in Kellerman Drive be endorsed.

Plans for the access on Appin Road are not presented as part of this report but will be assessed by the Roads and Maritime Services as the road is a State Classified road.

It should be noted that the consultant has forwarded a revised traffic signal plan to RMS (Attachment 3) showing a T1 turning line across the intersection to direct traffic from the median lane in Fitzgibbon Lane to the kerbside of Kellerman Drive for their approval.

Council Officers have identified a concern with larger service vehicles travelling through the development site wishing to turn left out of the driveway into Kellerman Drive. These vehicles due to their turning sweep path are unable to make the turn. In addition, due to the

alignment of the internal circulating road, vehicles may need to prop at the driveway to allow larger vehicles to travel through. It is recommended that signs be installed within the property preventing trucks and services vehicles exiting onto Kellerman Drive.

Officer's Recommendation

That the Committee discuss the proposal for the right turn bay in Kellerman Drive, St Helens Park to access the proposed service station on the corner with Appin Road traffic signals.

Discussion (16/7/2015)

The report is again presented to the Traffic Committee for further consideration.

Following further discussion it was agreed that if there is any further development on the site the developer would be required to provide traffic studies to support the right turn lane for the increased development.

Recommendation of Local Traffic Committee

- 1. That the Committee discuss the proposal for the right turn bay in Kellerman Drive, St Helens Park to access the proposed service station on the corner with Appin Road traffic signals.
- 2. That if there is any further development on the site the developer would be required to provide traffic studies to support the right turn lane for the increased development.

Background (16/7/2015)

Roads and Maritime Services advised Council in May 2015 that the following school zones were scheduled to receive school zone flashing lights in the week beginning 4 May 2014.

- Glenfield Public School
- Eagle Vale High School
- Campbelltown Performing Arts High School
- John Warby Public School
- John Therry Catholic High School/Our Lady Help of Christians Catholic Primary School
- Lomandra School
- St Peters Anglican Primary School
- Briar Road Public School
- Airds High School

Discussion (16/7/2015)

The Manager Technical Services advised that concerns have been raised regarding right turn movements with traffic heading east-west along Broughton Street and requested that Roads and Maritime Services undertake a safety audit to determine if improvements could be made.

The Manager Technical Services advised the RMS that there is a speed camera at this location.

The RMS representative advised that the matter would be investigated and reported back to the Traffic Committee.

Officer's Recommendation

That the Roads and Maritime Services representative investigate the concerns regarding right turn movements with traffic heading east-west along Broughton Street raised and report back to the Committee.

Purpose

To provide Council with an update on the lighting within Council Dog Leash Free Areas.

History

Council at the meeting of 9 June 2015 resolved that a report be presented investigating the cost and feasibility of installing lighting in all designated Dog Leash Free Areas across the Local Government Area (LGA).

Council currently has five dog leash free areas. The latest was recently opened at Milton Park.

Report

A review of the facilities indicates that solar lights have been installed at three of the five Dog Leash Free Areas and these have been installed as a result of specific requests. The lighted Dog Leash Free Areas are at St Helens Park, Minto and Raby.

In order to determine the patronage at the Dog Leash Free Areas Council has been installing cameras at each site. The Dog Leash Free Areas will be analysed to determine the number of visits and the time of the visits. This will allow Council to determine both the need for more facilities, the size and type of facilities as well as the extent of lighting that may be required.

Currently the Dog Leash Free Areas are generally opened from 6.00am through to 8.00pm though this may vary slightly due to the run schedule of the contractor doing opening and closing of Council facilities.

The information gathered will determine if the facilities could be opened longer in order to cater for the various work schedules of users of these facilities.

Once the data has been collected from all Council's current Dog Leash Free Areas an overall strategy will be developed and reported to Council indicating the need for further Dog Leash Free Areas and the types of facilities that could be provided (including lighting). In determining this strategy possible locations within the LGA will be considered. A review of facilities within other local government areas will be carried out along with community consultation to further form the strategy.

Officer's Recommendation

That a draft strategy for the provision of Dog Leash Free Areas that will include the installation of lighting, within the Campbelltown Local Government Area be developed and reported to Council.

Committee's Recommendation: (Glynn/Brticevic)

That the Officer's Recommendation be adopted.

CARRIED

Council Meeting 18 August 2015 (Dobson/Hawker)

That the Officer's Recommendation be adopted.

Council Resolution Minute Number 154

That the Officer's Recommendation be adopted.

1.3 Milton Park - Consolidation of Passive and Active Recreation Facility

Reporting Officer

Director City Works

Attachments

Locality Plan (contained within this report)

Purpose

To provide information to Council regarding the feasibility of consolidating a passive and active recreation facility in the vicinity of Milton Park to service the northern end of the city, potentially including a leash free area.

Report

Council at its meeting of 17 March 2015, requested a report on the feasibility of consolidating a passive and active recreation facility in the vicinity of Milton Park to service the northern end of the city, potentially including a leash free area.

Milton Park is a significant recreation area, over 30 hectares in size. It currently consists of a rugby league field, two soccer fields, six softball fields, a Council compound, a couple of formalised car parks, a new amenity facility, a newly constructed leash free area and a large amount of bushland and grassed areas.

The complex issues pertaining to the usage of Milton Park require considerable thought to ensure coordination of the varied usage requirements in order to maximise the opportunities of the site and ensure the park is reaching its full potential.

As such, it is proposed that Council prepare a draft Master Plan for Milton Park, in consultation with the community, all affected organisations that currently utilise the facilities. As part of the Master Planning process, the draft Master Plan including the outcomes of the community consultation will be provided to Council for consideration and input at a future briefing. The draft Master Plan will provide a clear vision for Milton Park, what mix of activities are best suited to the whole recreation area, better direction on what actions are required to improve the quality of services and a timetable for the improvements.

Subject to Council's acceptance of the draft Master Plan, it should then be placed on public exhibition before a further report comes back to Council.

Officer's Recommendation

- 1. That a draft Master Plan be prepared for Milton Park, Macquarie Fields.
- 2. That the draft Master Plan be placed on public exhibition, for a period of 28 days, in accordance with Council's Communications Strategy.
- 3. That following the public exhibition period, a further report be tabled with Council for the consideration of the Master Plan for Milton Park, Macquarie Fields.

Committee's Recommendation: (Borg/Mead)

That the Officer's Recommendation be adopted.

CARRIED

Council Meeting 18 August 2015 (Dobson/Hawker)

That the Officer's Recommendation be adopted.

Council Resolution Minute Number 154

That the Officer's Recommendation be adopted.

ATTACHMENT 1

1.4 LED Street Lighting Update

Reporting Officer

Manager Technical Services

Attachments

Nil

Purpose

To provide Council with an update on the feasibility and cost benefit of upgrading the current street lighting to LED (Light Emitting Diodes).

History

Council at its meeting of 29 July 2014 requested a report regarding the feasibility and cost benefit of replacing the existing lighting within the Local Government Area (LGA) with LED lighting.

While the street lighting is currently owned by Endeavour Energy it is Council that is responsible for providing a street light service to the community under the *Local Government Act 1993* and the *Roads Act 1993*. Currently there is no clear governance framework around the street lighting service that is provided. As a result, the interests of Council and the utility authorities has been progressively diverging.

This situation has been exacerbated in recent years by the service providers rapidly increasing tariffs for aging infrastructure that is not being adequately maintained. In addition to this, there is an emergence of LED as a more efficient and cost effective lighting source. There has been, and continues to be, a strong local government desire to take advantage of the safety, environmental and cost gains that this new technology offers as many other organisations are implementing around the world.

Currently, there are many different charges associated with street lighting and each lighting type is charged at a different rate. The charges put in place by the utility company are regulated by the Australian Electricity Regulator with limited input by local government. The utilities currently charge councils for any light they request to be removed and this charge is based on the serviceable life remaining on the pole and luminaire. This charge is only meant to be applicable if the utility funded the installation of the pole and luminaire.

Report

At present, Campbelltown City Council pays for the maintenance and energy provision to the 16,000 street lights in the LGA that are owned by Endeavour Energy. Council pays approximately \$3.3m per year for these street lighting services. High population growth expected in the LGA over the next decade is expected to add some 4000 street lights to those that Council is responsible for and this will possibly rise to some 7000 additional lights by 2030. It can be seen that if the status quo was maintained, Council's costs would increase by approximately 50%, not accounting for any CPI or other street light rate increases.

There are generally two categories of street light known as 'P' and 'V' category. "P" category is generally used in minor streets and pedestrian areas whilst 'V' category lighting is for main roads and public open spaces where a higher level of lighting is desired. Currently Endeavour energy has approved LED lighting for only 'P' category light with trials commencing on 'V' category lighting. These trials are envisaged to take at least a further two years to complete with no timeframe as to when an LED luminaire will be approved.

To determine the costs associated with converting the current permissible lights to LED is very difficult for staff to determine due to the complexity of who initially funded the installation of the street lighting, along with accurately determining the various charges associated with each lighting type. To assist Council in determining the feasibility and change over costs associated a specialist consultant was engaged to examine the various charges, how they are impacting Council's business, and what options are available for Council to obtain a better street lighting service.

Around the world, LED street lighting is now being widely rolled-out on all categories of roads to cut costs, improve safety and reduce environmental impacts. LED can broadly cut street lighting energy consumption by 50% for a typical mix of legacy lighting and there are also significant maintenance benefits because of the low failure rates and long-lives of LED's. Overall, LEDs have been assessed as having at least a 20% lower total cost of ownership than traditional lighting types with the gap progressively widening over time.

If Council was to replace the whole street lighting network with LED, Endeavour Energy would not accept responsibility for maintaining the lights other than in the 'P' category areas as it has not approved any LED 'V' category fittings. The benefit in changing part of the network over to LED is questionable as to the overall cost benefit and Council lighting network charges would still be controlled by Endeavour Energy.

The review undertaken by the specialist consultant to date indicates that the transitioning of the whole street lighting network to LED would provide the best and most cost effective benefit to Council.

The NSW Government went to the March 2015 election seeking a mandate to privatise the electricity distribution network serving Campbelltown City Council. This presents local government with best opportunity to seek street lighting network reforms and a number of NSW councils have already made representation to government about these reforms.

The specialist consultant is now working with staff to prepare further information for Council consideration to own and operate its own street lighting network providing the opportunity to competitively put the service to the open market. It is anticipated that the specialist consultant will complete their report in the coming months.

Council has already taken on the full ownership of the street lighting network on the recently completed section of Farrow Road and is currently seeking costs to own and operate the network on the soon to be commenced Eagle Vale Drive upgrade. An LED upgrade to both of these locations will provide Council with a trial on the benefits of such an approach. Council officers have also undertaken discussions with the developer of the Willowdale Estate about the option to undertake a similar trial on the street lighting network within the estate.

Costing on a wider scale approach and the need for Council to approach government to seek reform to the street lighting network as part of the privatisation of the electricity distribution network are currently being finalised. A report will be presented to Council in the coming months that will provide more comprehensive information on the benefits and costs of a wide scale conversion of the street lighting network to LED and Council taking ownership of this new asset.

Officer's Recommendation

- 1. That the information be noted.
- 2. That a further report be tabled for Council consideration upon completion of the specialist consultant's investigations on possible large scale reforms to the street lighting network and on the option of converting the complete network to an LED solution and possible Council ownership of the network.

3. ASSETS AND SUPPLY SERVICES

3.1 T15/15 Air Conditioning Services

Reporting Officer

Acting Manager Assets and Supply Services

Attachments

The following confidential attachment has been distributed to Councillors under separate cover as numerous tenderers have indicated that the contents of their tender are commercial-in-confidence:

Evaluation and Pricing Matrix

Purpose

To advise Council of the tenders received for air conditioning services and recommend that Council accept the tender submitted by Ultimate 1 Air Conditioning Pty Ltd.

History

Council had in place a contract for air conditioning services which has ended. As Council continues to require these services and the contract expenditure historically exceeds the legislative threshold of \$150,000, Council invited tenders for a new contract.

Report

Legislation

This tender process was conducted in accordance with the *Local Government Act 1993*, the *Local Government (General) Regulation 2005* and Council's Procurement Policy and Procedures.

Contract Expenditure

Funds for these works are allocated in Council's budget.

Contract Term

The term for this contract will be for a period of four years.

Advertising of Tenders

Tenders were advertised in The Sydney Morning Herald, The Macarthur Advertiser and The Macarthur Chronicle in the weeks commencing 18 and 25 May 2015. Tenders were also advertised on Tenderlink and Council's website. The Ingleburn and Campbelltown Chambers of Commerce and Industry were notified.

Tender Document

Organisations were requested to submit the following information with their tender response:

- company details
- references
- company experience, particularly as they relate to these services
- details of nominated resources, including supervisor details, a management plan for recruiting staff and vehicle/equipment specifications
- response time confirmation
- pricing
- insurances
- environmental practices
- Work Health and Safety management systems
- conflict of interest declaration
- collusive submission declaration
- additional terms of contract, if proposed.

Tenders Received

Tenders closed on Tuesday 9 June 2015. Thirteen on-time responses were received from the following organisations:

- A.G. Coombs (NSW) Pty Ltd
- Airadvice Pty Ltd
- Austech Airconditioning Services Pty Ltd
- Chill Tech Services Pty Ltd
- Hi Air Australia Pty Ltd
- Innovative Air Solutions Pty Ltd
- Nu-Tech Airconditioning Pty Ltd
- Quirks Australia Pty Ltd
- Ram Airconditioning Pty Ltd
- Trilogy Servicing Pty Ltd
- Ultimate 1 Air Conditioning Pty Ltd
- Ultra Refrigeration Pty Ltd
- Velocity Air Pty Ltd

Evaluation Process

The Evaluation Panel, consisting of officers from Assets and Supply and Governance and Risk evaluated the tenders against the following weighted assessment criteria:

- experience of the company
- nominated resources
- pricing
- work health and safety
- environmental commitment.

The Evaluation Panel used Council's standard 0-10 scoring system for all non-pricing criteria with 10 being the highest score.

The Work Health and Safety and Environmental Practices criteria were assessed on the basis of unsatisfactory, satisfactory or exceptional.

The scoring of tendered prices was determined based on tradesperson hourly rate and the accumulation of the preventative maintenance annual cost over a four year period, applying indexation to Consumer Price Index if nominated.

Short Listing

The Request for Tender process allows for a short listing process to occur at Council's discretion. This process excludes a Tender from further consideration at any stage of the evaluation process on a range of conditions, as follows:

- it is found not to comply with the Conditions of Tendering
- it is evaluated as not meeting or addressing a criteria
- it is found to be unacceptable in terms of effectiveness against the evaluation criteria
- it is evaluated as representing a greater than acceptable price
- it is found to be presenting unacceptable risk
- it is evaluated as not achieving a satisfactory standard.

The Evaluation Panel elected to short list on the condition of representing a greater than acceptable price. The Tender Evaluation Panel determined this would ensure Council can perform the requirements of the contract within the budgeted amount, and anticipated that any tendered rate that is over this amount would not be considered unless none of the shortlisted companies met the requirements of the tender.

Organisations Not Short Listed

As a result of the short listing process, the following companies are not recommended as they submitted a more than acceptable tradesperson rate and the Tender Evaluation Panel did not see any added value or benefit in recommending a more expensive tenderer:

- A.G. Coombs (NSW) Pty Ltd
- Chill Tech Services Pty Ltd
- Hi Air Australia Pty Ltd

- Quirks Australia Pty Ltd
- Ultra Refrigeration Pty Ltd
- Velocity Air Pty Ltd.

Short Listed Organisations

The following organisations were shortlisted:

- Airadvice Pty Ltd
- Austech Airconditioning Services Pty Ltd
- Innovative Air Solutions Pty Ltd
- Nu-Tech Airconditioning Pty Ltd
- Ram Airconditioning Pty Ltd
- Trilogy Servicing Pty Ltd
- Ultimate 1 Air Conditioning Pty Ltd.

Evaluation of Short Listed Organisations

Ultimate 1 Air Conditioning Pty Ltd provided the best response to Council and is recommended for the provision of air conditioning services as they:

- provided satisfactory details of their company experience, particularly as they relate to the Services
- provided satisfactory details of the nominated resources
- tendered competitive pricing to Council
- provided satisfactory work, health, safety and environmental documentation
- provided referees that confirmed their standard of service.

Airadvice Pty Ltd, Innovative Air Solutions Pty Ltd, Nu-Tech Airconditioning Pty Ltd and Trilogy Servicing Pty Ltd are not recommended as they tendered a more expensive price than the recommended tenderer.

Austech Airconditioning Services Pty Ltd and Ram Airconditioning Pty Ltd are not recommended as they:

- did not provide satisfactory details of their company experience
- did not provide satisfactory details of their nominated resources
- tendered a more expensive hourly rate than the recommended tenderer

Assurance of the Process Undertaken

In accordance with Council's Procurement Procedures, a Tender Review Panel, consisting of members of Council's Executive reviewed the Tender to assure the process was undertaken in a manner that was fair, transparent and resulted in the best value outcome to Council.

Management of Proposed Contract

The Contractor will be subject to contract management and safety reviews throughout the duration of the contract in accordance with Council's contract management requirements.

Officer's Recommendation

- 1. That Council accept the offer of Ultimate 1 Air Conditioning Pty Ltd for the provision of air conditioning services for a period of four years.
- 2. That the Contract documents be executed under the Common Seal of Council.
- 3. That the unsuccessful Tenderers be notified of the results of tender process.

Purpose

To provide Council with an update on the Campbelltown Commemorates event held on 24 April 2015.

Report

Campbelltown Commemorates was held on Friday 24 April 2015, in partnership with local RSL Sub Branches. The event formed part of Council's commitment to commemorating the Anzac Centenary through a range of initiatives previously reported to Council, such as events, videos, banners, intergenerational projects and memorials.

The event, which ran from 10.00am to 2.00pm was originally planned for Koshigaya Park, however due to several days of inclement weather in the lead up to the event, a decision was made to relocate to The Cube, Campbelltown Catholic Club.

Aimed at providing students with an opportunity to reflect on, and learn more about our military history, its costs and its impacts on our country, Campbelltown Commemorates began with a march of returned servicemen and women, a speech by the Mayor and a formal Anzac commemorative service which included a live bugle call.

A significant part of the event was the inclusion of a mass choir performance which saw local schools perform a special Anzac commemorative song. In 2014 Council was approached by a3 - Australian Arts Alive to share an original choral composition they had commissioned as part of the Anzac Centenary. 'Here You Lie (Side by Side)' was partly inspired by the words of M.Kemal Ataturk (Founder of the Turkish Republic in 1923) which are on the ANZAC Memorial at Gallipoli. They hoped that choirs across the country would perform it at events scheduled as part of local commemorations.

In acknowledgement of our schools being important stakeholders in the local community, with the students representing the future of the city, Council invited all local primary and high schools to participate in a mass choir to sing this moving tribute to the Anzacs at the event. More than 150 students from a number of schools across the Campbelltown Local Government Area (LGA) performed the song, a heartfelt performance which was also supported by Sweet Tonic Singers Inc.

To mark the Anzac Centenary, Council produced a significant commemorative plaque to be presented to each school in the Campbelltown LGA and a number of appropriate organisations, including both local RSL Sub Branches. Each plaque was handmade and individually numbered, reflecting the importance of the Anzac Centenary to our country. The plaques were presented by the Mayor as part of the formal proceedings. Council staff have received a number of positive comments about the plaques from the recipient schools and organisations, with many saying the plaques would be incorporated into their own Anzac displays.

Campbelltown Commemorates also provided a platform to showcase the outcomes of the Adopt a Digger project, a partnership between local veterans, volunteers, schools and youth groups. The project called on participants to research a World War 1 veteran who was a resident of Campbelltown at that time.

The projects were presented using a number of mediums including dance, story boards, interactive displays digital media and artworks. This intergenerational initiative was a fantastic way for young people to learn more about Campbelltown's military history through the personal stories of our service men and women. Schools and local organisations who participated in the project included Thomas Acres Public School, Woodland Road Public School, St Peters Primary School, Ingleburn High School, Eagle Vale High School, Ingleburn High School and Boystown.

Other activities on the day included poppy making, a historic vehicle display which included a Saracen troop carrier and other military vehicles, food experiences, family history searches and a WWI uniform dress up activity. Interactive displays by Campbelltown RSL Sub Branch, Ingleburn RSL Sub Branch, Macarthur Legacy, Campbelltown and Ingleburn RSL Women's Auxiliary, Dredges Cottage Veterans Recreation Centre and the Campbelltown Steam and Machinery Museum were also a very popular part of the event, which saw more than 800 people attend across the day.

As part of Council's documentation of Anzac Centenary activities across the LGA, a short video was produced to capture the activities of the day. This video will made available on Council's website and can currently be viewed at https://youtu.be/QJ9PVGUNtWI. A copy of this video will also be sent to every school in the LGA.

Campbelltown Commemorates was a very special and meaningful event that showcased the true spirit of the Anzacs, as well as the local schools and organisations who participated on the day.

From: Anderson, Tammy [mailto: Sent: Tuesday, 28 April 2015 8:21 PM To: Amanda King Subject: Thank You - Briar Road Public School

Hi Amanda,

On behalf of my staff, students and community I wanted to pass on our sincere thanks to the council. The 100th Anniversary Anzac event was well organised and run. To receive such a significant plaque was an added bonus. Our staff presented the plaque to our school captains as part of our school Anzac events which were also held on Friday. The students absolutely loved the story and meaning of the plaque.

We were very honoured to be part of the wider school community events and have proudly placed our plaque on display for the school community.

Thank you Campbelltown Council for your support of our wonderful school.

Regards,

Tammy Anderson

Hi Amanda,

I just wanted to say thank you so much for having us today. It was such a great event for the students to attend and they all had a great time. The service was so moving and truly beautiful to see, the displays were excellent and it was great to have so much interaction for the students. It's great to be part of such a caring and thoughtful council.

Thanks again on behalf of Ingleburn Public School.

Kind regards,

Courtney Overell Relieving Assistant Principal Sports Coordinator Ingleburn Public School Phone: Email:

2. COMMUNITY RESOURCES AND DEVELOPMENT

2.1 Seniors Week 2016 Funding Application

Reporting Officer

Manager Community Resources and Development

Attachments

Nil

Purpose

To seek Council's endorsement of a \$5000 funding application from the NSW Department of Family and Community Services under the Seniors Week Grants Program to assist in the development of activities and events scheduled for Seniors Week 2016.

Report

Seniors Week is an annual state-wide community event that celebrates the valuable contribution seniors make to our community. Contributory state grants of up to \$5000 are available to local government, community organisations and community groups to enable them to provide relevant Seniors Week activities.

The overall theme for 2016 Seniors Week which will be held from 1-10 April 2016 is 'Be Inspired'.

Preliminary discussions with local seniors groups and various Council sections have identified a proposed project which would focus on a community initiative, encouraging seniors to participate in training opportunities to develop skills in their areas of interest.

This would be achieved through working in partnership with sections of Council, agencies and local seniors to develop a series of workshops that focus on environment, health and technology to be showcased at Seniors Week.

The project aims to provide an opportunity for older people to learn new skills, be socially connected and interact more easily with the community, family and friends. It also creates opportunities for seniors to mix or socialise with new people from diverse backgrounds and maintain social participation to support good health and wellbeing. The project will also include project management training to provide participants with the tools needed to engage and deliver the information and skills learnt to the broader community. Workshops will provide a platform to promote Council services and facilities for local seniors to gain knowledge and connect to available resources whereby Council will work in partnership with other groups or agencies.

Officer's Recommendation

- 1. That Council endorse the application of \$5000 funding for 2016 Seniors Week from the NSW Department of Family and Community Services to provide a seniors event as part of the wider 2016 Seniors Week program in Campbelltown.
- 2. That subject to notification of success, the Funding Agreement from the NSW Department of Family and Community Services be accepted and signed by the General Manager on behalf of Council.

Committee's Recommendation: (Glynn/Thompson)

That the Officer's Recommendation be adopted.

CARRIED

Council Meeting 18 August 2015 (Rowell/Lound)

Campbelltown City Council six monthly progress report against the 2013-2017 Delivery Program, January - June 2015 (contained within this report)

Purpose

To advise Council of the progress in undertaking the principle activities outlined in the 2013-2017 Delivery Program.

History

It is a requirement of the *Local Government Act 1993*, that Council receive a progress report on the principle activities outlined in the 2013-2017 Delivery Program. The principle activities of Council are defined as the services and functions it provides to the community as detailed in the Delivery Program.

Report

In 2013, Council adopted the 2013-2017 Delivery Program. The Delivery Program outlines the objectives, strategies, services and functions, programs of work and activities that Council will undertake during 2013-2017.

The attachment to this report provides an update on the progress of the Council's services and function towards meeting the community's objectives detailed in the Community Strategic Plan.

Highlights from within the progress report include:

- the renewal of six community playgrounds under the renew-connect-revitalise program
- the completion of the Fit for the Future submission
- the ongoing expansion of eServices
- the introduction of the Leadership Excellence Program for Coordinators.

Officer's Recommendation

That the information be noted.

Committee's Recommendation: (Thompson/Oates)

That the Officer's Recommendation be adopted.

CARRIED

Council Meeting 18 August 2015 (Rowell/Lound)

2013-2017 Delivery Program Six Monthly Progress Report January -June 2015

Introduction

In June 2013, Council adopted the Integrated Planning and Reporting (IPR) framework. As a requirement of the *Local Government Act 1993*, a bi-annual progress report is to be submitted to Council, highlighting the key achievements of the principle activities, as well as any exceptions. Council's principle activities are defined as its services and functions as outlined in the Delivery Program. Council provides 27 services and nine functions as part of its operations.

Services

- Provision of environmental education
- Management of natural resources
- Regulation of environmental compliance
- Management of natural waterways
- Land use planning for the City
- Completion of Development Application assessments
- Support of MACROC
- Encouraging tourism to the Campbelltown region
- Promotion of City centres
- Provision of the road network
- Provision of a stormwater and drainage network
- Management of City traffic network
- Provision of the footpath and cycleway network
- Provision of education and care for children
- Provision of library services
- Provision of sport and recreational services
- Provision of services to targeted community groups
- Operation of the Campbelltown Arts Centre
- Provision of waste management
- Provision of community safety programs
- Provision of animal care services
- Provision of public health information and services
- Emergency bushland management
- Maintain the public spaces of the City
- Community events
- Community access to Council information
- Provision of customer service

Functions

- Governance
- Business management
- Work with State and Federal Governments
- Human resources
- Information technology
- Management of activities to support organisational sustainability
- Asset management
- The management of Council's property assets
- Financial management

This progress report identifies whether we, as a community, are moving towards the vision

"a connected community with opportunities to grow in a safe and natural environment"

The legend below describes if the principle activity (service or function) is moving towards or away from delivering on the community vision.

	Strongly progressing towards the vision	
	Making progress towards the vision	
(Shifting away from the vision	
(Rapidly moving away from the vision	

A sustainable environment

Strategy - 1.1 Promotion of sustainability

unction - 1.1.1 Management of activities to support organisational ustainability	Status
 Council continues to monitor its progress toward a sustainable organisation through the use of Sustainability Accounting Tool which offers cost and consumption information on six key areas of sustainability – electricity, gas, water, paper, waste and vehicle fleet. Council's Sustainability Committee continued to meet periodically to discuss and facilitate a diverse range of sustainable initiatives. These initiatives involve the development of policies, the design and implementation of onground works, the expenditure of funds and project accounting. Council's Sustainability Committee Working Parties continued to develop and implement projects of strategic relevance to their vision statements including: Sustainable Council: Development of a Sustainable Council intranet page to share, inform, educate and consult with Council staff on a range of sustainable projects and implementation of projects – 'Lets get Quirky' and 'Catchments Connecting Communities'. Council has undertaken an assessment on the energy use and efficiency of Campbelltown Arts Centre Council has engaged a contractor to install an 85 kW solar system on Greg Percival Library with the aim of reducing energy consumption at the facility by more than 40%. Preparation of health checks to monitor the consumption of water and energy at major facilities and across the organisation. Update of Council's Sustainable Events Management Policy. 	•

A sustainable environment Service - 1.1.2 Provision of environmental education Status A number of workshops were provided to the community in cooperation with the Macarthur Centre for Sustainable Living with approximately 300 residents attending. Workshops topics included: o green cleaning worm farming and composting o garden to table cooking- summer salads and stir-fries o simple and easy native gardening keeping chickens at home o no dig gardens and mulching o winter vegetable gardens o microwave cooking o green cleaning worm farming and composting o garden to table cooking- Preserving garden to table cooking- slow food cooking 0 microwave cooking Council coordinated a number of community clean up days at Council reserves, including Clean Up Australia Day. Through the events participants collected around 50 bags of rubbish as well as large items such as mattresses and vacuum cleaners. Council assisted the Airds Community Change Makers (CCM) receive a Keep Australia Beautiful Litter Grant. The grant is currently being implemented throughout the community, delivering clean up events, and educational workshops to the community. Council provided environmental education services and advice through events such as the regional Powerful Owl information evening and the Catch-a-Carp competition. International Composting Awareness Week events were held at Council's child care centres and local libraries Council provided environmental education workshops to local primary schools focusing on catchment protection and improvement in partnership with the Keep Australia Beautiful Enviromentors Program and the Australian Museum. Council has been working with local primary schools to produce drain stickers educating the community on catchment health and litter reduction through its Waterwise Waterways program Council in partnership with NSW Health and Community Greening Australia has delivered a regional environmental education program for schools called Kitchen Garden Workshop. The Catchments Connecting Communities program with Campbelltown Performing Arts High School has allowed students to develop actions to improve Marsden Park wetland and Ingleburn Reserve. Overall, Council has been engaging with 13 schools in the Campbelltown LGA through a number of environmental education activities. Ongoing promotion of environmental issues and events through media and displays. Development of environmental educational signage for parks and reserves. Preparation of school resources such as the environmental education plan. Production of environmental event calendars. Environmental education workshops were held at Council and private child care centres, including activities such as composting and recycling workshops. Preparation of a revised Environmental Education Strategy.

 The Noxious Weed and Pest Animal Strategy continued to be implemented. The ongoing works for the Part 5 Assessment Manual under the Environmental Planning and Assessment Act 1979 continued. Council continued to support the operation of Bushcare groups. The implementation of the Tree Swap Program continued. Aquatic weed control was undertaken across 62 kilometres of waterway. Council initiated a bush regeneration project in the Smith's Creek catchment aimed at enhancing Koala habitat. Work continued on the preparation of a Koala Plan of Management. A draft Biodiversity Strategy has been prepared. Council continued to assess Development Applications for impacts on Campbelltown's natural resources and identify measures to ameliorate the impacts. Council successfully obtained funding for a bush regeneration team under the federal governments Green Army Program. The Georges River Combined Council's Committee in partnership with Council successfully obtained funding under the federal governments Biodiversity Funding Program for a team of aboriginal bush regenerators. Conservation Volunteers Australia in partnership with Council obtained funding through the NSW Environmental Trust to undertake volunteer bush regeneration and koala surveys at two Council reserves. Council initiated an Indian Myna Bird Action Program in partnership with local men's sheds, to educate residents about the pest bird species and reduce their impacts on human health and the environment. Since its inception a total of 15 education workshops have been completed. Council installed 29 signs in koala habitat areas across the LGA to encourage drivers to be alert for koalas. Review and update of Ingleburn Plan of Management in consultation with local school students was undertaken. The Weed Action Program continued to be implemented. Ongoing habitat enhancement at Noorumba Reserve continued. <l< th=""><th></th><th>trategy - 1.2 Protection of the natural environment</th><th></th></l<>		trategy - 1.2 Protection of the natural environment

S	ervice 1.2.2 - Regulation of environmental compliance	Status
	Council received and investigated 395 customer requests relating to illegal building and development (185), pollution (168) and rubbish dumping (42). Council issued 80 notices/orders under the Environmental Planning and Assessment Act 1979 (63) and the Protection of the Environment Operations Act, 1997 (17). A total of 75 penalty notices were issued in relation to Environmental (68) and Land Use(7) offences	-

A sustainable environment

Strategy - 1.3 Care for natural waterways

S	ervice 1.3.1- Management of natural waterways	Status
	The Water Quality Monitoring Program continued across the Local Government Area. Council continued to support the Georges River Combined Council's Committee and its programs. Council constructed a wetland in the upper Spring Creek catchment in partnership with greater Sydney Local Land Services with the aim of improving water quality within the Georges River catchment. The second annual Catch-a-Carp competition was held on Sunday 22 March 2015 at Eagle Vale Pond, Eagle Farm Reserve, Eagle Vale. The event saw over 500 registered participants and many spectators coming along to enjoy the event. A total of 45 carp were caught across the three and a half hours of fishing. Preliminary designs for waterway improvement works in Quirk Reserve, Bradbury were developed.	-

s	ervice 3.1.1 - Provision of the road network	Status
	The annual roads rehabilitation program was implemented which included more than 350 sections equivalent 562,684m ² of roads. The high profile road projects include: Norfolk Street of Ingleburn Eucalyptus Drive of Macquarie Fields Sark Grove of Minto Junction Road of Ruse Repair projects were completed on 11 car parks including Lindesay Street Car Park Bicycle and Road Safety Educational Centre Car Park Macquarie Fields Railway Station Car Park Campbelltown Sports Stadium Car Park Campbelltown Sports Stadium Car Park Leumeah Station Car Park Bridge and culvert work included Safety Barrier Repair Work at Airds Road and Therry Road Bridges Corrosion Repair at Hurricane Drive Culvert Culvert Replacement works at Pembroke Park Bridge. More than 2200m of kerb and gutter was reconstructed across the LGA. Reactive maintenance was carried out to street furniture such as signs, seats, bins and fences. Beverley Road, Campbelltown is being extended between Warby Street and Chamberlain Street. A contract has been awarded for final length of the duplication of Eagle Vale Drive with works due to commence in August 2015.	•

S	ervice 3.1.2 - Provision of a stormwater and drainage network	Status
•	The Annual Stormwater Maintenance Program for pits, culverts, gross pollutant devices was completed. Work also included cleaning and maintenance of creeks, rivers, and water bodies. Council's capital improvement program on stormwater structures like pits, lintels and drop structures reconstruction program for 2014-2015 was completed. Including works carried out at drop structures at Cary Grove, Minto and Williamson Road, Ingleburn. Drainage upgrade works have been completed in Beverley Road Campbelltown.	-

Service 3.1.3 - Management of city traffic network	Status
 A Traffic study has commenced for the Ingleburn CBD. 	

An accessible City

Strategy 3-2 - The encouragement of the use of alternative transportation in, out and around the City

Service 3.2.1 - Provision of the footpath and cycleway network	Status
 The annual programs for installation of new footpath and cycleways, and reconstruction existing footpath and cycleways were completed. More than 5400m² of footpaths was reconstructed including: the Bicycle and Training Centre, Campbelltown Guernsey Avenue, Minto. New cycleways have been provided in Airds Road Leumeah and Fitzgibbon Lane Rosemeadow. Council was successful in obtaining grants to provide three new sections of cycleway in the LGA. 	•

MA

A safe, healthy and connected community

Strategy - 4.1 The provision of a balanced range of services to the community

ervi	ice 4.1.1 - Provision of education and care for children	Status
•	Council provides nine Long Day Care, one Occasional Care Service, one Family Day Care Scheme, two Before and After School Care and two Vacation Care services. All services operate according to National Regulations and Licencing standards. A review to rationalise services at the three Council Long Day Care services in Minto and Ingleburn Occasional Care was conducted. Council endorsed the recommendation to cease being the provider of child care at Parklands Early Learning Centre and Ingleburn Occasional Care and close the services as of 18 December. Council will explore external providers to provide child care at the two sites. The Mobile Toy and Book Library and Child and Family Centre continued to operate according to their funding guidelines and business plans.	-

S	ervice 4.1.2 - Provision of library services	Status
	The library service continues to provide a range of programs including those aimed at improved literacy, culturally and linguistically diverse (CALD) community, seniors, children and young adults. Campbelltown Library Service was selected as one of 13 NSW libraries to participate in a pilot program, Tech Savvy Seniors for CALD Communities, a NSW Government (through partners Office for Ageing and the State Library of NSW) and Telstra initiative. The popular weekly sessions were run consecutively over four weeks in each of three languages Cantonese, Hindi and Arabic. Summer and Autumn school holiday programs continue to be popular with over 1400 children and young adults attending programed activities. A record 575 children from 0 to 16yrs participated in Summer Reading Club. The Books for Babies program continues to provide strong support for early childhood literacy with over 540 Books for Babies bags, containing a high quality picture book by a well-known Australian author together and literacy support information, distributed to local families with new babies in the six month period. Over 8400 new items were added to the collection during the period including books, audio-visual material, periodicals and e-resources.	•

A safe, healthy and connected community

S	ervice 4.1.3 - Provision of sport and recreational services	Status
•	Campbelltown Sports Stadium continued to host Wests Tigers National Rugby League (NRL), hosting two matches in this reporting period. Both Sydney FC and Westerns Sydney Wanders (A-League) played at the stadium during this period providing elite level sporting events for the community. NSW State Cup and local football matches as well as school, zone, regional and state athletics carnivals were also held during this time.	
•	Ten residents of Campbelltown were selected to represent Australia and were considered eligible for financial assistance from Council.	
•	Council facilitated sporting ground requirements for sporting clubs in the provision of sport activities.	
•	Planning is underway for the appointment of independent consultants to write two new strategic planning documents. The Strategic Sport and Recreation Strategy and the Strategic Play Space Strategy will position Council to provide sport, active and passive recreation, play and leisure for the Campbelltown community for the long term. Both plans will help guide Council for the next 15 years in providing infrastructure and programs for the community. The strategies will provide a planning framework for areas such as sporting fields, aquatics, play grounds, cycleways, indoor facilities, stadia and other areas of sport and recreation services.	-
•	The Bicycle Education Centre hosted 38 school programs, 84 private bookings and the school holiday programs in the January, and April school holidays had 2,860 visitors.	
•	Council's four Leisure Centres continue to offer a range of fitness and swimming activities including Active Over 50's programs.	
•	Council's four Leisure Centres partnered with community based recreational programs, including Rainbow Club, Learn to Swim. Indigenous Learn to Swim, Go 4 Fun and Royal Life Saving Australia activities.	
•	Learn to Swim and squad programs saw strong levels of participation during Term 1 and Term 2.	

S	ervice 4.1.4 - Provision of services to targeted community groups	Status
•	Skate workshops were held for young people attending Council's skate parks Seniors Week, Youth Week, Community Forums on a variety of topical issues, International Women's Day, and Fishers Gig youth music festival heats were held.	
	Macarthur Community Options commenced preparations and training for the new Regional Assessment Services which are to commence operation on 1 July 2015.	
•	Local community groups received \$7500 for community projects. Residents were engaged in projects to promote positive community spirit, access to local services and involvement in community activities. The 2015 Ian Porter Scholarship and Brenton Banfield Medical Scholarship were awarded whereby Council provides assistance and	-
	access to academically able individuals from the Campbelltown LGA who through economic, social or other disadvantage have difficulty in participating in University study.

F١	unction 5.4.3 - Financial management	Status
	Council has entered into12 contracts with a value of approximately \$2.84m during the period, following a public procurement process. Long term financial planning tool developed to model borrowing strategies, ie. Internal vs external borrowings to facilitate alternative funding arrangements for Council's long term budget decisions. Direct monitoring of special rate variation funded renewal and maintenance projects to ensure delivery within appropriate timeframes and achievement of planned outcomes to reduce Council's asset renewal and maintenance backlog.	
	Council continued to manage investment and borrowings in accordance with the Long Term Financial Plan and associated policies. Investment income achieved budget forecasts.	-
	Council settled early a 5x5 renewal loan utilising reserve funding.	
	Council was successful in obtaining an \$8.5m Local Infrastructure Renewal Scheme subsidised loan for the road renewal program. Council also resolved to fund an additional \$1.5m via an internal loan to expedite a number of major building asset renewal projects. These loans are in specific accordance with Council's Long Term Financial Plan and were endorsed by NSW Treasury Corporation as a component of Council's asset management plan to supplement rates funding.	

2.3 Gardening Service

Reporting Officer

Manager Community Resources and Development

Attachments

Nil

Purpose

To advise Council about the potential for a gardening service in Campbelltown that is similar to a service provided in the Ryde Local Government Area.

History

Council at the meeting of 21 April 2015 requested that a report be presented investigating the potential for an Easy Care Gardening Volunteer Program similar to that supported by Ryde City Council and the report also include potential funding sources from State and Federal Government.

Report

Easy Care Gardening Inc. is non-profit charitable organisation that provides gardening and lawn mowing services to frail, aged pensioners, carers, and people on a disability support pension within the Hornsby, Ku-ring-gai, Ryde and Hunters Hill areas.

The service is partly funded through the Department of Family and Community Services (Ageing, Disability and Home Care) to provide services for frail, aged pensioners, carers, and people on a disability support pension. Although not run by Ryde Council, donations from Ryde and other local Councils, community groups, individuals and businesses help to finance the services provided. As the service relies upon a large number of volunteers, fees are kept to a minimum (\$12 per volunteer per visit, with a capped maximum fee of \$84 per visit dependent upon the work required).

Investigation of services available in Campbelltown has identified key local organisations. The Macarthur Home Modification Services is available to frail aged people, younger people with disabilities, and their carers. Like Easy Care, this service receives funding from the Department of Family and Community Services (Ageing, Disability and Home Care). If the person is under 65 they can call the service direct, if they are over 65 they need to call the My Aged Care phone line who can assist them with access to the service. The service is subsidised, providing lawn mowing at a cost of \$20 to \$30 per visit to eligible clients. Garden maintenance is provided only for the very frail costing them up to \$500, depending on the extent of work required.

A number of faith based organisations also provide some gardening services for people in need.

With the introduction of My Aged Care nation-wide on 1 July this year and the roll out of the National Disability Insurance Scheme commencing locally on 1 July 2016, there will be a more consistent and comprehensive linkage to frail aged people, younger people with disabilities, and their carers to services such as the Macarthur Home Modification and Maintenance Service and faith based organisations.

Through the Macarthur Community Options Service Council connects eligible people to these services as required.

2.4 Heart Foundation 2015 Go Red For Women Community Grants Program

Reporting Officer

Manager Community Resources and Development and Manager Healthy Lifestyles

Attachments

Nil

Purpose

To seek Council's endorsement of an application for \$10,000 funding from the Heart Foundation under the Heart Foundation 2015 Go Red For Women Community Grants Program to assist in the development of health and wellbeing projects and activities scheduled for 2016.

Report

The Go Red for Women campaign supports life-saving research, education and awareness of this important women's health issue. Grants of \$10,000 are open to local communities in metropolitan and regional NSW to run their own Women and Heart Disease awareness campaigns. The funded project would encourage and support women to recognise the importance and relevance of heart disease in women, know the warning signs of a heart attack and have a heart health check.

Preliminary discussions with Community Resources and Healthy Lifestyles teams have identified a proposed 'First Steps Heart Health Project' to improve the health and wellbeing of women in Council and the community with a focus on Aboriginal, culturally and linguistically diverse women. The project aims to form women walking groups that can sustain themselves beyond the project timeline. Workshops to raise awareness and provide education and information on heart disease, physical and emotional wellbeing will also be conducted. Women from the community walking groups will gain entry into the annual Campbelltown City Challenge Walk event in March 2016.

This would be achieved through Community Resources and Development and Healthy Lifestyles working in partnership with other sections of Council, services and the community to develop workshops and walking groups. The achievements of the walking groups will be showcased at Council's 2016 Challenge Walk event.

Officer's Recommendation

- 1. That Council endorse the application for \$10,000 funding from the Heart Foundation under the Heart Foundation 2015 Go Red For Women Community Grants Program to assist in the development of health and wellbeing projects and activities scheduled for 2016.
- 2. That subject to notification of success, the funding agreement from the Heart Foundation 2015 Go Red For Women Community Grants Program be accepted and signed by the General Manager on behalf of Council.

To provide Council with a report on Council's 2015 NAIDOC Week celebrations held from 5-12 July.

History

NAIDOC Week celebrations are held across Australia each July to celebrate the history, culture and achievements of Aboriginal and Torres Strait Islander peoples. NAIDOC Week is celebrated not only in Indigenous communities, but by Australians from all walks of life. The week is a great opportunity to participate in a range of activities and to support the local Aboriginal and Torres Strait Islander community.

Report

NAIDOC Week provides an opportunity each year to celebrate our Aboriginal and Torres Strait Islander cultures and recognise the contributions of Indigenous Australians in our community. This year the 2015 National NAIDOC theme was 'Standing on Sacred Ground-Learn, Respect and Celebrate' highlighting Aboriginal and Torres Strait Islander peoples' strong spiritual and cultural connection to land and sea.

NAIDOC Week celebrations were held across 5-12 July 2015, including a Flag Raising Ceremony, Community Fun Day and Touch Football competition. The official Flag Raising Ceremony, speeches and performances were held in front of Council's Administration Building to launch this year's NAIDOC Week celebrations on Monday 6 July 2015. The event was well attended by over 180 members of the Aboriginal and wider community and was followed by a Street March to Bradbury Park for the Community Day.

The Community Day was held from 11am – 3pm on Monday 6 July at Bradbury Park. The event included entertainment from local Aboriginal performers, amusement rides, and community activities provided by services. Council's Communications and Marketing, Sustainable City, Library Services and the Mobile Toy and Book Library participated and supported the event on the day. Over 35 organisations provided activities and engaged the community in order to provide information on their services and programs on the day. Approximately 1000 people attended the event across the day.

Twelve teams participated in the NAIDOC Week Touch Football Competition at Sarah Redfern Ovals on Wednesday 8 July. Children's activities were also provided for younger children attending the event.

To assist in the coordination of these events Council was successful in gaining financial and/or in-kind support from Office of Sport: Sport and Recreation, Macquarie Fields Local Area Command, Campbelltown Family Support Service, South Western Sydney Local Health District, Muru Nanga Mai, a Campbelltown Aboriginal Community Focus Group, the Campbelltown Seniors Issues Group and members of the local Aboriginal community.

All events proved very successful and initial feedback from the community, volunteers and service providers has been positive. Feedback provided will be used in the planning of the 2016 NAIDOC Week program.

Letters of appreciation will be sent to supporters of the 2015 NAIDOC Week events.

Nil

Purpose

To seek Council's endorsement of a submission to the Australian Government's Ministry for the Arts Indigenous Languages and Arts (Projects) Grant Program for the total sum of \$50,000.

Report

'One Billion Beats' is a multi-disciplinary music theatre work by Goenpul Jagara and Bundjulung writer, film maker and artist Romaine Moreton. It has been in development since 2010 and has been commissioned by Campbelltown Arts Centre to premiere in March 2016. Using spoken word, music, contemporary theatre techniques and cinematic visuals, 'One Billion Beats' explores the historical representation of Aboriginal people in Australian film, and provides autobiographical reflection by Romaine on her experiences of Western and Indigenous identity.

Romaine Moreton has worked in consultation with a local Tharawal Elder and the broader Aboriginal community to incorporate local experiences into the work. It is produced in collaboration with renowned artists Lou Bennett (music), Alana Valentine (writing and direction), Sean Bacon (video) and Vicki Gordon (Associate Producer).

Campbelltown Arts Centre proposes to submit an application to the Australian Government's Ministry for the Arts Indigenous Languages and Arts (Projects) Grant Program requesting \$50,000 for a two week development stage in November 2015 and a four week development stage in February 2016 which will culminate in a final rehearsal and the premiere of the work in March 2016.

Officer's Recommendation

- 1. That Council endorse a submission to the Australian Government's Ministry for the Arts Indigenous Languages and Arts (Projects) Grant Program for the total sum of \$50,000.
- 2. That subject to notification of success, the funding agreement from the Australian Government's Ministry for the Arts be accepted and signed by the General Manager on behalf of Council.

Committee's Recommendation: (Oates/Thompson)

That the Officer's Recommendation be adopted.

3.2 2015 APRA AMCOS Art Music Awards

Reporting Officer

Manager Cultural Services

Attachments

Nil

Purpose

To advise Council that new music work commissioned by Campbelltown Arts Centre as part of the 2014 Contemporary Music program which was presented as part of the Sydney Sacred Music Festival 2014 has been nominated as a finalist in the 2015 Australian Performing Right Association (APRA) Australian Mechanical Copyright Owners Society (AMCOS) Art Music Awards in the category of 'Best Jazz Work'.

Report

Campbelltown Arts Centre has been a presenting partner in association with The Sydney Sacred Music Festival since 2012.

Campbelltown Arts Centre commissioned for the 2014 Sacred Music Festival presentation, the 2013 Composer in Residence Simon Barker to create a new musical work 'Mujing'. This was a cross-cultural work built around a series of cycles in response to music associated with chant traditions found throughout Asia. The work was conceived by Barker and performed with collaborators Phil Slater (trumpet), Matt McMahon (piano), Carl Dewhurst (guitar), Riley Lee (Shakuhachi) and Bae II Dong (Korean Pansori Singing) receiving a five star review from the Sydney Morning Herald reviewer, Mr John Shand.

The Art Music Awards are presented each year by the APRA, AMCOS and the Australian Music Centre to recognise achievement in the composition, performance, education and presentation of Australian art music. Art Music covers activity across contemporary classical music, contemporary jazz and improvised music, experimental music and sound art.

'Mujing' has been announced as one of four finalists in the category of 'Best Jazz Work' at the 2015 APRA AMCOS Art Music Awards.

Winners will be announced at the 2015 Art Music Awards to be held on Tuesday 11 August 2015 at Sydney's City Recital Hall.

6.1 Renaming Macquarie Fields Leisure Centre

Reporting Officer

Manager Healthy Lifestyles

Attachments

Nil

Purpose

To advise Council on the feasibility of renaming the Macquarie Fields Leisure Centre.

History

Council at its meeting dated 26 February 2013 resolved that a report be presented on the feasibility of renaming the Macquarie Fields Leisure Centre (when all current works are completed) or other places of significance in honour of Kevin Wheatley VC or Ray Simpson VC.

Macquarie Fields Swimming Centre officially opened on 22 December 1973 as an outdoor swimming facility. Macquarie Fields Leisure Centre with the addition of the indoor swimming facility officially opened on 2 May 1998.

Report

Council completed renovations to the indoor change rooms, outdoor 50m pool and surrounding grounds to include two splash pads, a dry playground area, a BBQ area, outdoor shelters with seating and an outdoor amenities block which was officially opened in March 2014.

The centre is currently undergoing refurbishment to the front foyer and rectification works to the indoor 25m pool. Whilst repairs and refurbishments are undertaken, improvements are being made to the meeting room and front desk design to better facilitate the growth in demand and utilisation at the centre. Works are scheduled for completion in staged phases from July to September 2015.

Currently the two Victoria Cross medalists are recognised within the Campbelltown Local Government Area at Kevin Wheatley VC Reserve at Airds, Kevin Wheatley VC Memorial at Mawson Park and Ray Simpson Avenue, a new road name for Edmondson Park Urban Release Area.

Council currently has a Parks and Reserves Names Policy. Given that there are places of significance recognising both war veterans and that the current level of acknowledgment is considered appropriate, it is recommended that Council review the Parks and Reserves Names Policy to include a broader range of Council facilities and assets and guiding principles for how the organisation determines the renaming or naming of major community facilities, parks and reserves and other assets. This revised policy will be able to provide a clear process of how to best recognise significant identities within Campbelltown's history for appropriate naming rights and would focus on community engagement as a part of this process.

Officer's Recommendation

That a briefing night be provided to Council once the Parks and Reserves Names Policy has been revised and re-developed to include Council assets and facilities.

Committee's Recommendation: (Glynn/Oates)

That the Officer's Recommendation be adopted.

CARRIED

Council Meeting 18 August 2015 (Rowell/Lound)

That the Officer's Recommendation be adopted.

Council Resolution Minute Number 155

6.2 South West Sydney Academy of Sport Funding Increase

Reporting Officer

Manager Healthy Lifestyles

Attachments

Nil

Purpose

To seek Council approval for an increase in its yearly financial contribution to the South West Sydney Academy of Sport (SWSAS) by an additional \$4,000 for the 2015-2016 financial year.

History

Campbelltown City Council has been a significant financial contributor to the SWSAS since its inception in 1997 and has contributed \$22,000 plus GST annually since the 2008-2009 financial year. This contribution is equal to the contribution from Liverpool City Council. Camden Council contributes \$10,000 plus GST and Wollondilly Shire Council contributes \$8,800 plus GST annually.

Council has provided a further contribution to the SWSAS through the use of Council premises at 51 Queen Street, Campbelltown on favourable financial terms, which acknowledges the community benefit of the talent identification and development programs conducted by SWSAS.

Report

On Thursday 7 May 2015, a civic reception was held for 116 local junior athletes who have participated in Academy programs during the 2014-2015 program year. In the past five years, 465 local athletes have been supported by the Academy and its programs.

In recent communication, SWSAS requested Council to increase its contribution to the Academy from \$22,000 plus GST to \$26,000 plus GST for the 2015-2016 financial year and CPI linked with future years. The initial increase, once adopted by Council resolution, can be accommodated in the 2015-2016 budget.

The same request for funding increase has also been made of Liverpool City, Camden and Wollondilly councils. Wollondilly Council has not committed to this increase, however, has continued their regular funding as well as nominating SWSAS for the Mayoral Golf Award, in which they received additional funding.

Officer's Recommendation

- 1. That Council increase its annual financial contribution to South West Sydney Academy of Sport by an amount of \$4,000 for a total annual contribution of \$26,000 plus GST for the 2015-2016 financial year.
- 2. That Council revisits a CPI increase for future years as part of the next budget process and a further report be presented to Council.

Committee's Recommendation: (Glynn/Lound)

That the Officer's Recommendation be adopted.

6.3 Roads and Maritime Services Grant Application Campbelltown Bicycle Education Centre

Reporting Officer

Centre

Manager Healthy Lifestyles

Attachments

Nil

Purpose

To seek Council's endorsement of a submission to the Roads and Maritime Services through the Community and Road Safety Education Scheme (CARES) requesting \$3,000 to purchase a range of youth size helmets and bicycles to assist Campbelltown Bicycle Education Centre.

Report

The Bicycle and Education Centre provides a range of road safety educational programs and bike sizes to accommodate children aged from kindergarten through to year six, students with special needs and adults. These programs are reviewed annually to complement changing school and student educational needs. Programs are designed to educate students in safe road behaviour and bicycle skills appropriate to their age and ability.

The Roads and Maritime Services is an important partner in the development and ongoing operation of the Bicycle Education Centre and has supported other community and CARES facilities by supplying and maintaining traffic lights, signs and line marking.

It is proposed to submit an application to the Roads and Maritime Services through CARES requesting \$3,000 to purchase a range of youth size helmets and bicycles to support the centre's programs. This grant application would assist in the provision of resources to the increasing number of both preschool and primary school groups requesting to visit and participate in the Centre's road safety educational programs.

If successful, the grant is required to be spent and acquitted by the end of the 2015-2016 financial year.

Officer's Recommendation

- 1. That Council endorse a submission to the Roads and Maritime Services through the Community and Road Safety Education Scheme requesting \$3,000 to purchase a range of youth size helmets and bicycles to assist Campbelltown Bicycle Education Centre.
- 2. That subject to notification of success, the funding agreement from the Roads and Maritime Services be accepted and signed on behalf of the General Manager.

Committee's Recommendation: (Thompson/Lound)

That the Officer's Recommendation be adopted.

Draft Disaster Relief Donation Policy (contained within this report)

Purpose

To seek Council's endorsement of the Draft Disaster Relief Donation Policy.

History

Council at its meeting on 19 May 2015 resolved that Council develop a policy that establishes criteria for the consideration of disaster relief at a national and international level.

Report

In the past, Council has resolved to donate relief funding to those communities affected by the Asian tsunami (2005), Victorian bushfires (2009), Queensland floods (2011) and the Philippines typhoon (2013).

The Campbelltown community has throughout each disaster, expressed its significant compassion and desire to support the victims of disaster stricken areas, and has supported Council's decision to provide financial aid.

Based on advice from government departments, financial support is the most immediate and effective way of offering assistance to those affected by disaster. In some instances in-kind aid may also be beneficial to the recovery efforts where skilled staff are able to volunteer their time and knowledge to the affected community.

This Policy has been developed to provide a framework to guide Council's decision to respond to humanitarian crises created by natural disasters by way of a financial or in-kind contribution to disaster stricken areas, locally, nationally and internationally.

The Policy ensures that Council's contribution to affected areas is made in a timely and efficient manner and that any donations given are accountable and transparent to the Campbelltown community.

Officer's Recommendation

- 1. That the Draft Disaster Relief Donation Policy be adopted by Council.
- 2. That the Policy review date be set at 30 August 2018.

Committee's Recommendation: (Hawker/Kolkman)

That the Officer's Recommendation be adopted.

CARRIED

Council Meeting 18 August 2015 (Mead/Hawker)

That the Officer's Recommendation be adopted.

Council Resolution Minute Number 156

That the Officer's Recommendation be adopted.

Councillor Mead asked for his name to be recorded in opposition to the resolution for Item 1.1 – Disaster Relief Donation Policy.

ATTACHMENT 1		
Campt	Delltown city council	POLICY
Policy Title	Disaster Relief Donation Policy

Relevant Legislation	Local Government Act 1993	
Responsible Officer	Manager Governance and Risk	

Policy details may change prior to review date due to legislative changes, therefore this document is uncontrolled when printed.

Objectives

This Policy has been developed to provide a framework to guide Council's decision to respond to humanitarian crises created by natural disasters by way of a financial or in-kind contribution to disaster stricken areas, locally, nationally and internationally.

The Policy ensures that Council's contribution to affected areas is made in a timely and efficient manner and that any donations given are accountable and transparent to the Campbelltown community.

Policy Statement

Campbelltown City Council acknowledges the needs of other communities, locally, nationally or internationally in times of humanitarian crises created by natural disaster.

Council may wish to respond to a natural disaster by making a donation to a charity or charities which provide humanitarian assistance to communities affected by a natural disaster.

The amount to be contributed will be determined by resolution of Council and will be limited to financial or in-kind aid, unless specifically requested by the relevant aid agency.

An early decision to donate either financial aid or in-kind aid is essential and most effective when made within the immediate stages following the disaster to assist with rescue efforts and minimise human loss.

Scope

This Policy applies to all natural disasters recognized by the State and Federal Government.

Contributions will be limited to financial and in-kind aid. Other fundraising events and activities will be dealt with outside of this policy.

Donations should generally be made to aid agencies recognised by:

- Emergency Management NSW for local disasters
- Department of Human Services (DHS) for national disasters
- Australian Agency for International Development (AusAid) or Australian Council for International Development (ACFID) for international disasters. The Australian Red Cross and Salvation Army are both members of ACFID.

Council is responsible for approving all disaster relief donations.

Definitions

Natural Disaster is the effect of a natural hazard, that is, flood, drought, fire, tsunami, hurricane, earthquake, or tornado, which leads to financial, environmental and/or human losses.

Humanitarian Crisis is an event or series of events which represents a critical threat to the health, safety, security or wellbeing of a community or other large group of people, usually over a wide area. Armed conflicts, epidemics, famine, natural disaster and other major emergencies may all involve or lead to a humanitarian crisis.

Event for the purpose of this policy, will describe a disaster that is so catastrophic that it overwhelms the normal social and material support systems of those affected.

Principles

Determining the Eligibility of a Natural Disaster/Humanitarian Crisis

Following the occurrence of a natural disaster/humanitarian crisis, a Councillor may submit a written request to the General Manager to make a donation to a Natural Disaster or humanitarian crisis. The General Manager will assess whether the event meets the criteria of this policy and where it is determined that the nature of the event meets the criteria, the request will be presented to the next Council Meeting as Notice of Motion for consideration.

Funding Resources

As natural disasters are not foreseeable, donations will be sourced from Council's Section 356 Contributions/Donations budget.

Financial Contribution

Financial contribution will be based on the severity of the disaster and at the discretion of Council and will generally provide for a contribution of up to \$20,000. The actual amount is to be decided by Council on a case by case basis.

In-kind Contribution

Donations of in-kind support will require the resolution of Council and for logistical purposes is best limited, but not restricted to disasters that occur within Metropolitan and Regional New South Wales.

In-kind support may include time, personal or organisational expertise, advice or other organisational resources.

Material aid

It is not generally recommended that material aid such as non-perishable food items, clothing, medical supplies, etc. are donated as they are often found impractical or inappropriate for the climate and culture and do not meet the priority needs of those affected. Research shows that material aid, unless specifically requested, has proven costly in time, money and labour as it requires sorting, storing and transporting.

Criteria for donation

The following is to be considered when deciding on an appropriate donation:

- the scale of the disaster
- the capacity of other government agencies and organisations to respond to the disaster
- the need for ongoing support that is rebuilding disaster stricken areas once the initial crises has been dealt with
- the impact of any such crises on our immediate region and community
- the affected areas relationship to Campbelltown
- the affected areas connection to the cultural origin of residents of Campbelltown.

The preferred charity should be recognized by the Australian Government Aid program (AusAID) or Australian Council for International Development (ACFID), Australian Government Department of Human Services or LGNSW to ensure the aid agency's credibility.

Responsibility

The **General Manager** is responsible for undertaking an initial assessment against the policy, having regard to the nature of the event and the donation criteria, and where required submitting that assessment to the next Council Meeting for consideration in conjunction with the request.

Council is responsible for approving all donations by resolution of Council.

Communications and Marketing is responsible for providing a media release to the community informing them of Council's decision to provide financial or in-kind aid, ensuring that community confidence is maintained in the use of community contributions to relief aid, and the provision of regular updates to Council and the Community on additional support that can be offered once a recovery plan has been established.

Governance and Risk is responsible for coordinating the correspondence and contribution to the relief aid organisation and maintaining a register of relief aid donations.

Effectiveness of this Policy

This Policy will be reviewed in accordance with Council's adopted procedure for Policy Development and Review to ensure the criteria and general requirements comply with the relevant legislative requirements.

END OF POLICY STATEMENT

1.2 Actuarial Report 2015

Reporting Officer

Manager Governance and Risk

Attachments

Nil

Purpose

This report is to provide Council with information on the actuarial assessment completed for the 2014-2015 financial year as it relates to Council's Self-Insurance Licence for Workers Compensation.

Report

Campbelltown City Council enacted its Self-Insurance Licence for Workers Compensation on 1 July 2000. Under condition 3.4(a) of the licence, Council is required to have an actuarial report prepared by a qualified actuary, estimating Council's potential outstanding liability for its Workers Compensation claims each financial year. An independent external consultant (actuary) is contracted by Council to provide the actuarial report in meeting the requirements developed by WorkCover.

The 2015 report has been prepared in accordance with the Institute of Actuaries Professional Standard (PS300) relating to outstanding claims in general insurance as issued by The Institute of Actuaries of Australia. This report also provides results intended for accounting standards AASB137 as it related to the disclosure of provisions.

Statistics provided are as follows:

Claims Experience)		
Year	No of Claims	No of Claims Outstanding	Estimated Ultimate Claim Costs (\$)
Earlier	839	2	150,000
2009-2010	88	1	480,000
2010-2011	80	2	155,000
2011-2012	93	4	120,000
2012-2013	66	1	40,000
2013-2014	66	5	125,000
2014-2015	58	18	490,000
Total	1290	33	1,560,000

In the 2014-2015 financial year, 58 claims were reported and 33 claims remain outstanding. 18 of the claims relate to 2014-2015 and 15 relate to earlier years. Of the 18 claims, 8 have a precautionary estimate. The 10 remaining are not considered serious and are just waiting finalisation.

Based on these claims figures, Council's outstanding liability has increased in this financial year due to ongoing claims in each of 2009-2010 and 2014-2015 years.

Actuarial Liability of Outstanding C	Claims as at 30 June 2015
Current Component	\$730,000
Non-Current Component	\$2,080,000
Provision as at 30 June 2015	\$2,810,000

Security D	eposit 2015-2016
Estimated liabilities	\$2,810,000
50% Prudential Margin	\$1,400,000
Security Deposit	\$4,210,000

Council is required to lodge a bank guarantee or an investment with NSW Treasury Corporation (TCorp) to represent the security deposit for the Workers Compensation Licence. In the past Council was only in a position to accept the interest rates offered by TCorp, which were conservative when compared to those offered by other financial institutions. The Licence now contains provisions to allow TCorp to source interest rates from other approved financial institutions, giving Council the capacity to earn better returns on these invested funds. The investment that Council is required to hold for 2015-2016 is \$4.21m.

Every effort is made to ensure a safe working environment for staff and this is reflected by Council's commitment to Work Health and Safety. Council continues to provide safety awareness, increased training and improvements in identifying risk profiles associated with all work activities undertaken.

In the finalisation of the 2014-2015 financial accounts, an amount of \$4.21m has been restricted for future liabilities in accordance with the legislation. This restriction is required to be fully cash backed. There is also an internal restriction for future unforeseen potential liabilities of \$1.3m respectively.

The Workers Compensation vote in the budget has not increased for several years and provides for all expenses associated with the administration of the Workers Compensation Licence and also provides for three Safety Officers within Council's Work Health and Safety Unit.

Officer's Recommendation

That Council restrict funds of \$4.21m as per legislative requirements developed by WorkCover.

Committee's Recommendation: (Borg/Kolkman)

That the Officer's Recommendation be adopted.

CARRIED

Investment portfolio performance for the month of June 2015 (contained within this report)

Purpose

To provide a report outlining Council's investment portfolio performance for June 2015.

Report

Council invests any surplus funds that become available through the financial instrument designated by the Ministerial Order from the Office of Local Government. The Local Government Act 1993 and the Local Government (General) Regulation 2005 require a monthly investment report be presented to Council.

Council's Investment Portfolio as at 30 June 2015 stood at approximately \$104m. Funds are currently being managed both by Council staff and Fund Managers and are in accordance with the *Local Government Act 1993*, *Local Government (General) Regulation 2005* and Council's Investment Policy.

Portfolio Performance

Directly managed investments show an outperformance of the AusBond bank bill index benchmark by more than 100 basis points for the reporting period.

Monthly annualised return	June
Council Managed Funds	3.27%
Benchmark: AusBond Bank Bill Index	2.32%

Investment returns can fluctuate during any one reporting period based on market perceptions, or as in the case of funds under management, changes in asset classes. As such, any measurement of performance is better reflected over a rolling 12 month period to average out any fluctuations in monthly performance. Council's total investment portfolio has outperformed the benchmark on average over the last 12 months.

Rolling year to date return	June
Council Managed Funds	3.66%
Benchmark: AusBond Bank Bill Index	2.55%

Council's portfolio as at 30 June 2015 is diversified with 69% in term deposits of varying lengths of maturity which are managed in accordance with market expectations and Council's investment strategy, 24% in floating rate deposits which gives Council a set margin above either 30 or 90 day bank bills, 6% in fixed rate bonds, 1% in funds in a short term at call account.

Maturity profile	30 June
Short term at call	\$1,006,041
0 – 3 months	\$30,585,740
3 – 6 months	\$21,450,400
6 – 12 months	\$24,807,098
12 months +	\$26,000,000

All investments are placed with approved deposit taking institutions. No funds are placed with any unrated institutions.

Credit exposure	30 June
AAA to AA-	66%
A+ to A-	26%
BBB+ to BBB-	8%
Other approved deposit taking institutions	0%

Economic outlook

The Board of the Reserve Bank of Australia (RBA) left the cash rate unchanged at the present level of 2% at its meeting 7 July 2015 which was as the market expected.

The accompanying statement of monetary policy was neutral citing that the economy has grown over the last 12 months albeit at a rate below the longer term average. The unemployment rate while elevated also has not changed significantly recently. Overall it is anticipated that inflation will remain within target in the near future. The Board reiterated that information on economic and financial conditions will allow them to assess the outlook and whether the current stance on monetary policy will foster continued growth and contain inflation.

Summary

Council's investment portfolio continues to outperform the benchmark of the AusBond bank bill index. The Local Government Investment Guideline leaves little scope for the enhancement of Council's investment portfolio with the various investment products being offered. However, to enhance the portfolio, advantage is taken on the length of maturity of the investment given the rating of the institution, as well as reviewing any new investment products offered in consultation with Council's financial advisor, Spectra Financial Services.

Regular liaison with Council's external financial advisor assists in monitoring all of the risk factors to maximise Council's return on the investment portfolio, while minimising the risk associated with this strategy.

Manager Financial Services

Attachments

- 1. Monthly rates summary (contained within this report)
- 2. Actual to budget result (contained within this report)
- 3. Rates statistics (contained within this report)

Purpose

To provide details of the 2014-2015 rates and charges levy and cash collections for the period ending 30 June 2015.

Report

Rates and charges levied for the year ending 30 June 2015 totalled \$93,734,951 representing 99.98% of the annual budget forecast.

Receipts collected to the end of June totalled \$92,531,236. In percentage terms this amount represents 97.04% of all rates and charges due to be paid. In comparison, the amount collected in the same period last year was 96.86%. This ratio returns a result of 2.96% in unpaid rates and charges which is the lowest amount in the last 19 years and exceeds the previous best result last year of 3.14%. This ratio is a measure of the effectiveness of Council's debt recovery policies and the willingness and or capacity of the community to pay their land rates and charges.

A process to identify and assist ratepayers experiencing difficulties in meeting the instalment deadlines was conducted early in June. This process commenced with the issue of 2074 letters of demand to ratepayers with a balance exceeding \$500 and two or more instalments outstanding. The letters were issued on 16 June 2015 on Council letterhead requesting payment or suitable payment arrangements in writing by 26 June 2015. During this period, 1493 defaulters paid the amount due, therefore requiring no further action.

Recovery action taken by Council's agent, Executive Collections involved the issue of 581 letters of demand to ratepayers that had either not paid the amount due made arrangements to pay their account over an extended period. Aside from penalty interest charges these ratepayers do not incur and additional costs unless they fail to maintain their arrangement to pay. During the month a number of accounts escalated in the formal recovery process, this involved service of 11 Statements of Claim, 28 Judgments and 41 Writs.

Ratepayers who purchased property after the fourth instalment notice and a balance remained due to be paid are issued a 'notice to new owner' letter. During the month, five letters were sent providing information on the annual rate amount and the balance due.

Officer's Recommendation

That the information be noted.

Committee's Recommendation: (Dobson/Mead)

That the Officer's Recommendation be adopted.

CARRIED

Council Meeting 18 August 2015 (Mead/Hawker)

That the Officer's Recommendation be adopted.

Council Resolution Minute Number 156

3.3 Sundry Debtors Report - June 2015

Reporting Officer

Manager Financial Services

Attachments

- 1. Debtors summary to 30 June 2015 (contained within this report)
- 2. Ageing of sundry debts to 30 June 2015 (contained within this report)

Purpose

To provide a report detailing the amount outstanding by type and age for sundry and miscellaneous debts for the period ending 30 June 2015.

Report

Debts outstanding to Council as at 30 June 2015 are \$1,669,985, reflecting a decrease of \$1,604,944 since May 2015. The ratio of outstanding debts to current invoices has decreased from 71% in May to the current level of 15%. This debtor management ratio is a measure of the effectiveness of recovery efforts, however is impacted by Council policies as well as economic and social conditions.

Invoices raised – June 2015

During the month, 1076 invoices were raised totalling \$1,272,560. The majority of these are paid within a 30 day period. The most significant invoices raised during the month have been in the following areas:

Government and other Grants – \$491,413 – the main invoices relate to:

Campbelltown Warriors Football Club - Community Building Partnership Program power upgrade	\$143,000

Aldi Foods Pty Ltd - monthly rental at Macquarie Fields	\$24,750
Nuvezo Pty Ltd - monthly rental Dumaresq Street Cinema	\$23,797
Glenquarie Hotel Pty Ltd - monthly rental Macquarie Fields	\$20,438
Mycorp Group Pty Ltd - monthly rental Macquarie Fields	\$13,696

Waste Collection Services – \$142,433 – the main invoices relate to:

G & G Waste Services - effluent removal for April and May 2015	\$69,547
Remondis Australia Pty Ltd - effluent removal for April 2015 and weekend	\$66,472
opening fees for 19 and 25 May 2015	

Road and Footpath Restorations - \$107,557 - the main invoices relate to:

Silcar Pty Ltd and Thiess Services Pty Ltd - road restorations in various areas within the Local Government Area	\$52,712
Petra Construction Group Pty Ltd - road restorations in Ingleburn	\$29,846
Sydney Water Corporation - road and footpath restorations in various areas within the Local Government Area	\$22,767

Receipts to the value of \$3,358,823 have been received during the period, the most notable in the following areas:

Government and other Grants	\$2,615,048
Land and Building Rentals	\$199,696
Road and Footpath Restorations	\$129,438
Various Sundry Items	\$71,697
Sportsground and Field Hire	\$67,919

Sundry debts outstanding – 30 June 2015

Debts exceeding 90 days of age totalled \$233,127 as at 30 June 2015. The major invoices relating to this balance include:

Description	Date Invoiced	Balance at 30 June 2015
Debtor 68316.9 - retaining wall between Lot 1451 DP 703487, 2 and 4 Brownlow Place, Ambarvale. Debtor is maintaining arrangement to pay \$450 per month as approved by Council	09/06/10	\$7,907
Casper's Baseball Club - electricity charges. Club is experiencing financial difficulty, however have been making irregular payments to reduce the debt. Council continues to meet with club and Macarthur Baseball to resolve debt	17/12/12 to 17/06/15	\$7,339

Caltex Oil Australia Pty Ltd - independent assessment has been received, Council is currently making adjustments to account and will submit final reconciliation to Caltex	08/02/13 to 02/01/15	\$8,930
Insight Mercantile Pty Ltd – abandoned motor vehicle, unable to locate owner of the vehicle. Finance company acknowledges Councils power to sell an encumbered vehicle. The vehicle has gone to the auctioneer and was not sold at first auction, however will be put up for further auction in an attempt to sell the vehicle and recover the costs	18/07/14	\$2,799
GE Automotive – abandoned motor vehicle, unable to locate owner of the vehicle. Finance company acknowledges Councils power to sell an encumbered vehicle. The vehicle has gone to the auctioneer and was not sold at first auction, however will be put up for further auction in an attempt to sell the vehicle and recover the costs	05/07/12	\$5,709
74366.6 - motor vehicle accident at the Animal Care Facility, no response to letters sent. Debtor has now been located and is in discussion with Council's agent	05/06/14	\$1,981
Master Woodturning - Land value associated with walkway closure adjoining 37 Lancaster Street, Ingleburn. Payment made to Council's solicitors and held in trust until finalisation of transfer	20/11/14	\$54,129 (paid)
McDonalds Australia Limited - additional rent payable for the period 20 December 2013 to 19 December 2014 for Glenquarie McDonalds. Payment expected by 31 July	24/02/15	\$93,293

Debt recovery action is undertaken in accordance with Council's Sundry Debtor Recovery Procedures Policy and commences with the issue of a tax invoice. A person or entity may be issued any number of invoices during the calendar month for any business, services or activities provided by Council. At the conclusion of each calendar month, a statement of transactions is provided with details of all invoices due and how payments or credit notes have been apportioned. Once an invoice is paid, it no longer appears on any subsequent statement.

All debts that age by 90 days or more are charged a statement administration fee of \$5.50 per statement. Debtors are contacted by telephone, email or in writing to make suitable arrangements for payment of the overdue debt. Where a suitable arrangement is not achieved or not maintained as agreed, a seven day letter is issued referencing referral to Council's debt recovery agents.

Matters referred to Council's recovery agent are conducted in accordance with relevant legislation and the *Civil Procedures Act 2001*. Formal legal recovery commences with a letter of demand (or letter of intent) providing debtors with at least 14 days to respond. In the event that no response is received, instructions are given to proceed to Statement of Claim allowing a further 28 days to pay or defend the action. Failing this, the matter will automatically proceed to judgment and continue through the *Civil Procedures Act 2001* process.

All costs associated with formal legal recovery are payable by the debtor and staff continue to make every effort to assist debtors to resolve their outstanding debt before escalating it through the local court.

During the month, 10 accounts were issued a letter of demand on Council's letterhead, advising that if the account was not settled or an appropriate arrangement was not made, the account will escalate to formal legal action through Council's agent.

Council's agents were instructed to proceed with one Examination Notice and one Examination Order for unpaid licence fees and one Judgment for unpaid meeting room hire.

Council officers continue to provide assistance to debtors experiencing difficulties in paying their accounts. Debtors are encouraged to clear their outstanding debts through regular payments where possible, to avoid any further recovery action.

Officer's Recommendation

That the information be noted.

Committee's Recommendation: (Kolkman/Borg)

That the Officer's Recommendation be adopted.

CARRIED

Council Meeting 18 August 2015 (Mead/Hawker)

That the Officer's Recommendation be adopted.

Council Resolution Minute Number 156

3.4 2014-2015 General Purpose Financial Report and 2014-2015 Special Purpose Financial Report

Reporting Officer

Manager Financial Services

Attachments

Nil

Purpose

To inform Council of its requirement to form an opinion relating to its General Purpose Financial Report and resolve to refer the accounts for audit as per Section 413(2c) of the *Local Government Act 1993.*

Report

In accordance with Section 413(1) of the *Local Government Act 1993*, Council must prepare financial reports for each year and must refer them for audit as soon as practicable after the end of that year. The 2014-2015 General Purpose Financial Reports and Special Purpose Financial Reports have been completed and Council's independent auditor, Intentus Chartered Accountants contacted to commence the end of year audit.

Section 416 of the *Local Government Act 1993* stipulates that council's financial reports for the year must be prepared and audited within a four month period after the end of each financial year. Council is then required to conduct an Annual General Meeting to present the audited financial reports, together with the auditor's reports to the public. This must be done not more than five weeks after receipt of the auditor's reports. The Annual General Meeting has been scheduled for Tuesday 6 October 2015.

The actual operational result on an accruals basis (excludes capital expenditure) is a surplus exceeding \$18m after capital grants and contributions and a surplus of around \$7m before capital grants and contributions. This is a preliminary result pending some minor valuation changes to fixed assets and any accrual adjustments, however is not expected to materially change. The major factors contributing to the operational result include the following:

- increase in rates income due to the special rate variation principally, with \$5.5m dedicated directly to infrastructure renewal
- operating grants of \$5.8m directly related to the timing of Financial Assistance Grant payments
- increase in other revenues of \$3m. Primarily due to land sales in the One Minto project and surplus land in Parkhill Avenue, Leumeah
- increase of \$5m in depreciation as a result of fair valuation adjustments.

Depreciation of Council's fixed assets has now stabilised to its present levels of approximately \$25m as all asset classes are now valued in accordance with Australian Accounting Standard (AASB) 116 which has been implemented over the last several years. The change to Australian Accounting Standards requires assets to be re-valued at fair value using market based evidence where available and is undertaken by professionally qualified valuers. Assets with insignificant changes in fair value need only be re-valued every three to five years. The details of the original budget variations are reported in Note 16 to the General Purpose Financial Reports.

Note 13 to the General Purpose Financial Reports provides several financial performance measures of Council for the year. An indicator of significance is the unrestricted current ratio which assesses the adequacy of Council's working capital to satisfy obligations in the short term. The ratio has increased to 3.66:1 which continues to be above the benchmark of 2.0:1 reflecting Councils commitment to responsible budget management.

Council maintained a balanced budget throughout the 2014-2015 financial year with minor adjustments reported as part of the quarterly financial reviews. The actual funded result shows a surplus of approximately \$50,000 which is an excellent outcome in light of the current economic and financial environment. This result includes carry over works of some \$33m to be revoted in 2015-2016 representing an increase of \$9m on the previous year. This is largely attributable to grant funding of \$15m for road widening of Eagle Vale Drive, \$1m in unspent sustainability projects (WaSIP), \$850,000 for Waste and Recycling projects, and \$1.6m in sport and recreation projects (Lynwood Park and Minto Indoor Sports Centre). A report detailing the carry over works will be submitted in September 2015.

A significant effort from all staff has been made to ensure the end of year accounts were prepared particularly when considering the increased resources required to comply with the ongoing fair value accounting requirements.

The 2014-2015 Financial Reports have been prepared in accordance with the *Local Government Act 1993*, the regulations made thereunder, Australian Equivalents of the International Financial Reporting Standards and professional pronouncements, the Local Government Code of Accounting Practice and Financial Reporting and the Local Government Asset Accounting Manual. These statements are considered to fairly represent Council's financial position and operating result for the period.

Council is now required to refer the Financial Reports to the external auditor, Intentus Chartered Accountants for audit. Council is also required to convene an Annual General Meeting within five weeks of receipt of the Auditor's Reports and as reported above, the Annual General Meeting will be held on Tuesday 6 October 2015.

Officer's Recommendation

- 1. That the 2014-2015 General Purpose Financial Reports and the 2014-2015 Special Purpose Financial Reports be referred to audit.
- 2. That the Mayor, Deputy Mayor, General Manager and Responsible Accounting Officer sign the statements as required by Section 413(2) of the *Local Government Act 1993*.
- 3. That the audited results of the financial year be presented to Council at an Annual General Meeting to be held on Tuesday 6 October 2015.

Committee's Recommendation: (Kolkman/Hawker)

That the Officer's Recommendation be adopted.

Council Resolution Minute Number 156

3.5 Debtors write off of bad debts 2014-2015

Reporting Officer

Manager Financial Services

Attachments

Total debts recommended for write off (contained within this report)

Purpose

To provide a report outlining the amount in debts determined uneconomical to recover.

Report

As part of Council's end of year audit, debts totalling \$12,067.83 were presented and examined by Council's external Auditors, Intentus Chartered Accountants. The Auditors expressed an opinion that further action by Council is unlikely to realise recovery of costs and will only incur further fees which will subsequently require write off.

The debts submitted have undergone extensive recovery procedures with every avenue available to Council being explored and eventually exhausted, prior to being referred to the auditors for consideration. The list includes four casual staff corporate uniform debts, 15 learn to swim class fees, six miscellaneous fees (child care, gymnastics and hall or meeting room hire) and seven shop licence inspection fees.

In many of these cases, the debtors are no longer contactable, rendering recovery of the debt unattainable or at significant costs that may, in future, also not be recoverable. It should be noted, Council's authorisation to write off bad debts does not prevent recovery of the debt in future, if circumstances change. Once written off, debtors are noted as bad debtors within Council's corporate systems ensuring they are easily identifiable, should the individual or company attempt to transact with Council in the future.

In accordance with accounting standards, Council is required to create a provision for doubtful debts and review that provision at the end of each financial year. For the financial year ending 30 June 2015, the provision balance remains at \$12,100.

Officer's Recommendation

That the sundry debtors as listed in the attachment totalling \$12,067.83 be written off as uneconomical to recover.

Committee's Recommendation: (Hawker/Borg)

That the Officer's Recommendation be adopted.

CARRIED

Council Meeting 18 August 2015 (Mead/Hawker)

Report

On 11 November 2014, Council reviewed its policy concerning payment of expenses and provision of facilities to the Mayor, Deputy Mayor and Councillors.

Section 217 (a1) of the *Local Government (General) Regulation 2005* requires councils to include additional information for inclusion in annual report:

- (a1) details of the total cost during the year of the payment of the expenses of, and the provision of facilities to, councillors in relation to their civic functions (as paid by the council, reimbursed to the councillor or reconciled with the councillor), including separate details on the total cost of each of the following:
 - the provision during the year of dedicated office equipment allocated to councillors on a personal basis, such as laptop computers, mobile telephones and landline telephones and facsimile machines installed in councillors' homes (including equipment and line rental costs and internet access costs but not including call costs)
 - (ii) telephone calls made by councillors, including calls made from mobile telephones provided by the council and from landline telephones and facsimile services installed in councillors' homes
 - (iii) the attendance of councillors at conferences and seminars
 - (iv) the training of councillors and the provision of skill development for councillors

- (v) interstate visits undertaken during the year by councillors while representing the council, including the cost of transport, the cost of accommodation and other out-of-pocket travelling expenses
- (vi) overseas visits undertaken during the year by councillors while representing the council, including the cost of transport, the cost of accommodation and other out-of-pocket travelling expenses
- (vii) the expenses of any spouse, partner (whether of the same or the opposite sex) or other person who accompanied a councillor in the performance of his or her civic functions, being expenses payable in accordance with the *Guidelines for the payment of expenses and the provision of facilities for Mayors and Councillors for Local Councils in NSW* prepared by the Director-General from time to time
- (viii) expenses involved in the provision of care for a child of, or an immediate family member of, a councillor, to allow the councillor to undertake his or her civic functions.

These expenses are calculated on a monthly basis and reported to Council. Expenses for the month of July 2015 were as follows:

Expenses

1.	Training Seminars and Conferences Cost for July 2015.	\$250
2.	Staff Personal Secretary for the Mayor on a shared basis with the General Manager, together with Receptionist shared with Corporate Services. Apportioned cost for July 2015.	\$5047
3.	Stationery and Postage Cost of Mayoral and Councillors' stationery, business cards and postage expenses. Approximate cost for July 2015.	\$45
4.	Periodicals Cost of annual subscriptions. Cost for July 2015.	\$60
5.	Meals Provision of meals in conjunction with Council and Committee Meetings and Inspections. Cost for July 2015.	\$1667
6.	Refreshments Provision of refreshments in the Mayor's Suite and Councillors' Lounge and Civic Receptions. Cost for July 2015.	\$1270
7.	Insignia of Office Replacement costs Mayoral robes, chain, badge and name plates. Cost for July 2015.	Nil
8.	Travelling Expenses for Use of Private Vehicle Reimbursement of travelling expenses on authorised Council business. Claims submitted for July 2015.	\$1592

Provision of Facilities

1.	Accommodation Office located on the Third Floor of the Administration Building - costs are included in total maintenance and operating expenses of the Administration Building and apportioned on an area basis (3.5%). Cost for July 2015.	\$5145
2.	Communication System Mobile telephone, personal computer or a laptop, personal digital assistant and combined printer, copier, scanner, facsimile machine and telephone answering machine provided for the Mayor and Councillors. Cost of equipment for July 2015 in accordance with Councillors Policy.	\$117
3.	Office Equipment Facsimile machines, photocopier and telephone facilities for the Mayor and Councillors at the Civic Centre. Cost for July 2015.	\$5209
4.	Council Vehicle Costs associated with the use of Council vehicles by the Mayor and Councillors on authorised Council business. All usage is subject to the prior approval of the Mayor. Cost for July 2015.	Nil
5.	Internet Facilities Costs associated with the provision of internet facilities in accordance with Council's Policy. Cost for July 2015.	\$940
6.	Care Expenses Costs associated with care arrangements including childcare expenses and the care of elderly, disabled and/or sick immediate family members. Cost for July 2015.	Nil
	otal cost for the payment of expenses and provision of facilities to the Mayor, ty Mayor and Councillors for July 2015 amounted to \$21,342.

Activity Report (contained within this report)

Report

Works activities are proceeding to program and on demand and are outlined in the Activity Report. Statistics on graffiti are also presented in the Activity Report. It should be noted that the Activity Report continues to be reviewed to better reflect the areas and program/projects being undertaken by Council.

Officer's Recommendation

That the information be noted.

Council Meeting 18 August 2015 (Dobson/Thompson)

That the Officer's Recommendation be adopted.

Council Resolution Minute Number 159

ATTACHMENT 1

GRAFFITI

The schedule below provides details of the number of square metres of graffiti removed from Council's public facilities in the various suburbs by Council's contractor.

Facility	Jan to March 2014	April to June 2014	July to Sept 2014	Oct to Dec 2014	Jan to March 2015	April to June 2015	July 2015

HORTICULTURE ACTIVITIES

National Tree Day

Assisted with the delivery of native seedlings to local school and carried out site preparation for planting site at Georges River Road.

John Kidd Reserve, Blair Athol

Horticulture staff are currently involved in the planting of a number of newly established gardens situated within the above reserve. Refurbishment planting is also in progress with the existing gardens surrounding the community centre.

Milton Park Amenities

Planting out of a new garden area of the new facility was recently completed.

Williamson Road Weed Control

Council's weed control contractor recently completed the spraying of weed infestations on the full length of the median including roundabouts from Campbelltown Road to Henderson Road.

Kellicar Road and Gilchrist Drive, Campbelltown

Enhancing planting of garden area adjacent to traffic lights.

Sporting Fields

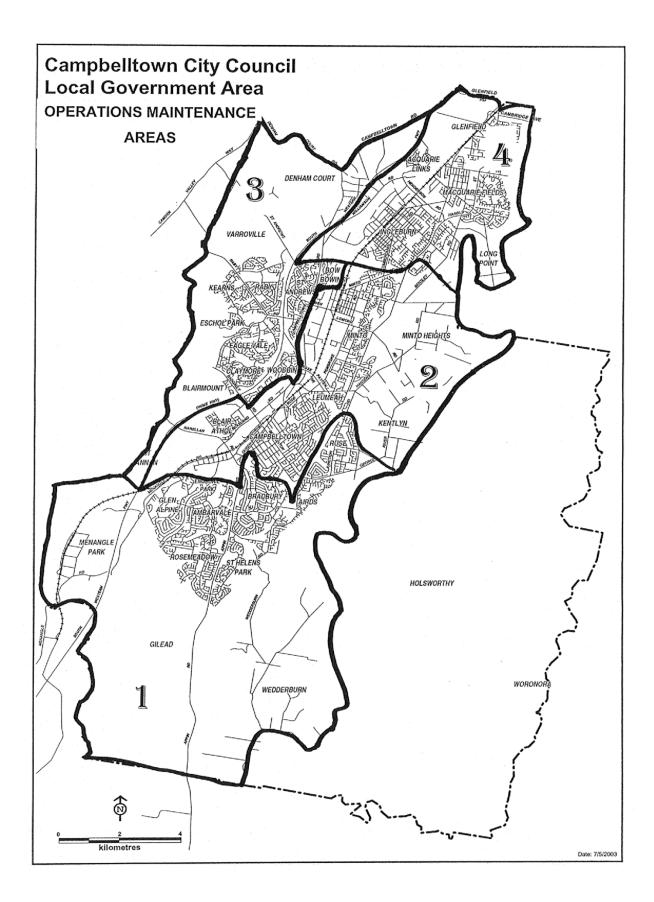

Council staff delivered topsoil to various ovals, aerated activities on 9 sporting fields and the installation and programming of 2 cloudmaster units.

11. REPORT OF DIRECTOR COMMUNITY SERVICES No reports this round

12. REPORT OF DIRECTOR PLANNING AND ENVIRONMENT No reports this round

13. QUESTIONS WITH NOTICE

13.1 Questions With Notice

Councillor Dobson - Answers to Questions With Notice of 9/6/15 re Cemetery planning proposal for 166-176 St Andrews Road Varroville (Varroville cemetery proposal)

- 1. Who answered these questions (i.e. who is 'l' in the response)?
- 2. Is it normal or proper council procedure that relevant errors and omissions identified in Council reports by the public or by sources other than councillors, only get corrected if the identification of these errors and omissions is endorsed by a majority of councillors at a council meeting or at the prior committee meeting?
- 3. If no to Qu. 2 above, can Council re-state why, in its formal submission to the JRPP Pre Gateway Review (with and including the report from Ian Reynolds Pty Ltd of 22nd August 2014), *and* in its subsequent discussions with officers of the NSW Department of Planning, Council did not seek to correct errors and omissions in its original report on the Varroville cemetery planning proposal (Item 2.6 of the Planning & environment Committee Meeting Agenda of the 4th March 2014) raised by the owners of Varro Ville Homestead in their presentation to that committee?
- 4. Is it normal or proper council procedure that the deadline for the inclusion of items on the Planning & Environment Committee Agenda is two Fridays before the Tuesday committee meeting, no exceptions?
- 5. If no to Question 4 above, please explain the answers given on 9/6/15 to questions 2 & 3?
- 6. Why was the letter of 6th March 2015 (Varroville cemetery planning proposal) from the NSW Minister for Planning *not* treated in a similar manner to the letter of 27th October 2014 from the same Minister by going straight to the March 2015 Council Meeting as Urgent General Business?
- 7. With reference to the answer to Question 8 of 9/6/15 regarding meetings between officers of Campbelltown City Council and officers of the NSW Department of Planning & Environment in which council officers said they still supported the cemetery proposal and stood by their original report to council: On what dates did these meetings take place, and who was present at those meetings?
- 8. With reference to the answer to Question 8 of 9/6/15 regarding Campbelltown council officers' stated support for the content of the report on the Varroville cemetery planning proposal (Item 2.6 of the Planning & environment Committee Meeting Agenda of the 4th March 2014): Do the reporting officer and the Director of Environment and Planning continue to believe the following claims and conclusions in that report:

- a. The cemetery is fully multi-denominational?
- b. The "proposed master plan [for the cemetery] is *not incompatible* with retaining views to and from the [Varro Ville] homestead" (i.e. is therefore 'compatible)?
- c. The proposed master plan for the cemetery *protects* the *colonial* landscape qualities?
- d. The proposed master plan for the cemetery *conserves* significant landscape features including the dams, former carriageway, and remnant vineyard terracing?
- e. The *rural landscape* character of the Scenic Hills (as defined in the objectives for 7 d1, *rural environment*) can be maintained in conjunction with the development of this cemetery?
- f. The recommendations of the cemetery proposal's Heritage Assessment (Appendix H, Urbis, August 2013, p.42)) are 'synonymous' with the list of documents that the Heritage Council in its submission considered should be prepared to inform any decision about land use, zoning and future change?
- g. The extensive vistas available from this site, having always been in private ownership are not currently available to the public?
- 9. With reference to the answer to Question 8 of 9/6/15 regarding Campbelltown council officers' stated support for the content of the report on the Varroville cemetery planning proposal (Item 2.6 of the Planning & environment Committee Meeting Agenda of the 4th March 2014): Can the reporting officer and the Director of Environment and Planning comment on the appropriateness of considering Minister Hodgkinson's claim that the NSW Government supports the development of a cemetery *at Varroville* as part of its assessment when the Minister has no role in the assessment of the site's suitability and other Ministers (e.g. Planning) cannot prejudge the outcome of the assessment?
- 10. With reference to the answer to Question 8 of 9/6/15 regarding Campbelltown council officers' stated support for the content of the report on the Varroville cemetery planning proposal (Item 2.6 of the Planning & environment Committee Meeting Agenda of the 4th March 2014): Can the reporting officer and the Director of Environment and Planning state why the following information was not included in that report and what difference their inclusion might have made to the officer's recommendation:
 - a. The cemetery proposal is incompatible with the objectives of the 7 (d1) zoning (as noted by the NSW Heritage Council), and this invokes Part 2 Clause 9 (3) of the Campbelltown Local Environment Plan District 8;
 - b. The cemetery proposal is incompatible with the relevant aims and zoning objectives of the Draft Campbelltown Local Environment Plan 2014 (Draft CLEP14) and this invokes Part 2 Clause 2.3 (2) of that plan;

- c. The cemetery proposal is incompatible with the recommendations of Campbelltown Council's 2011 Visual & Landscape Analysis of Campbelltown's Scenic Hills (Paul Davies Pty Ltd & Geoffrey Britton, adopted by Council as a contributory document to be taken into account in the preparation of the Draft CLEP14), *including* the cemetery's proposed use of the 'hidden areas' for burial rooms and buildings;
- d. Council's 2011 Heritage Study and Register Review (Paul Davies Pty Ltd, adopted by Council as a contributory document to be taken into account in the preparation of the Draft CLEP14) recommended that Varro Ville Homestead's state heritage listed curtilage be extended to include "the whole of the original [Varro Ville] land grant, including the...historic dams", and that this includes the whole of the land intended for the cemetery.
- e. The cemetery falls within the National Trust's curtilage for Varro Ville Homestead (placed on its register in 1976);
- f. The curtilage proposed in the cemetery proposal is inconsistent with that of the National Trust and the recommendation of Council's Heritage Study above;
- g. The proposed master plan for the cemetery does not reflect the recommendations of its own heritage assessment (Urbis Heritage Assessment, August 2013, Appendix H).
- h. *Map 2 Existing Visual Exposure* from p.8 of the proponent's visual study by Richard Lamb shows that at least two thirds of the site has high to medium visual exposure with implications for the compatibility of the proposal with the underlying zoning of the site and its objectives.
- i. A cemetery of this magnitude would eventually require St. Andrews Road to be opened to Camden Valley Way and East Leppington, which (according to the Officers Report at Item 2.5 of the Planning & Environment Committee Meeting Agenda of the 4th March 2014) *"has the potential to give rise to significance issues for Council in regard to traffic management and upgrading works along St Andrews Road".*
- j. Security fencing and/or walls to protect the site and to protect the owners of Varro Ville Homestead would adversely affect the rural views and heritage values of the site.
- k. The proposal is in conflict with Council's complete list of prior resolutions of 13th November 2007 regarding this site, and of 16th October 2012 regarding the Scenic Hills generally. [These were only quoted in Item 2.5 of the Planning & Environment Committee Meeting Agenda of the 4th March 2014, albeit that the 16th October 2012 was misreported].
- I. While submissions were received from the Carmelite community, there were other submissions from the public, including from the owners of Varro Ville Homestead that also opposed the cemetery.

- m. The full content of Minister Hodkinson's letter of the 16th December 2013 indicated that the proposal would become a Crown Application at the Development Application stage with implications for Council's ongoing control of the development once the land was rezoned.
- n. The approval of the planning proposal in its current form does not guarantee that critical alterations will not be made at a later date after the land has been rezoned.
- 11. With reference to the answer to Question 8 of 9/6/15 regarding Campbelltown council officers' stated support for the content of the report on the Varroville cemetery planning proposal (Item 2.6 of the Planning & environment Committee Meeting Agenda of the 4th March 2014): Can the reporting officer and the Director of Environment and Planning explain why, in that report, they considered *educational establishments* and *places of public worship* to *"have the potential to impact detrimentally upon the visual character and aesthetics of the Scenic Hills due to the nature and extent of the structure and form of such development*", but then *permitted* these land uses in the Draft Campbelltown LEP 2014, even though their prohibition would not have affected the rights of any such existing establishments?
- 12. Has Council met with the NSW Minister for Planning on the Varroville cemetery proposal, and if so, can Council provide minutes of that meeting (and any other meeting if more than one) showing when the meeting took place, who was present, what was discussed, what undertakings were given, what was agreed?

Answer:

The General Manager provided the following answer in response to all 12 Questions With Notice raised by Councillor Dobson in item 13.1:

Questions in relation to these matters were answered in writing and published in the Minutes of the Ordinary Council Meeting on 9 June 2015. The matter of the lawn cemetery planning proposal has been the subject of a comprehensive independent investigation which has concluded. Council has no decision making role in relation to the planning proposal application, as the decision making authority in this matter rests with the Joint Regional Planning Panel and Department of Planning.

On this basis, the Mayor ruled the Questions with Notice out of order.

16. NOTICE OF MOTION

16.1 Scenic Hills - St Andrews Road

Councillors Chanthivong, Brticevic, Glynn, Kolkman and Oates have given Notice in writing of their intention to move the following Motion at the next meeting of Council on 18 August 2015.

- 1. That Campbelltown Council reaffirms its commitment to protect and conserve the Scenic Hills.
- 2. That Council write to the Minister for Roads seeking confirmation that the NSW Government has no plans to open up St Andrews Road from Camden Valley Way to Campbelltown Road.

Council Meeting 18 August 2015 (Brticevic/Lound)

That the Motion be adopted.

Council Resolution Minute Number 160

That the Motion be adopted.

Councillor Mead asked for his name to be recorded in opposition to the resolution for Item 16.1 - Scenic Hills - St Andrews Road.

17. URGENT GENERAL BUSINESS

It was **Moved** Councillor Oates, **Seconded** Councillor Brticevic that the following item of Urgent General Business be accepted.

17.1 LGNSW Annual Conference motion

It was Moved Councillor Oates, Seconded Councillor Brticevic:

That Council submit the following motion to the LGNSW Annual Conference:

That LGNSW lobby the State Government to undertake a comprehensive review of the NSW Affordable Housing State Environmental Planning Policy (SEPP) to address each of the anomalies and inconsistencies highlighted below:

- a. The potential abuse of the SEPP to achieve overdevelopment of sites
- b. inappropriate bulk and scale of developments compared to existing residences
- c. remoteness of developments from major centres and public transport nodes
- d. Inconsistencies with the desired character/amenity of the areas.

Council Meeting 18 August 2015 (Oates/Brticevic)

That Council submit the following motion to the LGNSW Annual Conference:

That LGNSW lobby the State Government to undertake a comprehensive review of the NSW Affordable Housing State Environmental Planning Policy (SEPP) to address each of the anomalies and inconsistencies highlighted below:

- a. The potential abuse of the SEPP to achieve overdevelopment of sites
- b. inappropriate bulk and scale of developments compared to existing residences
- c. remoteness of developments from major centres and public transport nodes
- d. Inconsistencies with the desired character/amenity of the areas.

Council Resolution Minute Number 162

That Council submit the following motion to the LGNSW Annual Conference:

That LGNSW lobby the State Government to undertake a comprehensive review of the NSW Affordable Housing State Environmental Planning Policy (SEPP) to address each of the anomalies and inconsistencies highlighted below:

- a. The potential abuse of the SEPP to achieve overdevelopment of sites
- b. inappropriate bulk and scale of developments compared to existing residences
- c. remoteness of developments from major centres and public transport nodes
- d. Inconsistencies with the desired character/amenity of the areas.

18. PRESENTATIONS BY COUNCILLORS

18.1 Presentations by Councillors

- 1. Councillor Hawker advised that he had the pleasure of representing His Worship the Mayor, Councillor Lake at the Vietnam Veterans Day Memorial Service held on 18 August, where he laid a wreath of behalf of the Mayor and Council. Councillor Hawker advised that a large crowd attended the event and even though it was a sad day, it was a good celebration and remembrance of those that we have lost.
- 2. Councillor Kolkman advised that he represented His Worship the Mayor, Councillor Lake, at the opening of the current exhibition at the Campbelltown Arts Centre, Imperial Slacks Symposium. Councillor Kolkman noted that both the exhibition and Campbelltown Arts Centre were mentioned during a recent Foxtel broadcast 'Arts of Sydney'.
- 3. Councillor Lake advised of the recent passing of a past Council employee, Stan Baylis who worked for Council from 1950-1980 as a surveyor. Councillor Lake further advised of the recent passing of the wife of Councillor Col Mitchell, Mayor of Wollondilly Shire Council and expressed his condolences to both families.
- 4. Councillor Lake advised of the following recent and upcoming events:
 - The Koshigaya exchange employee will be arriving in Campbelltown shortly for a period of several weeks
 - There were 96 people that attended the recently held Citizenship ceremony on Monday 3 August
 - The Police Awards were recently held along with the celebration of 100 years of women in policing
 - The Battle of Lone Pine memorial service was recently held
 - The Macarthur Chronicle held a forum regarding Queen Street, Campbelltown, that allowed residents to provide input on what they would like to see in Queen Street.
- 5. Councillor Glynn advised that the opening of the 'Spamalot' production will begin on 28 August 2015 at the Campbelltown Theatre Group.

CONFIRMATION OF COUNCIL'S ORDINARY MEETING MINUTES

At the Council Meeting held 15 August 2015 the following Council minutes were adopted:

There being no further business at the meeting of 15 August 2015, the meeting closed at 8.12pm.

Confirmed by Chairperson:
