Ms Carmel Donnelly **Acting Chief Executive Officer** State Insurance Regulatory Authority Department of Finance, Services and Innovation 2-24 Rawson Place Sydney NSW 2000

Dear Carmel,

Review of June 2017 HBCF Scheme Report

Taylor Fry Consulting Actuaries (Taylor Fry) has been requested by the State Insurance Regulatory Authority (SIRA) to undertake a review of the NSW Home Building Compensation Fund (HBCF) Scheme Report as at 30 June 2017 and the underlying data contained within the report.

We have been provided with a copy of the draft and final reports, along with a claims database containing details of all individual scheme claims and aggregated information on the types and values of projects covered.

While we have not reviewed the accuracy of the data provided, we have reviewed it for reasonableness and used it to replicate the tables within the report. We also reconciled the tables and graphs with those used in the March 2017 report.

We found the information prepared by SIRA and the commentary contained within both the draft and final reports to be a fair and accurate representation of the HBCF.

I trust that this letter covers the information you require. Please do not hesitate to contact me if you have any questions or would like any further details to be provided.

Yours sincerely,

Daniel Smith

Fellow of the Institute of Actuaries of Australia

Introduction

Preamble

The Home Building Compensation (HBC) Scheme, formerly known as the home warranty insurance scheme, provides a last-resort safety net for consumers under the *Home Building Act 1989*, where builders fail to complete residential building work or rectify defects.

From 1 September 2015, the State Insurance Regulatory Authority (SIRA) assumed the regulatory functions of HBC, which were previously undertaken by NSW Fair Trading.

In New South Wales, HBC insurance may only be offered by licensed insurers approved by the Minister under the Act. icare (Insurance and Care NSW) hbcf became the sole provider of insurance under the HBC Scheme on 1 July 2010, replacing the former private insurers from that date. The approved insurers from the private sector all ceased writing business on or before 30 June 2010. However, all approved insurers will continue to manage and settle claims on policies written up until that date.

HBC Scheme data

One of the roles of SIRA, as provided under the market practice guidelines, is to collect data in relation to the HBC Scheme on policies, premiums and claims from insurers in order to be able to monitor the operation of the scheme. The following information on the operation of the scheme applies only to the version of the scheme in operation since 1 July 2002, in which the protection offered applies only in the event of the death, disappearance or insolvency of a builder. For policies issued from 19 May 2009, cover extends to situations where a builder's licence is suspended for a failure to comply with a mandatory monetary order of the NSW Civil and Administrative Tribunal or a court in favour of the homeowner.

This publication summarises the data that has been provided quarterly since June 2006 for the insurance period 1 July 2002 to 30 June 2017. The information provided has been aggregated across insurers. Data provided by individual insurers is commercially confidential and has not been disclosed.

Further information on the operation of, or the **current reforms** by the NSW Government to the scheme, is available through the following links:

Caution in interpreting the information

Home building compensation is a 'long tail' class of insurance business, which means:

- there may be significant delay between the date a project certificate is issued and the commencement of the project
- the duration of building projects may range from a few weeks to several years
- coverage remains in place for six years after project completion, and
- it may take some time for homeowners to identify a loss, lodge a claim with an insurer and for the insurer to assess the claim and arrange rectification.

Claims experience within the HBC Scheme can vary greatly from year to year depending on economic conditions in both the home building market and in the community generally. Since the adoption of the single insurer model from 1 July 2010, insurance market cycles are only likely to impact the scheme to the extent that the insurer seeks to obtain reinsurance cover from the commercial insurance market.

For the first few years after the current HBC Scheme commenced in 2002, the NSW economy performed reasonably well, and conditions were generally favourable for home builders. As over 90 per cent of the insurance claims arise from the insolvency of the builder, the downturn in the economy in 2008 drove a significant increase in claims on the scheme as even some larger builders failed. Poor business decisions are also more likely to convert into business failure if additional financing is unexpectedly required or existing loans need to be renegotiated or rolled over when lending or investing conditions are tight. Any serious assessment of the scheme should place substantial weight not only on the long tail nature of the scheme, but also that different economic circumstances can yield significantly different claims results.

As the cover provided by HBC Scheme insurers extends over at least six years from completion of work, the downturn in the building industry between 2008 and 2012 has given rise to claims because major defects now emerging may involve builders that have become insolvent since then. As a consequence, the claim experience of even early underwriting years has continued to deteriorate. During the 12 months to 30 June 2017, there was an increase of \$93 million, or 14 per cent, in the overall estimated net incurred claims cost reported by the scheme insurers.

Part 1 Information about licensed builders

1. Eligibility information

'Eligibility' is the term used to describe the entitlement that a builder has to apply for a certificate of insurance for home building projects, and the conditions under which the certificate of insurance may be granted. From 1 July 2010, eligibility application may be made via an insurance broker to one of icare hbcf's insurance agents.

Builder eligibilities

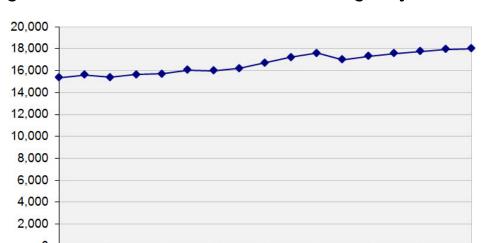

From August 2015, eligibility limits for builders were changed from annual turnover limits to 'open job limits'. This is the maximum number and value of jobs under construction by an individual licensed builder at any point in time. Individual limits on the maximum contract value for the various types of projects will continue.

Table A1 shows the number of builder eligibilities at the end of each quarter by open job limit bands (for June 2015 and earlier by the annual turnover limits bands) for all types of cover.

Table A1: Number of builder eligibilities by open job limit (previously annual turnover limit) band

| Turnover band (\$' m) | \$0 - <0.5m | \$0 .5 - <1m | \$1 - <2m | \$2 - <3m | \$3 - <5m | \$5 - <20m | \$20+m | Totals |

2. Securities and indemnities information

For some builders, icare hbcf may require security in the form of a deed of indemnity as a condition of approving eligibility or providing cover for a specific project. Bank guarantees will not be sought for providing insurance eligibility, although a builder can provide a bank guarantee if the builder chooses to do so (refer Table to B1). Other security relates to an indemnity under a group trading agreement where an entity is operating as part of a group structure.

Securities provided prior to 1 July 2010 by builders to former insurers are unable to be transferred to icare hbcf, and will remain in place until they are released by the insurers. Such securities held by former insurers are not included in the table below.

| Jun 17 | 1 | #3,028 | [#] 545 | 3,574 | 18% |

As at 30 Jun $\,$ 2017, 245 builders have concurrent in-force group trading agreement and deeds of indemnity.

3. Builder project certificate information

Generally a project certificate is issued in relation to a project prior to building commencement. The project certificate is evidence of the insurance contract. The number of current project certificates refers to projects still in progress at the end of the quarter.

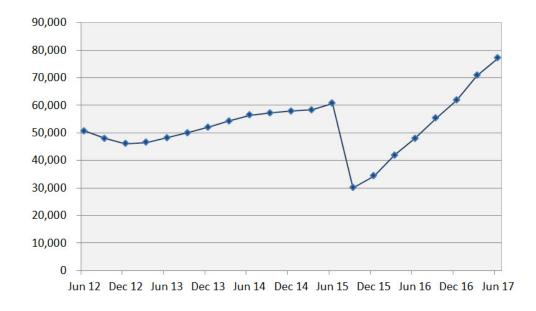

In August 2015, icare hbcf changed its eligibility rules from annual rolling limits to open job eligibility limits which set out the maximum number and total value of jobs a builder can have under construction at any one time. At the transition, all projects that could reasonably be assumed to be completed based on industry data were reported as closed to the insurer. The marked reduction in open job certificates between June and September 2015 resulted from the transition in moving away from a formerly assumed 12-month construction period.

After September 2015, the number of projects reported by the insurer as still open suggests that the number of closed jobs may have been over estimated at the time of the system change. Other factors such as increases in construction activity and builders not reporting completion advices on a timely basis, may have also contributed to the increase in open job numbers since September 2015.

Current builder project certificates

Figure C1 shows the trend in the total number of current (open) project certificates for work not yet completed at the end of each quarter.

Figure C1: Trend in the total number of current project certificates at the end of each quarter

New project certificates issued to builders

Tables C1, C2.1 and figure C2.1 show the number and value of new project certificates issued during the quarter, reduced by the number (or value) of project certificates cancelled in the quarter. A cancellation occurs when a project certificate is terminated because the project did not commence. If a project certificate applies to more than one type of cover, then it is classified under the type of cover that represents the greatest value under the contract.

^{*} A project certificate is issued for each unit in a multi-unit development.

The total number of certificates issued (19,207) fell marginally in the June quarter but up 5 per cent compared with the same quarter last year. In June 2017, the number of certificates issued for new multi dwellings has fallen for the first time since March 2016.

The proportions of project certificates issued during the last 12 months are: new single and new multi dwellings (47 per cent), alterations and renovations (45 per cent) and swimming pools/others (8 per cent).

[#] Alterations and additions - structural (i.e. the majority of the work is structural), including work on existing multi-units.

[^] Renovations - non-structural (i.e. the majority of the contract is non-structural), including e.g. kitchen/bathroom renovations and trade work, including work on existing multi-units

Notes: ABS8/31.0 Building Approvals, Australia; I ables 12, 22 and 45 "Dwelling units approved in new residential buildings - New South Wales". Both builder and owner-builder data is included in the above table as ABS did not distinguish between type of builder in its statistics. From 15 January 2015 owner-builder work is no longer insured which is leading to a small reduction in the relationships over time.

We have excluded public sector work from the building approval data to enable likefor-like comparison.

Figures for more recent quarters may change where the ABS revises its estimates, and there will continue to be differences between the series due to factors such as timing of reporting and the scope and coverage of the ABS statistics.

Figures C3.1 and C3.2 show the detailed comparisons for numbers and values respectively between new dwellings project certificates issued and building approvals. Subject to the above, they show the number and value of project certificates issued generally move broadly in line, as expected, with the building approvals data.

4. Builders' premium information

Insurers provide information to SIRA on the premium charged for project certificates issued to builders during the quarter. For the reports below, premium is shown on two bases: including charges and excluding charges. 'Charges' refer to all commissions, government and other charges (i.e. GST, stamp duty, government levies and credit card surcharges) as reported by insurer to SIRA.

Premium including charges is intended to represent the amount paid by the builder including statutory charges such as GST and stamp duty. However, it excludes any fees charged by brokers or intermediaries in addition to the insurer's premium. Any margin added by the builder in on-charging the premium to consumers is also not captured in the insurers' data and is therefore not reported in the figures below. Premium excluding charges is the amount retained by the insurer to pay claims and the insurer's expenses.

Effective from 3 April 2017, icare hbcf has:

- introduced new base premium rates and builder risk-based pricing
- ceased paying commissions to broker distributors who have since adopted a feefor-service model.

5. Builder claims information

The handling and management of claims by insurers is subject to *Claims Handling Guidelines*, refer link:

http://www.fairtrading.nsw.gov.au/pdfs/Tradespeople/SI_Corp_claims_handling_guidelines.pdf

SIRA receives a snapshot of the cumulative data at the end of each quarter of all claims received by insurers for HBC business issued after 1 July 2002. The information set out below provides only a partial picture of HBC Scheme activity. Therefore, care must be taken in basing conclusions on trends that have emerged to date. The data in this publication relates only to project certificates issued from 1 July 2002 and to claims that have been notified to date on those certificates. It does not include claims that have not yet been reported to insurers on those certificates or any provisions made by insurers in their accounts for the cost of unreported claims or cost escalation on reported claims.

Claims experience

The remaining tables in this section show a further breakdown of the cumulative claims experience where liability has been accepted by the insurer in regards to builders (not owner-builders) as at **30 June 2017**.

Information is shown separately between:

- a) claims that are finalised with all costs known, and
- b) those that are open, in which case at least part of the cost is an estimate of future payments.

Table E.3: Claims experience by principal cause (including GST) for finalised accepted* claims

| Principal cause | No. of claims | Sum paid to claimant | Sum paid to third parties | Total gross paid #2 \$ | Average claim size \$ |
|-----------------|------------------|----------------------|---------------------------|---------------------------|--------------------------|
| Insolvency#1 | 5,079 | 403,417,765 | 35,294,905 | 438,712,670 | 86,378 |
| Death | 53 | 3,866,369 | 180,595 | 4,046,964 | 76,358 |
| Disappearance | 282 | 18,939,887 | 1,578,232 | 20,518,119 | 72,759 |
| Total | 5,414 | 426,224,021 | 37,053,732 | 463,277,753 | 85,570 |

^{*}Accepted claims are those in which liability is partially, fully or deemed accepted by the insurer.

^{&#}x27;Paid to claimant' includes all payments to the claimant or to suppliers involved in the rectification of the works.

^{&#}x27;Paid to third parties' includes payments to investigators, loss adjusters, legal expenses, etc. but not insurers' claims handling expenses (overheads).

^{#1} Includes the situation where a builder's licence is suspended for a failure to comply with a monetary order of the NSW Civil and Administrative

Tribunal or a court in favour of the homeowner.

^{#2} All amounts shown are undiscounted values.

Table E4: Claims experience by principal cause (including GST) for open* accepted claims

| Principal cause | No. of claims | Sum paid to claimant | Sum paid to third parties | Net outstanding estimate \$ | Estimated total claims cost #2 | Average claim size \$ |

^{*}Open claims are claims which are not finalised.

Table E5: Claims experience by claim code (including GST) for finalised accepted claims

| Claim Code | No. of Claims | Sum Paid to Claimant | Sum Paid to Third Parties | Total Gross Paid \$ | Average Claim Size \$ |
|---------------------------|---------------|-------------------------|------------------------------|------------------------|--------------------------|
| Failure to commence | 244 | 5,127,554 | 201,189 | 5,328,743 | 21,839 |

| Total | 5,414 | 426,224,021 | 37,053,732 | 463,277,753 | 85,570 |

[§] Following major changes to home building laws from 15 January 2015, the definition of a structural defect, and therefore what is covered by the six-year warranty period was replaced by a definition for 'major defect'. Other defects that don't meet the smajor defect test, will continue to be covered by the standard two-year statutory warranty.

Table E9 shows the claims experience to date split by the year the project certificate was issued. For reasons explained in section 2, this data provides an incomplete view of the claims experience for each year. For most years of issue, the number of claims and amount paid on claims may continue to increase over the next few years because:

- there may be significant delay between the date a project certificate is issued and the commencement of the project
- the duration of building projects may range from a few weeks to a few years
- coverage remains in place for six years after project completion, and
- it may take some time for homeowners to identify a loss, lodge a claim with an insurer and for the insurer to assess the claim and arrange rectification.

The impact of these factors is even greater for more recent years and for multi-storey dwellings.

Insurers have also estimated additional costs of \$7 million for claims in which liability has not yet been determined or declined.

Insurers do manage to recover some claim payments, generally as creditors of insolvent builders or from third parties. Since the scheme commenced, some \$23 million has been recovered or about three per cent of estimated total claims cost to date.

Overall for the scheme, the number of accepted liability claims was up 112 or two per cent and the reported costs up \$19 million or three per cent, since last quarter.

Part 2 Owner-builder information

This section sets out the data for owner-builders (**OB**) in a similar format to that shown earlier for builders. Not all tables in Part I have a corresponding table in this section as some data is not relevant or available in respect of owner-builder insurance.

As new home building laws came into effect on 15 January 2015, owner-builders who sell properties built under owner-builder permits are no longer required to provide insurance to the subsequent purchaser, or attach certificate of insurance to contract for sale for intending purchasers of owner-builder work.

icare hbcf ceased issuing new insurance cover from 15 January 2015 to owner-builders who sell their properties, so no new data is applicable for reporting in sections OB.C and OB.D post-March 2015 quarter. Claims will continue to be reported and settled for several years.

Note: A decrease from prior quarter may occur due to corrections to existing claims or its classification.

The tables in the next section show a further breakdown of the accepted liability claims as at 30 June 2017. Both open and finalised claims are included in these tables.

OB.E3: Owner-builder claims experience by principal cause when liability accepted (including GST)

| Principal cause | No. of claims reported | No. of claims open | Total paid to date \$ | Estimated total claims cost \$ | Average claim size \$ |
|-----------------|------------------------|-----------------------|-----------------------|--------------------------------|-----------------------|
| Insolvency | 55 | 7 | 6,457,359 | 7,454,702 | 135,540 |
| Death | 5 | 0 | 171,939 | 171,939 | 34,388 |
| Disappearance | 72 | 10 | 8,096,927 | 8,808,584 | 122,341 |
| Total | 132 | 17 | 14,726,225 | 16,435,225 | 124,509 |

^{&#}x27;Total amounts paid to date includes all payments to the claimant or to suppliers involved in the rectification of the works. It also includes payments to third parties such as investigators, loss adjusters, legal expenses, etc. Insurers' own claim handling expenses (overheads) are excluded.

Disappearance of builder is the main cause of claims against owner-builders, in contrast to claims against builders which are predominantly in respect of builder insolvency.

Table OB.E4: Claims experience by claim code when liability accepted (including GST)

| Claim code | No. of claims reported | No. of claims open | Total paid to date \$ | Estimated total claims cost \$ | Average claim size \$ |
|---------------|------------------------|-----------------------|-----------------------|--------------------------------|-----------------------|
