

Permit Notices for the Operation of B-Doubles, Road Trains, 4.6m High Vehicles & Controlled Access Buses

Roads and Traffic Authority

www.rta.nsw.gov.au

Foreword

The purpose of this book is to provide industry with a copy of the permit notices which prescribe the conditions which apply to the operation of B-doubles, road trains, 4.6 metre high vehicles and controlled Access Buses in New South Wales.

Given the requirement that a copy of these permit notices be carried in a vehicle to which they apply, this book provides permit information in a convenient format for general use.

In addition to this book, three maps which outline approved routes for B-doubles, road trains and 4.6 metre high vehicles are available from the Roads and Traffic Authority.

I trust that this book will be of assistance to you in your business as a heavy vehicle operator.

Paul Forward

Acting Chief Executive

General

About this book

Purpose of the book

This book informs you of the laws and conditions which apply to the operation of road trains, B-doubles, 4.6 metre high vehicles and Controlled Access Buses in New South Wales.

What it contains

This book contains:

- The General B-double permit notice (see page 3)
- The General road train permit notice (see page 81)
- The Converter Dolly Combination Notice (see page 107)
- The 4.6 metre high vehicle route notice (see page 113)
- The Interim Controlled Access Bus notice (see page 135)

When should you carry the book

If you use this book as a permit, you must carry it in the vehicle. As an alternative, you can use a current copy of the particular notice published in the Government Gazette.

If your load is eligible under the 4.6 metres high vehicle notice to be carried at up to 4.6 metres high on a road train or B-double, then you must carry a copy of both the permit notices that apply to the vehicle concerned.

If you have applied for and have been issued with a specific permit, you must carry this handbook, or the particular notice with you as part of the specific permit.

Note: Road train or B-double notices do not allow you to carry oversize loads, and may not be used in conjunction with the oversize general permit notice to carry oversize loads.

Roads Act 1993

General B-Double Notice under Division 2 of Part 3 of the *Road Transport (Mass, Loading and Access) Regulation, 1996*

I, Ronald David Christie, Chief Executive of the Roads and Traffic Authority, in pursuance of Part 3 of Division 2 of the *Road Transport (Mass, Loading and Access) Regulation, 1996*, by this Notice, specify the areas and routes on which B-Doubles that comply with the requirements of the *Road Transport (Mass, Loading and Access) Regulation 1996* as set out in Parts 3, 4 and 5 of the Schedule and Schedule 4 to the *Road Transport (Vehicle Registration) Regulation 1998*, may be used on public streets or within areas specified in Part 6 of the Schedule subject to any requirements or conditions set out in the Schedule.

R D Christie
Chief Executive
Roads and Traffic Authority

Schedule

Part 1 – Preliminary

1.1 Citation

This Notice may be cited as the General B-Doubles Notice 1996.

1.2 Commencement

This Notice takes effect on 13 December 1996.

1.3 Interpretations

- 1.3.1 Unless stated otherwise, words and expressions used in this Notice have the same meaning as those defined in Appendix 1.
- 1.3.2 Subject to Subclause 1.3.3, a diagram appearing in this Notice is illustrative only.
- 1.3.3 If a provision contains a diagram that is called an essential diagram, that diagram is part of the Notice.

1.4 Effect

This Notice remains in force until 13 December 2000 unless it is amended or repealed earlier.

<p>Note: This Notice replaces the General Permit for the Operation of B-Doubles 1995 that was published in Government Gazette No. 102 of 25 August, at pages 4938–4996, that was subsequently amended in Government Gazette No. 77 of 28 June 1996, at pages 3617–3661.</p>
--

Part 2 – Operating and travel requirements

2.1 Operating requirements

- 2.1.1 A copy of this Notice or an information sheet issued by the Roads and Traffic Authority setting out the obligations imposed under the Notice, must be carried in the driving compartment whenever the vehicle is operating as a B-Double and must be produced when requested to do so by a member of the police service or an authorised officer.
- 2.1.2 All requirements and conditions of this Notice are to be observed when a vehicle is operating as a B-Double.
- 2.1.3 A vehicle operating as a B-Double must clearly display a warning sign at the rear in accordance with the requirements of Part 4 of this Notice.
- 2.1.4 A vehicle operating as a B-Double must comply with the statutory requirements of the Roads Act 1993.
- 2.1.5 The prime mover and semi-trailer of a B-Double must be constructed to comply with the appropriate standards for registration, or the Australian Design Rules unless otherwise stated.
- 2.1.6 All units used in a B-Double must be registered in a State or Territory of the Commonwealth or under the Federal Interstate Registration Scheme.
- 2.1.7 The driver of a B-Double must hold, and be able to produce if requested, a driver's licence authorising the driver to drive a B-Double.
- 2.1.8 The load limits set by this Notice must not be exceeded.
- 2.1.9 Despite Clause 5.3, a person must not drive a B-Double in excess of any speed limit set by law.
- 2.1.10 A B-Double must travel at least 200 metres behind a heavy motor lorry, a trailer attached to a heavy motor lorry or a caravan attached to a vehicle except when:
 - overtaking or being overtaken by another vehicle,
 - the vehicle ahead is stopping or stationary,
 - there is a separate lane for overtaking, or
 - travelling in an urban area or where the speed limit is set at 60 km/h or less where it is impractical to maintain a distance of 200 metres.

Note For the purpose of 2.1.10, a heavy motor lorry means any motor lorry:

- a) having an unladen weight exceeding 3 tonnes, or
- b) drawing a trailer, where the aggregate of the unladen weight of the lorry and the unladen weight of the trailer exceeds 3 tonnes.

2.2 Travel requirements

2.2.1 B-Doubles may operate only on approved routes.

- Note** 1. It is the responsibility of operators seeking approval of new routes to contact RTA area offices and follow the requirements specified in route assessment guidelines.
2. Operators may apply to the Roads and Traffic Authority for a specific permit for travel on any road other than those specified in Part 6.

2.2.2 Deviation from approved routes or B-Double areas is not permitted except in emergencies. Emergency route deviations may be made only at the direction of an authorised officer or a member of the Police Service.

2.2.3 B-doubles whose overall length is not greater than 19 metres and whose total mass does not exceed 50 tonnes operating under this notice may operate on all roads, except where prohibited by a load limit specified for a road, bridge, causeway or ferry by a sign specified under section 112 of the roads Act 1993.

Part 3 – Mass and dimension limits

3.1 Maximum limits for axles and axle groups

The maximum axle mass limits for a B-Double must be the **lowest** of:

- a)

steering single axle	– 6.0 tonnes gross
single axle consisting of 4 tyres	– 9.0 tonnes gross
tandem axle group consisting of 8 tyres	– 16.5 tonnes gross
tri-axle group consisting of 12 tyres	– 20.0 tonnes gross
tri-axle group consisting of 6 tyres with section widths of at least 375 millimetres	– 20.0 tonnes gross
- b) the manufacturers' mass ratings, or
- c) the sum of the mass limits for the tyres fitted to the axles and axle groups.

3.2 Maximum gross mass limits

The maximum gross mass limit for a B-Double must be the lowest of:

- a) the sum of the axle and axle group mass limits in Clause 3.1 a),
- b) the sum of the manufacturers' mass limits for the prime mover (GVM) and the semi-trailer (GTM),
- c) the gross combination mass (GCM) limit specified by the prime mover manufacturer, or
- d) 62.5 tonnes.

3.3 Maximum dimension limits

3.3.1 Prime movers and semi-trailers must comply with Third Edition Australian Design Rule 43.

3.3.2 A B-Double must not be more than 25.0 metres long.

3.3.3 A B-Double must not be more than 4.3 metres high.

- 3.3.4 An exception to item 3.3.3 above may be applied to a B-Double that together with any load exceeds 4.3 metres but does not exceed 4.6 metres in height, provided that any relevant conditions set out in the 4.6 Metre High Vehicle Route Notice 1999 are complied with.

3.4 Mass limits relating to axle spacing

- 3.4.1 For any B-Double, the mass limits in Table 1 must not be exceeded in relation to the distances set out in that Table that apply to the B-Double or any vehicle forming part of it.
- 3.4.2 For any B-Double, the mass limits in Table 1 apply to the sum of the masses of each axle group or single axle in the distance referred to in that Table, including the axles between which the distance is measured.

3.5 Spacing rules

- 3.5.1 A B-Double with two tri-axle groups must conform to the formulae:

$$x - y \leq 1 \text{ and } y - x \leq 1.3,$$

where

- x** is the distance in metres between the centres of the closest axles of the second and third axle groups, treating the steer axles as the first axle group and assigning to the next rearmost axle group the description 'second axle group' and to each successive axle group a higher ordinal number, and
- y** is the distance in metres between the centres in the closest axles of the third and fourth axle groups, treating the steer axles as the first axle group and assigning to the next rearmost axle group the description 'second axle group' and to each successive axle group a higher ordinal number.

- 3.5.2 For B-Doubles other than those referred to in Clause 3.5.1, the distance between the centres of tandem axle groups must not be less than 6 metres and the distance between the centres of the tandem and tri-axle groups must not be less than 7 metres.
- 3.5.3 Deleted.
- 3.5.4 The total mass of a vehicle or a combination, and any load, must not exceed 15 tonnes if the distance between any 2 axles that are not part of the same axle group is less than 2.5 metres.

3.6 Measurement of distances for Table 1

3.6.1 Each distance in Table 1 refers to:

- a) the distance from the centre of any single axle to the centre of any other single axle,
- b) the distance from the centre of any single axle to the centre of the furthest axle in any axle group, or
- c) the greatest distance between the centres of axles in any 2 axle groups.

Table 1 – Mass limits relating to axle spacings – B-Doubles

For any B-Double, the loaded mass of which can lawfully exceed 42.5 tonnes where the distance between the extreme axles does not exceed 21 m, the mass limit must not exceed that calculated in accordance with the formula opposite	$M = 1.5L + 29.5$ where: M is the mass limit in tonnes and L is the distance in metres
For any B-Double, the loaded mass of which can lawfully exceed 42.5 tonnes where the distance between the extreme axles is not less than 21 m, the mass limit must not exceed that specified opposite	62.5 tonnes
For all B-Doubles, the axle loads of the axles in any two or more adjacent axle groups (or of any single axle and the axles in one or more adjacent axle groups) must not exceed that calculated in accordance with the formulae opposite.	For L less than or equal to 11.33 metres, $M = 3L + 12.5$, where: M is the mass limit in tonnes and L is the distance in metres. For L greater than 11.33 metres, $M = 1.5L + 29.5$, where: M is the mass limit in tonnes and L is the distance in metres.

Part 4 – Warning signs

4.1 B-Double warning signs

- 4.1.1 A B-Double that is more than 22 metres long must have fitted horizontally to the rearmost part of it a B-Double warning sign in accordance with the requirements of this Part.
- 4.1.2 The sign must show the words 'LONG VEHICLE' in black upper case letters at least 180 millimetres high in typeface Series B (N), complying with *Australian Standard, AS 1744, Forms of letters and numerals for road signs*.
- 4.1.3 If the sign is in two pieces, the word 'LONG' must appear on one piece and the word 'VEHICLE' on the other.
- 4.1.4 A B-Double warning sign, or piece of a B-Double warning sign, must not be displayed on:

- a) a vehicle that does not form part of a B-Double, or
- b) a B-Double that is not more than 22 metres long.

4.2 Warning signs not to be used in other cases

A 'LONG VEHICLE' warning sign must not be used on a vehicle or combination except in accordance with this Part.

4.3 Specifications for warning signs

4.3.1 A warning sign must be:

- a) durable, and
- b) manufactured in one or 2 pieces from sheet steel 0.8 millimetres thick or an alternative material of at least equivalent stiffness, unless it is designed to be fixed to the vehicle body using an adhesive.

4.3.2 A warning sign must be at least 1.02 metres long by 250 millimetres high.

4.3.3 A warning sign must be coated with yellow retro-reflective material (Class 1 or Class 2) which meets *Australian Standard AS 1906, Retro-reflective materials and devices for road traffic control purposes*.

4.3.4 A warning sign must have a black border.

4.3.5 A warning sign must show the sign manufacturer's name or logo, and the brand and class of retro-reflective material used, in block letters not more than 10 millimetres high.

4.3.6 A warning sign must be mounted so that no part of it is:

- a) more than 1.8 metres above the ground, or
- b) less than 500 millimetres above the ground.

Part 5 – B-Double standards and specifications

5.1 Compliance with standards

5.1.1 A B-Double must comply with each applicable Australian Design Rule (ADR).

5.1.2 A vehicle must comply with each standard specified in this Notice, unless the Notice is inconsistent with an ADR that applies to it.

5.2 Power of B-Double prime mover

5.2.1 The minimum power required of a hauling unit must be 300 kilowatts.

5.2.2 An exception to the above requirement may be given if it can be demonstrated to the RTA that the vehicle is capable of starting movement on a 12% gradient, and is capable of maintaining a constant speed of 70 km/h on a 1% gradient when operating at the nominated Gross Combination Mass.

5.2.3 If the manufacturer of a motor vehicle forming part of a B-Double has not determined the GCM of the vehicle, the total mass of the

combination and any load must not exceed the number of kilograms worked out using the following formula:

$$\text{Mass in kilograms} = \frac{K \times M \times R \times T}{16}$$

where:

K means:

- a) 0.055 if a single drive axle is fitted to the motor vehicle,
- b) 0.053 if a single drive tandem axle is fitted to the motor vehicle, or
- c) 0.051 if a dual drive tandem axle group is fitted to the motor vehicle,

M means the number of tyre revolutions per kilometre as specified by the tyre manufacturer for the tyres fitted to the driving axle or axles,

R means the overall gear reduction between engine and drive wheels,

T means the maximum engine net torque in Newton-metres.

5.3 Speed limiting

5.3.1 A B-Double must comply with the speed limiting requirements of Third Edition Australian Design Rule 65.

5.3.2 A B-Double must be speed limited so that it has a maximum road speed capability of 100 km/h.

5.4 Vehicle monitoring devices

A vehicle monitoring device, eg. tachograph, electronic trip recorder or similar device, meeting Roads and Traffic Authority Vehicle Engineering Specification 531, shall be fitted to the prime mover and shall be used whenever the vehicle is in B-Double configuration. Records must be retained for at least six months, and, on request, be made available to an authorised officer at all times.

Note: For information relating to the requirement to fit or use a vehicle monitoring device on prime movers when the vehicle is not in B-Double configuration, contact the RTA Technical Enquires on the numbers listed below:				
	Blacktown	Wollongong	Newcastle	Parkes
Tel:	(02) 9830 5555	(02) 4226 7007	1800 049 920	1800 809 388
Fax:	(02) 9831 0913	(02) 4225 8844	(02) 4323 9905	(02) 6861 1496

5.5 Tracking

When travelling in a straight line on a level, smooth surface, all units in a B-Double must track in the path of the prime mover without shifting or swerving more than 100 mm either side of the path of the prime mover.

5.6 Turning capability

A B-Double must be able to turn both left and right within a circle not exceeding 25 metres diameter when measured at the outer edge of the tyre track at ground level.

5.7 Spray Suppression Devices

Spray suppression devices must be fitted to all axle groups and single axles of a B-Double combination.

The spray suppression devices must comply with the requirements of British Standard AU 200 – 1984, Parts 1 and 2.

5.8 Braking requirements for B-Doubles

5.8.1 Braking requirements for B-Doubles:

The braking requirements in this Part apply in addition to the braking system requirements that apply to all heavy vehicles.

These requirements do not apply to a B-Double that has a length of 19 metres or less, or to a vehicle used in a B-Double of that length.

5.8.2 Braking system design for a prime mover:

A prime mover used in a B-Double must meet the requirements of either second edition ADR 35A or third edition ADR 35.

A prime mover used in a B-Double must also have an anti-lock brake system that complies with ADR 64, if the prime mover:

- a) was manufactured on or after 1 January 1990,
- b) was first used in a B-Double on or after 1 January 1994, or
- c) is used in a B-Double combination that includes a road tank vehicle that carries dangerous goods.

5.8.3 Braking system design for a trailer

A trailer that is used in a B-Double, and is not otherwise required to comply with an ADR relating to braking, must comply with requirements specified in Second or Third Edition ADR 38 for the performance of:

- a) the service brake system,
- b) the emergency brake system, and
- c) the parking brake system.

A semi-trailer, regardless of its date of manufacture, must have an anti-lock braking system that meets the requirements of ADR 38, if:

- a) it is being used in a B-Double that includes a road tank vehicle, whether or not the semi-trailer is itself a road tank vehicle, and
- b) the road tank vehicle carries dangerous goods.

5.8.4 Air Brakes—Requirements for a prime mover

If a B-Double is fitted with brakes that operate using compressed air, the braking system of the prime mover must meet the requirements of this Part when:

- a) the pressure is measured in an 800 millilitre vessel connected by a 2 metre pipe with a bore of approximately 13 millimetres to the coupling head of the braking system, and
- b) the initial air pressure is not less than:
 - i) the arithmetic average of the maximum and minimum pressures in the operating pressure range specified by the vehicle manufacturer, or
 - ii) if there is no manufacturer's specification—650 kilopascals.

The pressure must reach at least 420 kilopascals within 400 milliseconds after the rapid and complete application of the foot-operated control of the braking system.

After the brakes have been fully applied, the pressure must fall within half a second of the release of the foot-operated control to 35 kilopascals.

5.8.5 Air Brakes: least favoured chamber

The pressure in the least favoured chamber of the braking system of a B-Double whose brakes operate using compressed air must meet the requirements of this subclause when the initial air pressure is not less than:

- a) the arithmetic average of the maximum and minimum pressures in the operating pressure range specified by the vehicle manufacturer, or
- b) if there is no manufacturer's specification—650 kilopascals.

The pressure must reach at least 420 kilopascals within 1.0 second of the rapid and complete application of the foot-operated control.

After the brakes have been fully applied, the pressure must fall to 35 kilopascals or the pressure at which the friction surfaces cease to contact each other within 1.0 second of the release of the foot-operated brake control on a B-Double.

Note: The 'least favoured chamber' means the brake chamber with the longest line to the treadle valve in the prime mover.

5.8.6 Recovery of air pressure for brakes

The air pressure in each air brake reservoir in a B-Double must recover to at least 420 kilopascals within one minute after 3 full brake applications have been made within a 10 second period if, before the 3 brake applications have been made:

- a) the engine is running at maximum speed,
- b) the governor cut-in pressure is no higher than:
 - i) the pressure recommended by the manufacturer, or
 - ii) if there is no manufacturer's recommendation—550 kilopascals

- c) the initial air pressure in the storage tanks of the vehicles is not less than:
 - i) the arithmetic average of the maximum and minimum pressures in the operating pressure range specified by the vehicle manufacturer, or
 - ii) if there is no manufacturer's specification—650 kilopascals.

5.8.7 Air supply for brakes

A B-Double that uses compressed air to operate accessories must have:

- a) sufficient air compressor capacity and air receiver volume to ensure that the operation of accessories does not adversely affect brake performance, and
- b) a compressed air system built to ensure that the brake system is preferentially charged.

5.8.8 Brake line couplings

Brake line couplings on the same part of a vehicle in a B-Double must not be interchangeable.

Couplings must be polarised in accordance with *Australian Standard AS D8-1971, Hose couplings for use with vacuum and air-pressure braking system on prime movers, trailers and semi-trailers*, if the hoses used with the brake couplings are used for the same purpose as the hoses described in the Australian Standard.

5.8.9 Simultaneous parking brake application

If the parking brake of a motor vehicle in a B-Double is applied, the parking brakes of any attached trailer must also be applied automatically.

5.8.10 Capacity of air reservoirs

The capacity of the air storage tanks of a motor vehicle used in a B-Double must be at least 12 times the volume of all the brake activation chambers on the vehicle.

The capacity of the air storage tanks of a trailer used in a B-Double must be at least 8 times the volume of all brake activation chambers on the trailer.

5.9 Coupling requirements for B-Doubles

5.9.1 Coupling requirements

The coupling requirements for B-Doubles listed in this section apply in addition to coupling requirements that apply to all heavy vehicles.

These requirements do not apply to a vehicle, coupling or part of a coupling that is used in a B-Double that has a length of 19 metres or less.

5.9.2 Fifth wheel couplings

A fifth wheel coupling used to connect a towing vehicle to a semi-trailer used in a B-Double must not be built with a pivot that allows a semi-trailer to roll relative to the towing vehicle.

The above does not apply to a fifth wheel coupling if:

- a) the semi-trailer design requires torsional stresses to be minimised,
- b) the roll axis of the fifth wheel coupling is above the surface of the coupler plate, and
- c) the degree of rotation allowed around the roll axis of the fifth wheel coupling is restricted to prevent roll instability.

A turntable used in a vehicle that forms part of a B-Double must be marked with:

- a) the name or trademark of the manufacturer, and
- b) the D-value rating,

of the turntable.

5.9.3 Selection of fifth wheel couplings

A fifth wheel coupling used in a B-Double must have a D-value of at least 107 kilonewtons (11.0 tonnes) that accords with *Australian Standard AS 1773-1990, Articulated Vehicles – Fifth wheel assemblies*.

A fifth wheel coupling used in a B-Double that is built for a 50 millimetre or

90 millimetre kingpin must:

- a) meet the dimensional requirements in *Australian Standard AS 1773-1990, Articulated Vehicles – Fifth wheel assemblies*, and
- b) not be worn more than is recommended by that Australian Standard.

A fifth wheel coupling used in a B-Double that is built for a 75 millimetre kingpin must:

- a) be compatible with the kingpin described in Clause 5.9.7, and
- b) not be worn more than is specified in Subclause 5.9.4 a) and b).

5.9.4 Determining the D-value of a fifth wheel coupling

When testing a fifth wheel coupling built for a 75 millimetre kingpin used in a B-Double to determine whether its D-value meets the requirements of Clause 5.9.3:

- a) the closed jaw diameter must not wear more than 2.6 millimetres, and
- b) the jaw thickness must not wear more than 3 millimetres.

5.9.5 Mounting of fifth wheel couplings on a B-Double

A fifth wheel coupling must be mounted on a prime mover or a semi-trailer used in a B-Double in accordance with the requirements

of Australian Standard AS 1771-1987, *Installation of fifth wheel and turntable assemblies*.

5.9.6 Branding of fifth wheel couplings

A fifth wheel coupling on a vehicle manufactured on or after 1 July 1991 forming part of a B-Double must be clearly and permanently marked in accordance with *Australian Standard AS 1773-1990, Articulated vehicles – Fifth wheel assemblies*, with the:

- the name or trademark of its manufacturer,
- its D-value rating, and
- its nominal size.

5.9.7 Selection of kingpins for a B-Double

A kingpin used in a B-Double must:

- be a 50 millimetre, 75 millimetre or 90 millimetre kingpin, and
- have a D-value of at least 162 kilonewtons (16.5 tonnes) that accords with *Australian Standard AS 2175-1990, Articulated vehicles – Kingpins*.

A 50 millimetre or 90 millimetre kingpin used in a B-Double must:

- be built to meet the dimensional requirements in *Australian Standard AS 2175-1990, Articulated vehicles – Kingpins*, and
- not be worn more than is recommended by that Australian Standard.

A 75 millimetre kingpin used in a B-Double must:

- be built to meet the dimensions specified in the essential diagram below, and
- not be worn more than specified in 5.9.8 a), b) or c).

5.9.8 When testing a 75 millimetre kingpin described in the essential diagram above to determine whether its D-value meets those requirements:

- diameter F must not be worn more than 3.0 millimetres,
- diameter G must not be worn more than 2.0 millimetres, and
- height H must not be worn more than 2.3 millimetres.

5.9.9 Attachment of kingpins

A kingpin on a trailer used in a B-Double must be attached in accordance with:

- a) the manufacturer's recommendations and instructions, or
- b) the guidelines detailed in *Australian Standard AS 2175-1990, Articulated vehicles – Kingpins*.

5.9.10 Branding of kingpins

A kingpin used in a trailer manufactured on or after 1 July 1991 that forms part of a B-Double must be clearly and permanently marked on the lower circular face of the kingpin in accordance with *Australian Standard AS 2175-1990, Articulated vehicles – Kingpins* with:

- a) the name or trademark of its manufacturer,
- b) its D-value, and
- c) its nominal size.

Part 6 – Approved routes

6.1 Approved routes

6.1.2 A B-Double may operate only on the approved routes and in those areas listed in Appendix 2:

Part 1 B-Double routes within the Sydney Region, and

Part 2 B-Double routes in New South Wales (excluding the Sydney Region).

6.1.3 The travel restrictions and conditions which apply to an approved route or area must be observed.

Appendix 1 – Definitions

‘articulated vehicle’ means a vehicle consisting of a prime mover and a semi-trailer;

‘authorised officer’ means a person employed by the RTA as an enforcement officer;

‘B-Double’ means a motor vehicle combination consisting of a prime mover towing two semi-trailers;

Typical B-Double

‘combination’ means a motor vehicle connected to one or more trailers;

‘prime mover’ means a motor vehicle built to tow a semi-trailer;

‘semi-trailer’ means a trailer that has:

- a) one axle group or single axle towards the rear, and

- b) a means of attachment to a prime mover that would result in some of the load being imposed on the prime mover;

‘Standards for registration’ means the standards specified by the Roads and Traffic Authority for vehicle registrations.

Appendix 2 – B-double Routes in NSW

Part 1 – B-double Routes within the Sydney Region

Type	Road	Starting Point	Finishing Point
	State Routes		
25	Abercrombie St, Wattle St, Pyrmont Bridge Rd (Northbound travel only permitted)	Cleveland St, Chippendale	Victoria Rd, Pyrmont
25	Appin Rd, Moore–Oxley Bypass, Campbelltown Rd	Wollondilly Council boundary, near Appin	Hume Hwy, Crossroads
25	Bay St	Princes Hwy, Rockdale	The Grand Pde, Brighton-le-Sands
25	Bayswater St, Marlborough St, Westbourne Rd	Lyons Rd, Drummoyne	Victoria Rd, Drummoyne

Route Assessment Procedures for B-Doubles

Approved B-double routes are listed in the permit Notice and appear on the two B-double maps (*Road Train and B-double routes in NSW and ACT* and *B-double Routes in Sydney, Newcastle and Wollongong*).

Operators are required to obtain approval for any routes or terminals not previously approved for B-doubles. Applications for such approvals can be made to contact officers in the RTA area offices responsible for the particular route. Contact telephone and fax numbers are listed below.

Contact officers are available to discuss and advise on route and terminal assessment procedures, and provide a time estimate for the assessment process. The time needed for assessment will be affected by the number of other organisations, such as councils, that may need to be consulted. Applicants will be advised if trials are necessary for a route or a terminal.

After the necessary assessments and trials, findings are referred to the respective RTA Regional Manager for decision. Applicants are provided with written advice of decisions.

Roads Act 1993

General Road Train Notice under Division 2 of Part 3 of the Road Transport (Mass, Loading and Access) Regulation 1996

I, Ronald David Christie, Chief Executive of the Roads and Traffic Authority, in pursuance of Part 3 of Division 2 of the Road Transport (Mass, Loading and Access) Regulation 1996, by this Notice, specify the areas and routes on which Road Trains that comply with the requirements of the Road Transport (Mass, Loading and Access) Regulation 1996 as set out in Parts 3, 4 and 5 of the Schedule and Schedule 4 to the Road Transport (Vehicle Registration) Regulation 1998, may be used on public streets or within areas specified in Part 6 of the Schedule subject to any requirements or condition set out in the Schedule.

RD Christie
Chief Executive
Roads and Traffic Authority

Wales

Route assessment procedures for road trains

Regional contacts

Schedule

Part 1 – Preliminary

1.1 Citation

This Notice may be cited as the General Notice for the Operation of Road Trains 1996.

1.2 Commencement

This Notice takes effect on 13 December 1996.

1.3 Interpretations

1.3.1 Unless stated otherwise, words and expressions used in this Notice have the same meaning as those defined in Appendix 1.

1.3.2 Subject to Subclause 1.3.3, a diagram appearing in this Notice is illustrative only.

1.3.3 If a provision contains a diagram that is called an essential diagram, that diagram is part of the Notice.

1.4 Effect

This Notice remains in force until 13 December 2000 unless it is amended or repealed earlier.

<p>Note: This Notice replaces the General Permit for the Operation of Road Trains 1995 that was published in Government Gazette No. 102 of 25 August, at pages 4915 to 4937, that was subsequently amended in Government Gazette No. 77 of 28 June 1996, at pages 3607 to 3616.</p>
--

Part 2 – Operating requirements

2.1 Operating requirements

- 2.1.1 A copy of this Notice must be carried in the driving compartment whenever the vehicle is operating as a road train and must be produced when requested to do so by a member of the police service or an authorised officer.
- 2.1.2 All requirements and conditions of this Notice are to be observed when a vehicle is operating as a road train.
- 2.1.3 A vehicle operating as a road train must clearly display warning signs at the front and rear in accordance with the requirements of Part 4 of this Notice.
- 2.1.4 A vehicle operating as a road train must comply with the statutory requirements of the Roads Act 1993.
- 2.1.5 The hauling unit and trailers or semi-trailer of a road train must be constructed to comply with the appropriate standards for registration, or the Australian Design Rules unless otherwise stated.
- 2.1.6 All units used in a road train must be registered in a State or Territory of the Commonwealth or under the Federal Interstate Registration Scheme.
- 2.1.7 The driver of a road train must have a driver's licence either endorsed for road trains or of a category that encompasses road trains.
- 2.1.8 The load limits set by this Notice must not be exceeded.
- 2.1.9 Despite Clause 5.3, a person must not drive a road train in excess of any speed limit set by law.
- 2.1.10 A road train must travel at least 200 metres behind a heavy motor lorry, a trailer attached to a heavy motor lorry or a caravan attached to a vehicle except when:
 - overtaking or being overtaken by another vehicle,
 - the vehicle ahead is stopping or stationary,
 - there is a separate lane for overtaking, or
 - travelling in an urban area or where the speed limit is set at 60 km/h or less where it is impractical to maintain a distance of 200 metres.

Note For the purpose of 2.2.3, a heavy motor lorry means any motor lorry:

- a) having an unladen weight exceeding 3 tonnes, or
- b) drawing a trailer, where the aggregate of the unladen weight of the lorry and the unladen weight of the trailer exceeds 3 tonnes.

2.2 Travel requirements

- 2.2.1 Road trains may operate only on approved routes and must observe any travel limitation which applies to an approved route.

Note

1. It is the responsibility of operators seeking approval of new routes to contact RTA area offices and follow the requirements specified in the route assessment guidelines.
2. Operators may apply to the Roads and Traffic Authority for a specific permit for travel on any road other than those specified in Part 6.

2.2.2 Deviation from approved routes or road train areas is not permitted except in emergencies. Emergency route deviations may be made only at the direction of an *authorised officer* or a member of the Police Service.

Part 3 – Mass and dimension limits

3.1 Maximum limits for axles and axle groups

The maximum axle mass limits for a road train must be the lowest of:

- a)

steering single axle	– 6.0 tonnes gross
single axle consisting of 4 tyres	– 9.0 tonnes gross
tandem axle group consisting of 4 tyres	– 11.0 tonnes gross
tandem axle group consisting of 8 tyres	– 16.5 tonnes gross
tri-axle group consisting of 12 tyres	– 20.0 tonnes gross
tri-axle group consisting of 6 tyres with section widths of at least 375 millimetres	– 20.0 tonnes gross
- b) the manufacturers' mass ratings, or
- c) the sum of the mass limits for the tyres fitted to the axles and axle groups.

3.2 Maximum gross mass limits

3.2.1 Except as provided in Subclause 3.2.2, the maximum gross mass limit for a road train up to 36.5 metres in length must be the lowest of:

- a) 79.0 tonnes gross,
- b) the sum of the axle and axle group mass limits in Clause 3.1 a),
- c) the sum of the manufacturers' mass limits for the prime mover (GVM) and the semi-trailers (GTM), or
- d) the gross combination mass (GCM) limit specified by the prime mover manufacturer.

3.2.2 The maximum gross mass limit for a road train up to 53.5 metres in length must be the lowest of:

- a) 115.5 tonnes gross,
- b) the sum of the axle and axle group mass limits in Clause 3.1 (a),
- c) the sum of the manufacturers' mass limits for the prime mover (GVM) and the semi-trailers (GTM), or
- d) the gross combination mass (GCM) limit specified by the prime mover manufacturer.

3.3 Maximum dimension limits

- 3.3.1 Hauling units and semi-trailers must comply with Third Edition Australian Design Rule 43.
- 3.3.2 Except as provided in Subclause 3.3.5, a road train must not be more than 36.5 metres long.
- 3.3.3 A road train must not be more than 4.3 metres high.
- 3.3.4 An exception to Subclause 3.3.3 above to allow loading up to 4.6 metres high may be applied to a road train, subject to compliance with all of the relevant conditions of the 4.6 Metre High Vehicle Route Notice 1999.
- 3.3.5 An exception to Subclause 3.3.2 above to allow a dimension up to 53.5 metres in length may be applied to a road train travelling on any approved route specified in Part 2 of Appendix 2.

3.4 Mass limits relating to axle spacing

- 3.4.1 For any road train, the mass limit must not exceed that determined or specified by the Authority.
- 3.4.2 For any road train that complies with the limits determined or specified in accordance with Clause 3.4.1, the mass limits in Table 1 apply to the sum of the masses of each axle group or single axle in the distance referred to in that Table, including the axles between which the distance is measured.
- 3.4.3 Deleted.
- 3.4.4 The total mass of a vehicle or a combination, and any load, must not exceed 15 tonnes if the distance between any 2 axles that are not part of the same axle group is less than 2.5 m.

3.5 Measurement of distances for Table 1

Each distance in Table 1 refers to:

- a) the distance from the centre of any single axle to the centre of any other single axle,
- b) the distance from the centre of any single axle to the centre of the furthest axle in any axle group, or
- c) the greatest distance between the centres of axles in any 2 axle groups.

Table 1 - Mass limits relating to axle spacing - Road Trains

For any road train the sum of the axle loads of the axles in any two adjacent axle groups (or of any single axle and the axles in an adjacent axle group) must not exceed that calculated in accordance with the formula opposite.	$M = 3L + 12.5$ where M is the mass limit in tonnes, and L is the distance in metres.
--	---

Part 4 – Warning signs

4.1 Road train warning signs

- 4.1.1 A road train that is more than 30 metres long must have 'ROAD TRAIN' warning signs in accordance with this Part.
- 4.1.2 A road train that is more than 22 metres long but not more than 30 metres long must have 'ROAD TRAIN' warning signs, or a 'LONG VEHICLE' warning sign in accordance with this Part.
- 4.1.3 The words on a 'ROAD TRAIN' or 'LONG VEHICLE' warning sign must be in black upper case letters at least 180 millimetres high in typeface Series B (N), complying with *Australian Standard AS 1744-1975, Forms of letters and numerals for road signs*.
- 4.1.4 If a 'ROAD TRAIN' or 'LONG VEHICLE' warning sign is in two pieces, one word must appear on one piece and the other word on the other piece.
- 4.1.5 'ROAD TRAIN' warning signs must be used in pairs and fitted horizontally, one at the front and the other at the rear of the combination concerned.
- 4.1.6 A 'LONG VEHICLE' sign must be fitted horizontally to the rearmost part of the combination concerned.

4.2 Warning signs not to be used in other cases

A 'ROAD TRAIN' warning sign or a 'LONG VEHICLE' warning sign must not be used on a vehicle or combination except in accordance with this Part.

4.3 Specifications for warning signs

- 4.3.1 A warning sign must be:
 - a) durable, and
 - b) manufactured in one or two pieces from sheet steel 0.8 millimetres thick or an alternative material of at least equivalent stiffness, unless it is designed to be fixed to the vehicle body using an adhesive.
- 4.3.2 A warning sign must be at least 1.02 metres long by 250 millimetres high.
- 4.3.3 A warning sign must be coated with yellow retro-reflective material (Class 1 or Class 2) which meets *Australian Standard AS 1906, Retro-reflective materials and devices for road traffic control purposes*.
- 4.3.4 A warning sign must have a black border.
- 4.3.5 A warning sign must show the sign manufacturer's name or logo, and the brand and class of retro-reflective material used, in block letters not more than 10 millimetres high.
- 4.3.6 A warning sign must be mounted so that no part of it is:
 - a) more than 1.8 metres above the ground, or
 - b) less than 500 millimetres above the ground.

Part 5 – Road train standards and specifications

5.1 Compliance with standards

- 5.1.1 A road train must comply with each applicable Australian Design Rule (ADR).
- 5.1.2 A vehicle must comply with each standard specified in this Notice, unless the Notice is inconsistent with an ADR that applies to it.

5.2 Power of road train hauling unit

- 5.2.1 If the manufacturer of a motor vehicle forming part of a road train has not determined the GCM of the vehicle, the total mass of the combination and any load must not exceed the number of kilograms worked out using the following formula:

$$\text{Mass in kilograms} = \frac{K \times M \times R \times T}{16}$$

where:

K means:

- a) 0.055 if a single drive axle is fitted to the motor vehicle,
- b) 0.053 if a single drive tandem axle is fitted to the motor vehicle, or
- c) 0.051 if a dual drive tandem axle group is fitted to the motor vehicle,

M means the number of tyre revolutions per kilometre as specified by the tyre manufacturer for the tyres fitted to the driving axle or axles,

R means the overall gear reduction between engine and drive wheels,

T means the maximum engine net torque in Newton-metres.

5.3 Speed limiting

- 5.3.1 A road train must comply with the speed limiting requirements of Third Edition Australian Design Rule 65.
- 5.3.2 A road train must be speed limited so that it has a maximum road speed capability of 90 km/h.

5.4 Tracking

When travelling in a straight line on a level, smooth surface, all units in a road train must track in the path of the hauling unit without shifting or swerving more than 100 mm either side of the path of the hauling unit.

5.5 Braking requirements for road train or component of road train

5.5.1 Braking Requirements for a Road Train or component of a Road Train

The braking requirements in this Part apply in addition to the braking system requirements that apply to all heavy vehicles.

These requirements do not apply to a road train that has a length of 19 metres or less, or to a vehicle used in a road train of that length.

5.5.2 Braking System Design for a Hauling Unit

A motor vehicle that:

- a) would not otherwise be required to comply with an ADR relating to braking,
- b) is used in a road train,

must comply with the requirements specified in either Second Edition ADR 35A or Third Edition ADR 35 for the performance of:

- a) the service brake system,
- b) the secondary brake system, and
- c) the parking brake system.

5.5.3 Braking system design for a trailer

A trailer that is used in a road train, and is not otherwise required to comply with an ADR relating to braking, must comply with requirements specified in Second or Third Edition ADR 38 for the performance of:

- a) the service brake system,
- b) the emergency brake system, and
- c) the parking brake system.

A road train trailer to which this Part applies need not be fitted with a mechanical parking brake if it carries wheel chocks that provide a performance equivalent to the performance requirement of the parking brake system.

5.5.4 Air brakes—Requirements for hauling unit

If a road train is fitted with brakes that operate using compressed air, the braking system of the hauling unit must meet the requirements of this Part when:

- a) the pressure is measured in an 800 millilitre vessel connected by a 2 metre pipe with a bore of approximately 13 millimetres to the coupling head of the braking system,
- b) the initial air pressure is not less than:

- i) the arithmetic average of the maximum and minimum pressures in the operating pressure range specified by the vehicle manufacturer, or
- ii) if there is no manufacturer's specification—650 kilopascals.

The pressure must reach at least 420 kilopascals within 400 milliseconds after the rapid and complete application of the foot-operated control of the braking system.

After the brakes have been fully applied, the pressure must fall within half a second of the release of the foot-operated control to 35 kilopascals.

5.5.5 Air brakes—Least favoured chamber

The pressure in the least favoured chamber of the braking system of a road train whose brakes operate using compressed air must meet the requirements of this subclause when the initial air pressure is not less than:

- a) the arithmetic average of the maximum and minimum pressures in the operating pressure range specified by the manufacturer of the vehicle, or
- b) if there is no manufacturer's specification—650 kilopascals.

The pressure must reach at least 420 kilopascals within 1.5 seconds of the rapid and complete application of the foot-operated control.

After the brakes have been fully applied, the pressure must fall to 35 kilopascals or the pressure at which the friction surfaces cease to contact each other within 1.5 seconds of the release of the foot-operated brake control on a road train.

Note: The 'least favoured chamber' means the brake chamber with the longest line to the treadle valve in the prime mover.

5.5.6 Recovery of air pressure for brakes

The air pressure in each air brake reservoir in a road train must recover to at least 420 kilopascals within one minute after 3 full brake applications have been made within a 10 second period if, before the 3 brake applications have been made:

- a) the engine is running at maximum speed, and
- b) the governor cut-in pressure is no higher than:
 - i) the pressure recommended by the manufacturer, or
 - ii) if there is no manufacturer's recommendation—550 kilopascals
- c) the initial air pressure in the storage tanks of the vehicles is not less than:
 - i) the arithmetic average of the maximum and minimum pressures in the operating pressure range specified by the vehicle manufacturer, or

- ii) if there is no manufacturer's specification—650 kilopascals.

5.5.7 Air Supply for brakes

A road train that uses compressed air to operate accessories must have:

- a) sufficient air compressor capacity and air receiver volume to ensure that the operation of accessories does not adversely affect brake performance, and
- b) a compressed air system built to ensure that the brake system is preferentially charged.

5.5.8 Brake line couplings

Brake line couplings on the same part of a vehicle in a road train must not be interchangeable.

Couplings must be polarised in accordance with *Australian Standard AS D8-1971, Hose couplings for use with vacuum and air-pressure braking system on prime movers, trailers and semi-trailers*, if the hoses used with the brake couplings are used for the same purpose as the hoses described in the Australian Standard.

5.5.9 Simultaneous parking brake application

If the parking brake of a motor vehicle in a road train is applied, the parking brakes of any attached trailer must also be applied automatically.

5.5.10 Capacity of air reservoirs

The capacity of the air storage tanks of a motor vehicle used in a road train must be at least 12 times the volume of all the brake activation chambers on the vehicle.

The capacity of the air storage tanks of a trailer used in a road train must be at least 8 times the volume of all brake activation chambers on the trailer.

5.6 Coupling requirements

5.6.1 Coupling requirements

The coupling requirements for road trains listed in this section apply in addition to coupling requirements that apply to all heavy vehicles.

These requirements do not apply to a vehicle, coupling or part of a coupling that is used in a road train that has a length of 19 metres or less.

5.6.2 Fifth wheel couplings

A fifth wheel coupling used to connect a towing vehicle to a semi-trailer used in a road train must not be built with a pivot that allows a semi-trailer to roll relative to the towing vehicle.

The above does not apply to a fifth wheel coupling if:

- a) the semi-trailer design requires torsional stresses to be minimised,

- b) the roll axis of the fifth wheel coupling is above the surface of the coupler plate, and
- c) the degree of rotation allowed around the roll axis of the fifth wheel coupling is restricted to prevent roll instability.

A turntable used in a vehicle that forms part of a road train must be marked with:

- a) the name or trademark of the manufacturer, and
 - b) the D-value rating,
- of the turntable.

A trailer with only one axle group or a single axle (except a semi-trailer or converter dolly) that is used in a road train must not have a coupling fitted at its rear.

5.6.3 Selection of fifth wheel couplings

A fifth wheel coupling used in a road train must have a D-value that accords with *Australian Standard AS 1773–1990, Articulated vehicles – Fifth wheel assemblies*.

A turntable used in a road train must have a D-value of at least 140 kilonewtons (14.3 tonnes) for a prime mover and 162 kilonewtons (16.5 tonnes) for a converter dolly, in accordance with *Australian Standard AS 1773–1990, Articulated vehicles – Fifth wheel assemblies*.

A fifth wheel coupling used in a road train that is built for a 50 millimetre or 90 millimetre kingpin must meet the dimensional requirements in *Australian Standard AS 1773 – 1990, Articulated vehicles – Fifth wheel assemblies*.

A fifth wheel coupling used in a road train that is built for a 75 millimetre kingpin must be compatible with the kingpin described in Clause 5.6.7

5.6.4 Determining the D-value of a fifth wheel coupling

When testing a fifth wheel coupling built for a 75 millimetre kingpin used in a road train to determine whether its D-value meets the requirements of Clause 5.6.3:

- a) the closed jaw diameter must not wear more than 2.6 millimetres,
- b) the jaw thickness must not wear more than 3 millimetres.

5.6.5 Mounting of fifth wheel couplings on a road train

A fifth wheel coupling must be mounted on a prime mover or a semi-trailer used in a road train in accordance with the requirements of *Australian Standard AS 1771–1987, Installation of fifth wheel and turntable assemblies*.

5.6.6 Branding of fifth wheel couplings

A fifth wheel coupling on a vehicle manufactured on or after 1 July 1991, forming part of a road train must be clearly and permanently

marked in accordance with *Australian Standard AS 1773-1990, Articulated vehicles – Fifth wheel assemblies*, with the:

- a) the name or trademark of its manufacturer,
- b) its D-value rating, and
- c) its nominal size.

5.6.7 Selection of kingpins

A kingpin used in a road train must:

- a) be a 50 millimetre, 75 millimetre or 90 millimetre kingpin, and
- b) have a D-value of at least 162 kilonewtons (16.5 tonnes) that accords with *Australian Standard AS 2175-1990, Articulated vehicles – Kingpins*.

A 50 millimetre or 90 millimetre kingpin used in a road train must:

- a) be built to meet the dimensional requirements in *Australian Standard AS 2175-1990, Articulated vehicles – Kingpins*, and
- b) not be worn away more than is recommended by that Australian Standard.

A 75 millimetre kingpin used in a road train must:

- a) be built to meet the dimensions specified in the essential diagram below, and
- b) not be worn away more than is specified in 5.6.8 a), b) or c).

5.6.8 When testing a 75 millimetre kingpin described in the essential diagram above to determine whether its D-value meets those requirements:

- a) diameter F must not wear more than 3 millimetres,
- b) diameter G must not wear more than 2 millimetres, and
- c) height H must not wear more than 2.3 millimetres.

5.6.9 Attachment of kingpins

A kingpin on a trailer used in a road train must be attached in accordance with:

- a) the manufacturer's recommendations and instructions, or
- b) the guidelines detailed in *Australian Standard AS 2175-1990, Articulated vehicles – Kingpins*.

5.6.10 Branding of kingpins

A kingpin used in a trailer manufactured on or after 1 July 1991 that forms part of a road train must be clearly and permanently marked on the lower circular face of the kingpin in accordance with *Australian Standard AS 2175-1990, Articulated vehicles – Kingpins*, with:

- a) the name or trademark of its manufacturer,
- b) its D-value, and
- c) its nominal size.

5.6.11 Selection of couplings and drawbar eyes

A drawbar-type coupling or a drawbar eye used in a road train must:

- a) be a 50 mm pin type,
- b) have a D-value of at least 186 kilonewtons (19 tonnes) that accords with *Australian Standard AS 2213-1984, 50 mm pin type couplings and drawbar eyes for trailers*,
- c) be built to the dimension specified in that Australian Standard, and
- d) not be worn away more than is recommended in that Australian Standard.

5.6.12 Attachment of couplings and drawbar eyes

The drawbar-type coupling or drawbar eye in a road train must be built and positioned so that:

- a) when the road train is moving, the drawbar can move at least 15 degrees upwards or downwards from the position it occupies when the road train is parked on level ground,
- b) the pivot point of the coupling is not more than 300 mm forward of the rear of the trailer to which it is attached, and
- c) it is at a height of at least 800 mm, but not more than 950 mm, when the road train is unloaded and parked on level ground.

5.6.13 Branding of couplings and drawbar eyes

A drawbar-type coupling or a drawbar eye on a vehicle manufactured on or after 1 July 1991 forming part of a road train must be clearly and permanently marked in accordance with *Australian Standard AS 2213 – 1984, 50 mm pin type couplings and drawbar eyes for trailers*, with:

- a) the name or trademark of manufacturer,
- b) its D-value rating.

5.6.14 Tow coupling overhang

The tow coupling overhang of a motor vehicle, other than a prime mover, used in a road train must not be more than the greater of:

- a) 30% of the distance from the centre of the front axle to the centre of the axle group or single axle at the rear of the vehicle,
- b) 2.7 metres.

The tow coupling overhang of a semi-trailer, or a dog trailer consisting of a semi-trailer and converter dolly, used in a road train must not be more than 30% of the distance from the point of articulation to the centre of the axle group or single axle at the rear of the vehicle.

The tow coupling overhang of any other dog trailer used in a road train must not be more than 30% of the distance from the centre of the front axle group or single axle to the centre of the axle group or single axle at the rear of the vehicle.

Part 6 – Approved routes

6.1 Approved routes

- 6.1.1 A road train may operate only on approved routes and in road train areas listed in Appendix 2.
- 6.1.2 The travel restrictions and conditions which apply to an approved route or area must be observed.

Appendix 1 – Definitions

- ‘articulated vehicle’** means a vehicle consisting of a prime mover and a semi-trailer;
- ‘authorised officer’** means a person employed by the RTA as an enforcement officer;
- ‘combination’** means a motor vehicle connected to one or more trailers;
- ‘converter dolly’** means a pig trailer consisting of an axle group, a fifth wheel assembly and a drawbar designed and used to convert a semi-trailer into a dog trailer;

Typical converter dolly

- ‘prime mover’** means a motor vehicle built to tow a semi-trailer;
- ‘road train’** means either an articulated vehicle hauling one or more trailers or a rigid motor vehicle hauling two or more trailers;

Typical road trains

- ‘semi-trailer’** means a trailer that has:
- one axle group or single axle towards the rear; and
 - a means of attachment to a prime mover that would result in some of the load being imposed on the prime mover;
- ‘standards for registration’** means the standards specified by the Roads and Traffic Authority for vehicle registrations;
- ‘trailer’** means any vehicle without motive power of its own, designed to be towed by a vehicle, and includes a semi-trailer coupled to a converter dolly.

Appendix 2 – Road train routes in New South Wales

Appendix 2 – Part 1, 36.5 metre road train routes in New South Wales

RT	000	Road train area	<p>Road trains may be operated for the purpose of transporting any goods or livestock west of a line taken from the NSW/Qld border at Mungindi through Collarenebri, Walgett, Byrock, Nyngan, Cobar and Ivanhoe to the NSW/Vic border at Wentworth.</p> <p>The urban areas of Broken Hill, Cobar, Euabalong and Euabalong West are excluded from road train use except on the following routes:</p> <p>1 Broken Hill</p> <ul style="list-style-type: none"> - Barrier Hwy - Rakow St - William St - Silver City Hwy - Silver City Hwy - Pinnacles Rd - Kanandah Rd - Ryan St - Creedon St - Kanandah Rd - Kanandah Pl [entire length, no through road] - Pinnacles Rd to Saleyards - Creedon St between Rakow St and Gaffney St - Iodide St between William St and Crystal St - Argent St between Iodide St and Barrier Hwy - From junction of Bonanza and Patton Streets thence Patton St - Comstock St - Eyre St - Holten Dr to the junction with Menindee Road <p>2 Cobar</p> <ul style="list-style-type: none"> - Barrier Hwy (Marshall St) - Kidman Way from Nymagee road (MR61) and Bourke road (MR421) - Lewis St (north of the Barrier Hwy) thence Louth Rd - Barton St (north of the Barrier Hwy) thence Frederick St - Kidman Way - Lewis St (south of Barrier Hwy) thence Blakey St - Woodiwiss St - Lerida St to the Cobar Airport turnoff - Bathurst St (from Barrier Hwy) - Becker St - Monaghan St to access the Caltex Service Station - Murray St (from Barrier Hwy) - Prince St - Bourke St to access the Mobil Service Station - Murray St (from Barrier Hwy) - Becker St - Bourke St to access the Shell Service Station - Murray St (from Barrier Hwy) to Woodiwiss Ave - South Railway Parade (entire length) - Old Bourke Road (entire length) - All streets in the East Cobar Industrial Estate east of Old Bourke St <p>3 Euabalong</p> <ul style="list-style-type: none"> - Hercules St from Euabaolong - Lake Cargellico road (MR423) to Euabalong - Gunebang road (MR411) - Robinson - Lachlan - Murrin - Mudda Streets <p>4 Euabalong West</p> <ul style="list-style-type: none"> - Euabba - Murrin Streets <p>[The road train area is marked on the Road Train and B-double route map]</p>

General Route Listing

Type	Road No	Road Name	Starting point	Finishing point	Conditions
RT	000	Abattoir Rd, Deniliquin	Barham Rd	Saleyards Rd	
RT	067	Balranald-Ivanhoe Rd	Sturt Hwy (SH14), Balranald	Cobb Hwy (SH21), Ivanhoe	
RT	329	Baradine-Grawan Bridge Rd	Burren Junction-Warren road (MR619), Burren Junction	Gwydir Hwy (SH12) near Grawan Bridge	
RT	000	Baranbar St, Narrabri	Mooloobar St, Narrabri.	Goobar St, Narrabri	Cargill Oil Seed (Aust), Baranbar St, Narrabri West
RT	008	Barrier Hwy	Mitchell Hwy (SH7), Nyngan	SA border at Cockburn	Via Cobar, Wilcannia, Broken Hill as per urban access routes listed in notes 1 & 2 of Road Train Area
RT	000	Barwon St, Narrabri	Newell Hwy (SH17)	Fitzroy St	- No access on Barwon St between 8.30am and 9.30am and 3.00pm and 4.00pm on schooldays. - Access from Newell Hwy is restricted to daylight hours only. - Access for the period 1 November 1998 to 30 June 1999 only
RT	564	Berrigan-Jerilderie road (MR564)	Riverina Hwy (SH20) at Berrigan	Newell Hwy (SH17)	
RT	000	Boothenda Rd, Dubbo	Yarrandale Rd, North Dubbo	Dubbo Abattoirs and Saleyards.	
RT	017	Bourke St, Dubbo	Erskine St	River St	
RT	000	Brewon Rd (Shire Roads 35 and 62)	Carinda-Quambone road (MR202), Carinda	Marthaguy Creek approx 34km north of Carinda	
RT	016	Bruxner Hwy	Boggabilla	Wearne	
RT	619	Burren Junction-Walgett road	Burren Junction-Wee Waa road (MR343)	Castlereagh Hwy (SH18) approx 5 km north-east of Walgett	
RT	018	Castlereagh Hwy	Newell Hwy (SH17), Gilgandra	NSW/ Qld border near Hebel	
RT	000	Centre Rd, Moama	Cobb Hwy (SH21)	Hillside Rd	
RT	021	Cobb Hwy	Barrier Hwy (SH8) 19km east of Wilcannia	Nicholas Dr, Moama	
RT	000	Cobbora Rd, Dubbo	Erskine St (MR206), Dubbo	Yarrandale Rd, North Dubbo	
RT	000	Collins St, Hillston	Cowper St, Hillston	Hillston-Goolgowi road (MR80)	Dry weather only
RT	061	Condobolin-Cobar road	Condobolin-Tullamore road (MR57), Condobolin	Barrier Hwy (SH8), Cobar	
RT	070	Coolabah-Brewarrina road	Mitchell Hwy (SH7), Coolabah	Brewarrina-Bourke road (MR68), Brewarrina	
RT	000	Cowper St, Hillston	Milton St, Hillston	Hillston-Goolgowi road (MR80)	
RT	094	Deniliquin-Swan Hill road	Cobb Hwy (SH21)	Entrance to "Yaloke" (26 km west of Deniliquin)	

RT	000	Erskine St, Dubbo	Whylandra St	Cobbora Rd (SH27)	
RT	000	Federation St, Gilgandra	Castlereagh Hwy (SH18)	Oxley Hwy (SH11)	
RT	000	Fitzroy St, Dubbo	River St	Purvis Lane, North Dubbo	
RT	000	Fitzroy St, Narrabri	Barwon St	Tibbereena St	- No access on Barwon St between 8.30am and 9.30am and 3.00pm and 4.00pm on schooldays. - Access from Newell Hwy is restricted to daylight hours only. - Access for the period 1 November 1998 to 30 June 1999 only
RT	367	Garah–Mungindi road	Moree–Boomi road (MR232), Garah	NSW/Qld border at Mungindi	
RT	000	Goobar St, Narrabri	Shire Road 29	Baranbar St	
RT	507	Goondiwindi–Mungindi road	Newell Hwy (SH17) near Goondiwindi Bridge over Macintyre River	Garah–Mungindi road (MR367), Mungindi	
RT	000	Greggerys Road, Berrigan	Berrigan–Jerilderie road (MR564)	Unnamed lane [access to Barrett's Tyre Service]	
RT	012	Gwydir Hwy	Biniguy (east of Moree) at SR 183	Castlereagh Hwy (SH18) north of Walgett	
RT	000	Haines St, Hillston	O'Donald St	Aerodrome Rd	Travel permitted in dry weather only
RT	000	Hargraves Lane, Gilgandra	Oxley Hwy (SH11)	Newell Hwy (SH17)	
RT	000	Hillside Rd, Moama	Centre Rd	Solvent Recovery Plant	
RT	000	Lachlan River Rd, Hillston	Griffith–Mosgiel road (MR80)	Kidman Way near Willandra	
RT	000	Lachlan Valley Way	Euabalong–Mount Hope road (MR411) Euabalong	Condobolin–West Wyalong road (MR57) near Condobolin	
RT	377	Lachlan Valley Way	Newell Hwy (SH17), Forbes	Condobolin–Melrose road (MR61), Condobolin	
RT	501	Lachlan Valley Way	Willanthry Bridge–The Priors road (MR410) at Willanthry Bridge	Cobb Hwy (SH21), Booligal	
RT	000	Maitland St, Narrabri	Fitzroy St	Old Gunnedah Rd	- Access from Newell Hwy is restricted to daylight hours only. - Access for the period 1 November 1998 to 30 June 1999 only
RT	000	McCabe St, Balranald	Market St	Nelson's Depot	
RT	347	Melrose–Collie road	Condobolin–Nymagee road (MR61), Melrose	Oxley Hwy (SH11), Collie	
RT	006	Mid Western Hwy	Newell Hwy (SH17), West Wyalong	Cobb Hwy (SH21), Hay	
RT	000	Milton St, Hillston	Lachlan River Rd	Cowper St	
RT	007	Mitchell Hwy	NSW/ Qld border at Barrington	Thompson St, Dubbo	

RT	000	Moa St, Balranald	Market St	Balranald-Ivanhoe road	
RT	375	Mooloobar St, Narrabri	Newell Hwy (SH17), Narrabri	Cargills Oilseeds Terminal	
RT	080	Mossiel-Griffith road	Cobb Hwy (SH21), Mossgiel	Kookora St, Griffith	
RT	411	Mount Hope-Euabalong road	Willanthry Bridge-The Priory road (MR410) near Mount Hope	Lachlan Valley Way (MR230) 5.6 km east of Euabalong	
RT	127	Narrabri-Collins Bridge Rd	Newell Hwy (SH17), Narrabri Junction	Junction with Shire Rd 232 at Collins Bridge	No road train access on Main Road 127 via Wee Waa township between Collins Bridge and junction with Shire Road 247 west of Wee Waa
RT	089	Narromine-Tomingely road	Mitchell Hwy (SH7), Narromine	Newell Hwy (SH17), Tomingely	
RT	017	Newell Hwy	NSW/Qld border at Goondiwindi	1 km North of junction with Oxley Highway (SH11) near Coonabarabran.	Terminal is at the rest area provided.
RT	017	Newell Hwy, Gilgandra	Hargraves Lane	Ampol Truckstop, Gilgandra	Accesses Ampol, Finemores Depot & GrainCorp Silos

**Roads and Traffic Authority
Roads Act 1993**

**Notice under Division 2 of Part 3 of the Road Transport (Mass, Loading and
Access) Regulation 1996**

I, Ronald David Christie, Chief Executive of the Roads and Traffic Authority, pursuant to Division 2 of Part 3 of the Road Transport (Mass, Loading and Access) Regulations 1996, make the Notice set forth hereunder so as to specify the areas and routes on which a prime mover and semi-trailer combination towing a converter dolly that complies with the requirements of the Road Transport (Mass, Loading and Access) Regulations 1996, and Schedule F to the Motor Traffic Regulations 1935, may be used subject to any general requirements set out in Parts 2, 3, 4 and 5 of the Schedule and any conditions set out in the Schedule.

**R D Christie
Chief Executive
Roads and Traffic Authority**

SCHEDULE

PART 1 - PRELIMINARY

1.1 Citation

This notice may be cited as the Converter Dolly Combination Notice 1996.

1.2 Commencement

This Notice takes effect on 7 March 1997.

1.3 Limitation

This notice continues to have effect until 31 December 1999 unless it is amended or repealed earlier.

1.4 Interpretation

Unless stated otherwise, words and expressions used in this Notice have the same meaning as those defined in Part 6.

1.5 Application

This Notice applies to a prime mover and semi-trailer combination that is towing a converter dolly.

PART 2 - ROADS

2.1 Approved roads

2.1.1 A combination to which this Notice applies may only travel on those roads specified in Part 2 of Appendix 2 of the General B-Double Notice 1996 provided that any relevant conditions set out in that Notice are complied with.

2.1.2 In spite of subclause 2.1.1, a vehicle or combination must not travel on a road, bridge or structure where any posted mass or dimension limit would be exceeded.

PART 3 - VEHICLE MASS AND DIMENSION LIMITS

3.1 Length

3.1.1 The prime mover and semi-trailer portion of the vehicle combination must not be more than 19 metres long.

3.1.2 The prime mover, semi-trailer and converter dolly combination must not be more than 26.0 metres long.

3.2 Mass

3.2.1 The gross mass of the converter dolly must not be more than 3 tonnes.

3.2.2 The total mass of the prime mover, semi-trailer and converter dolly combination, including any load carried on the semi-trailer, must not be more than 45.5 tonnes.

3.2.3 The manufacturer's gross combination mass ratings for the prime mover must be at least 45.5 tonnes.

3.2.4 The vehicle's manufacturer's ratings for any component vehicle of the combination must not be exceeded.

PART 4 - OPERATING REQUIREMENTS

4.1 Pitch Stability

Tandem axle dollies may have hinged or rigid drawbars.

Single axle dollies with hinged drawbars must have a substantial and secure lock on the drawbar.

4.2 Braking

4.2.1 Whenever an unladen converter dolly is towed by a prime mover/semi-trailer combination, the converter dolly service brake control lines should be disconnected, unless some means of preventing wheel lock-up is fitted to the vehicle.

4.2.2 The air supply of the converter dolly braking system must be maintained to ensure that, in the event of disconnection from the semi-trailer, the emergency brakes of the converter dolly will apply and remain applied for a period of not less than fifteen minutes.

4.2.3 The converter dolly must have lights and reflectors as specified in the Motor Traffic Regulations 1935.

4.2.4 The converter dolly must have mudguards as specified in the Motor Traffic Regulations 1935

4.3 Warning signs

4.3.1 Where the vehicle combination is more than 22 metres long, the converter dolly must have a warning sign fitted horizontally to the rearmost part of it. The warning sign must:

- show the words "LONG VEHICLE" in black, upper case letters at least 180 millimetres high in typeface Series B (N), complying with Australian Standard AS 1744 "Forms of Letters and Numerals for Road Signs";
- be durable and manufactured in one or two pieces from sheet steel 0.8 millimetres thick or an alternative material of at least equivalent stiffness;
- be at least 1.02 metres long by 250 millimetres high;
- be coated with yellow retro-reflective material (Class 1 or Class 2) which meets Australian Standard AS 1906 "Retro-reflective Materials and Devices for Road Traffic Control Purposes";
- have a black border;
- show the sign manufacturer's name or logo, and the brand and class of retro-reflective material used in block letters not more than 10 millimetres high;
- be mounted so that no part of it is:
 - (i) more than 1.8 metres above the ground; or
 - (ii) less than 500 millimetres above the ground.

4.3.2 If the warning sign described in 4.3.1 is in two pieces, the word "LONG" must appear on one piece and the word "VEHICLE" on the other.

PART 5 - MISCELLANEOUS

5.1 Operating requirements

No person shall stand or drive on roads and road related areas, a combination to which this Notice applies, unless a copy of this Notice, or an information sheet issued by the Roads and Traffic Authority setting out the obligations imposed under this Notice, together with a copy of the General B-Double Notice 1996, or an information sheet

issued by the Roads and Traffic Authority setting out the obligations imposed under that Notice, are carried in the driving compartment and produced to a member of the Police force or an authorised officer if requested to do so.

PART 6 - GLOSSARY OF TERMS

In this notice:

“axle group” means a single axle group, tandem axle group, twinsteer axle group, tri-axle group or quad axle group.

“converter dolly” means a trailer with one axle group or single axle and a fifth wheel coupling designed to convert a semi-trailer into a dog trailer.

“dog trailer” means a trailer (including a trailer consisting of a semi-trailer and converter dolly) with:

- (a) one axle group or single axle at the front that is steered by connection to the towing vehicle by a drawbar, and
- (b) one axle group or single axle at the rear.

“drawbar” means a part of a trailer (other than a semi-trailer) that connects the trailer body to the coupling for towing purposes.

“fifth wheel coupling” means a device, other than the upper rotating element and the kingpin (which are parts of a semi-trailer), used with the prime mover, semi-trailer or a converter dolly to permit quick coupling and uncoupling and to provide for articulation.

“load” in relation to a vehicle or combination, includes anything that is normally removed from the vehicle or combination when not in use, but, if the vehicle or combination is not constructed to carry anything that is not normally removed from that vehicle or combination when not in use, does not include:

- (a) tools, equipment or substances necessary for the vehicle or combination to function, or for any load to be restrained, or
- (b) any personal items used by the driver.

“prime mover” means a motor vehicle built to tow a semi-trailer.

“road” means an area that is open to and used by the public and is developed for, or has one of its main uses, the riding or driving of motor vehicles.

“road related area” means:

- (a) an area that divides a road,
- (b) a footpath or nature strip adjacent to a road,
- (c) an area that is open to the public and is designated for use by cyclists or animals,

- (d) an area that is not a road and that is open to or used by the public for driving, riding or parking motor vehicles, or
- (e) any other area that is open to and used by the public and that has been declared, in accordance with subsection 6 of section 264A of the Roads Act, to be an area to which specified regulations apply.

“semi-trailer” means a trailer that has:

- (a) one axle group or single axle towards the rear, and
- (b) a means of attachment to the prime mover that would result in some of the load being imposed on the prime mover.

“single axle” means an axle not forming part of an axle group.

“single axle group” means a group of two or more axles, in which the horizontal distance between the centre lines of the outermost axles is less than 1 m.

“trailer” means a vehicle that is built to be towed, or is towed, by a motor vehicle, but does not include a motor vehicle that is being towed.

“vehicle” means any description of vehicle on wheels and includes the vehicle’s equipment and any substances that the vehicle is carrying that are essential for its operation.

Roads Act 1993

Notice under Part 3 of the Road Transport (Mass, Loading and Access) Regulation 1996

I Ronald David Christie, Chief Executive of the Roads and Traffic Authority, in pursuance of Clause 14 of Schedule 4 to the *Road Transport (Vehicle Registration) Regulation 1998*, and Divisions 1, 2, and 3 of Part 3 of the *Road Transport (Mass, Loading and Access) Regulation 1996*, make the Notice set forth hereunder so as to:

- exempt those vehicles described in clauses 2.1 and 2.3 of the Schedule to this Notice from the provisions of Clause 4.10(1) of the Appendix to Part 6 of Schedule 4 to the Road Transport (Vehicle Registration) Regulation 1998 relating to height, while on the areas or routes specified in Part 3 of the Schedule to this Notice; and
- specify the areas and routes on which those vehicles described in clause 2.2 of the Schedule to this Notice may be used,

subject to any conditions set out in the Schedule to this Notice and any general or specific requirements set out in Parts 3 and 4 of such Schedule.

R D Christie
Chief Executive
Roads and Traffic Authority

SCHEDULE

Part 1 — Preliminary

1.1 Citation

This Notice may be cited as the *4.6 Metre High Vehicle Route Notice 1999*.

1.2 Commencement

This Notice takes effect on 26 February 1999.

1.3 Effect

This Notice remains in force until 31 December 2003.

1.4 Interpretation

Unless stated otherwise, words and expressions used in this Notice have the same meaning as those defined in Appendix 1. A diagram appearing in this Notice is illustrative only.

1.5 Application

- a) This Notice applies to any of the vehicles or combinations specified in Part 2 that are constructed or loaded to a height that exceeds 4.3 metres but do

not exceed 4.6 metres in height, while such vehicles are travelling in the area or on the routes specified in Part 3.

- b) Unless stated otherwise, vehicles and combinations operating under this Notice must comply with the dimension limits prescribed in the Road Transport (Mass, Loading and Access) Regulation 1996 and the Road Transport (Vehicle Registration) Regulation 1998.

1.6 Repeal

This Notice repeals the *4.6 Metre High Vehicle Route Notice 1996*.

Part 2 — Vehicle Classes

For the purposes of this Notice the following classes of vehicles are specified.

2.1 Class 1 vehicles

- a) a special purpose vehicle that exceeds 4.3 metres, but does not exceed 4.6 metres, in height;
- b) a vehicle or combination (including a low loader or load platform combination) that is specially designed for the carriage of a large indivisible item, or is carrying a large indivisible item, that together with any load, exceeds 4.3 metres but does not exceed 4.6 metres in height;

2.2 Class 2 vehicles

- a) a combination carrying vehicles on more than one deck that together with any load, exceeds 4.3 metres but does not exceed 4.6 metres in height;
- b) a single motor vehicle, or a combination, that exceeds 4.3 metres but does not exceed 4.6 metres in height and is built to carry cattle, sheep, pigs or horses.

2.3 Class 3 vehicles

- a) a single motor vehicle, or a combination, that, together with its load exceeds 4.3 metres but does not exceed 4.6 metres in height and is carrying wool, hay bales or other primary produce;
- b) a single motor vehicle carrying vehicles on more than one deck that, together with its load exceeds 4.3 metres but does not exceed 4.6 metres in height.
- c) a single motor vehicle, or a combination, that is constructed to exceed 4.3 metres in height, but does not exceed 4.6 metres in height and is carrying freight, other than motor vehicles, trailers, caravans, cattle, sheep, pigs, horses, wool, hay bales, or other primary produce.
- d) a single motor vehicle, or a combination, that together with any load exceeds 4.3 metres in height, but does not exceed 4.6 metres in height.

Part 3 — Vehicle Access

3.1 On and west of the Newell Highway

The vehicles described in Part 2 of this Notice may be stood or driven on the Newell Highway and any road west of the Newell Highway if they comply with Part 4 and the relevant sections of Part 5 of this Notice.

3.2 Approved 4.6m high routes east of the Newell Highway

The vehicles described in Part 2 of this Notice (except vehicles described by Clause 2.3 (d)) may be stood or driven on the roads specified in Appendix 2 if they comply with Part 4 and the relevant sections of Part 5 of this Notice.

Note:

For the 'Special Requirements' relating to construction, loading and equipment, refer to Clause 5.1 (general freight); 5.2 (stock crates); Clause 5.3 (car carriers); 5.4 (hay bales); 5.5 (wool bales); 5.6 (freight containers).

3.3 B-doubles travelling on 4.6m high routes

A B-double that exceeds 4.3 metres but does not exceed 4.6 metres in height may be stood or driven in those areas and on roads permitted in this Notice if:

- a) it is also permitted to do so by the *General B-Double Notice 1996*; and
- b) any relevant conditions set out in the *General B-Double Notice 1996*, are complied with.

Note:

This means the road must be approved for both 4.6m high and B-Double travel.

3.4 Road Trains travelling on 4.6m high routes

A Road Train that exceeds 4.3 metres but does not exceed 4.6 metres in height may be stood or driven in those areas and on roads permitted in this Notice if:

- a) it is also permitted to do so by the *General Road Train Notice 1996*; and
- b) any relevant conditions set out in the *General Road Train Notice 1996*, are complied with.

Note:

This means the road must be approved for both 4.6m high and Road Train travel.

Part 4 — General Requirements

4.1 Direction of travel

Travel is permitted in both directions on all roads approved for travel under this Notice except where stated in Appendix 2, or where one way traffic only is permitted.

4.2 Copy of Notice or information sheet must be carried

No person shall stand or drive on roads and road related areas, a vehicle to which this Notice applies, unless a copy of this Notice, or an information sheet published by the Roads and Traffic Authority setting out the obligations of this notice, is carried in the driving compartment and produced to a police officer or an authorised officer if requested to do so.

4.3 Load security

The load must be secured in accordance with the requirements of the *Road Transport (Mass, Loading and Access) Regulation 1996*. Therefore a load restraint system must be used which is capable of withstanding the forces which result if the laden vehicle were subjected to each of the following separately:

- a) 0.8g deceleration in a forward direction;
- b) 0.5g deceleration in a rearward direction;
- c) 0.5g acceleration in either lateral direction; and
- d) 0.2g acceleration in either from the load in a vertical direction:

where "g" (the acceleration due to gravity) is equal 9.81 metres/second/second (Refer Diagram 4.1).

Diagram 4.1

Note:

For additional guidance on load restraint refer to the Federal Office of Road Safety's (FORS) / National Road Transport Commission (NRTC) *Load Restraint Guide*. Copies of the guide can be obtained from the Roads and Traffic Authority.

Part 5 — Special Requirements

5.1 Vehicles constructed to 4.6m carrying general freight (ie freight other than vehicles, livestock, or primary produce)

A vehicle, or vehicle combination, that is constructed to exceed 4.3 metres in height, but does not exceed 4.6 metres in height and is carrying freight, other than motor vehicles, trailers, caravans, cattle, sheep, pigs, wool, hay bales, or other primary produce, must:

- a) have —

- (i) a maximum deck height of 1.2 metres over at least 50% of its deck length;
- (ii) air suspension on trailers; and
- and
- b) be operated at 10% less than the gross mass limit applicable to the vehicle or combination.

5.2 Multi-deck stock crates

Livestock must not be carried in an upper deck of a multi-deck stock crate unless any lower deck of the stock crate is fully laden.

5.3 Car carriers

Car-carriers operating under this Notice must comply with the following requirements.

- a) Car-carriers must not carry a load other than motor vehicles, trailers, and caravans.
- b) The overall height limits of vehicles are:
 - (i) laden height of 4.6 metres maximum;
 - (ii) unladen height of 4.3 metres maximum.
- c) With the exception of cab/chassis, all vehicles carried as loading must be carried directly on decking fixed to the base vehicle structure and not carried on other vehicles being carried as loading by the base vehicle.
- d) No vehicle can be carried on an upper deck unless all decks below it, except the well deck, are fully occupied, except under the following circumstances:
 - (i) where the rear of the upper deck of the car carrier can be lowered, vehicles that cannot fit in the lower deck may be transported on the lowered section of the upper deck if the rest of the lower deck of the car carrier is full (refer Figure 5.1);

Figure 5.1

- (ii) a vehicle may be carried on the upper deck forward of the lowered upper deck if there is a vehicle in the space under it, or the vehicle is above the cabin of the car carrier (refer Figure 5.2). If the vehicle can fit into the lower deck, it must be carried on the lower deck.

Figure 5.2

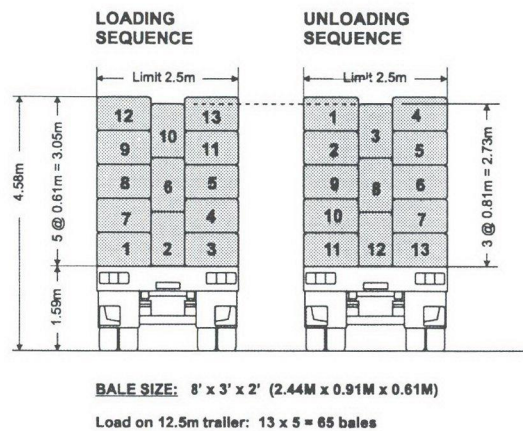

- e) Where a mix of vehicles is carried and there is a difference in the individual mass of each vehicle of more than 500 kg, the heavier vehicles must be carried on the lower deck.
- f) For all vehicles, except cab/chassis:
 - (i) a secure and substantial part of the structure of each end of each vehicle carried must be lashed to the structure of the car carrier;
 - (ii) where wheel lashings are relied upon to meet this requirement at least one wheel on each side of each vehicle, must be secured to the car carrier.
- g) For cab/chassis:
 - (i) at least one end of each vehicle's chassis frame must be lashed to the structure of the car carrier;
 - (ii) the other end may be secured to the chassis frame of another cab/chassis if both ends of the lower cab/chassis are lashed to the structure of the car carrier.
- h) Except for cab/chassis as above, the securing of one vehicle to another vehicle being carried on the same carrier, is not permitted.

5.4 Hay bales

- a) For hay bales 1.5 metres (or more) long, each group of bales laid transversely must be secured to the vehicle structure by webbing and webbing winches;
- b) For hay bales less than 1.5 metres long laid transversely, at least every second group of bales and both end bale groups must be secured by webbing and webbing winches, and a cap tarpaulin must cover and secure the top of the entire load;
- c) Gates must be provided at each end of the load and held upright by diagonal chains, or equivalent means, attached to the tie rails. (Ropes will not provide sufficient restraint for this purpose)
- d) Angle or edge protectors must be placed between the webbing straps and the bales.

Note:

For hay bales 1.5 metres (or more) long, the following loading and unloading pattern and sequence should be followed to prevent accidents when loading and unloading the vehicle.

**Figure 5.3****5.5 Wool bales**

Wool bales carried under this Notice must comply with the following loading pattern.

(a) Loading Pattern

- (i) The first tier comprises two rows of bales placed on their flat with heads together and butts facing outwards. Bales shall be loaded so that no seam of any bale projects beyond the outermost limit of the tray of the vehicle (See Fig 5.4 Loading Pattern)
- (ii) The second tier is placed on top of the first tier in the same pattern.
- (iii) The third tier comprises three rows of bales placed on their flat with their ends facing to the front and back of the vehicle.
- (iv) The fourth tier comprises no more than two rows of binding bales placed on their flat, with at least one row facing to the front and back of the vehicle.
- (v) If the fourth tier comprises only one row of bales, it should be placed along the centre of the vehicle, with the ends of all bales facing the same direction, either outwards or to the front and back of the vehicle.

Fig 5.4**(b) Restraining the load laterally**

- (i) The outward spread of the lower bales along the sides of the vehicle must be minimised by using separate lashings to restrain the centre of the lower two rows of bales (See Fig 5.5).

**Fig 5.5**

- (ii) lashings (minimum standard 12 mm synthetic ropes) must be tied over the five centre bales.
- (iii) After the third row of bales is added, webbing lashings each of a minimum rated capacity of 2 tonnes must be applied at each bale along the length of the vehicle (See Fig 5.6). Ropes alone are not strong enough for this application. Two webbing lashings must be replaced by rope where there are no suitable winch positions, except for the end two lashings, provided that the two lashings are not side by side.

**Fig 5.6**

- (iv) Where a fourth row of two bales is added to the already restrained bottom three rows, it must be restrained by a suitable cap tarpaulin but still having ropes on the front and rear end bales (See Fig 5.7). If a cap tarpaulin is not utilised, ropes or webbing lashings should be applied at each bale along the length of the load.

**Fig 5.7****(c) Restraining the load forwards and rearwards**

- (i) Forward and rearward movement of the load must be restrained by tie-down lashings, with additional restraint from strong head and tail gates.

- (ii) Diagonal chains of 2 tonnes minimum rated capacity must be attached to the top of these gates and onto the vehicle tie rail supports to provide additional restraint (See Fig 5.7).

5.6 Freight containers

- (a) Freight containers must not be carried under this Notice unless securely fastened to the carrying vehicle by twist locks.
- (b) Clause 5.6(a) applies whether a container is laden or unladen, and whether certified for marine use or not.

Appendix 1 – Definitions

‘authorised officer’ means a person employed by the RTA as an enforcement officer;

‘B-double’ means a motor vehicle combination consisting of a prime mover towing two semi-trailers;

Typical B-double

‘cab/chassis’ means an incomplete motor lorry without a body or turntable;

‘combination’ means a motor vehicle connected to one or more trailers;

‘converter dolly’ means a trailer with one axle group or single axle and a fifth wheel coupling designed to convert a semi-trailer into a dog trailer;

Typical converter dolly

‘fifth wheel coupling’ means a device, other than the upper rotating element and the kingpin (which are parts of a semi-trailer), used with a prime mover, semi-trailer or a converter dolly to permit quick coupling and uncoupling and to provide for articulation;

‘freight container’ means a box-like goods receptacle provided with corner fittings of, or similar to, the types specified respectively in Australian/New Zealand Standard AS/NZS 3711.1–1993, Freight Containers – Classification, Dimensions and Ratings;

‘GCM’ (gross combination mass), in relation to a motor vehicle, means the greatest possible sum of the maximum loaded mass of the motor vehicle and of any vehicles that may lawfully be towed by it at one time:

- a) as specified by the motor vehicle’s manufacturer:
 - i) on a plate fixed to the vehicle by the manufacturer, or
 - ii) if the manufacturer has not specified the sum of the maximum loaded mass on a plate fixed to the vehicle in another place, or
- (a) as specified by the vehicle registration authority if:
 - i) the manufacturer has not specified the sum of the maximum loaded mass,
 - ii) the manufacturer cannot be identified, or
 - iii) the vehicle has been modified to the extent that the manufacturer’s specification is no longer appropriate;

‘GVM’ (gross vehicle mass) means the maximum loaded mass of a vehicle:

- a) as specified by the manufacturer,
- b) as specified by the vehicle registration authority if:
 - (i) the manufacturer has not specified a maximum loaded mass,
 - (ii) the manufacturer cannot be identified, or
 - (iii) the vehicle has been modified to the extent that the manufacturer's specification is no longer appropriate;

'large indivisible item' means an item that:

- a) cannot be divided without extreme effort, expense or risk of damage to it, and
- b) cannot be carried on any vehicle or combination without exceeding a mass or dimension limit in Schedule 1;

'lashing'

means a device such as chain, cable or webbing together with suitable fittings which is used to restrain a load;

'load'

in relation to a vehicle or combination, includes anything that is normally removed from the vehicle or combination when not in use, but, if the vehicle or combination is not constructed to carry anything that is not normally removed from that vehicle or combination when not in use, does not include:

- a) tools, equipment or substances necessary for the vehicle or combination to function, or for any load to be restrained, or
- b) personal items used by the driver;

'primary produce'

means:

- a) fruit, grain, flowers, vegetables, tobacco, or farm or agricultural produce;
- b) dairy, poultry, other bird farming, pig farming, bee keeping, oyster or fish culture produce;
- c) nursery produce;
- d) sheep, cattle or horses;
- e) eucalyptus or other oil produce from leaves for distillation.

'prime mover'

means a motor vehicle built to tow a semi-trailer;

'restricted access vehicle' means a single motor vehicle or a combination which alone, or together with any load, exceeds one or more of the following limits:

- a) a mass limit prescribed in the *Road Transport (Mass, Loading and Access) Regulation 1996*, or
- b) one or more of the following dimension limits:
 - i) a width of 2.5 metres,
 - ii) a height of 4.3 metres,
 - iii) a length of 12.5 metres in the case of a single motor vehicle or 19 metres in the case of a combination,

- iv) any other dimension limit prescribed in the *Road Transport (Mass, Loading and Access) Regulation 1996*, or the *Motor Traffic Regulations 1935*;

‘road train’

means a combination, other than a B-double, consisting of a motor vehicle towing at least two trailers (counting as one trailer a converter dolly supporting a semi-trailer);

Typical road trains

‘semi-trailer’

means a trailer that has:

- one axle group or single axle towards the rear, and
- a means of attachment to a prime mover that would result in some of the load being imposed on the prime mover;

‘special purposes vehicle’ means a motor vehicle, other than a tow truck or an agricultural vehicle, built for a purpose other than carrying a load, except for water in the case of concrete pumps and fire trucks.

‘trailer’

means a vehicle that is meant to be towed, or is towed, by a motor vehicle, but does not include a motor vehicle that is being towed;

‘vehicle’

means any description of vehicle on wheels and includes the vehicle’s equipment and any substances that the vehicle is carrying that are essential for its operation;

‘well deck’

means a deck area which is below the level of the top of the road wheels of the carrying vehicle.

Typical well-deck car carrier

Appendix 2 – 4.6 Metre High Vehicle Routes in NSW

Those parts of New South Wales that are on the routes or in or between the boundaries listed below:

Part 1 – 4.6 metre high vehicle routes within the Sydney Region

State Routes	Starting point	Finishing point
Victoria Rd – Bank St – Jones St – Western Distributor – Bradfield Hwy – Warringah Fwy – Gore Hill Fwy	Darling St, Rozelle	Pacific Hwy, Artarmon
M2 Motorway – Abbott Rd	Epping Rd, North Ryde	Seven Hills Rd, Seven Hills
High St – Pacific Hwy, (including Arthur St – Berry St southbound)	Warringah Fwy, North Sydney	Syd-Newcastle Fwy, Wahroonga
Botany Rd – Regent St	Bunnerong Rd, Matraville	Cleveland St, Chippendale
Gardeners Rd – Kent Rd – Ricketty St – Canal Rd	Bunnerong Rd, Kingsford	Princes Hwy, Sydenham
Bunnerong Rd – Anzac Pde – Cleveland St – City Rd – Parramatta Rd	Botany Rd, Matraville	Old Canterbury Rd, Lewisham
McEvoy St – Euston Rd – Sydney Park Rd – Mitchell Rd – Princes Hwy (southbound only between King Georges Rd and Port Hacking Rd)	Botany Rd, Alexandria	Southern Fwy, Waterfall
Alison Rd	Anzac Pde, Randwick	Avoca St, Randwick
Foreshore Rd	Botany Rd, Banksmeadow	Gen. Holmes Dr, Mascot
Gen. Holmes Dr	Foreshore Rd, Mascot	Botany Rd, Mascot
Mill Pond Rd	Gen. Holmes Dr, Mascot	Botany Rd, Mascot
Wentworth Ave	Botany Rd, Mascot	Bunnerong Rd, Maroubra
Denison St – Beauchamp Rd	Wentworth Ave, Hillsdale	Botany Rd, Banksmeadow
Joyce Dr	Gen. Holmes Dr, Mascot	O'Riordan St, Botany
Marsh St – West Botany St – Wickham St – Forest Rd – Croydon Rd – Queen St – Forest Rd – Henry Lawson Dr – Woodville Rd	Cooks River (Qantas Dr)	River Ave, Villawood
Stoney Creek Rd	Forest Rd, Bexley	Forest Rd, Peakhurst
Bay St	The Grand Pde, Brighton-Le-Sands	Princes Hwy, Rockdale
President Ave	The Grand Pde, Brighton-Le-Sands	Princes Hwy, Kogarah
Sandringham St – The Grand Pde	Rocky Point Rd, Sans Souci	Bay St, Brighton-Le-Sands
King Georges Rd – Wiley Ave – Roberts Rd – Centenary Dr – Homebush Bay Dr – Concord Rd – Church St – Devlin St – Lane Cove Rd – Ryde Rd – Mona Vale Rd	Princes Hwy, Blakehurst	Pittwater Rd, Mona Vale
Kingsway – Taren Point Rd – Rocky Point Rd	Princes Hwy, Kirrawee	Princes Hwy, Kogarah
Port Hacking Rd Nth	Kingsway, Caringbah	Princes Hwy, Sylvania
Liverpool Rd – Hume Hwy	Parramatta Rd, Ashfield	Nepean River, Menangle
Stanmore Rd – New Canterbury Rd – Canterbury Rd – Milperra Rd – Newbridge Rd – Terminus St	Edgeware Rd, Enmore	Hume Hwy
Milton St – Georges River Rd – Punchbowl Rd	Liverpool Rd, Ashfield	Canterbury Rd, Punchbowl
Gordon St – Railway Tce	New Canterbury Rd, Petersham	Old Canterbury Rd, Lewisham
South Western Fwy	King Georges Rd, Beverly Hills	Hume Hwy, Prestons
Fairford Rd – Stacey St	M5 Motorway, Padstow	Hume Hwy, Bankstown
Rookwood Rd – Joseph St	Hume Hwy, Bankstown	Weeroona Rd, Lidcombe
Appin Rd – Moore-Oxley Bypass – Campbelltown Rd	Wollondilly boundary, near Appin	Hume Hwy, Crossroads
Narellan Rd – Camden Valley Way – The Northern Rd – Parker St – The Northern Rd	Appin Rd, Campbelltown	Richmond-Blacktown Rd, South Windsor
Cabramatta Rd	Hume Hwy, Cabramatta	Elizabeth Dr, Bonnyrigg

The Horsley Dr Hassall St – Gipps Rd – Greystanes Rd	Hume Hwy, Carramar The Horsley Dr, Smithfield	Wallgrove Rd, Horsley Park Great Western Hwy, Girraween
Elizabeth Dr Victoria Rd – Church St – Windsor Rd – Bridge St – Macquarie St – Richmond-Windsor Rd – Eastmarket St – March St – Kurrajong Rd – Bell's Line of Rd	Hume Hwy, Liverpool Marsden Rd, Ermington	The Northern Rd, Luddenham Darling Causeway, Bell
Great North Rd – Lyons Rd – Victoria Rd Burns Bay Rd – Centennial Ave Blaxland Rd Beecroft Rd	Parramatta Rd, Croydon Victoria Rd, Huntleys Point Victoria Rd, Ryde Carlingford Rd, Epping	Devlin St, Ryde Epping Rd, Lane Cove Epping Rd, Epping Pennant Hills Rd, Pennant Hills
Marsden Rd Silverwater Rd – Stewart St James Ruse Dr	Victoria Rd, Ermington Parramatta Rd, Auburn Parramatta Rd, Granville	Pennant Hills Rd, Carlingford Marsden Rd, Ermington Cumberland Hwy, North Parramatta
Cumberland Hwy – Pennant Hills Rd Castle Hill Rd	Hume Hwy, Liverpool Pennant Hills Rd, West Pennant Hills	Pacific Hwy, Wahroonga Old Northern Rd, Castle Hill
Showground Rd Wallgrove Rd – Rooty Hill Rd Sth Phillip Pkwy Rooty Hill Rd Nth Richmond Rd- Blacktown Rd Pitt Town Rd – Bathurst St – Chatham St – Eldon St – Cattai Rd – Wismans Ferry Rd – Bay Rd – Old Northern Rd Bridge St – Wilberforce Rd Prospect Hwy – Blacktown Rd – Main St – Sunnyholt Rd – Burns Rd – Memorial Ave Wall Park Ave – Seven Hills Rd – Old Northern Rd Mamre Rd Park Rd – Mulgoa Rd Castlereagh Rd – Bosworth St Wattle St – Dobroyd Pde – Lilyfield Rd – Balmain Rd – Brennan St – Railway Pde – The Crescent Parramatta Rd – Concord Rd Parramatta Rd	Old Northern Rd, Castle Hill Elizabeth Dr, Horsley Park Eastern Rd, Rooty Hill Woodstock Ave, Rooty Hill Knox Rd, Doonside Windsor Rd, McGraths Hill Macquarie St, Windsor Western Fwy, Prospect Blacktown Rd, Blacktown Elizabeth Dr, Kemps Creek The Northern Rd, Luddenham Andrews Rd, Cranebrook Parramatta Rd, Ashfield Liverpool Rd, Ashfield Homebush Bay Dr, Flemington	Windsor Rd, Kellyville Eastern Rd, Rooty Hill Woodstock Ave, Rooty Hill Richmond Rd, Plumpton Bourke St, Richmond Wisemans Ferry Access King Rd, Wilberforce Windsor Rd, Kellyville Bay Rd, Maroota Gt Western Hwy, St Marys Gt Western Hwy, Penrith Kurrajong Rd, Richmond Victoria Rd, Rozelle Homebush Bay Dr, Rhodes James Ruse Dr, Granville

Sydney Ports Authority Bumbarah Point Rd – Friendship Rd and other access roads within Port Botany	Botany Rd	
Auburn Council Silverwater and Homebush Bay areas	Area bound by Parramatta Rd, Duck River, Parramatta River, Powells Creek and Homebush Bay Dr	

John St	Parramatta Rd, Lidcombe	Fury Ford Holding Yard
Auburn / Strathfield Councils		
Weeroona Rd – East St – Railway St – Arthur St	Joseph St, Lidcombe	Centenary Dr, Flemington
Bankstown Council		
Villawood industrial area	Area bound by Woodville Rd, Christina Rd, Miller Rd, Biloela St, Marple Ave and Llewellyn Ave	
Revesby industrial area	Area bound by Milperra Rd, Ashford Ave, Bullecourt Ave, Horsley Rd, South Western Mwy and Queen St	
Woorang Rd, Milperra	Milperra Rd	—
Baulkham Hills / Hawkesbury Councils		
Sackville Rd – King Rd	Wisemans Ferry Rd, Sackville	Wilberforce Rd, Wilberforce
Blacktown Council		
Arndell Park and Huntingwood industrial areas	Area bound by Doonside Rd, Bungarribee Creek, Holbeche Rd, Reservoir Rd, Western Motorway and Horsley Rd	
North Blacktown, Kings Park industrial areas	Roads within the area bound by Sunnyholt Rd, Bessemer St, Chicago Ave, Richmond railway, Cobham St, Faulkland Crescent Reserve, Camorta Close and Madagascar Dr, but excluding Cobham St, Camorta Close and Madagascar Dr	
Rooty Hill industrial area	Area bound by Phillip Pkwy and its proposed extension northwards, Lamb St, Eastern Creek and Western Railway	
Brabham Dr – Ferrers Rd	Great Western Hwy, Eastern Creek	Eastern Creek Raceway south gate
Eastern Rd – Knox Rd	Rooty Hill Rd Sth, Rooty Hill	Richmond Rd, Doonside
Woodstock Ave, Rooty Hill	Rooty Hill Rd Nth	Phillip Pkwy
Power St	Knox Rd, Doonside	Rooty Hill Rd Nth, Glendenning
Botany Bay Council		
Exell St, Banksmeadow	Botany Rd	—
Greenfield St, Banksmeadow	Hill St	Exell St
Hale St, Botany	Botany Rd	Commonwealth Wool Stores
Hill St – McPherson St	Botany Rd, Banksmeadow	—
Stephen Rd – Swinbourne St	Botany Rd, Botany	—
Camden Council		
Camden Valley Way – Argyle St	The Northern Rd, Narellan	Commens Depot, Camden
Edward St, Camden	Argyle St	Camden Saleyards
Campbelltown Council		
Queen St, Campbelltown	Campbelltown Rd	Chamberlain St
Blaxland Rd	Narellan Rd, Campbelltown	Campbelltown Rd, Leumeah
Mill Rd, Campbelltown	Blaxland Rd	Paul Wakeling Ford
Brooks Rd, Ingleburn	Hume Hwy	Williamson Rd
Williamson Rd, Ingleburn	Campbelltown Rd	Stennet Rd
Ingleburn industrial area	Area bound by Williamson Rd, Henderson Rd, Lancaster St and Stennet Rd	
Minto industrial area	Area bound by Campbelltown Rd, Leumeah Rd, Airds Rd, Roase Payten Dr, Pembroke Rd, Ben Lomond Rd, Southern railway, Bow Bowing Creek and its tributary to Campbelltown Rd at St Andrews Park	
Canterbury / Ashfield Councils		
Jeffrey St – King St – Milton St	Canterbury Rd, Canterbury	Georges River Rd, Ashfield
Fairfield Council		
Victoria St, Smithfield	Cumberland Hwy	Hassall St
Wetherill Park industrial area	Area bound by The Horsley Dr, Cowpasture Rd and a line continued north to Prospect Reservoir, Fairfield City Council boundary, Gipps Rd, Hassall St, Victoria St and Elizabeth St	
Fairfield / Bankstown Councils		
River Ave – Christina Rd	The Horsley Dr, Villawood	Miller St, Leightonfield

Hawkesbury Council		
Groves Ave – Railway Rd North – Park Rd	Windsor Rd, Mulgrave	saleyards
Bourke St – March St, Richmond	Lennox St	East Market St
Holroyd Council		
Woodpark industrial area	Woodpark Rd, Percival St, Jumal Pl, Tait St, Britton St, Cooper St, Dupas St, Hume Rd, Tarlington Pl, Cullen Pl, Long St, Sammut St	
Sturt St – McCredie Rd – Fairfield Rd – Dennistoun Ave	Cumberland Hwy, Guildford	Sydney Wool Centre
McCredie Rd, Smithfield	Sturt St	westward
Pavesi St, Smithfield	Sturt St	Iris St
Kogarah Council		
Park Rd – Ramsgate Rd	Princes Hwy, Kogarah Bay	Rocky Point Rd, Ramsgate
Terry St, Blakehurst	Princes Hwy	King Georges Rd
Leichhardt Council		
Robert St, Rozelle	Victoria Rd	White Bay Container Terminal
Liverpool Council		
Governor Macquarie Dr – Munday St – Manning St	Hume Hwy, Warwick Farm	—
Moorebank Ave – Church Rd, Moorebank	South-western Fwy	Heathcote Rd
Helles Ave, Moorebank	Moorebank Ave	—
Hoxton Park Rd	Hume Hwy, Liverpool	Cowpasture Rd, Hoxton Park
Nuwarra Rd, Moorebank	Newbridge Rd	Heathcote Rd
Marrickville Council		
May St – Bedwin Rd – Edgeware Rd	Princes Hwy, St Peters	Stanmore Rd, Enmore
Edinburgh Rd, Marrickville	Bedwin Rd	Victoria Rd
Parramatta Council		
Grand Ave – Durham St – Thackery St	James Ruse Dr, Camellia	Shell depot, Jack Seatons depot
Colquhoun St – Devon St, Camellia	Grand Ave	Durham St
Rydalmere industrial area	Area bound by Victoria Rd, Park Rd, Parramatta River and Subiaco Creek	
Brodie St, excluding Victoria Rd underpass	Victoria Rd, Rydalmere	
Parramatta / Ryde Councils		
Wharf Rd – Hope St – Boronia St – Spurway St	Victoria Rd, Ermington	Prixcar Services, Ermington
Penrith Council		
Andrews Rd, Cranebrook	The Northern Rd	Castlereagh Rd
Glossop St – Forrester Rd	Great Western Hwy, St Marys	Dunheved Circuit, Dunheved
Dunheved industrial area:	Christie St, Wordoo St, Power St, Lee Holm Rd, Maxim Place, Warrior Place, Anne St, Bent St, Tresco St, Production Ave, Dunheved Circuit, Links Rd, Severn St, Vallance St, Charles St, Appin Place, Triggs St, Kiewa Rd, Niemur Rd	
Rockdale Council		
West Botany St	Princes Hwy, Arncliffe	President Ave, Kogarah
South Sydney Council		
Link Rd – Epsom Rd, Zetland	South Dowling St	Botany Rd
Strathfield Council		
Cosgrove Rd, South Strathfield	Liverpool Rd	TNT Depot
Sutherland Shire		
Parraweena Rd – Atkinson Rd	Port Hacking Rd, Miranda	end Atkinson Rd, Taren Point
Sydney City Council		
Sussex St – Hickson Rd	Western Distributor	Darling Harbour ports
Willoughby Council		
Reserve Rd – Frederick St, Artarmon	Gore Hill Fwy	New Hunter Holden
Edinburgh Rd High St Mowbray Rd	Eastern Valley Way, Willoughby	Pacific Hwy, Chatswood
Herbert St – Clegg St	Pacific Hwy, St Leonards	Reserve Rd, Artarmon

Dickson Ave – Clarendon St – Hotham Pde – McLachlan Ave – Marden St	Reserve Rd, Artarmon

Part 2 – 4.6 metre high vehicle routes in New South Wales (excluding the Sydney Region) east of the Newell Highway

Route	Starting point	Finishing point
Newcastle and Hunter area		
Pacific Hwy	Sydney-Newcastle Freeway (F3), Kariong	New England Hwy, Hexham
Motorway Connection	Sydney-Newcastle Fwy north of Warnervale	Pacific Hwy, Doyalson
MR220	Sydney-Newcastle Fwy at Freemans Dr Interchange	Cessnock Rd, Cessnock.
MR220	Cessnock Rd, Cessnock	New England Hwy, Branxton.
MR218 (Cessnock Rd)	MR 220, Cessnock	New England Hwy, Maitland
Mitchell Ave, Victoria St, Kurri Kurri Rd	Northcott St, Kurri Kurri	Railway St, Stanford Merthyr
John Renshaw Dr	Railway St, Stanford Merthyr	George Booth Dr, Buchanan
John Renshaw Dr	George Booth Dr, Buchanan	New England Hwy, Beresfield
George Booth Dr	Sydney-Newcastle Fwy at Cardiff Interchange	Macquarie Rd, Cardiff
Myall Rd	Macquarie Rd, Cardiff	Charlestown Rd, Garden Suburbs
Charlestown Rd	Pacific Hwy, Charlestown	Cardiff Rd, New Lambton Heights
Lookout Rd	Charlestown Rd, New Lambton Heights	Croudace Rd at Russell Rd, New Lambton.
Croudace Rd	Russell Rd, New Lambton	Newcastle Rd, Lambton
Link Rd, Thomas St, Newcastle Rd, Griffiths Rd, Brisbane Rd, Donald St, Parry St	Sydney-Newcastle Fwy	Pacific Hwy at Stewart Ave, Newcastle West
Macquarie Rd, Munibung Rd, Mitchell Rd	Cardiff Rd	Car carrier depot in Mitchell Rd
Carnley Ave	Charlestown Rd, Kotara	Bridges Rd, New Lambton
Northcott Dr, Bridges Rd, Turton Rd	Pacific Hwy, Highfields	Griffiths Rd, Waratah
Park Ave, Kotara	Northcott Dr	Holding yards near Searle St
SH23	Newcastle Rd, Jesmond	Pacific Hwy (Maitland Rd), Sandgate
Industrial Dr, Hannell St, Hunter St	Pacific Hwy, Mayfield West	Pacific Hwy (Stewart Ave), Newcastle West
Lambton Rd, Belford St, Tudor St	Turton Rd, Broadmeadow	Parry St, Newcastle West
<i>To the Carrington port facilities:</i>		
Lee Wharf Rd	Hannell St	Lee Wharf, Wickham
Elizabeth St, Darling St, Robertson St, Bourke St, Cowper St, Denison St	Hannell St	Smart St, Carrington
Northern NSW		
Pacific Hwy	New England Hwy, Hexham	Condong
New England Hwy	Intersection of the New England Hwy and Bell St, Muswellbrook	Intersection of the New England Hwy and the Pacific Hwy, Hexham
New England Hwy	Muswellbrook, north of Market St	NSW/Qld border
Oxley Hwy	Tamworth	Coonabarabran
Oxley Hwy	Port Macquarie	New England Hwy, north of Bendemeer
Gwydir Hwy	Grafton	Moree
Bruxner Hwy	Ballina	Boggabilla
High St, Ken Tubman Dr, High St, Regent St, Maitland	Les Darcy Dr (New England Hwy)	New England Hwy at Johnson St roundabout
MR90 (Bucketts Way)	Taree	Pacific Hwy south of Karuah

MR192	Taree	Wingham
MR76	Pacific Hwy south of Raleigh	Armidale
MR135	MR74 south of Ebor	MR73 south of Gilgai
Summerland Way, including signposted internal bypass around obstruction in Prince St, Grafton on MR 83	Grafton	NSW/Qld border
MR74 (Grafton Rd)	Grafton	MR76 north of Ebor
MR124	Armidale	MR73, Yarrowyck
MR622	Woodenbong	Legume and Tenterfield
MR361 (Bonalbo Rd)	Tabulum	Woodenbong
High Vehicle detour through Muswellbrook:	Intersection of the New England Hwy and Market St, Muswellbrook	Intersection of the New England Hwy and Bell St, Muswellbrook
• Southbound—Market St, Victoria St, Bell St		
• Northbound—Bell St, Victoria St, Market St		
MR503	Singleton	Mount Thorley
MR128, MR 289 (Bingleburra Rd)	Singleton	Dungog, Stroud
MR213	MR 209 north of Denman	MR503, Mount Thorley
MR209	New England Hwy, Muswellbrook	MR62, Merriwa
MR62	Merriwa	MR77 Ease of Dunedoo (Craboon)
MR77	MR55 east of Dunedoo (Craboon)	Newell Hwy, Gilgandra
MR206	Dubbo	MR77, Dunedoo
MR618	MR 62 west of Cassilis	Coolah
MR233	Gulgong	Mitchell Hwy north of Wellington
MR105 to Barry	New England Hwy east of Tamworth	Barry
MR105 to Ellerston	New England Hwy, Scone	Ellerston
Local road	Ellerston	New England Hwy, Blandford
Walcha to Gloucester via Top Dale and Nowendoc	Walcha	Gloucester
Topdale to Nundle	Walcha—Gloucester Rd, Top Dale	MR105 west of Hanging Rock
Walcha to Dungowan via Niangala and Port Stephen's Cutting	Walcha	MR105, Dungowan
Local Rd 13 and 15	Top Dale—Nundle Rd	Nowendoc Junction
MR106	MR105 west of Nundle	New England Hwy north of Wallabadah
Shire Rd 6	MR105 west of Nundle	New England Hwy
MR187	Main Rd 63	Gwydir Hwy west of Inverell
MR73	Walcha	Gwydir Hwy east of Inverell
MR382	Gwydir Hwy, Glen Innes	MR136 north of Woodville
MR382	MR136 west of Emmaville	Bruxner Hwy
MR 136	MR382 west of Emmaville	MR382 north of Woodville
MR72	New England Hwy north of Willow Tree	Newell Hwy south of Narrabri
MR129 (Quirindi—Coonabarabran Rd)	MR72 west of Quirindi	Coonabarabran
MR205 (Mendooran—Coonamble Rd)	Mendooran	Newell Hwy
MR334	MR205 north of Mendooran	Newell Hwy
MR130	Quirindi	Oxley Hwy, West Tamworth
MR126	Wallabadah	Quirindi
MR579	Werris Creek	MR72 south of Breeza
MR63 (Yetman—Tamworth Rd)	Tamworth	Yetman
MR357	MR63, Manilla	MR72 north of Boggabri
MR132 (Bundarra—Barraba Rd)	Bundarra	Barraba
MR133 (Bingara—Narrabri Rd)	MR63, Bingara	Newell Hwy near Narrabri
MR360	MR63 north of Barraba	MR133, Cobbadah
MR134	MR63 north of Bingara	Ashford
MR137	Inverell	Bruxner Hwy east of Bonshaw
7705	MR63 north of Warialda	North Star and Bruxner Hwys
MR382	MR136 west of Emmaville	Bruxner Hwy

MR136	MR382 west of Emmaville	MR382 north of Woodville
Western NSW		
MR55 (Mullaley–Coolah–Gulgong–Ilford Rd)	Oxley Hwy, Mullaley	Ilford
MR56 (Lachlan Valley Way)	Forbes	Hume Hwy, Yass
MR390 (Blayney–Hobbys Yards Rd)	Blayney	Hobbys Yards
MR246 (Trunkey–Near Georges Plains)	Hobbys Yards	Trunkey
MR236 (Henry Lawson Way)	Newell Hwy, Forbes	Mid Western Hwy west of Grenfell
Mid Western Hwy	Bathurst	Marsden
Mitchell Hwy	Bathurst	Dubbo
MR61 (Orange–Bogan Gate Rd)	Mitchell Hwy north of Orange	Parkes
MR359 (Boree–Molong Rd)	Molong	MR61 west of Boreenore
MR377 (Boree–Condobolin Rd)	Forbes	MR61 west of Boreenore
MR310 (Cudal–Cowra Rd)	Cudal	Cowra
MR239 (Henry Lawson Way)	Grenfell	Young
MR54 (Goulburn–Crookwell–Bathurst Rd)	Trunkey	Goulburn
MR54 (Goulburn–Crookwell–Bathurst Rd)	Ilford	Great Western Hwy east of Bathurst.
Great Western Hwy	MR516, Bowenfels	Bathurst
Bells Line of Road	East Market St, Richmond	Bell
MR516 (The Chifley Rd)	Bell	Great Western Hwy, Bowenfels
Regional Road 7512/MR233	MR206 (Dubbo–Dunedoo Rd), Murrumbidgee, via Saxa Bridge, Gollan, Goolma, Two Mile Creek and Guntawang	Gulgong
South and South Western NSW (including Wollongong City)		
Princes Hwy, (including Bulli Pass, Bellambi Lane, Northern Distributor to/from North Wollongong, Flinders St, Keira St, Crown St, to West Wollongong). Excluding the bridge over Wagonga River at Narooma and the south-bound bridge over Shoalhaven River at Nowra	Bega	Port Hacking Rd, Sylvania
Southern Fwy	Princes Hwy, Waterfall	Princes Hwy, Bulli Pass
Southern Fwy	Princes Hwy, West Wollongong	Princes Hwy, Yallah
Five Islands Rd	Princes Hwy, Unanderra	King St, Warrawong
King St, Warrawong	Pt Kembla Steelworks, Five Islands Rd	Northcliffe Dr, Warrawong
Illawarra Hwy excluding the railway bridge at Moss Vale	Princes Hwy north of Albion Park Rail	Hume Hwy at Hoddles Cross Roads south of Moss Vale
Hume Hwy	NSW/Vic border	Cumberland Hwy (Orange Grove Rd), Liverpool
MR79 (Doughboy–Tarago–Goulburn Rd)	Auburn St, Goulburn	Kings Hwy
MR268 (Bungendore–Tarago Rd)	Tarago	Kings Hwy, Bungendore
MR51 (Kings Hwy)	Batemans Bay	NSW/ACT border
Uriarra Rd, Crawford St, Bungendore St, Queanbeyan	NSW/ACT border	Kings Hwy
Kendall Ave, Patterson Parade, Queanbeyan	Canberra Ave	
Federal Hwy	Hume Hwy	NSW/ACT border
MR248 (Boorowa–Crookwell–Tarlga Rd)	Boorowa	Main Rd 54 west of Crookwell
MR52 (Sutton Rd)	Crookwell	NSW/ACT border
Barton Hwy	NSW/ACT border	Hume Hwy
Monaro Hwy	NSW/ACT border	NSW/Vic border
Snowy Mountains Hwy	Princes Hwy north of Bega	Hume Hwy, Mount Adrah

Olympic Hwy. • Excluding— • Railway overbridge 1.2 kilometres north of Junee • Railway overbridge 3.1 kilometres south of Cootamundra,	Mid Western Hwy west of Cowra	Hume Hwy north of Albury
Travers St, Wagga Wagga	Moorong St (Olympic Hwy MR78)	Fitzmaurice St
MR93 (Bombala–Delegate Rd)	Monaro Hwy south of Bombala	NSW/Vic border
MR243 (Gundagai–Junee–Coolamon–Grong Grong Rd)	Gundagai	Newell Hwy
MR57 (Junee–Temora–Condobolin–Nyngan Rd)	Olympic Way, Old Junee	Newell Hwy east of Wyalong
MR241 (Gunning–Boorowa–Young–Temora Rd)	Young	Temora
MR84 (Bowning–Temora Rd)	Olympic Way, Wallendbeen	MR57, Temora
MR387 (Temora to Newell Hwy)	MR 57, Temora	Newell Hwy, Mirrool
MR211 (Holbrook–Wagga Wagga Rd)	Sturt Hwy, Wagga Wagga	Hume Hwy north of Holbrook
MR331 (Berrigan–Walbundrie–Holbrook Rd)	MR85 north of Jingellic	Berrigan
MR85 (Tumut–Jingellic Rd)	Snowy Mountains Hwy south of Gilmore	NSW/Vic border
MR628 (Tumbarumba–Murray River Rd)	NSW/Vic border	Tumbarumba
MR282 (Jingellic–Tumbarumba Rd)	Jingellic	Hume Hwy, Bowna
MR284 (Tumbarumba–Hume Hwy Rd)	MR85 west of Tumbarumba	Hume Hwy
MR384 (Tumbarumba–Wagga Wagga Rd)	MR284	Hume Hwy
MR384 (Tumbarumba–Wagga Wagga Rd)	Sturt Hwy, Forest Hill	Hume Hwy south of Kyeamba
MR370 (Howlong–Kywong Rd)	Sturt Hwy, Kywong	Riverina Hwy east of Howlong
MR131 (Riverina Hwy–Urana Rd)	Riverina Hwy	MR125 south of Urana
MR299 (Corowa–Riverina Hwy Rd)	Corowa	Riverina Hwy
MR86 (Corowa–Riverina Hwy Rd)	Corowa	Riverina Hwy
MR250 (Edward St, Corowa)	MR86 (Sanger St, Corowa)	MR550 (Deniliquin Rd)
MR550 (Deniliquin Rd)	Corowa	Tocumwal
MR226 (Barooga –Cobram Bridge)	NSW/Vic border	MR550, Barooga
MR551 (To Murray River east of Tocumwal)	Barooga	MR550
MR363 (Cobram–Berrigan Rd)	Barooga	Riverina Hwy south of Berrigan
MR564	Berrigan	Newell Hwy south of Jerilderie
MR280 (Wondalga–Tumblong Rd)	MR85, Wondalga	Hume Hwy north of Tumblong
MR59 (Lockhart–Urana Rd)	Collingullie	Newell Hwy north of Jerilderie
MR356 (ENE of Finley)	MR331	MR323
MR323 (Jerilderie east)	MR131 north of Daysdale	Newell Hwy, Jerilderie
MR543 (The Rock–Coolamon Rd)	Coolamon	The Rock
MR87 (Coolac–Cootamundra Rd)	Hume Hwy, Coolac	Cootamundra
MR235 (Cootamundra–MR84 Rd)	Cootamundra	Stockinbingal
MR385 (Urana–Morundah Rd)	Urana	Newell Hwy, Morundah
MR125 (Albury–Walbundrie–Urana Rd)	Hume Hwy, Lavington	Urana
MR547 (Jindera–Walla Park Rd)	MR125 north of Jindera	MR332 north of Walla Walla
Riverina Hwy	NSW/Vic border at Bethanga Bridge	Finley
MR197 (Merino Vale Dr)	Riverina Hwy, Howlong	NSW/Vic border
Sturt Hwy	Hume Hwy north of Tarcutta	Newell Hwy, Narrandera
MR279 (Tumut–Gundagai Rd)	Snowy Mountains Hwy west of Tumut	Gundagai

Part 3 – 4.6 metre high Shire and Council areas (excluding the Sydney Region) east of the Newell Highway

Shire or Council Area	
Coolah Shire	All roads within Coolah shire

Narromine Shire

All roads within Narromine Shire

ROADS AND TRAFFIC AUTHORITY ROADS ACT 1993

NOTICE UNDER DIVISION 2 OF PART 3 OF THE ROAD TRANSPORT (MASS, LOADING AND ACCESS) REGULATION 1996

I, Ronald David Christie, Chief Executive of the Roads and Traffic Authority, pursuant to Division 2 of Part 3 of the Road Transport (Mass, Loading and Access) Regulations 1996, by this Notice, specify the routes described in the Schedule hereto for the operation of Controlled Access Buses as defined therein, provided the mass and dimension limits specified in Part 3 thereof are complied with.

RD Christie
Chief Executive
Roads and Traffic Authority

SCHEDULE

INTERIM CONTROLLED ACCESS BUS NOTICE

Note: A Controlled Access Bus is a rigid bus that is longer than 12.5 metres but not longer than 14.5 metres. A passenger 'coach' is regarded as a bus.

PART 1 - PRELIMINARY

1.1 Citation

This notice may be cited as the Interim Controlled Access Bus Notice 1998.

1.2 Commencement

This Notice takes effect on 27 November 1998.

1.3 Limitation

This notice remains in force until 31 December 2002 unless it is amended or repealed earlier.

1.4 Application

This Notice applies to a Controlled Access Bus that does not exceed 14.5 metres in length.

1.5 Notes

Notes in the text of this Notice do not form part of this Notice.

PART 2 - ROADS

2.1 Where a Controlled Access Bus may operate

A Controlled Access Bus may travel on any road if it can operate in accordance with the "Route Assessment for 14.5 metre buses", published by the Roads and Traffic Authority.

2.2 Controlled Access Bus may not travel where load limit applies

A Controlled Access Bus may not travel on a road, bridge, causeway or ferry where there is a load limit specified by a sign or notice specified under Section 112 of the Roads Act 1993.

PART 3 - MASS AND DIMENSION LIMITS

3.1 Mass and dimension limits

- (i) A Controlled Access Bus must comply with the applicable mass and dimension limits specified in Schedule 4 to the Road Transport (Vehicle Registration) Regulation 1998, and Schedule 1 to the Road Transport (Mass, Loading and Access) Regulation 1996.
- (ii) The length of a Controlled Access Bus must not be more than 14.5 metres.
- (iii) The rear overhang of a Controlled Access Bus must not exceed 70% of the distance between the centre of the foremost axle and the foremost extremity of the rear overhang, or 4.9 metres, whichever is the shorter length.

PART 4 - GLOSSARY OF TERMS

In this notice:

"controlled access bus" means a bus that is more than 12.5 metres long except a bus that is:

- (a) an articulated vehicle; or
- (b) an articulated bus;

as defined in the Dictionary to the Road Transport (Vehicle Registration) Regulation 1998.

"rear overhang" means the distance between the rear overhang line and the rear of the vehicle.

"rear overhang line" means:

- (a) if there is a single axle at the rear of the vehicle, the centre-line of the axle, or
- (b) if there is an axle group at the rear of the vehicle - the centre of the axle group, determined without regard to the presence of any steerable axle unless all axles in the group are steerable.

Routes suitable for Controlled Access Buses
